Emphasizing speed over frequency can make sense in contexts where everyone is expected to plan around the timetable, including peak-only commute services and very long trips with low demand. In all other contexts, though, it seems to be a common motorist's error. Roads are there all the time, so their speed is the most important fact that distinguishes them. But transit is only there if it's coming soon. If you have a car, you can use a road whenever you want and experience its speed. But transit has to exist when you need it (span), and it needs to be coming soon (frequency). Otherwise, waiting time will wipe out any time savings from a faster service. Unless you're comfortable planning your life around a particular scheduled trip, speed is worthless without frequency, so a transit map that screams about speed and whispers about frequency may simply be planting confusion.

\*commute: 통근

While speed is a primary factor for roads, it becomes (A)\_\_\_\_\_ in public transit unless it is supported by (B)\_\_\_\_\_, because excessive waiting time can negate any advantages of a fast-moving vehicle.

*the right of suffrage belongs to those who, having by habitation and residence identified their interests and feelings with the citizen, are upon the just principles of reciprocity between the governed and governing, entitled to a vote in the choice of the officers of the government, although they may be neither native nor adopted citizens. Aliens had to establish a certain degree of residence, but no more than one would have to do in order to appear on the electoral register after moving from Boston to New York.*

In the United States, the practice of permitting aliens to vote could be seen as compatible with the idea of an exclusionary citizenship, but that is a hard balance to maintain. If the vote, of all rights, is in the hands of noncitizens, why should they not count as citizens, and the entire distinction between resident alien and citizen be abandoned? Indeed, something like this thought probably lay behind the disappearance of alien voting: with universal adult citizen suffrage after 1920, the only way to maintain an exclusionary kind of citizenship was to restrict the vote to citizens and not residents. But no theory of "active" democracy can countenance this distinction: the laws concerning our common life must be made by all those who are taking part in it, and residence is the only convincing test of whether someone is taking part as — is understood almost universally when it comes to questions of which citizens should have a voice in local government.

*This is something Michael Walzer recognized in Spheres of Justice when he observed that "the rule of citizens over non-citizens, of members over strangers, is probably the most common form of tyranny in human history." Walzer has been criticized for arguing from this observation that what he called "communities of character" must be free to decide who joins them from outside, and I think it is fair to say that the position espoused by Joseph Carens, that there should in general be open borders, is now much more popular even among political activists.*

*Beyond the utility of literature—learning from the best that has ever been written by others—it serves as sheer delight, pleasing us in several different and important ways.*

In the escape that reading literature provides through vicarious identification and comparison with other lives, places, and times, we activate our imagination, that uniquely human ability to explore an alternative set of ideas and experiences that are outside our present environment and that may not even be real. As opposed to perception that receives and processes information from the outside world — light, sound, shape — and finds meaning in it — a sunset, a symphony, a house — in imagination, the process is reversed. Translating the words we read into what they signify, we populate an inner world in which imagery is created from the memory. For example, we read "house" and picture a representation of a house from memory. It is our imagination, the complex interweaving of perception and memory that literature activates, releasing a latent creativity that pleases. The writer may provide the blueprint, but the reader builds literature's many rooms, and like any satisfying occupation, literature gratifies our imaginative and creative abilities.

- ② 필수적인 - 엄수
- ③ 효과적인 - 접근성
- ④ 미미한 - 유지
- ⑤ 매우 중요한 - 편리함

2) [정답] ③

- ① 투표권을 시민으로 제한하는 것의 논리적 필연성
- ② 보통 선거권이 거주 외국인을 포함하는 데 실패한 이유
- ④ 1920년: 시민과 거주자 사이의 구분이 사라진 해
- ⑤ 능동적 민주주의: 통치 공직자의 권한을 강화하는 방법

3) [정답] ②

[해설] ② 명사인 'soda can'을 뒤에서 수식하여 그 상태를 설명하는 분사가 필요한 자리이다. 캔이 길거리에서 '발견되는' 수동의 관계이므로 동사원형 find를 과거분사인 found로 고쳐 써야 한다.

6) [정답] ②

[해설] 주어진 문장은 대중교통이 '곧 올 때만' 존재한다는 특성을 언급하며 앞서 제시된 도로의 '항상 존재함'과 대조를 이루고 있다. 도로의 특징을 설명하는 문장 바로 뒤에 위치하여 대중교통과의 차이점을 명확히 하고, 이후 이어지는 자가용과 대중교통의 구체적인 이용 방식에 대한 대조를 자연스럽게 연결하므로 주어진 문장이 들어가기에 가장 적절한 곳은 ②이다.

[해설] 주어진 글에서 문학이 상상력을 활성화한다는 점을 제시한 후, (B)에서 외부 정보를 받아들이는 '지각'과 내면의 이미지를 만드는 '상상'의 차이를 '과정의 역전'이라는 표현으로 대조한다. 이어지는 (A)에서는 그 역전된 과정이 구체적으로 어떻게 일어나는지(기억에서 이미지를 생성)를 "house"라는 단어를 예로 들어 상세히 설명한다. 마지막으로 (C)에서 이러한 지각과 기억의 복합적인 얽힘이 곧 상상력이며, 이것이 독자의 창의적 능력을 만족시킨다는 결론으로 마무리하는 것이 논리적으로 가장 자연스럽다. 따라서 가장 적절한 순서는 ②이다.

## 11) [정답] ③

[해설] 필자는 대기 시간이 길어지면 빠른 대중교통 수단이 제공하는 시간 절약 효과가 사라진다는 점을 지적하며, 특수한 맥락을 제외한 대부분의 상황에서 대중교통 계획 시 속도보다 배차 빈도를 우선시해야 한다고 강조하고 있다. 따라서 필자가 주장하는 바로 가장 적절한 것은 ③이다.

## 12) [정답] ②

[해설] ② why should로 시작하는 의문문에서 why should they not count as citizens, and (why should) the entire distinction. ~ be abandoned?와 같이 조동사 should에 걸리는 병렬구조를 이루어야 한다. 따라서 to be를 동사 원형 형태인 be로 고쳐 써야 한다.

인간의 기억은 감정에 의해 왜곡될 수 있지만 컴퓨터 저장 시스템은 데이터를 완벽하고 정확하게 보존하도록 설계되었다는 기술적 성능 차이를 설명하는 ③은 인간 인지의 본질적 특성(서사와 의미)을 다루는 글의 전체 흐름과 관계가 없다.

## 15) [정답] ④

[해설] 지문의 핵심은 문학이 외부 세계를 단순히 수용하는 '지각'과는 반대로, 읽은 단어를 기억 속의 이미지로 변환하여 내면세계를 채우는 인간만의 고유한 능력을 자극한다는 점이다. 빈칸 뒤에서 설명하는 '지각과 기억의 복합적인 얽힘'이 가리키는 대상이자 글 전체를 관통하는 키워드는 ④ '상상력'이다.

- ① 논리 ② 기억 ③ 지각 ⑤ 관찰
