

1. 다음 글의 주제로 가장 적절한 것은?

Situational ethics is an ethical theory that takes into account the context of a situation or an act when judging whether it is ethical. Supporters of this theory willingly permit casting aside absolute moral standards. In the absence of a universal standard or law, what matters is the outcome or consequences; so, the end justifies the means. Possibly the following contrasting realities can help illustrate the application of situational ethics. In a pickup game of basketball played among friends, everyone is expected to call his or her own fouls or acknowledge knocking the ball out-of-bounds. Caring about one's friends and maybe getting to keep playing with the group leads to these actions. But, once an organized game is played with officials, most athletes will not admit to the same fouls or violations as the end goal of winning is more important than expressing concern for competitors. Situational ethics has been extended by many athletes and coaches to mean trying to get away with as many actions on the field or court as possible to gain competitive advantages.

- ① the application of situational ethics in the context of sports
- ② the negative impacts of situational ethics on deep friendships
- ③ the necessity of universal moral standards in organized matches
- ④ the strict rules of basketball games compared to other sports
- ⑤ the roles of referees in maintaining absolute moral standards

2. 다음 글의 요지로 가장 적절한 것은?

Moral outrage is the psychological tool that motivates people to punish wrongdoers, even at cost or risk to themselves. It is a "commitment device," something that commits people to punishment, even though trying to punish someone can be dangerous. When we witness unjust harm, whether someone committing interpersonal violence or obvious cheating, we have an embodied physical reaction. We get angry, our blood pressure spikes, our heart beats faster; we thirst for retribution. Outrage leads us to ignore the irrationality of risking our own safety to punish someone. In any single situation, there is rarely an immediate personal benefit for meting out punishment, and often there is real risk, because the person you are serving justice against could lash out at you or get revenge in the future. But the powerful feeling of outrage leads us to momentarily forget this unfavorable evaluation and get involved in a situation we would be better off avoiding, and science reveals how this feeling and forgetting is essential for maintaining a cooperative society.

A series of studies has used "public goods games" to reveal the benefits of outrage. In these games, all players start out with some resources(for example, \$20), and they can choose to contribute some or all of their money to the common pool, or just keep all their money for themselves and give nothing. The total common pool, which is all of people's donations combined, is then multiplied (for example, tripled) and redistributed equally among all participants.

* retribution: 징벌, 응징 ** mete out: (벌 등을) 내리다 *** lash out at: ~을 공격[비난]하다

[지문출처: *Outraged : Why We Fight About Morality and Politics and How to Find Common Ground* (Kurt Gray)]

- ① 과거의 진화적 경험이 인간의 현재 도덕적 판단 기준에 절대적인 영향을 미친다.
- ② 도덕적 분노는 개인적 위험을 감수하게 함으로써 협력적 사회를 유지하게 만드는 필수적 기제이다.
- ③ 대인 관계에서 발생하는 폭력과 속임수는 인간의 신체적, 정신적 건강에 부정적인 영향을 미친다.
- ④ 부당한 상황을 목격했을 때 감정적으로 대응하기보다는 즉각적이고 이성적인 판단을 내리는 것이 중요하다.
- ⑤ 타인을 처벌함으로써 얻게 되는 개인적인 이익이 클수록 사람들은 도덕적 분노를 더 강하게 느낀다.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

(Gerald A. LeBlanc)]

The notion that natural is safe can be debunked with little effort. A natural plant derivative, ethanol, is responsible for eighty-eight thousand deaths annually through voluntary consumption.¹ Another natural plant product, tobacco, kills up to 20 percent of its users.² A natural compound has gained cosmetic popularity as a wrinkle remover. Yet this compound, botulinum, is considered by many experts to be the most toxic substance on this planet.³ Clearly, our belief that natural is safe is misleading.

Why do humans have the counterproductive instinct to favor natural products in the absence of knowledge of their benefits or their potential for harm? The answer likely lies in our genes. Our species, through most of its evolutionary history, relied heavily upon experience to judge whether ingestion of something was beneficial (i.e., nutritional or medicinal) versus whether it was dangerous (i.e., poisonous). We evolved the instinct to avoid plants that made us sick and ① avored those that made us well. Treating unknowns with great caution provided a terrific survival advantage. Today, we trust ② what products of nature are safe to consume. But those pills ③ coming off a pharmaceutical production line look nothing like what our instincts tell us is safe to eat. The ingredients remind us of a high school chemistry lab. Yet we are expected ④ to consume them. Thus, we treat them with caution just as our distant ancestors regarded a new plant. When in need of a remedy, we are drawn to derivatives of our food, plant products, ⑤ which we perceive to be safe, and not artificial products of science.

Our wariness of pharmaceuticals is fueled by past industry failures. The drug diethylstilbestrol (DES) was prescribed to pregnant women from about 1940 to 1971 to prevent miscarriage. It did not protect against miscarriage. Rather, daughters born to mothers who took the drug experienced significant elevations in some rare cancers of the reproductive tract. In the same period, the drug thalidomide was prescribed to pregnant women to prevent nausea and other symptoms of morning sickness.

*How do you know a product is a "dietary supplement"? Simple. The law defines dietary supplements, in part, as products that are taken by mouth that contain a "dietary ingredient."*²⁴ *Dietary supplements include vitamins, minerals, herbs or botanicals, and amino acids as well as other substances such as enzymes, organ tissues, metabolites, extracts, or concentrates, used to supplement the diet.*

Dietary supplements are not drugs. A drug is intended to diagnose, cure, mitigate, treat, or prevent disease. Before marketing, drugs must undergo extensive studies of effectiveness, safety, interactions with other substances, and dosing. The FDA gives formal premarket approval to a drug and monitors its safety after the drug is on the market. If a drug is subsequently shown to be dangerous, the FDA can act quickly to have it removed from the market. None of this is true for dietary supplements. The current law gives the FDA only limited authority over supplements. This makes it difficult for the government to remove unsafe supplements from the marketplace. The FDA does not evaluate the safety and effectiveness of supplements before they hit the marketplace. There are some legislators in Congress who want to improve the law by requiring supplement makers to put safer products on the shelves and label products more clearly. The objective is to ensure that consumers can tell the difference between dietary supplements that are safe and those that have potentially serious side effects or drug interactions.

* mitigate: 완화하다

[지문출처: *Discovering Nutrition* (Insel, Don Ross, Kimberley McMahon, Melissa Bernstein)]

Unlike drugs, which go through ___(A)___ review processes before reaching the market, dietary supplements face minimal FDA oversight, prompting legislators to seek ways to ___(B)___ consumer protection.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Literature is not a _____ carrier of bits of information. Literature (rather than practical reading) invites us repeatedly to re-experience what it offers and to re-evaluate its interpretations. Literature continues to convey meaning and importance over time, and, most strikingly, to shift its meaning according to our viewpoint. We have all had the experience of reading a classic piece of literature after a few years and finding in it finer points and significance we overlooked the initial (or fifth) time through. What has changed is not the piece of literature itself but our life events that are now reflected in the written word. One's view of Shakespeare's majestic drama on aging under existential threat, *King Lear*, is a unique experience read in one's twenties than it is in one's seventies. This is true because reading literature, rather than practical reading, requires complete reader participation, activating not just our data handling abilities but our scrutiny, imagination, and feelings. These change over time in every individual, and those changes illustrate how pieces of literature are more vibrant than practical reading.

- ④ The Declining Significance of Classic Literature Today
- ⑤ How Repeated Reading Gradually Weakens Our Imagination

정답 및 해설

1) [정답] ①

[해설] 상황 윤리는 행위의 맥락을 고려하여 윤리성을 판단하는 이론으로, 보편적 기준 없이 결과가 중요하다라는 점을 설명하고 있다. 이를 친구들 간의 비공식 농구 경기와 심판이 있는 공식 경기라는 대조적 상황을 통해 예시하며, 많은 선수와 코치가 경쟁적 이점을 얻기 위해 상황 윤리를 확장 적용한다는 내용의 글이다. 따라서 글의 주제로 가장 적절한 것은 ① '스포츠 맥락에서의 상황 윤리의 적용'이다. ② 상황 윤리가 깊은 우정에 미치는 부정적 영향 ③ 공식 경기에서 보편적 도덕 기준의 필요성 ④ 다른 스포츠에 비해 농구 경기의 엄격한 규칙 ⑤ 절대적 도덕 기준 유지에서 심판의 역할

2) [정답] ②

[해설] 도덕적 분노는 부당한 행위를 목격했을 때 신체적 반응을 일으키며, 처벌에 따르는 개인적 위험을 무시하게 만드는 심리적 도구라는 점을 설명하고 있다. 개별 상황에서는 처벌에 따른 즉각적 이익이 거의 없고 오히려 위험이 따르지만, 분노의 강력한 감정이 이러한 불리한 평가를 일시적으로 잊게 하여 협력적 사회를 유지하는 데 필수적이라는 내용의 글이다. 따라서 글의 요지로 가장 적절한 것은 ②이다.

3) [정답] ②

[해설] trust 뒤에 '천연 제품이 섭취하기에 안전하다'는 완전한 절이 이어지고 있으므로, 불완전한 절을 이끄는 관계대명사 what이 아니라 명사절을 이끄는 접속사 that이 와야 한다. 따라서 what을 that으로 고쳐 써야 한다.

4) [정답] ②

[해설] 약물은 시판 전에 효과, 안전성 등에 대한 철저한(thorough) 검토 과정을 거치지만, 건강보조식품은 FDA의 감독이 최소한에 그치므로 의원들이 소비자 보호를 강화(strengthen)할 방안을 모색하고 있다는 내용의 글이다. 따라서 요약문의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은 ② 'thorough - strengthen'이다. ① 간소화된 - 제거하다 ③ 비공식적인 - 약화하다 ④ 철저한 - 우회하다 ⑤ 간소화된 - 확대하다

5) [정답] ②

[해설] 문학은 시간이 지나면서도 계속 의미를 전달하고 독자의 관점에 따라 의미가 변화하며, 독자의 삶의 경험이 바뀔에 따라 같은 작품에서 새로운 의미를 발견하게 된다는 내용의 글이다. 따라서

문학은 단편적인 정보를 잠깐 전달하는 수단이 아니라 맥락에서 빈칸에 들어갈 말로 가장 적절한 것은 ② 'temporary(일시적인)'이다. ① 중립적인 ③ 실용적인 ④ 영구적인 ⑤ 수동적인

6) [정답] ④

[해설] 주어진 문장은 친구에 대한 배려와 계속 함께 경기하고 싶은 마음이 이러한 행동으로 이어진다는 내용이므로, 앞에는 '이러한 행동(these actions)'이 가리키는 구체적 행동, 즉 친구들 간 비공식 경기에서 스스로 파울을 인정하거나 공이 아웃된 것을 시인하는 내용이 와야 하고, 뒤에는 이와 대조적으로 공식 경기에서는 같은 행동을 하지 않는다는 내용이 이어져야 한다. 따라서 주어진 문장이 들어가기에 가장 적절한 곳은 ④이다.

7) [정답] ④

[해설] 도덕적 분노가 부당한 행위에 대해 개인적 위험을 감수하면서까지 처벌하게 만드는 심리적 기제이며, 이것이 협력적 사회를 유지하는 데 필수적이라는 내용의 글이다. 현대 법률 체계가 잘못을 저지른 자를 객관적으로 처리하도록 설계되어 있어 개인이 응징을 추구할 필요성을 최소화한다는 내용의 ④는 글의 전체 흐름과 관계가 없다.

8) [정답] ④

[해설] 인류는 진화 과정에서 경험에 의존하여 섭취물의 안전성을 판단하는 본능을 발달시켰는데, 제약 생산 라인에서 나오는 알약은 본능적으로 안전하다고 느끼는 음식과 전혀 다르게 보인다는 맥락에서, 밀줄 친 부분은 약의 성분이 매우 인공적이고 자연적 본능에 낯설게 느껴진다는 의미이다. 따라서 밀줄 친 부분이 글에서 의미하는 바로 가장 적절한 것은 ④ '매우 인공적이고 자연적 본능에 낯선 인상을 준다'이다. ① 천연 식물 치료제보다 제약 생산 라인을 신뢰하게 한다 ② 고등학교에서의 과거 교육 경험에 대한 향수를 불러일으킨다 ③ 과학적으로 제조된 제품이 섭취하기에 완전히 안전하다는 것을 입증한다 ⑤ 알약의 효능을 이해하기 위해 영양 화학을 배울 것을 요구한다

9) [정답] ③

[해설] 약물은 시판 전에 효과, 안전성, 상호작용, 용량에 대한 광범위한 연구를 거치고 FDA의 공식 사전 승인을 받지만, 건강보조식품은 이러한 절차가 적용되지 않으며 FDA의 권한도 제한적이라는 점을 설명하고 있다. 이에 일부 의원들이 건강보조식품 제조업체에 더 안전한 제품을 출시하고 라벨을 명확히 표기하도록 요구하는 법 개선을 추진하고 있다는 내용의 글이다. 따라서 필자가 주장하는 바로 가장 적절한 것은 ③이다.

10) [정답] ④

[해설] 글에서 달라진 것은 문학 작품 자체가 아니라 현재 글에 반영되는 우리의 삶의 경험(What has changed is not the piece of literature itself but our life events)이라고 했으므로, 달라진 것이 문학 작품 자체라는 ④는 글의 내용과 일치하지 않는다.

11) [정답] ③

[해설] 친구들 간의 비공식 농구 경기에서는 스스로 파울을 인정하지만, 심판이 있는 공식 경기에서는 대부분의 선수가 같은 파울이나 위반을 인정하지 않는다는 대조적 상황을 통해 상황 윤리를 설명하고 있으므로, 빈칸에는 공식 경기에서 선수들이 파울을 인정하지 않는 이유가 들어가야 한다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ③ '승리라는 궁극적 목표가 경쟁자에 대한 배려를 표현하는 것보다 더 중요하기 때문에'이다. ① 강한 우정을 쌓는 것이 단순히 이기는 것보다 훨씬 가치 있다고 여겨지기 때문에 ② 보편적 도덕법이 모든 공식 스포츠 경기에 엄격히 적용되어야 하기 때문에 ④ 심판의 존재가 선수들에게 자신의 파울에 대해 더 책임감을 느끼게 하기 때문에 ⑤ 실수를 인정하는 것이 진정한 경쟁적 이점을 얻는 유일한 방법이기 때문에

12) [정답] ⑤

[해설] 도덕적 분노는 부당한 행위를 목격했을 때 강한 신체적·감정적 반응을 일으켜 처벌에 따르는 잠재적 위험을 간과(overlook)하게 만들며, 이것이 역설적으로 사회적 협력을 유지(sustaining)하는 데 핵심적인 역할을 한다는 내용의 글이다. 따라서 요약문의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은 ⑤ 'overlook - sustaining'이다. ① 분석하다 - 유지하기 ② 계산하다 - 방해하기 ③ 무시하다 - 저해하기 ④ 과장하다 - 촉진하기

13) [정답] ③

[해설] 인간이 왜 천연 제품을 선호하는 역효과적 본능을 가지는지 그 답이 유전자에 있다는 주어진 글 다음에는, 인류가 진화 역사를 통해 경험에 의존하여 섭취물의 이로움과 위험을 판단했고 아프게 하는 식물을 피하고 좋게 하는 식물을 선호하는 본능을 발달시켰다는 내용의 (B)가 이어져야 한다. (B) 다음에는 미지의 것을 조심하는 것이 생존에 유리했고, 오늘날 천연물은 신뢰하지만 제약 생산 라인의 알약은 본능적으로 안전하다고 느끼는 것과 전혀 다르게 보인다는 내용의 (C)가 오고, 이어서 그 성분들이 고등학교 화학 실험실을 떠올리게 하여 조심하게 되며, 치료가 필요할 때 인공적 산물이 아닌 식물 파생물에 끌린다는

내용의 (A)가 이어져야 한다. 따라서 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은 ③이다.

14) [정답] ④

[해설] require는 목적격 보어로 to부정사를 취하는 동사이므로 'require + 목적어 + to부정사'의 어순이 되어야 한다. 따라서 putting을 to put으로 고쳐 써야 한다.

15) [정답] ①

[해설] 문학은 일시적인 정보 전달 수단이 아니라 시간이 지나면서 독자의 관점에 따라 의미가 변화하며, 독자의 정밀한 검토, 상상력, 감정을 활성화하는 완전한 참여를 요구한다는 내용의 글이다. 독자의 삶의 경험이 변함에 따라 같은 작품에서 새로운 의미를 발견하게 되어 문학이 실용적 읽기보다 더 생동감 있다는 점을 강조하고 있다. 따라서 글의 제목으로 가장 적절한 것은 ① '문학: 독자와 함께 성장하는 살아 있는 거울'이다. ② 왜 실용적 읽기가 교육에서 문학을 능가하는가 ③ 리어왕: 노화를 이해하기 위한 시대를 초월한 안내서 ④ 오늘날 고전 문학의 쇠퇴하는 중요성 ⑤ 반복적인 읽기가 어떻게 점차 우리의 상상력을 약화시키는가
