Giving clients sufficient opportunity to react to your designs while in progress is a key to professional success. Similarly, involving prospective building users as well as clients is even more valuable in the long run. Say your client is a large corporation, such as a health care provider. While the hospital administration may serve as your client, no doubt the perspectives of administration personnel will differ significantly from those of doctors, interns, residents, nurses, and other medical staff who use the building regularly. In addition, the experiences of patients and visitors who use the building irregularly, often as a result of life-threatening emergencies, are altogether different as well. Understanding how each type of user experiences the current medical environment as well as how each reacts to your prospective designs inevitably produces a better building. People are likely to be more satisfied with a new building or addition if they have been consulted in the design process. For a large institution, this can translate into increased productivity on the job, reduced absenteeism, less turnover, and lower costs.

- ① 대규모 의료 기관의 건축 설계 시 행정 관리자의 의견을 최우선으로 반영해야 한다.
- ② 건축물의 완성도를 높이기 위해 설계 진행 과정에서 다양한 사용자를 참여시켜야 한다.
- ③ 응급 환자와 방문객의 편의를 위해 병원 내 동선은 단순하고 효율적으로 설계되어야 한다.
- ④ 건물 사용자의 만족도는 설계의 기술적 완성도보다 기관의 비용 절감 노력에 의해 결정된다.
- ⑤ 전문적인 건축 설계자의 역량은 복잡한 의료 환경에서 발생하는 갈등을 중재하는 데서 드러난다.

Cognitive processes—association, categorization, analysis, differentiation, integration—are ways of organizing new and existing meanings in memory. Common, social, or communal “shared meaning” emerges either through similar experiences and shared processes and principles or through iterations of interactive communication, especially through language and other symbolic exchanges. Moving from solely personal meanings to shared meanings is a crucial part of the developmental process in human childhood.

Sharing meanings and experiences is not a simple, automatic process: whenever two or more people observe or participate in the same ongoing event they experience it from different perspectives, with different histories, with different background knowledge.

- (A) Yet the baby may make it clear (perhaps by terrified crying) that her perspective is quite different from that of the adult. The two share an experience, but not a meaning.
- (B) When giving a bath, for example, a parent whose experience with water play has been fun, whose knowledge about the source of the water and its disposition provides confidence, and whose body control ensures that the baby is safely held and not in danger, expects the infant to enjoy splashing water.
- (C) These differences are most glaring when the individuals involved include an infant or very young child and an adult, although an adult arranging an event for an infant may find it difficult to keep these differences in mind.

The parent may attempt to manipulate the meaning of the bath experience for the infant, and to set up a sequence of experiential histories that will provide background for the next and subsequent bath experiences. Verbal and gestural expressions (including the embracing hold) convey a meaning that may come to be shared (the bath is fun and safe), but the overall experience itself remains quite different for each, given the different roles that the two play in the

activity.

The assignment of credit and dates for the final formulation of these efforts is an act of retrospective consensus judgment by the community of scientists in the field, mostly based on perceptions of who contributed the most to the final formulation and assigning their names to them, along with dates, as easily-identifiable markers. This verdict it is not always unanimous and sometimes bitterly contested by those who feel their contributions have not been adequately recognized.

A detailed anthropological study of daily scientific practice in the Salk Institute laboratory in La Jolla, California shows how difficult it is to assign credit and dates. ① Bruno Latour describes how scientists arrived at the elucidation of TRF (thyrotropin-releasing factor), a hormone that is secreted by the brain. ② He says that his observations led him to "the conviction that a body of practices widely regarded by outsiders as well organized, logical, and coherent, in fact consists of a disordered array of observations with which scientists struggle to produce order." ③ The final consensus formulation of TRF (i.e., when it became a scientific "fact") emerged some time between January 1968 and January 1970. ④ The 1977 Nobel Prize in Medicine was awarded for the discovery of TRF, despite the ongoing debate regarding its potential side effects on human metabolism. ⑤ Half of the Nobel Prize in Medicine for 1977 for this discovery was shared between the Salk group and another competing group in New Orleans (the other half went to Rosalind Yalow for the techniques she developed that were used in these studies), but each of these two competing groups strongly felt that they deserved sole credit and that the other did not deserve even a share of the award.

But despite these known shortcomings, we still continue (as I will also be guilty of sometimes in this book) to use that misleading shorthand description of scientific discovery in the form of "Scientist X discovered Y on date Z" as long as it serves a pedagogical purpose by providing a concise, convenient, and memorable narrative structure of landmark developments in science. But in doing so, we should always bear in mind that what we are passing on is a myth-story and not an accurate history, let alone a complete one.

Take another example: if an excessively loud music cue is suddenly heard in the midst of a quiet, tender dramatic moment of a play (or film), the intent of the drama will be compromised. When music does encroach on a dramatic or entertainment setting on a stage, it should sound as if it belonged there, it should sound musically right, and it should leave a good impression. It is the music director's obligation to properly assimilate the music, to oversee its quality control, and to connect the material with its listeners.

The idea of music direction, in the sense of someone shaping and leading a musical performance, goes back to the beginnings of music. Even the gamelans of ancient Indonesia had leaders who would ① signal to the group changes of meter and tempo, beginnings and endings, and transitions from piece to piece. Yet listening audiences are ② rarely aware of any musical leadership, and for good aesthetic reason. They need not be aware to fulfill their experience; indeed, the unnecessarily conspicuous ③ absence of a musical leader will detract from it. An audience is better off, for the most part, taking in the whole of a stage work rather than being party to the techniques that go into ④ realizing it. This is not to say that when an orchestra plays alone the audience members' eyes are not ⑤ fixed on the conductor for the majority of the time; they probably are. When music is accompanying something happening on stage, however, all eyes turn to the stage, and so do everyone's ears, too (including the music director's).

The following accounts demonstrate the obscurity and inscrutability of music direction. In 1964, the last Tony Award for Best Conductor and Musical Director was given to Shepard Coleman for his work on the original production of Hello, Dolly! on Broadway. Mr. Coleman died in 1998. His obituary in the New York Times cites his work as a "pit musician for Broadway musicals from 1946 to 1960" and states that his Hello, Dolly! Tony was for his "vocal arrangements" for the show.

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

I am not defending Matt's choice to skip "The Farrier" passage. But I think the story points out the importance that prior knowledge plays when a reader approaches a page. If I teach "The Farrier" in Wyoming, I can hand it to the students and get started immediately, but if I teach this story in Anaheim, as the teacher, I need to frame the text before their reading commences. These kids in Wyoming and in Anaheim might have the same reading abilities, but that doesn't mean they are on equal footing when the reading starts. Kids without prior knowledge are at a disadvantage, regardless of reading ability.

The importance of what a reader brings to the page is highlighted in a study discussed by Hirsch in The Knowledge Deficit. This study consisted of two groups of students who were asked to read a passage about baseball. The first group was made up of strong readers who knew little about baseball. The second group was composed of struggling readers who were knowledgeable about baseball. After reading the passage, students in each group had their comprehension tested. Guess which group scored higher? The struggling readers. Having strong reading skills was not enough for the students who came to the page with a knowledge deficit about the topic. Though the second group of readers were not strong readers, their prior knowledge enabled them to outscore readers with far better abilities. Prior knowledge, or, in the case of the good readers, the lack of prior knowledge, was the x-factor.

I do not know whether this year's state test will have a passage about baseball or farriers, but I do know one thing: those students who sit down to the exam with the broadest base of prior knowledge will have the highest chances of scoring well. If we are serious about building strong readers, we need to be serious about building strong knowledge foundations in our students. With this in mind, we should be mindful of the large wealth of knowledge capital that comes from the voluminous reading of books, newspapers, blogs, and magazines.

* glaring: 두드러진 ** disposition: 성질

[지문출처: *Young Minds in Social Worlds : Experience, Meaning, and Memory* (Katherine Nelson)]

- ① Both occupy the same physical reality while interpreting it through conflicting subjective

lenses.

- ② Background knowledge and past histories are automatically unified through a shared ongoing event.
- ③ The infant eventually accepts the adult's perspective after repetitive exposure to the same event.
- ④ Adults fail to provide sufficient information to infants, leading to a loss of shared experiences.
- ⑤ A parent's confidence in safety is the key to synchronizing the infant's meaning with their own.

[해설] 건축 설계 과정에서 건축주뿐만 아니라 의사, 간호사, 환자, 방문객 등 건물을 실제로 사용하는 다양한 사람들의 의견을 반영하고 그들을 참여시키는 것이 건물의 완성도와 사용자의 만족도를 높이는 길이라는 내용의 글이다. 따라서 글의 요지로 가장 적절한 것은 ②이다. ① 대규모 의료기관 설계 시 행정 관리자의 의견을 최우선으로 해야 한다 ③ 응급 환자와 방문객을 위해 병원 내 동선은 단순해야 한다 ④ 건물 사용자의 만족도는 비용 절감 노력에 의해 결정된다 ⑤ 건축 설계자의 역할은 의료 환경의 갈등 중재에서 드러난다

2) [정답] ⑤

[해설] 공유된 의미 형성이 아동 발달의 중요한 부분이라는 주어진 글 뒤에는, 하지만 아기나 어린아와 성인 사이에서는 이러한 공유가 어렵다는 내용의 (C)가 온다. 이어서 부모가 목록 경험을 긍정적으로 예상하며 아기를 목록시키는 구체적인 예시인 (B)가 오고, 부모의 예상과 달리 겁에 질려 우는 아기의 반응을 통해 서로 경험은 공유하지만 의미는 공유하지 못함을 보여주는 (A)가 연결되는 것이 자연스럽다. 따라서 가장 적절한 순서는 ⑤이다.

3) [정답] ④

[해설] 과학적 발견에 대한 공로와 낱짜를 지정하는 과정의 어려움과 그 이면에 숨겨진 복잡한 합의 과정에 대해 설명하는 글이다. 노벨 생리학·의학상 수상 사실을 언급하면서 인체 대사에 미치는 잠재적 부작용에 대한 논쟁이 지속되고 있다는 내용인 ④는 과학적 발견의 공로 배분이라는 전체 흐름과 관계가 없다.

4) [정답] ③

[해설] 무대 공연에서 음악 감독은 존재하되 관객의 미적 체험을 방해하지 않도록 눈에 띄지 않아야 한다는 맥락의 글이다. 지문에서 음악 지휘자의 불필요하게 눈에 띄는 '존재'가 관객의 경험을 손상시킨다고 해야 흐름이 자연스러우므로, ③의 absence(부재)를 presence(존재)와 같은 단어로 고쳐야 한다. ① 그룹에게 박자와 템포의 변화를 신호 보내다 ② 관객들은 음악적 리더십을 거의 의식하지 못한다 ④ 그것을 실현하는 데 들어가는 기술 ⑤ 관객의 눈이 지휘자에게 고정되다

5) [정답] ①

[해설] 읽기 능력 자체보다 특정 주제에 대한 배경지

식이 독해력에 더 큰 영향을 미친다는 야구 관련 실험 결과를 소개하는 글이다. 따라서 요약문의 빈칸 (A), (B)에는 '친숙함(familiarity) - 기술(technique)'이 들어가는 것이 가장 적절하다. ② 관심 - 창의성 ③ 인내 - 지능 ④ 선호 - 기억 ⑤ 무지 - 경험

6) [정답] ③

[해설] ③ from의 목적어 역할을 하는 명사구에서 비교 대상인 perspectives가 복수형이므로 지시대명사 that을 those로 고쳐 써야 한다.

7) [정답] ①

[해설] 부모는 목록이 즐겁고 안전하다고 생각하지만, 아기는 겁에 질려 우는 상황을 통해 같은 물리적 상황에 처해 있어도 서로의 주관적인 관점에 따라 그 의미를 다르게 해석할 수 있음을 나타낸다. 따라서 밑줄 친 부분이 의미하는 바로 가장 적절한 것은 ① '상충하는 주관적 렌즈를 통해 물리적 현실을 해석하면서 둘 다 같은 물리적 현실을 점유하고 있다'이다. ② 배경지식과 과거 이력은 공유된 사건을 통해 자동으로 통합된다 ③ 반복적인 노출 후에 아기는 결국 성인의 관점을 수용한다 ④ 성인이 아기에게 충분한 정보를 제공하지 못해 공유된 경험을 상실한다 ⑤ 안전에 대한 부모의 확신이 아기의 의미와 자신의 의미를 동기화하는 핵심이다

8) [정답] ②

[해설] 과학적 발견의 공로와 낱짜를 확정하는 과정이 실제로는 매우 무질서하고 논쟁적이며, 단지 교육적 편의를 위해 "누가 언제 무엇을 발견했다"는 식의 단순화된 신화적 이야기를 사용한다는 내용이다. 따라서 글의 주제로 가장 적절한 것은 ② '과학 작업의 무질서한 특성으로 인한 공로 귀속의 긴장'이다. ① 과학적 사실의 타당성 검증에서 객관적인 외부자의 역할 ③ TRF 발견에 대한 1977년 노벨 의학상의 역사적 의미 ④ 과학적 돌파구를 앞당기기 위한 국제적 협력의 필요성 ⑤ 내분비 연구가 새로운 의료 기술 발전에 미치는 영향

9) [정답] ②

[해설] 음악 감독은 무대 공연의 의도에 맞게 음악을 조화시켜야 하며, 특히 관객이 공연에 몰입할 수 있도록 음악 지휘자의 존재가 불필요하게 눈에 띄어서는 안 된다는 내용의 글이다. 따라서 필자가 주장하는 바로 가장 적절한 것은 ②이다. ① 음악 감독은 관객이 구조를 이해하도록 명확한 수신호를 보내야 한다 ③ 관객은 연주의 기술적 측면에 집중해야 한다 ④ 지휘자는 시선 교환을 통해 공감을 이끌어내야 한다 ⑤ 음악 감독은 시각적 연출에 개입해야 한다

10) [정답] ④

[해설] 독자의 배경지식이 독해력과 시험 성적에 결정적인 역할을 한다는 것을 야구 실험 등을 통해 설명하는 글이다. 야구 경기와 같은 규칙적인 신체 활동이 학생의 인지적 집중력을 향상시킨다는 내용의 ④는 배경지식과 독해력의 상관관계라는 글의 흐름과 무관하다.

11) [정답] ③

[해설] 주어진 문장은 건물을 불규칙하게 사용하는 환자
자와 방문객의 경험 또한 (정기적 사용자들과는)
완전히 다르다는 추가적인 내용을 담고 있다. ②
번 뒤에서 병원 행정직원과 의사, 간호사 등 건
물을 '정기적으로' 사용하는 사람들의 관점이 다
르다는 내용이 언급되었으므로, 그 뒤에 '게다가
(In addition)'를 사용하여 비정기적 사용자의 관
점을 추가하는 것이 적절하다. 따라서 주어진 문
장이 들어가기에 가장 적절한 곳은 ③이다.

12) [정답] ③

[해설] 부모는 물놀이가 즐거웠던 경험과 안전에 대한
확신이 있으므로 아기가 물을 튀기며 노는 것을
'즐길(enjoy)' 것이라고 기대하는 문맥이 자연스
럽다. 따라서 ③의 fear를 enjoy와 같은 단어로
고쳐야 한다.

13) [정답] ④

[해설] ④ 해당 문장의 주어는 The final consensus
formulation of TRF이며, 문장의 정동사가 필요
한 자리이다. 따라서 분사 형태인 emerging을
과거동사 emerged로 고쳐 써야 한다.

14) [정답] ①

[해설] 무대 공연에서 음악적 실행을 위해 지휘자가
필요하지만, 관객의 미적 몰입을 방해하지 않으려
면 지휘자의 존재감이 드러나지 않아야 한다는
글이다. 따라서 빈칸 (A), (B)에는 '두드러짐
(prominence) - 미묘한/눈에 띄지 않는(subtle)'
이 적절하다. ② 권위 - 절대적인 ③ 전문 지식
- 눈에 띄는 ④ 부재 - 간접적인 ⑤ 창의성 - 유
연한

15) [정답] ③

[해설] 읽기 기술보다 독자가 가진 배경지식이 텍스트
를 이해하고 시험에서 좋은 성적을 거두는 데 더
중요한 요인(x-factor)임을 강조하는 글이다. 따
라서 글의 제목으로 가장 적절한 것은 ③ '배경지
식: 독해의 숨겨진 열쇠'이다. ① 왜 야구가 우수
한 독자들에게 어려운 주제인가 ② 읽기 기술: 이
해력의 절대적 예측 변수 ④ 어려움을 겪는 학생
들의 읽기 기술을 향상시키는 법 ⑤ 신체 활동과
학습 능력 사이의 상관관계
