We usually think of a clock as a physical thing, like an alarm clock or a wristwatch. But a clock is really a process embodied in a machine, and the nature of that process is repetitive. A clock can be almost any process that repeats itself over and over again for an indefinite period. Water clocks drip at a steady pace; quartz crystals vibrate regularly. Indeed, it is almost impossible to think of a clock that does not depend on a repetitive cycle of events. The only example that comes to mind readily is a candle marked in hours. But here too there is iteration — the repeated burning of molecules of wax — so this too is an iterative process, although at first masked. The use of radiocarbon dating is another, much longer scale clock that also appears to be like this. It seems to yield a smooth time scale but in fact does not: the decay of atoms of carbon-14 is repetitive, although on a large scale it gives the appearance of being continuous.

You are dealing with an audience with a low level of commitment whose members are used to browsing rather than following linear pathways. And this is without factoring in the constant threat of the clicking finger—the finger that can take your reader to eBay or Amazon or anywhere else they care to roam with no more energy than tapping a screen or a mouse button requires. In terms of grabbing and keeping the attention of your readers, this environment is as competitive as it gets.

In academia, you are taught to write up your results thus: "I came up with a hypothesis, then I did this experiment, and then I did another experiment, then I tested my ideas some more, and so on until [dramatic fanfare] ta-da! I proved this." If you wrote this way online, very few of your readers would make it to your dramatic conclusion, no matter how exciting or groundbreaking it was. Online, we don't have the patience to wait for your big reveal at the end. Instead, you need to tell us up front : "I proved this! And here's how I know it..." Your readership may still dwindle and trail off over the course of your writing, but at least the vast majority know what it is you've achieved from the very beginning. A few more of them may stay along for the ride if the opening line — the "hook," in journalistic terms — is particularly interesting. If you grab their attention early, you can more likely convince more readers to stay for the whole story.

The human perceptual system is designed to recognize objects under changing illuminations, situations, and contexts. It is extraordinarily adapted to a constantly changing world. To deal with this uncertainty, the brain uses not one, but multiple routes. If one is blocked, it takes another route. This immense _____ of the brain to rely on changing cues, according to whatever is available, is known as vicarious functioning. It can be found in most biological systems. For instance, migrating birds fly thousands of miles and may rely on the stars to navigate. But if it's a cloudy day, they may instead rely on landmarks or their magnetic sense. Similarly, the brain can recognize a face by the shape of the eyes, nose, and mouth. In extreme cases, only a few lines are sufficient, as when we recognize the face of a celebrity in caricatures made with just a few pencil strokes. Face recognition also functions even when parts of a face are covered and internal features such as eyes are hardly visible. In this case, the brain relies on external features such as hair and head shape.

Consider the image of former US president Bill Clinton and his vice president Al Gore (figure 5.1). How do we recognize Gore on the left and Clinton on the right? Is it Clinton's characteristic nose and mouth? Not at all. In the picture, Clinton and Gore have exactly the same nose, mouth and eyes. Their entire faces are identical after digital manipulation.¹⁸ Nevertheless, we perceive them as being different. The only real difference lies in the hair and head shape.

- ③ 준거 집단은 규범, 비교, 연합 효과를 통해 개인의 자아 평가에 영향을 준다.
- ④ 뛰어난 집단에 소속되는 것은 항상 부정적인 자기 평가로 이어진다.
- ⑤ 타인과의 비교를 자제함으로써 긍정적인 자아 정체성을 확립해야 한다.

6. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

In music, proximity may refer to elements' being close together in pitch, time, or space. For example, notes that are similar in pitch may be grouped together. Notes are also grouped together if they are played together in time or if they come from the same instrument or section of a larger musical group. To get a sense of the idea of proximity, imagine a person playing a piano. Typically, the right hand plays notes that are higher in pitch than the left hand. Also, most often, it is the right hand that plays the melody, whereas the left hand plays the bass line or accompaniment. Even though all of the notes are played in close spatial proximity and at approximately the same time, we hear the notes from the right hand emerging as melody because they are _____. Similarly, in some of Bach's famous solo music for violin, the violinist essentially creates two streams of music by simultaneously playing both high and lower notes. Perceptually, we group the high notes together and group the low notes together, so we hear it as polyphonic or as two lines of music.

* polyphonic: 다성 음악의(한 번에 많은 음을 내는)

[지문출처: Sensation and Perception (E. Bruce Goldstein)]

- ① intended to be played by different instruments simultaneously
- ② separated by the physical distance of the performer's hands
- ③ organized by the volume and intensity of each specific note
- ④ grouped together with respect to pitch
- ⑤ perceived as a single rhythm despite the different keys

7. 다음 글의 내용을 한 문장으로 요약하고자 한다.
빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

But, more often than not, because removing pollution from water is likely to be an expensive process, and I know that I am not able to charge others for this benefit, I will probably not be willing or able to invest in reducing lake pollution. As other individuals using the lake will probably reach the same conclusion as I have, the pollution cleanup will not occur. Or, to use the language of economics, water quality improvement will be undersupplied, if left to individuals to make such an improvement.

Public goods are undervalued in markets, which exist for private goods but rarely for public goods. For example, aquatic habitats such as wetlands provide diverse benefits that are often public goods, including breeding or refuge for unique species, recreation, hunting and tourism, or purification of water supplies. These benefits are enjoyed simultaneously by many people and are provided to them for "free" by the natural functioning of the wetlands. As a result, there is no "market" and thus no "price" for these public good uses of wetlands. But the actual value of these services is not zero. Because many people benefit from these services, their value is the total additional benefits of all individuals who enjoy provision of these services by wetlands. This value could be huge, even though there is no apparent "market price" for these wetland services. This gap between the (zero) price for wetland services and their actual value to all beneficiaries indicates how much these public goods are undervalued in markets.

Finally, individuals who do not use a water resource for irrigation, recreation or drinking supplies may still additionally benefit if the resource is not degraded or depleted. These individuals may still value the resource, even though they may never use, visit or even see it, simply because they value its existence or they believe the resource should be available for use by future generations. Such non-use values also have no "market" or "price," yet they can be significant especially

20. 다음 글의 주제로 가장 적절한 것은?

In music, proximity may refer to elements' being close together in pitch, time, or space. For example, notes that are similar in pitch may be grouped together. Notes are also grouped together if they are played together in time or if they come from the same instrument or section of a larger musical group. To get a sense of the idea of proximity, imagine a person playing a piano. Typically, the right hand plays notes that are higher in pitch than the left hand. Also, most often, it is the right hand that plays the melody, whereas the left hand plays the bass line or accompaniment. Even though all of the notes are played in close spatial proximity and at approximately the same time, we hear the notes from the right hand emerging as melody because they are grouped together with respect to pitch. Similarly, in some of Bach's famous solo music for violin, the violinist essentially creates two streams of music by simultaneously playing both high and lower notes. Perceptually, we group the high notes together and group the low notes together, so we hear it as polyphonic or as two lines of music.

* polyphonic: 다성 음악의(한 번에 많은 음을 내는)

[지문출처: Sensation and Perception (E. Bruce Goldstein)]

- ① the role of proximity in musical perception and grouping
- ② the technical difficulty of playing polyphonic violin music
- ③ historical changes in the arrangement of orchestra sections
- ④ the physical limitations of hands in piano performance
- ⑤ the relationship between instrument quality and sound grouping

21. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

This value could be huge, even though there is no apparent "market price" for these wetland services.

But, more often than not, because removing pollution from water is likely to be an expensive process, and I know that I am not able to charge others for this benefit, I will probably not be willing or able to invest in reducing lake pollution. As other individuals using the lake will probably reach the same conclusion as I have, the pollution cleanup will not occur. Or, to use the language of economics, water quality improvement will be undersupplied, if left to individuals to make such an improvement.

Public goods are undervalued in markets, which exist for private goods but rarely for public goods. (①) For example, aquatic habitats such as wetlands provide diverse benefits that are often public goods, including breeding or refuge for unique species, recreation, hunting and tourism, or purification of water supplies. (②) These benefits are enjoyed simultaneously by many people and are provided to them for "free" by the natural functioning of the wetlands. (③) As a result, there is no "market" and thus no "price" for these public good uses of wetlands. But the actual value of these services is not zero. (④) Because many people benefit from these services, their value is the total additional benefits of all individuals who enjoy provision of these services by wetlands. (⑤) This gap between the (zero) price for wetland services and their actual value to all beneficiaries indicates how much these public goods are undervalued in markets.

Finally, individuals who do not use a water resource for irrigation, recreation or drinking supplies may still additionally benefit if the resource is not degraded or depleted. These individuals may still value the resource, even though they may never use, visit or even see it, simply because they value its existence or they believe the resource should be available for use by future generations. Such non-use values also have no "market" or "price," yet they can be significant especially

* aquatic: 수생의 ** refuge: 피난처 *** beneficiary: 수혜자

정답 및 해설

1) [정답] ②

[해설] 시계는 물리적인 물체라기보다 반복적인 과정 그 자체이며, 물시계, 수정 결정, 양초, 방사성 탄소 연대 측정에 이르기까지 모든 시계의 본질은 반복되는 사이클에 의존한다는 내용의 글이다. 따라서 글의 제목으로 가장 적절한 것은 ② '보이지 않는 리듬: 반복적인 과정으로서의 시간 측정'이다. ① 시계: 인간의 삶을 통제하기 위한 기계적 발명품 ③ 현대의 시계가 물보다 수정 결정을 선호하는 이유 ④ 방사성 탄소 연대 측정: 과거를 측정하는 가장 정확한 방법 ⑤ 시계의 진화: 밀랍 양초에서 디지털 화면까지

2) [정답] ③

[해설] 온라인 독자들은 인쇄심이 부족하고 쉽게 다른 사이트로 떠날 수 있으므로, 학술적인 글쓰기처럼 결론을 마지막에 제시하는 대신 핵심 결론을 글의 서두(up front)에 배치하여 독자의 주의를 즉시 끌어야 한다는 내용의 글이다. 따라서 필자가 주장하는 바로 가장 적절한 것은 ③이다.

3) [정답] ②

[해설] 인간의 시각 체계는 불확실한 환경에 대응하기 위해 하나의 경로가 막히면 다른 경로를 사용하는 능력을 갖추고 있는데, 이를 '대리 기능'이라 부른다. 이는 상황에 따라 가용한 단서에 의존하는 뇌의 엄청난 유연성을 보여준다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ② '유연성'이다. ① 경직성 ③ 복잡성 ④ 불안정성 ⑤ 정확성

4) [정답] ④

[해설] 주어진 문장은 이집트와 수단 이 서로 유리한 Hala'ib 지역을 차지하기 위해 각자 유리한 국경선(1899년 선과 1902년 선)을 주장한다는 내용을 담고 있다. 이 문장은 두 선의 교차로 인해 Hala'ib Triangle과 Bir Tawil이라는 두 지역이 형성되었다는 내용(③번 뒤)과 그 결과 두 나라가 Bir Tawil의 소유권을 거부하게 되었다는 내용(④번 뒤) 사이에 들어가는 것이 흐름상 가장 자연스럽다.

5) [정답] ③

[해설] 준거 집단은 개인이 자신을 평가하는 기준이 되며, 집단의 규범을 모방하는 규범적 효과뿐만 아니라, 타인과 자신을 비교하는 비교 효과, 그리고 뛰어난 집단과 자신을 연결 지어 자부심을 느끼는 연합 효과를 통해 자아 평가에 영향을 미친다는 내용의 글이다. 따라서 글의 요지로 가장 적절한 것은 ③이다.

6) [정답] ④

[해설] 피아노 연주 시 오른손과 왼손이 동시에 연주 되더라도 우리가 오른손의 음들을 멜로디로 인식하는 이유는 그 음들이 유사한 높낮이(pitch)를 가지고 있어 하나의 그룹으로 묶이기 때문이다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ④ '음높이에 관해 함께 그룹화되기'이다. ① 다른 악기들에 의해 동시에 연주되도록 의도되기 ② 연주자 손의 물리적 거리에 의해 분리되기 ③ 각 특정 음의 음량과 강도에 의해 조직되기 ⑤ 다른 건반에도 불구하고 단일한 리듬으로 지각되기

7) [정답] ②

[해설] 습지 서비스와 같은 공공재는 많은 사람에게 큰 혜택을 주지만, 시장에서 거래되는 사유재와 달리 명시적인 가격이 형성되지 않아 실제 가치보다 낮게 평가되는 경향이 있다는 내용의 글이다. 따라서 요약문의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은 ② '명시적인 가격 - 과소 평가되는'이다. ① 금전적 비용 - 우선시되는 ③ 법적 보호 - 무시되는 ④ 경쟁적 특성 - 표준화되는 ⑤ 사회적 합의 - 과대평가되는

8) [정답] ⑤

[해설] 글의 마지막 부분에서 탄소-14 원자의 붕괴는 실제로는 반복적(반연속적)이지만, 큰 규모로 볼 때는 부드럽고 '연속적인' 것처럼 보인다고 설명하고 있다. 따라서 '별개의, 불연속적인'을 뜻하는 discrete는 문맥상 '연속적인'을 뜻하는 continuous로 고쳐야 하므로 ⑤가 적절하지 않다.

9) [정답] ③

[해설] ③번 뒤의 구조를 보면 'you've achieved'의 목적어가 빠진 불완전한 절이 이어지고 있으며, 앞에 선행사가 없으므로 접속사 that이 아닌 선행사를 포함한 관계대명사 what이 와야 한다. 따라서 that을 what으로 고쳐 써야 한다.

10) [정답] ①

[해설] 인간의 뇌가 불확실한 환경에서 다양한 감각 단서(별, 지형지물, 얼굴의 내부/외부 특징 등)를 활용하여 사물을 인식하고 적응하는 유연한 메커니즘(대리 기능)에 대해 설명하는 글이다. 따라서 글의 주제로 가장 적절한 것은 ① '다양한 감각 단서를 통해 적응하는 뇌의 메커니즘'이다. ② 정확한 인식을 위한 일관된 환경의 중요성 ③ 얼굴 식별에 있어서 인간 시각 체계의 한계 ④ 새들의 이동 패턴과 항법에 대한 진화론적 이유 ⑤ 기억에 있어서 얼굴의 내부 및 외부 특징의 차이

11) [정답] ④

[해설] 지문에서 수단은 Hala'ib 지역을 소유하기 위

해 '업데이트된 1902년의 선(the updated 1902 line)'을 주장한다고 명시되어 있으므로, 1899년의 국경선을 주장한다는 ④는 글의 내용과 일치하지 않는다.

12) [정답] ③

[해설] ③번이 속한 문장에서 'you'는 are likely to에 걸리는 두 개의 동사구 share that norm과 (are likely to) have high self-esteem을 병렬로 연결해야 한다. 따라서 주어가 you이므로 has를 have로 고쳐 써야 한다.

13) [정답] ③

[해설] 바흐의 바이올린 곡에서 연주자가 높은 음과 낮은 음을 동시에 연주할 때, 우리 뇌는 음높이의 근접성에 따라 높은 음들끼리, 낮은 음들끼리 그룹화하여 이를 두 개의 독립된 선으로 지각한다는 의미이다. 따라서 밑줄 친 부분이 의미하는 바로 가장 적절한 것은 ③ '음높이의 근접성 때문에 서로 다른 멜로디가 개별적으로 지각된다'이다. ① 연주자가 더 풍부한 음질을 내기 위해 여러 악기를 사용한다 ② 관객이 바이올린 연주자 손의 물리적 움직임에 집중한다 ④ 높고 낮은 음들이 하나의 구별 불가능한 화음으로 섞인다 ⑤ 청취자가 음악을 단순한 한 줄의 음의 배열로 인식한다

14) [정답] ①

[해설] 습지가 제공하는 정수, 수생 생물 서식지 제공 등의 공공재적 서비스는 시장 가격이 형성되어 있지 않아 실제 가치보다 시장에서 과소평가되고 있다는 것이 글의 핵심 내용이다. 따라서 글의 요지로 가장 적절한 것은 ①이다.

15) [정답] ②

[해설] 글의 전체 내용은 시계의 본질이 '반복성'에 있다는 점을 강조하고 있다. 따라서 시계란 반복적인 사건의 사이클에 의존하지 않는 것을 생각하기란 거의 불가능하다는 맥락이 되어야 하므로, 빈칸에 들어갈 말로 가장 적절한 것은 ② '반복되는 사건의 순서에 의존하지 않는'이다. ① 물리적 환경과 상관없이 기능하는 ③ 복잡한 기계적 부품으로 구성된 ④ 완벽하게 선형적이고 끊기지 않는 척도를 제공하는 ⑤ 가시적이거나 유형적인 방식으로 시간을 측정하지 못하는

16) [정답] ②

[해설] 발견의 시간적 순서를 따르는 학술적(academic) 글쓰기와 달리, 온라인 글쓰기는 독자의 관심을 유지하기 위해 결론부터 말하는 직접적인(direct) 접근 방식이 필요하다는 내용이다. 따라서 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은 ②이다. ① 전문적인 - 감정적인 ③ 과학적인 - 묘사적인 ④ 전통적인 - 역사적인 ⑤

저널리즘적인 - 포괄적인

17) [정답] ④

[해설] 지문에서 얼굴 인식은 얼굴의 일부가 가려지거나 눈과 같은 내부 특징이 거의 보이지 않을 때도 머리카락이나 머리 모양 같은 외부 특징에 의존하여 작동한다고 설명하고 있으므로, 작동이 불가능하다는 ④는 글의 내용과 일치하지 않는다.

18) [정답] ③

[해설] 영국은 1899년 위도에 근거한 직선의 기하학적 경계를 설정했으나, 이것이 현지 부족의 생활권을 침해하자 1902년 부족들의 영역을 반영한 새로운 문화적 경계를 다시 그었다. '두 교차하는 선의 결합'이 지문의 맥락에서 의미하는 바는 직선으로 대변되는 인위적 경계와 부족의 영역을 반영한 실질적 경계가 중첩되며 발생한 지정학적 상황을 고려해야 한다. 따라서 가장 적절한 것은 ③ '기하학적 경계와 문화적·부족적 경계의 공존'이다. ① 이집트와 수단이 공유하는 정치적 이해관계의 결합 ② 토착 부족들을 빈 사막으로 이주시킨다는 역사적 합의 ④ 영국 식민 지배하에 있던 서로 다른 두 국가의 공식적인 합병 ⑤ 영국 제국에 맞서기 위한 현지 공동체 간의 전략적 동맹

19) [정답] ③

[해설] 준거 집단인 학급 친구들의 학업 성취도가 뛰어난 경우, 자신과 그들을 비교하게 되면 자신의 학업 성적이 기준에 미치지 못한다고 느껴 '부정적인(negative)' 자기 평가를 하게 된다는 흐름이 적절하다. 따라서 ③의 positive를 negative로 고쳐야 한다.

20) [정답] ①

[해설] 음악에서 음높이, 시간, 공간상의 근접성 원리가 어떻게 작용하여 우리가 여러 음들을 선율이나 독립된 음악적 선으로 그룹화하여 인식하게 만드는지에 대해 설명하는 글이다. 따라서 글의 주제로 가장 적절한 것은 ① '음악적 지각과 그룹화에서 근접성의 역할'이다. ② 다성 바이올린 음악 연주의 기술적 어려움 ③ 오케스트라 섹션 배치의 역사적 변화 ④ 피아노 연주 시 손의 물리적 한계 ⑤ 악기의 품질과 소리 그룹화 사이의 관계

21) [정답] ⑤

[해설] 주어진 문장은 습지 서비스의 가치가 거대할 수 있다는 내용을 담고 있다. 이 내용은 바로 앞 문장에서 언급된 '많은 사람이 이 서비스로부터 혜택을 받기 때문에 그 가치는 모든 개인의 추가적 이익의 합계이다'라는 설명에 대한 부연이며, 뒤에 이어지는 '이러한 (0원인) 가격과 실제 가치 사이의 격차'라는 내용과 논리적으로 연결된다.

따라서 ⑤번 위치가 가장 적절하다.

|
