2. 밑줄 친 the unseen wall around Owen seemed to melt away가 다음 글에서 의미하는 바로 가장 적절한 것은?

Looking around the loud cafeteria, Owen gripped his tray firmly. He felt the huge pressure of being new to the high school. Not knowing how the afternoon would go made him feel nervous. He sat with a deep sigh at a corner table. He thought, 'Can I make it through the rest of the classes?' Just then, a plastic tray was placed down opposite him. It was a classmate from his math class. "Hi, is this seat taken? By the way, thanks for lending me that pen before." The unseen wall around Owen seemed to melt away. "Not at all, please sit," he replied. Starting to feel at ease, he smiled warmly at the guy.

- ① Owen began to feel a sense of belonging and psychological comfort.
- ② Owen's physical barriers in the cafeteria were removed by a classmate.
- ③ Owen decided to ignore the pressure of his math classes and social life.
- ④ Owen felt more burdened by the sudden interaction with a stranger.
- ⑤ The noisy environment of the cafeteria became quiet and peaceful.

3. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

When moving into a new situation, many people decide that they need to master what's new. To this end, they reduce their connections to people or activities that might distract them from their goal. But that is a mistake. Being too focused can lead to becoming unidimensional—you have few remedies to the microstresses that are inevitably bombarding you at that time. So when things are tough during such a transition, you have almost nothing else in your life to counterbalance the stress. Instead of staying laser-focused, use this transition as the jumping-off point for building new networks to shape the work you want to do and whom you want to do it with. *And use these transitions as times to reflect on the kinds of people you want to be part of your life outside work. Be intentional in building and revitalizing your circle of nonwork friends.*

[지문출처: *The Microstress Effect: How Little Things Pile Up and Create Big Problems--and What to Do about It* (Rob Cross, Karen Dillon)]

While individuals tend to (A)_____ their social ties to adapt to a new environment, such a narrow focus can increase their (B)_____ to stress, highlighting the necessity of maintaining diverse networks.

4. 다음 글의 요지로 가장 적절한 것은?

A first step toward establishing a respectful classroom learning community is acceptance of all ideas and answers—regardless of any obvious errors. Rich mathematical discussions cannot occur if this expectation is not in place. We must remember that wrong answers are often rooted in misconceptions, and unless these ideas are allowed to be brought to the forefront, we cannot help students confront their thinking. Students who are in safe learning environments are willing to risk sharing an incorrect answer with their peers in order to grow mathematically. It is important to model and expect the acceptance of all ideas without derogatory comments. As educators we can model this by recording all answers to be considered without giving any verbal or physical expressions that indicate agreement or disagreement with any answer. The teacher may need to practice having a "blank face." Students look to teachers as the source of correct answers. Part of building a safe learning community is to shift this source of knowledge to the students by equipping them to defend the thinking behind their solutions.

If there is a large range of incorrect answers, it would be appropriate to have students discuss which answers are reasonable and which answers could be ruled out based on logic and number sense. This provides an excellent opportunity for students to estimate and further consider the relationships between the numbers.

* derogatory: 비하하는

[지문출처: *Number Talks: Helping Children Build Mental Math and Computation Strategies, Grades K-5* (Sherry Parrish)]

5. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Wider platforms than these minimums are found in practice, especially if pedestrian flow studies indicate they are needed. Access to the platform gates is through a concourse from the street or through walkways from the station service area. When the waiting and service areas are on different levels, then ramps, stairways, escalators, and elevators are needed adjuncts. Pedestrian flow studies should also be done to size these facilities.

The usual intercity traveler moves slowly through the station area. The passenger may not be familiar with the routine, have baggage to handle and check or retrieve, have a long wait for connections or delayed trains, and may require information, food, and a comfortable place to sit.

- (A) These two types of traffic should be kept separate to avoid conflict and confusion. In some large stations such as Grand Central Terminal in New York City, commuter and intercity trains arrive and depart on different levels.
- (B) In smaller stations, separate platforms should be used and traffic routed so that the two lines of movement do not cross. In some instances, separate stations are in use. Clear and concise direction and routing signs and other means of channelization are desirable.
- (C) Commuters, on the other hand, are familiar with the route through the station, have little or no luggage, and are usually in a hurry. They want direct access to or from local streets and transport.

* retrieve: 되찾다 ** concise: 간결한

6. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Most performance lighting is made up of a number of different looks ① which we have called lighting states. Each lighting cue triggers a change to a new state. Like actors, lighting cues usually need a motivation. This might be something very obvious such as a cue ② required to brighten a room setting when an actor turns on a light switch or the rapid increase in intensity at the end of a dance number in a traditional musical (known as a button cue). At other times we will need a cue to provide a subtle change in atmosphere over a number of minutes, ③ motivated perhaps by the mention of a sunset or the intention to slowly change the feel of the performance from normal to ④ threatening. The question, 'What will lighting do for this production?' ⑤ need to be asked for each moment of the production, each dramatic unit or scene, and each transition. 'What will light do for this scene?' For drama and many other production genres, a good way to begin to answer these questions is by producing a lighting score. This can then evolve into the first cue synopsis, and form the basis of our whole approach to creating the light for the piece.

What we are attempting to achieve with the lighting score is to record practical and artistic requirements for each major moment in the piece.

7. 밑줄 친 the room is now part of the signal path가 다음 글에서 의미하는 바로 가장 적절한 것은?

Imagine that you are sitting near a noisy machine. Some sound radiates from the machine and travels directly to your ears. Because that direct sound does not strike a room surface, it is not affected by the room. (However, its high-frequency response will be slightly reduced as it travels through air.) On the other hand, other sound from the machine strikes a room surface and returns to your ears; that sound is affected by the surface characteristics.

Rooms have their own "sound" because they impose their own characteristics on audio signals contained within them. It's actually kind of remarkable. Sound such as music coming from headphones will sound the same everywhere. No matter what acoustical environment we are in, the headphones sound the same. That's because the room is not part of that playback signal path. But sound such as music from a loudspeaker will sound different in every acoustical environment. Every room where you set up the loudspeaker will cause the sound you hear to be different—sometimes dramatically different; that is because the room is now part of the signal path. Also, in the same room, the loudspeaker will sound different when it is placed in different locations in the room and it will sound different as you move around the room. Similarly, when you are recording a musical instrument, the sound you receive at the microphone will be different in every room and the recorded sound will sound different as the instrument or the microphone is moved.

Clearly, acoustical environments such as rooms are a big deal.

We are familiar with the idea of an electrical signal passing through a black box that changes the signal passing through it. We can imagine that the box has knobs and buttons that let us manipulate the changes. A room operates the same way on an acoustic signal, and we can just as surely manipulate the changes it imposes. Instead of knobs and buttons, we use room size and geometry, glass fiber, drywall, carpet, ceiling tile, and other common and specialized construction materials to tune the room to the desired result.

* acoustical: 음향의

[지문출처: Handbook of Sound Studio Construction: Rooms for Recording and Listening (Ken C. Pohlmann)]

- ① Physical features of a space interact with and alter the output of sound.

- ② Audio signals are transmitted faster in a room than through headphones.
③ High-quality loudspeakers can neutralize the acoustic effects of a room.
④ The listener's movement is the only factor that changes the signal path.
⑤ Recording equipment should be isolated from the room's characteristics.

8. 다음 글의 주제로 가장 적절한 것은?

The chart above shows the proportions of shoppers in the U.S. who were willing to reply to four distinct feedback request approaches in 2023, 2024, and 2025. In every year, the proportion of shoppers who were willing to reply in an email was the greatest among the four approaches. In 2025, the proportions of shoppers who were willing to reply to each feedback request approach were identical apart from those who were willing to reply in an email. In 2024, shoppers were more willing to reply to feedback requests made in person than to those made through social media. The gap between the proportions of shoppers who were willing to reply in an email and in person was greater in 2024 than in 2023. The proportions of the shoppers who were willing to reply in a text message increased annually from 2023 to 2025.

- ① growing preference for social media as a feedback tool
② comparison of costs between various feedback collection methods
③ stability of email as a dominant feedback response method in the U.S.
④ necessity of using text messages for accurate feedback analysis
⑤ shifting patterns of consumer shopping behavior in the U.S. market

10. piano manufacturing에 관한 다음 글의 내용과 일치하지 않는 것은?

The Industrial Revolution did more than just invent new materials or machines. It invented a new process for manufacturing: the modern factory. Prior to around 1850, most piano shops used an apprentice system in which a master builder taught younger workers the skills of the trade, usually over the course of many years. The larger piano shops did have specialists—for example, one person who specialized in soundboards, another who made hammers, and so on. But even the largest piano makers of that time produced no more than 5-10 pianos per year per worker, as pianos were still made essentially one at a time. The development of a true piano factory occurred first in the United States, led by Jonas Chickering in Boston and later the Steinway family in New York City. These factories led to improvements in both efficiency and quality. For example, one of the factories of the time had its own iron casting facility where it made its metal plates, which were thought to be the best available.

At the same time, the modern factory system led to further specialization and standardization. While specialty companies had already been established for some components, such as wire, new companies were formed that specialized in making felt, hammers, actions, tuning pins, and many other components.

* apprentice: 견습생

[지문출처: *Physics of the Piano* (Nicholas J. Giordano)]

- ① Before around 1850, most piano shops relied on an apprentice system for training workers.
- ② Larger piano shops employed specialists who focused on specific parts like soundboards or hammers.
- ③ Large-scale manufacturers at that time produced dozens of pianos per worker each year.
- ④ The emergence of authentic piano factories was initiated in American cities like Boston and New York.
- ⑤ Some piano factories managed their own facilities to cast metal plates of the highest quality.

11. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Many doctoral programmes are incorporating professional development workshops, internships, and experiential learning opportunities to enhance students' employability and versatility (Cardoso et al., 2022).

As doctoral education continues to evolve, it will be essential for universities and policymakers to adapt and innovate to meet the evolving needs and aspirations of doctoral students and the broader research community.

In a thesis-based doctoral programme, students typically spend a significant amount of time and effort researching a specific topic. While this deep dive into a particular area allows for thorough exploration and understanding, it can also result in narrowing the focus. As students become deeply absorbed in their research, they may spend less time exploring related fields or acquiring skills outside their immediate area of study. Consequently, this singular focus may limit the breadth of knowledge and skills developed during the programme, potentially ----- . Some universities in Europe have recognised the limitations of traditional thesis-based doctoral programmes and have started to implement more structured approaches. These structured programmes often combine research with coursework and training in transferable skills. By incorporating coursework, seminars, workshops and internships into the curriculum, they aim to provide students with a broader skill set and better prepare them for a variety of career paths beyond academia.

European universities are increasingly emphasising professional development and training opportunities for doctoral students. These opportunities may include workshops on communication skills, project management, entrepreneurship, ethics, and teaching pedagogy. By offering such training, universities aim to equip doctoral students with the skills and knowledge needed to succeed in academia, industry, government and other sectors.

* thesis-based: 논문 기반의

[지문출처: Social Implications of Research in Higher Education (Mdikana, Andile Alfred)]

- ① enhancing the students' expertise in solving complex research problems
- ② making it difficult for students to transition into diverse professional roles

12. 다음 글의 주제로 가장 적절한 것은?

In addition, children understand that if a person thinks that something is the case, he or she will be more likely to act upon that mental state than if he or she is only imagining a particular outcome. For example, if a child thinks that a box really contains a toy, he or she will be more likely to eagerly rip the box open than if he or she is just fancifully imagining that the box contains a toy.

Research shows that, by age three, children understand that imaginary objects do not come to life. This is especially clear with respect to everyday objects—children know that even though they imagine a pencil in an empty box, the box will remain empty. However, emotion can sometimes disrupt this understanding, or at least its expression. That is, even though a child knows that monsters are not real, the thought of a monster under a bed might be enough to make a child refuse to go into his room at night. Indeed, research shows that children have a more difficult time displaying their understanding of the causal relations between imagination and reality when they are asked to pretend or imagine scary things, like monsters. In one study, preschool children were shown an empty box and were asked to imagine a monster inside. All children agreed that the box was empty. However, when they were left alone with the box they exhibited fear and avoidance of it.

Although this behavior might suggest that children confuse fantasy and reality, one must consider that adults may engage in similar behaviors. For example, an adult might cover his or her eyes when watching a scary movie, or might cry while reading the tragic conclusion to a love story. These sorts of reactions suggest separate emotional and cognitive systems, and have led researchers to propose that emotional reactions to imaginary objects may develop independently of a child's understanding of the reality status of the entity.

[지문출처: Language, Memory, and Cognition in Infancy and Early Childhood (Janette B. Benson, Marshall M. Haith)]

- ① various ways to encourage children's imaginative play with everyday objects
- ② the influence of emotional factors on children's perception of imaginary threats
- ③ developmental milestones of three-year-olds in understanding physical causality
- ④ reasons why children prefer to imagine scary things despite knowing they are not real
- ⑤ the importance of providing a safe environment for children to explore their imagination

13. 다음 글의 제목으로 가장 적절한 것은?

Recognizing that the heart of the aesthetic lies in sensibility, I have claimed that developing the awareness and capacity of aesthetic sensibility leads to immensely broader and richer social experience. At the same time, through an awareness of negative aesthetics and the negative sublime, aesthetic sensibility provides a powerful tool for criticism by recognizing the human consequences of exploitative commercial and political practices.

Perhaps the best-known development to emerge from the liberation and expansion of aesthetic experience is the aesthetics of everyday life. Although there is presently a flowering of work on everyday aesthetics, the possibility of aesthetic gratification in ordinary objects and events has long been recognized, even if degraded and dismissed by prevalent philosophical theory. Widely valued by poets, especially Romantic poets and those in Asian traditions, the aesthetic in everyday situations has also been recognized by novelists. It may be most convenient, though, to locate its contemporary intellectual origins in John Dewey's *Art as Experience*. In that book Dewey argued against the separation of art from life by basing aesthetic experience on the biological and cultural conditions of human life. He located the aesthetic, not in an internalized awareness of sensation and feeling but in "a complete interpenetration of self and the world of objects and events." Further, Dewey maintained that "the aesthetic is the clarified and intensified development of traits that belong to every normally complete experience."

I shall not attempt a chronology of the development of the present interest in the aesthetics of everyday life. Instead, let me mention some significant stages in its emergence. An important source came from the innovations that were occurring in the arts in the mid-twentieth century. A

prime influence was the work of the American composer and theorist, John Cage. Experimental and innovative, Cage's interest in aleatoric (chance) music became widely known through his piano work of 1952, 4'33", which consisted in attending to the chance sounds that occurred during that interval of time.

* gratification: 만족감

14. 다음 글의 주제로 가장 적절한 것은?

Because human existence has this moral dimension it exemplifies a higher grade of being than is to be found in the amoral, irresponsible existence of animals and plants. In traditional terms, it is freedom of the will and the moral responsibility that goes with it that together raise human life above the level of the beasts.

There is a serious confusion of thought in this line of reasoning if the conclusion drawn is understood as asserting that humans are morally superior to nonhumans.

One cannot validly argue that humans are morally superior beings on the ground that they possess, while others lack, the capacities of a moral agent. The reason is that, as far as moral standards are concerned, only beings that have the capacities of a moral agent can meaningfully be said to be either morally good or morally bad. Only moral agents can be judged to be morally better or worse than others, and the others in question must be moral agents themselves. Judgments of moral superiority are based on the comparative merits or deficiencies of the entities being judged, and these merits and deficiencies are all moral ones, that is, ones

determined by moral standards. One entity is correctly judged morally superior to another if it is the case that, when valid moral standards are applied to both entities, the first fulfills them to a greater degree than the second. Both entities, therefore, must fall within the range of application of moral standards. This would not be the case, however, if humans were being judged superior to animals and plants, since the latter are not moral agents.

Just as animals and plants can be neither good nor bad scientists, engineers, critics, or Supreme Court justices, so they can be neither good nor bad moral agents. More precisely, it is meaningless to speak of them as morally good or bad. Hence it is meaningless to say either that they are morally inferior to humans or that humans are morally superior to them. I conclude that it is not false but simply confused to assert that humans are the moral superiors of animals and plants.

* entity: 존재

[지문출처: *Respect for Nature: A Theory of Environmental Ethics* (Paul W. Taylor)]

- ① stand on the highest level of moral excellence
- ② have sympathy for each other's moral deficiency
- ③ come to an agreement on a set of moral values
- ④ be excluded from the judgment of moral superiority
- ⑤ fall within the range of application of moral standards

15. 다음 글의 요지로 가장 적절한 것은?

However, its suggestion that its AI is beginning to recognise one of the functions of silence in natural speech is problematic. It claims that: 'the AI has an actual understanding of this syntax ... Some voices, those trained with a few 'uh's and 'ah's in them, have shown to sometimes insert those vocal mannerisms during the pauses, like a real speaker might' (2024, n.p.). Yet, as we will hear, silence is not reducible to nor straightforwardly replaceable with such linguistic filler sounds and hesitation markers.

Such artificial 'pause fillers' as machine-generated supplements for silence may help to produce a more natural-sounding cadence in machine-generated speech patterns and so help to convince the AI's human interlocutors that they are engaging with another human. AI's 'humanity' of silence emerges in these contexts not least because a short period of silence is likely to be interpreted as a 'pause for thought', therefore reinforcing the illusion that the machine is 'thinking' before responding, just as a human might. However, the technical issues flagged in AI's poor handling of higher duration and frequency silences, no less than the machine inference that silence can be filled with relevant sounds in some conversational situations, are both significant. In this context at least, the AI may be starting to recognise silence not as an absence but as meaningful data. Yet the AI's confusion when presented with substantial silences, and its understanding that short break tags are equivalent to vocal markers such as 'uh's' and 'ah's' indicate the AI's continuing preferences for sound over silence, for presence over absence.

* cadence: 억양 ** interlocutor: 대화 상대

*** equivalent: 상응하는

[지문출처: *The Routledge Handbook of AI and Literature* (Will Slocombe, Genevieve Liveley)]

- ① AI는 인간과의 자연스러운 대화를 위해 침묵보다 소리를 삽입하는 것을 선호한다.
- ② 침묵을 데이터로 인식하는 AI의 능력은 인간의 사고 과정을 완벽히 재현하고 있다.
- ③ AI가 대화 중 사용하는 인공적 휴지기는 인간으로 오해받게 하는 결정적 결함이다.
- ④ 긴 침묵에 대한 AI의 서툰 대응은 인간 대화 상대에게 위협적인 요소로 작용한다.
- ⑤ 대화 상황에 맞는 적절한 소리를 생성하는 AI는 침묵의 의미를 완벽하게 이해한다.

16. 다음 글의 제목으로 가장 적절한 것은?

Another merchant understood the local dialect and asked for some "eyren," as eggs were then known in this part of the country. "What sholde a man in thyse dayes now wryte," Caxton asked, "egges or eyren? Certaynly it is harde to playse euery man by cause [because] of dyuersite [diversity] and chaunge of langage." Later, the Great Bible of 1539 and the King James Bible of 1611 helped standardize the language and had a culturally unifying effect.

Standardization of information was an effect of printing; since it allowed exact reproduction of information in a way that manuscript copying did not. This is evident in the contrast between the travel logs of Marco Polo and those of Christopher Columbus. After his return from China in 1295, a century and a half before printing, Polo's narrative was copied in about 150 different manuscripts, with so many differences that we're not sure which version is authentic. In contrast, there is only one version of Christopher Columbus's letters about the exploration of the Caribbean in the 1490s, since they were fixed in printed form and widely distributed at the time they were written. So the certainty of accuracy was a way that printing was an improvement over the old oralmanuscript culture.

Printing itself became standardized in the early 1500s, making possible a new kind of non-linear access to information through title pages and tables of contents and page numbering systems. Other improvements included better type fonts such as roman and italic, and a standardized printing production process codified in books like Joseph Moxon's 1683 Handy Works or Pierre Fournier's 1764 Manuel Typographique.

Social impacts of expanded printing included the spread of humanism and individualism.

17. 다음 글의 내용과 일치하지 않는 것은?

The origins of agriculture date back at least 22,000 years, when early humans began collecting wild grains as a food source.

Archaeological evidence suggests that various crops were being cultivated as early as 9500 BC in the Levant. Over the millennia, continuous innovations have boosted agricultural productivity while reducing manual labor. However, the growing global population will always demand more food. It is projected that by 2050, the world's population will increase to 9.7 billion, which will require global food production to rise by at least 70% to meet demand. Despite this need, only a small portion of the Earth's surface is suitable for farming due to limitations such as climate, topography, soil quality, and technology. Political and economic factors, including land ownership patterns, environmental laws, and population density, also influence agricultural land use. In fact, the amount of land used for agriculture has been declining. In 2013, around 18.6 million square miles was used for food production, compared to 19.5 million square miles in 1991.

To meet the challenge of feeding more people with less land, precision agriculture (PA) offers a promising solution. PA uses advanced techniques and technologies to improve agricultural efficiency, increase food production, reduce environmental impact, and lower costs (Gawande et al. 2023). This site-specific approach collects precise data for each field location and adjusts farming practices accordingly.

If you are going to compare languages, it helps to start with something that you are confident you can find in all languages. Take for example signs or words for mother and father. If we add other family relationships to this category—son, grandmother, aunt, brother-in-law, cousin—we are defining the category of kinship terminology. Comparative typological studies of kinship terminology have discovered that languages have labels for some but not all family relationships. And the probability that a specific kin relationship has a label is predictable based on the other kinship terms in the language. For example, all languages have a core set of kinship terms—like mother and father. By contrast, terms for less central category members are often built up from the core terms—like mother-in-law and step-father. If we compare languages across the world, we can ask what kinship relationships are typically expressed with core terminology, and what relationships are expressed by modifying the core terminology.

Wilkinson (2009) compared 40 signed languages from across the world to identify recurrent patterns in the kinship terms in these languages. She found considerable variability in the number of kinship terms across languages with as few as six terms in Croatian Sign Language and as many as 58 terms in Nepali Sign Language. One pattern that stood out across these languages was that terms for daughter and son were more likely to be a semantic extension of the terms for girl and boy or woman and man than signs for grandmother and grandfather or mother and father.

* kinship: 친족 ** typological: 유형학의

[지문출처: *Understanding Signed Languages* (Erin Wilkinson, Jill P. Morford)]

- ① universal patterns and predictability in kinship terminology
- ② the cultural significance of naming mother and father in family
- ③ the difficulty of translating kinship terms between different languages
- ④ emotional bonds formed through the use of specific family labels
- ⑤ why some languages lack basic terms for central family members

19. 다음 글의 주제로 가장 적절한 것은?

There are several ways that participants in a make-believe can communicate things about the fictional world to other participants. Sometimes these messages are emitted naturally as a result of full participation in the fictional world—i.e., something said or done by a player while in character communicates some things that are fictional of that world. For example, a child pretending to be Peter Pan might gasp and draw a plastic knife. This might be sufficient to communicate that fictionally one of Peter's enemies, such as Captain Hook, is approaching. These in-character behaviors can be insufficient, however, to maintain the necessary amount of common ground about what is fictional in the world of the make-believe. At these times participants often come at least partly out of character to give other participants the information they need. For example, it would be important to avoid confusion about who is playing which character: "No, you're Captain Hook, and I'm Peter Pan!"

People can also signal to others that a make-believe is occurring and invite them to play along. As above, these meta-communications can happen in or out of character. Breaking character, when it does happen, can be subtle: a sarcastic tone of voice or meaningful glance could suffice. For plays, films, and television shows, the context alone of the screen or stage could be enough of a signal to viewers that the actors are only behaving that way for the purposes of the production.

* make-believe: 가상 역할 놀이

** gasp: 숨을 헐떡이다

[지문출처: *Culturally Sustainable Social Robotics: Proceedings of Robophilosophy 2020* (Marco Norskov, Johanna Seibt, Oliver Santiago Quick)]

- ① the necessity of staying in character to enhance the reality of make-believe
- ② various communication methods to maintain common ground in fictional play
- ③ the negative impact of using plastic props on children's social development
- ④ psychological reasons why children prefer playing Peter Pan and Captain Hook
- ⑤ the difficulty of distinguishing between the real world and the fictional world

20. [states of matter]에 관한 다음 글의 내용과 일치하지 않는 것은?

At sufficiently high temperatures, no molecules can exist, and there is a fourth state of matter, plasma. Plasmas can be described as ionized gases where the elements are stripped of their electrons and there is a chaotic mixture of ionized nuclei and negative electrons. Plasma is the most common state of matter in the universe, and we observe it in our terrestrial experience through the solar aurora, the northern lights, neon lamps, and flames.

Our intuition about states of matter comes from our experience on Earth's surface, where the pressure is uniformly low and variations in temperature cause changes in the state of matter from solid to liquid to gas. Therefore, when we think of melting or boiling or the creation of plasma, we intuitively assume it reflects an increase in temperature. This bias comes from the fact that we live in a very constant pressure environment. Even small changes in pressure, such as those we experience when under water or on high mountaintops, can have very large effects on our metabolism. But the pressure changes we experience are trivial compared to the pressure range of the overall planetary environment. Since pressure is controlled by the weight of overlying material, pressures increase rapidly with depth. Imagine the pressures generated by the weight of rock a mile thick! For this reason a planet's pressure ranges are enormous—from essentially zero pressure in space to pressures of millions of atmospheres in planetary interiors.

A diagram illustrating this reality is presented in Figure 4-3, showing states of matter for two common substances—water and carbon dioxide. At a temperature of 25°C and pressure of one bar, water of course is liquid and CO₂ is gas. At these pressures CO₂ is never a liquid—at very cold temperatures, it is solid, and upon heating, it sublimates from solid to gas. But at higher pressures, liquid CO₂ is stable—as is the case in many fire extinguishers, for example, where the CO₂ is strongly compressed.

* intuition: 직관 ** metabolism: 신진대사

[지문출처: *How to Build a Habitable Planet: The Story of Earth from the Big Bang to Humankind* (Charles H. Langmuir, Wallace Broecker)]

- ① 지구 표면에서는 온도의 변화가 물질의 상태 변화를 일으킨다.
- ② 물질의 상태 변화가 압력의 증가를 반영한다고 직관적으로 가정하게 된다.
- ③ 수중이나 높은 산 위에서 겪는 압력 변화는 신진대사에 큰

영향을 줄 수 있다.

- ④ 압력은 위에 쌓여 있는 물질의 무게에 의해 결정된다.
- ⑤ 행성 내부의 압력은 수백만 기압에 달할 수 있다.

21. 다음 글의 제목으로 가장 적절한 것은?

Self-experiments can take a scientific question raised by conventional research and try to answer it, as in A. N.'s randomness work. Conventional research may suggest solutions to practical problems: self-experiments can ask if the solutions work. S. R.'s weight experiments, for instance, were partly inspired by animal studies. Conventional research may also help show that a surprising observation in a self-experiment is correct, e.g., S. R.'s sleep and mood research.

When self-experimentation and conventional experiments are both possible, the difference between them often resembles the difference between learning and showing: Self-experiments are better for discovery but worse for convincing others that the solution is helpful or the answer is correct. Of course, most scientists want to do both—discover something and convince others of their discovery. Thus, psychologists should consider doing both self-experiments and conventional ones. The best use of resources may often be self-experiments followed by conventional ones. The researcher begins with self-experiments that, if all goes well, find large effects and/or generate and eliminate many hypotheses. This exploratory and theory-building phase lasts until a convenient solution or large effect is found. Then the researcher uses self-experiments to find the procedural parameters (e.g., duration, time of day, intensity) that optimize the solution or maximize the effect. Only then would the researcher begin conventional experiments, using the optimized parameters.

* parameter: 매개 변수 ** optimize: 최적화하다

22. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Each of these forms of visualization evolved a distinct visual vocabulary, with periods of experimentation and innovation producing visualization schemes that most modern historians now find completely transparent, with earlier visual dead ends now completely forgotten. Daniel Rosenberg and Anthony Grafton have recently shown how experimentation with designs of chronologies helped produce the modern streamlined edition of the time line and information-rich variants by the end of the eighteenth century.

The emergence of the social sciences in the nineteenth century and the ability to work with large datasets created demand for new ways of visualizing information. Processed numerical information was best expressed in tables, charts, and graphs. Mathematics, natural sciences, and social sciences that employed statistics were at the forefront of the development of charts and graphs. History was a consumer, not a designer, of most of these new visualizations—and mostly a sparing consumer at that, since economic and social history lagged behind political history as an area of research. Simple charts and graphs were not difficult to interpret, and their visual conventions became part of what any ordinary reader would be expected to follow. As statistical analysis became more sophisticated, the visualizations that resulted became more and more central to the argument. In some cases, the visualization made interpretation possible. These success stories demonstrated the worth of statistical analysis and visualization. Perhaps the most notable example is John Snow's map of the incidence of cholera in an 1854 London outbreak, which helped plot the source of the outbreak at a single water pump in the neighborhood. Snow's cholera map showed that visualizations could serve as both narrative and analysis. Authors began to experiment with ways of using visual clues to tell complex stories about events, increasing the amount of information that could be conveyed in a small space and thereby overcoming the limitations of two dimensions in print.

A noteworthy example of innovative presentation occurs in Charles Joseph Minard's 1869 Carte Figurative des pertes successives en hommes de l'Armée Française dans la campagne de Russie 1812-1813, which portrays the advance and retreat of French troops in Russia on a scale map, showing the changing size of the force due to death and desertion through the thickness of the line

representing the force.

* sparing: 절제된 ** lag: 뒤처지다

[지문출처: *Writing History in the Digital Age* (Jack Dougherty, Kristen Nawrotzki)]

- ① reducing the reliability of numerical data in historical research
- ② overcoming the limitations of two dimensions in print
- ③ emphasizing the dominance of political history over social history
- ④ simplifying the process of collecting large-scale datasets
- ⑤ limiting the reader's ability to interpret statistical information

23. 다음 글에 나타난 Alden의 심경 변화로 가장 적절한 것은?

Alden was a youthful ambitious painter who dreamed of becoming the most prominent creator in the realm. He traveled a long distance to meet Master Roman, a legendary artist known for capturing nature's spirit. When Alden arrived at Roman's cabin, his heart pounded with thrill and dread. He knocked on the aged wooden door, holding his artworks to his chest. A brief moment later, an elderly man with eyes as deep as the sea opened the door. Without saying a single word, Roman gestured for him to enter. On entering, Alden enthusiastically spread his finest scenery sketches, waiting for compliments. However, Roman scanned them swiftly and pushed them aside. Not giving any feedback that Alden expected, he walked to his yard. He picked up a simple, gray rock and handed it to Alden. "Paint this," Roman said. "But forget your elaborate techniques. Paint what is genuinely inside." Alden felt a surge of disappointment. He thought the expert was mocking him. How could a boring, hideous rock have anything inside? Unwillingly, Alden took the stone to his room. For days and nights, he stared at it, annoyed. It seemed just a bumpy, gray chunk. But as he watched the stone in the shifting illumination of sunrise and sunset over time, something changed. Alden noticed the gray stone held small fragments of quartz catching light and spots of dried moss telling a tale of time. The more he looked at the stone, the more elegance he found in the uneven surface. Captivated, he grabbed his brush and began to mix colors. A few days later, Alden returned with his

canvas to Master Roman. His hands shook as he handed the canvas to the expert. After the expert looked at the stone in Alden's painting for a lengthy period, a gentle smile broke across his face. In Alden's view, the stone sparkled with concealed shades of blue, green, and gold. "To be an artist is not to invent, but to observe," the expert said gently. Alden realized the message was not about painting, but about seeing.

* quartz: 석영 ** moss: 이끼

- ① bored → confident
- ② excited → depressed
- ③ indifferent → grateful
- ④ expectant → enlightened
- ⑤ terrified → disappointed

정답 및 해설

1	④	2	①	3	①	4	③	5	④
6	⑤	7	①	8	③	9	⑤	10	③
11	②	12	②	13	③	14	④	15	①
16	①	17	④	18	①	19	②	20	②
21	①	22	②	23	④				

1) [정답] ④

[해설] 주어진 글은 지하 주차장 보수 작업으로 인해 일정 기간 주차장 이용이 불가능함을 안내하는 내용이다.

(A) 보수 작업을 '수행할' 예정이라는 문맥이므로 conducting이 적절하다.

(B) 보수 작업의 결과로 주차 시설을 '이용할 수 없는' 상태가 된다는 의미이므로 unavailable이 적절하다.

(C) 수리 작업을 최대한 빨리 '완료하겠다'는 약속을 하는 것이므로 completing이 문맥상 가장 자연스럽다.

따라서 정답은 ④이다.

[출제의도] 문맥상 적절한 낱말을 찾는다.

2) [정답] ①

[해설] 전학 온 뒤 시끄러운 급식실에서 큰 압박감과 긴장을 느끼며 혼자 앉아 있던 Owen에게 한 급우가 친근하게 다가가 말을 걸며 고마움을 표하자, Owen이 안도감을 느끼며 긴장이 풀리는 상황을 묘사하고 있다. 따라서 밑줄 친 부분이 글에서 의미하는 바로 가장 적절한 것은 ① 'Owen은 소속감과 심리적 편안함을 느끼기 시작했다'이다.

② Owen의 급식실 내 물리적 장벽이 급우에 의해 제거되었다.

③ Owen은 수학 수업과 사회 생활의 압박을 무시하기로 결정했다.

④ Owen은 낯선 사람과의 갑작스러운 상호작용으로 더 부담감을 느꼈다.

⑤ 급식실의 시끄러운 환경이 조용하고 평화로워졌다.

[출제의도] 어구의 함축 의미를 추론한다.

3) [정답] ①

[해설] 새로운 환경에 적응하려 할 때 사람들은 흔히 목표에 집중하기 위해 기존의 인간관계나 활동을 줄이는 경향이 있지만, 글쓴이는 이것이 스트레스에 대항할 수 있는 수단을 없애는 실수라고 지적한다.

(A)에는 사람들이 새로운 환경에 적응하기 위해 사회적 유대를 '제한하거나 줄인다'는 의미의 단어가 들어가야 하므로 restrict가 적절하며, (B)에는 이러한 좁은 집중이 스트레스에 대한 '취약성'을 높여

역효과를 낸다는 의미의 vulnerability가 들어가야 문맥이 자연스럽다. 따라서 [사회적 유대를 줄이는 행위가 오히려 스트레스에 대한 방어력을 약화시킨다는 논리적 귀결]에 따라 ① '제한하다 - 취약성'이 가장 적절하다.

② 확장하다 - 저항력

③ 강화하다 - 무관심

④ 제한하다 - 내성

⑤ 다양화하다 - 민감성

[출제의도] 글의 요약문을 완성한다.

4) [정답] ③

[해설] 존중하는 학습 공동체를 만들기 위해서는 오류와 상관없이 모든 아이디어를 수용하는 분위기가 필수적이며, 이를 통해 학생들이 오개념을 드러내고 자신의 생각을 방어하며 수학적으로 성장할 수 있는 안전한 환경이 조성된다는 내용의 글이다. 따라서 글의 요지로 가장 적절한 것은 ③이다.

[출제의도] 글의 요지를 추론한다.

5) [정답] ④

[해설] 도시 간 여행객의 특징을 설명한 주어진 글 뒤에는, 'on the other hand'를 사용하여 통근자의 대조적인 특징을 설명하는 (C)가 이어지는 것이 자연스럽다. (C) 다음에는 이 두 집단의 동선을 분리해야 한다는 원칙과 대형 역의 사례를 든 (A)가 오고, 마지막으로 작은 역에서의 해결책과 안내 표지의 중요성을 언급한 (B)로 마무리되는 것이 가장 적절하다. 따라서 정답은 ④이다.

[출제의도] 글의 순서를 논리적으로 배열한다.

6) [정답] ⑤

[해설] ⑤번이 포함된 문장의 주어는 'The question'으로 단수 명사이다. 따라서 복수 동사 형태인 need를 단수 동사 형태인 needs로 고쳐 써야 한다. ① 선행사 a number of different looks를 수식하며 called의 목적어 역할을 하는 관계대명사 which는 적절하다. ② '요구되는'이라는 수동의 의미로 앞의 명사 a cue를 수식하는 과거분사 required는 적절하다. ③ 주절 뒤에서 수동의 의미를 나타내며 부수적인 정보를 제공하는 분사구문의 과거분사 motivated는 적절하다. ④ 전치사 to의 목적어로 쓰여 '정상적인 것에서 위협적인 것으로'라는 의미를 완성하는 동명사(또는 현재분사 형용사) threatening은 적절하다.

[출제의도] 주어와 동사의 수 일치룰 파악한다.

7) [정답] ①

[해설] 스피커에서 나오는 소리는 헤드폰과 달리 방의 음향 환경에 영향을 받아 다르게 들리게 된다는 내용의 글이다. 따라서 밑줄 친 부분이 의미하는 바로 가장 적절한 것은 ① '공간의 물리적 특징이 소리의 출력과 상호작용하고 그것을 변화시킨다'이다. ② 오디오 신호는 헤드폰을 통해서보다 방 안에서 더 빠르게 전달된다 ③ 고품질 스피커는 방의 음향 효과를 중화시킬 수 있다 ④ 청취자의 움직임은 신호

경로를 변화시키는 유일한 요소이다 ⑤ 녹음 장비는 방의 특성으로부터 격리되어야 한다
[출제의도] 어구의 함축 의미를 추론한다.

8) [정답] ③

[해설] 2023년부터 2025년까지 미국의 쇼핑객들이 이메일을 통한 피드백 요청에 가장 높은 응답 의사를 보였음을 설명하는 도표에 관한 글이다. 따라서 글의 주제로 가장 적절한 것은 ③ '미국에서 지배적인 피드백 응답 수단으로서 이메일의 안정성'이다. ① 피드백 도구로서 소셜 미디어에 대한 선호도 증가 ② 다양한 피드백 수집 방법 간의 비용 비교 ④ 정확한 피드백 분석을 위한 문자 메시지 사용의 필요성 ⑤ 미국 시장에서 소비자 쇼핑 행태의 변화하는 양상
[출제의도] 글의 주제를 추론한다.

9) [정답] ⑤

[해설] 물리학자 데니스 샤마의 학업적 선택을 다룬 주어진 글 뒤에는, 학위를 마친 후 정상 상태 우주론을 지지하며 유명해진 초기 경력을 다룬 (C)가 온다. 이후 1960년대에 새로운 증거가 나타나자 자신의 관점을 바꿔 빅뱅 모델을 받아들이고 멘토로서 명성을 쌓았다는 (B)가 이어지며, 마지막으로 그의 제자 스티븐 호킹과 관련된 영화를 통해 대중에게 알려졌다 (A)가 오는 것이 자연스럽다.
[출제의도] 글의 순서를 파악한다.

10) [정답] ③

[해설] 지문에서 당시 가장 큰 피아노 제조업자들도 피아노가 본질적으로 한 번에 한 대씩 제작되었기 때문에 노동자 1인당 연간 5~10대 이하의 피아노를 생산했다고 설명하고 있다. 따라서 노동자 1인당 수십대의 피아노를 생산했다는 내용인 ③은 글의 내용과 일치하지 않는다.
① 1850년경 이전의 대부분의 피아노 상점은 노동자 교육을 위해 견습생 제도에 의존했다.
② 규모가 큰 피아노 상점은 사운드보드나 해머와 같은 특정 부품을 전문으로 하는 전문가를 두었다.
④ 진정한 피아노 공장의 출현은 보스턴과 뉴욕 같은 미국의 도시에서 시작되었다.
⑤ 일부 피아노 공장은 최고 품질의 금속판을 만들기 위해 자체 주물 시설을 갖추었다.
[출제의도] 글의 세부 내용을 파악한다.

11) [정답] ②

[해설] 빈칸 앞 문장에서 Consequently(결과적으로)를 통해 특정 연구 주제에만 매몰되는 것이 지식과 기술의 폭을 제한한다는 부정적 결과를 제시하고 있다. 이는 뒤에 이어지는 문장에서 유럽 대학들이 이를 보완하기 위해 '전이 가능한 기술'이나 '다양한 직업 경로'를 강조하는 것과 대조를 이룬다. 따라서 좁은 시야로 인해 학계 외의 다양한 분야로 진출하는 데 제약이 생길 수 있음을 유추할 수 있으므로 ② '학생들이 다양한 전문적 역할로 전환하는 것을 어렵게 만들'이 가장 적절하다.
① 복잡한 연구 문제를 해결하는 학생들의 전문성을

향상할

- ③ 주요 연구 분야 밖의 관련 분야 탐구를 장려할
④ 특정 주제에 대한 더 효율적이고 철저한 이해로 이어질
⑤ 학문 간 경계를 넘나드는 도전을 더 효과적으로 처리하도록 학생들을 준비시킬
[출제의도] 빈칸에 적절한 표현을 추론한다.

12) [정답] ②

[해설] 아동은 보통 3세경에 상상과 현실을 구분하는 능력을 갖추지만, 공포와 같은 감정이 개입되면 이러한 인지적 이해가 방해받아 상상 속의 위협에 대해 실제적인 회피 반응을 보이게 된다는 내용의 글이다. 이는 성인이 허구임을 알면서도 공포 영화를 볼 때 눈을 가리는 것과 유사하게 감정 반응 체계가 인지적 체계와 독립적으로 작동할 수 있음을 보여준다. 따라서 글의 주제로 가장 적절한 것은 ② '상상 속의 위협에 대한 아동의 인식에 미치는 감정적 요인의 영향'이다.
① 일상적인 물건을 이용한 아동의 상상 놀이를 장려하는 다양한 방법
③ 물리적 인과 관계를 이해하는 데 있어 3세 아동의 발달적 이정표
④ 아동이 상상이 진짜가 아님을 알면서도 무서운 것을 상상하기를 선호하는 이유
⑤ 아동이 상상력을 탐구할 수 있도록 안전한 환경을 제공하는 것의 중요성
[출제의도] 글의 주제를 추론한다.

13) [정답] ③

[해설] 예술적 경험의 해방과 확장이 일상생활의 미학으로 이어졌음을 설명하며, 특히 존 듀이가 예술과 삶의 분리에 반대하고 미적 경험을 일상적 삶의 조건에 통합시키려 했다는 점을 강조하는 글이다. 따라서 글의 제목으로 가장 적절한 것은 ③ '듀이의 관점: 미적 경험을 일상생활에 통합하기'이다. ① 예술에서 미적 만족을 찾는 것의 생물학적 제한 ② 널리 퍼진 철학적 이론들: 왜 낭만주의 시인들이 삶을 목살했는가 ④ 아시아 전통과 현대 예술 사이의 역사적 갈등 ⑤ 내면화된 감각이 어떻게 고급 예술과 일상적 사건을 구별하는가
[출제의도] 글의 제목으로 가장 적절한 것을 찾는다.

14) [정답] ④

[해설] 도덕적 기준은 오직 도덕적 행위 능력을 가진 존재들 사이에서만 적용될 수 있으므로, 도덕적 행위자가 아닌 동식물과 인간을 비교하여 인간이 도덕적으로 우월하다고 주장하는 것은 무의미하다는 내용의 글이다. 따라서 글의 주제로 가장 적절한 것은 ④ '도덕적 우월성 판단에서 제외됨(동식물)'이다. ① 도덕적 탁월함의 가장 높은 단계에 서기 ② 서로의 도덕적 결함에 대해 동정심을 갖기 ③ 일련의 도덕적 가치에 대해 합의에

도달하기 ⑤ 도덕적 기준의 적용 범위 내에 속하기

[출제의도] 글의 주제로 가장 적절한 것을 찾는다.

15) [정답] ①

[해설] AI가 대화 중 침묵의 기능을 인식하려고 시도하지만, 여전히 긴 침묵에 서툰 짧은 멈춤을 'uh', 'ah'와 같은 소리 채움으로 대체하려 한다는 점을 지적하며, AI가 부재(침묵)보다는 존재(소리)를 선호한다는 것을 설명하는 글이다. 따라서 글의 요지로 가장 적절한 것은 ①이다.

[출제의도] 글의 요지로 가장 적절한 것을 찾는다.

16) [정답] ①

[해설] 인쇄술이 도입되면서 정보의 정확한 복제가 가능해졌고, 이를 통해 정보의 표준화와 정확성이 확보되었다는 내용의 글이다. 마르코 폴로의 필사본들이 서로 다른 내용을 담고 있어 진위 확인이 어려운 것과 달리, 크리스토퍼 콜럼버스의 편지는 인쇄된 형태로 고정되어 단일한 버전이 유지된 사례를 통해 인쇄술이 정보의 정확성을 보장했음을 설명하고 있다. 따라서 글의 제목으로 가장 적절한 것은 ① '인쇄술: 정보 정확성과 표준화의 닻'이다. ② 마르코 폴로의 여정: 왜 그의 이야기가 미스터리가 되었는가 ③ 1490년대의 탐험이 인쇄술의 역사를 어떻게 바꾸었는가 ④ 왜 고대 필사본이 인쇄된 책보다 더 신뢰할 수 있는가 ⑤ 위대한 역사적 탐험가들의 유명한 여행 기록 비교하기

[출제의도] 글의 제목을 추론한다.

17) [정답] ④

[해설] 지문에서 기후, 지형, 토양의 질 등의 제한 때문에 지구 표면의 오직 적은 부분만이 농사에 적합하다고 언급되었으므로, 지구 표면의 대부분이 농사에 적합하다는 ④는 글의 내용과 일치하지 않는다.

[출제의도] 글의 세부 내용을 파악한다.

18) [정답] ①

[해설] 모든 언어에는 '어머니'나 '아버지'와 같은 핵심적인 친족 용어가 존재하며, 그 외의 친족 관계는 이러한 핵심 용어를 수정하거나 결합하여 표현된다는 규칙성과 예측 가능성에 대해 설명하는 글이다. 따라서 글의 주제로 가장 적절한 것은 ① '친족 용어의 보편적 패턴과 예측 가능성'이다. ② 가족 내에서 어머니와 아버지를 명명하는 것의 문화적 중요성 ③ 서로 다른 언어 간에 친족 용어를 번역하는 것의 어려움 ④ 특정 가족 호칭의 사용을 통해 형성되는 정서적 유대감 ⑤ 일부 언어에 중심적인 가족 구성원에 대한 기본 용어가 부족한 이유

[출제의도] 글의 주제를 추론한다.

19) [정답] ②

[해설] 가상 역할 놀이에서 참여자들이 배역 안에서의 자연스러운 행동이나 배역에서 벗어난 메타 커뮤니케이션 등 다양한 방식을 동원하여 허구 세계에 대한 공통된 이해를 유지하고 정보를 공유한다는 내용의

글이다. 따라서 글의 주제로 가장 적절한 것은 ② '허구적 놀이에서 공통의 기반을 유지하기 위한 다양한 의사소통 방법'이다. ① 가상 놀이의 현실감을 높이기 위해 배역을 유지할 필요성 ③ 플라스틱 소품 사용이 아이들의 사회적 발달에 미치는 부정적 영향 ④ 아이들이 피터 팬과 후크 선장 놀이를 선호하는 심리적 이유 ⑤ 현실 세계와 가상 세계를 구별하는 것의 어려움

[출제의도] 글의 주제를 파악한다.

20) [정답] ②

[해설] 지문에서 우리는 일정한 압력 환경에 살고 있기 때문에 물질의 상태 변화가 압력의 증가가 아닌 '온도의 증가'를 반영한다고 직관적으로 가정한다고 언급되어 있다. 따라서 글의 내용과 일치하지 않는 것은 ②이다.

[출제의도] 글의 세부 내용 일치 여부를 파악한다.

21) [정답] ①

[해설] 자기 실험은 새로운 발견에 유리하고 전통적 실험은 타인을 설득하는 데 유리하므로, 심리학자들은 자기 실험을 통해 가설을 세우고 매개변수를 최적화한 뒤 전통적 실험을 수행하는 전략적 순서를 고려해야 한다는 내용의 글이다. 따라서 글의 제목으로 가장 적절한 것은 ① '전략적 순서: 자기 발견에서 공식적 검증까지'이다. ② 전통적 실험이 새로운 가설을 생성하는 데 실패하는 이유 ③ 현대 심리학에서 자기 실험의 윤리적 딜레마 ④ 철학적 매개변수: 과학계를 설득하는 유일한 열쇠 ⑤ 실험 설계를 지나치게 단순화함으로써 연구 효율성 극대화하기

[출제의도] 글의 내용을 종합하여 적절한 제목을 추론한다.

22) [정답] ②

[해설] 지문 후반부에서 저자들이 작은 공간에 더 많은 정보를 담아 복잡한 이야기를 전달하는 실험을 했다고 언급하며, 이를 통해 '인쇄물이라는 2차원적 한계를 극복했다(overcoming the limitations of two dimensions in print)'고 설명한다. 빈칸은 이 결과와 일맥상통하는 내용을 담아야 한다.

[출제의도] 빈칸에 적절한 표현을 추론한다.

23) [정답] ④

[해설] 초반부에 Alden은 전설적인 화가를 만나기 위해 먼 길을 왔고, 자신의 작품을 보여주며 칭찬을 기대하고(waiting for compliments) 있었으므로 '기대하는(expectant)' 상태였다. 후반부에서는 평범한 돌에서 진정한 미를 발견하고 "예술은 발명이 아니라 관찰"이라는 깨달음을 얻었으므로 '깨달은(enlightened)' 상태로 변한 것이 적절하다.

[출제의도] 등장인물의 정서적 변화를 파악한다.
