5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Wider platforms than these minimums are found in practice, especially if pedestrian flow studies indicate they are needed. Access to the platform gates is through a concourse from the street or through walkways from the station service area. When the waiting and service areas are on different levels, then ramps, stairways, escalators, and elevators are needed adjuncts. Pedestrian flow studies should also be done to size these facilities.

The usual intercity traveler moves slowly through the station area. The passenger may not be familiar with the routine, have baggage to handle and check or retrieve, have a long wait for connections or delayed trains, and may require information, food, and a comfortable place to sit. Commuters, on the other hand, are familiar with the route through the station, have little or no luggage, and are usually in a hurry. They want direct access to or from local streets and transport. These two types of traffic should be kept separate to avoid conflict and confusion. In some large stations such as Grand Central Terminal in New York City, commuter and intercity trains arrive and depart on different levels. In smaller stations, separate platforms should be used and traffic routed so that the two lines of movement do not cross. In some instances, separate stations are in use. Clear and concise direction and routing signs and other means of channelization are desirable.

6. 다음 글을 읽고 답할 수 없는 질문은?

Most performance lighting is made up of a number of different looks which we have called lighting states. Each lighting cue triggers a change to a new state. Like actors, lighting cues usually need a motivation. This might be something very obvious such as a cue required to brighten a room setting when an actor turns on a light switch or the rapid increase in intensity at the end of a dance number in a traditional musical (known as a button cue). At other times we will need a cue to provide a subtle change in atmosphere over a number of minutes, motivated perhaps by the mention of a sunset or the intention to slowly change the feel of the performance from normal to threatening. The question, 'What will lighting do for this production?' needs to be asked for each moment of the production, each dramatic unit or scene, and each transition. 'What will light do for this scene?' For drama and many other production genres, a good way to begin to answer these questions is by producing a lighting score. This can then evolve into the first cue synopsis, and form the basis of our whole approach to creating the light for the piece.

What we are attempting to achieve with the lighting score is to record practical and artistic requirements for each major moment in the piece.

[지문출처: Performance Lighting Design: How to light for the stage, concerts and live events (Nick Moran)]

- ① What is the definition of "lighting states" in a performance?
- ② When does a "button cue" usually occur in a traditional musical?
- ③ Who is responsible for designing the motivation for each lighting cue?
- ④ How can a lighting cue affect the atmosphere of a performance?
- ⑤ At what specific points should the role of lighting be considered?

7. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Imagine that you are sitting near a noisy machine. Some sound radiates from the machine and travels directly to your ears. Because that direct sound does not strike a room surface, it is not affected by the room. (However, its high-frequency response will be slightly reduced as it travels through air.) On the other hand, other sound from the machine strikes a room surface and returns to your ears; that sound is affected by the surface characteristics.

Rooms have their own "sound" because they impose their own ① characteristics on audio signals contained within them. It's actually kind of remarkable. Sound such as music coming from headphones will sound the ② same everywhere. No matter what acoustical environment we are in, the headphones sound the same. That's because the room is not part of that playback signal path. But sound such as music from a loudspeaker will sound ③ identical in every acoustical environment. Every room where you set up the loudspeaker will cause the sound you hear to be different—sometimes dramatically ④ different; that is because the room is now part of the signal path. Also, in the same room, the loudspeaker will sound different when it is placed in different locations in the room and it will sound different as you move around the room. Similarly, when you are recording a musical instrument, the sound you receive at the microphone will be different in every room and the recorded sound will sound different as the instrument or the microphone is ⑤ moved.

Clearly, acoustical environments such as rooms are a big deal.

We are familiar with the idea of an electrical signal passing through a black box that changes the signal passing through it. We can imagine that the box has knobs and buttons that let us manipulate the changes. A room operates the same way on an acoustic signal, and we can just as surely manipulate the changes it imposes. Instead of knobs and buttons, we use room size and geometry, glass fiber, drywall, carpet, ceiling tile, and other common and specialized construction materials to tune the room to the desired result.

The chart above shows the proportions of shoppers in the U.S. who were willing to reply to four distinct feedback request approaches in 2023, 2024, and 2025. In every year, the proportion of shoppers who were willing to reply in an email was the greatest among the four approaches. In 2025, the proportions of shoppers who were willing to reply to each feedback request approach were identical apart from those who were willing to reply in an email. In 2024, shoppers were more willing to reply to feedback requests made in person than to those made through social media. The gap between the proportions of shoppers who were willing to reply in an email and in person was greater in 2024 than in 2023. The proportions of the shoppers who were willing to reply in a text message increased annually from 2023 to 2025.

Dennis William Sciama was born in Manchester, England, in 1926. He received an instruction in mathematics and physics at Malvern College. Despite his father's desire for him to take over the family company, Sciama chose to continue pursuing his academic path. After earning a doctoral degree in physics from the University of Cambridge in 1953, he became well-known for his studies on the cosmos. Early in his profession, Sciama supported the steady-state theory, which argued that the cosmos had no origin. However, when new proof against the theory appeared in the 1960s, he changed his perspective and accepted the Big Bang model. In 1991, he was awarded the Guthrie Medal for excellent contributions to experimental physics by the British Institute of Physics. Sciama's role as a mentor became known even outside academic societies. Afterwards, he was introduced in movies about his most famous student, Stephen Hawking, which made Sciama known to a broader public.

10. (A), (B), (C)의 네모 안에서 문맥에 가장 맞는 낱말로 가장 적절한 것은?

The Industrial Revolution did more than just invent new materials or machines. It invented a new process for manufacturing: the modern factory. Prior to around 1850, most piano shops used an apprentice system in which a master builder taught younger workers the skills of the trade, usually over the course of many years. The larger piano shops did have (A) generalists / specialists—for example, one person who specialized in soundboards, another who made hammers, and so on. But even the largest piano makers of that time produced no more than 5-10 pianos per year per worker, as pianos were still made essentially (B) one / several at a time. The development of a true piano factory occurred first in the United States, led by Jonas Chickering in Boston and later the Steinway family in New York City. These factories led to (C) declines / improvements in both efficiency and quality. For example, one of the factories of the time had its own iron casting facility where it made its metal plates, which were thought to be the best available.

At the same time, the modern factory system led to further specialization and standardization. While specialty companies had already been established for some components, such as wire, new companies were formed that specialized in making felt, hammers, actions, tuning pins, and many other components.

11. 밑줄 친 narrowing the focus가 다음 글에서 의미하는 바로 가장 적절한 것은?

Many doctoral programmes are incorporating professional development workshops, internships, and experiential learning opportunities to enhance students' employability and versatility (Cardoso et al., 2022).

As doctoral education continues to evolve, it will be essential for universities and policymakers to adapt and innovate to meet the evolving needs and aspirations of doctoral students and the broader research community.

In a thesis-based doctoral programme, students typically spend a significant amount of time and effort researching a specific topic. While this deep dive into a particular area allows for thorough exploration and understanding, it can also result in narrowing the focus. As students become deeply absorbed in their research, they may spend less time exploring related fields or acquiring skills outside their immediate area of study. Consequently, this singular focus may limit the breadth of knowledge and skills developed during the programme, potentially hindering students' ability to adapt to diverse career paths or address interdisciplinary challenges. Some universities in Europe have recognised the limitations of traditional thesis-based doctoral programmes and have started to implement more structured approaches. These structured programmes often combine research with coursework and training in transferable skills. By incorporating coursework, seminars, workshops and internships into the curriculum, they aim to provide students with a broader skill set and better prepare them for a variety of career paths beyond academia.

European universities are increasingly emphasising professional development and training opportunities for doctoral students. These opportunities may include workshops on communication skills, project management, entrepreneurship, ethics, and teaching pedagogy. By offering such training, universities aim to equip doctoral students with the skills and knowledge needed to succeed in academia, industry, government and other sectors.

12. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

In one study, preschool children were shown an empty box and were asked to imagine a monster inside.

In addition, children understand that if a person thinks that something is the case, he or she will be more likely to act upon that mental state than if he or she is only imagining a particular outcome. For example, if a child thinks that a box really contains a toy, he or she will be more likely to eagerly rip the box open than if he or she is just fancifully imagining that the box contains a toy.

Research shows that, by age three, children understand that imaginary objects do not come to life. (①) This is especially clear with respect to everyday objects—children know that even though they imagine a pencil in an empty box, the box will remain empty. (②) However, emotion can sometimes disrupt this understanding, or at least its expression. (③) That is, even though a child knows that monsters are not real, the thought of a monster under a bed might be enough to make a child refuse to go into his room at night. (④) Indeed, research shows that children have a more difficult time displaying their understanding of the causal relations between imagination and reality when they are asked to pretend or imagine scary things, like monsters. (⑤) All children agreed that the box was empty. However, when they were left alone with the box they exhibited fear and avoidance of it.

Although this behavior might suggest that children confuse fantasy and reality, one must consider that adults may engage in similar behaviors. For example, an adult might cover his or her eyes when watching a scary movie, or might cry while reading the tragic conclusion to a love story. These sorts of reactions suggest separate emotional and cognitive systems, and have led researchers to propose that emotional reactions to imaginary objects may develop

independently of a child's understanding of the reality status of the entity.

13. John Dewey에 관한 다음 글의 내용과 일치하지 않는 것은?

Recognizing that the heart of the aesthetic lies in sensibility, I have claimed that developing the awareness and capacity of aesthetic sensibility leads to immensely broader and richer social experience. At the same time, through an awareness of negative aesthetics and the negative sublime, aesthetic sensibility provides a powerful tool for criticism by recognizing the human consequences of exploitative commercial and political practices.

Perhaps the best-known development to emerge from the liberation and expansion of aesthetic experience is the aesthetics of everyday life. Although there is presently a flowering of work on everyday aesthetics, the possibility of aesthetic gratification in ordinary objects and events has long been recognized, even if degraded and dismissed by prevalent philosophical theory. Widely valued by poets, especially Romantic poets and those in Asian traditions, the aesthetic in everyday situations has also been recognized by novelists. It may be most convenient, though, to locate its contemporary intellectual origins in John Dewey's *Art as Experience*. In that book Dewey argued against the separation of art from life by basing aesthetic experience on the biological and cultural conditions of human life. He located the aesthetic, not in an internalized awareness of sensation and feeling but in "a complete interpenetration of self and the world of objects and events." Further, Dewey maintained that "the aesthetic is the clarified and intensified development of traits that belong to every normally complete experience."

I shall not attempt a chronology of the development of the present interest in the aesthetics of everyday life. Instead, let me mention some significant stages in its emergence. An important source came from the innovations that were occurring in the arts in the mid-twentieth century. A prime influence was the work of the American composer and theorist, John Cage. Experimental and

innovative, Cage's interest in aleatoric (chance) music became widely known through his piano work of 1952, 4'33", which consisted in attending to the chance sounds that occurred during that interval of time.

14. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

One entity is correctly judged morally superior to another if it is the case that, when valid moral standards are applied to both entities, the first fulfills them to a greater degree than the second.

Because human existence has this moral dimension it exemplifies a higher grade of being than is to be found in the amoral, irresponsible existence of animals and plants. In traditional terms, it is freedom of the will and the moral responsibility that goes with it that together raise human life above the level of the beasts.

There is a serious confusion of thought in this line of reasoning if the conclusion drawn is understood as asserting that humans are morally superior to nonhumans.

One cannot validly argue that humans are morally superior beings on the ground that they possess, while others lack, the capacities of a moral agent. (①) The reason is that, as far as moral standards are concerned, only beings that have the capacities of a moral agent can meaningfully be said to be either morally good or morally bad. (②) Only moral agents can be judged to be morally better or

worse than others, and the others in question must be moral agents themselves. (③) Judgments of moral superiority are based on the comparative merits or deficiencies of the entities being judged, and these merits and deficiencies are all moral ones, that is, ones determined by moral standards. (④) Both entities, therefore, must fall within the range of application of moral standards. (⑤) This would not be the case, however, if humans were being judged superior to animals and plants, since the latter are not moral agents.

Just as animals and plants can be neither good nor bad scientists, engineers, critics, or Supreme Court justices, so they can be neither good nor bad moral agents. More precisely, it is meaningless to speak of them as morally good or bad. Hence it is meaningless to say either that they are morally inferior to humans or that humans are morally superior to them. I conclude that it is not false but simply confused to assert that humans are the moral superiors of animals and plants.

15. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

However, its suggestion that its AI is beginning to recognise one of the functions of silence in natural speech is problematic. It claims that: 'the AI has an actual understanding of this syntax ... Some voices, those trained with a few 'uh's and 'ah's in them, have shown to sometimes insert those vocal mannerisms during the pauses, like a real speaker might' (2024, n.p.). Yet, as we will hear, silence is not reducible to nor straightforwardly replaceable with such linguistic filler sounds and hesitation markers.

Such artificial 'pause fillers' as machine-generated supplements for silence may help to produce a more natural-sounding cadence in machine-generated speech patterns and so help to convince the AI's human interlocutors ① that they are engaging with another human. AI's 'humanity' of silence emerges in these contexts not least because a short period of silence is likely to be interpreted as a 'pause for thought', therefore ② reinforcing the illusion that the machine is 'thinking' before responding, just as a human might. However, the technical issues flagged in AI's poor handling of higher duration and frequency silences, no less than the machine inference that silence can be filled with relevant sounds in some conversational situations, ③ is both significant. In this context at least, the AI may be starting to recognise silence not as an absence but as meaningful data. Yet the AI's confusion when ④ presented with substantial silences, and its understanding that short break tags are equivalent to vocal markers such as 'uh's' and 'ah's' indicate the AI's continuing ⑤ preferences for sound over silence, for presence over absence.

16. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Another merchant understood the local dialect and asked for some "eyren," as eggs were then known in this part of the country. "What sholde a man in thyse dayes now wryte," Caxton asked, "egges or eyren? Certaynly it is harde to playse euery man by cause [because] of dyuersite [diversity] and chaunge of langage." Later, the Great Bible of 1539 and the King James Bible of 1611 helped standardize the language and had a culturally unifying effect.

Standardization of information was an effect of printing; since it allowed ① exact reproduction of information in a way that manuscript copying did not. This is evident in the contrast between the travel logs of Marco Polo and those of Christopher Columbus. After his return from China in 1295, a century and a half before printing, Polo's narrative was copied in about 150 different manuscripts, with so many ② differences that we're not sure which version is authentic. In contrast, there is only one version of Christopher Columbus's letters about the exploration of the Caribbean in the 1490s, since they were ③ fixed in printed form and widely distributed at the time they were written. So the ④ uncertainty of accuracy was a way that printing was an ⑤ improvement over the old oralmanuscript culture.

Printing itself became standardized in the early 1500s, making possible a new kind of non-linear access to information through title pages and tables of contents and page numbering systems. Other improvements included better type fonts such as roman and italic, and a standardized printing production process codified in books like Joseph Moxon's 1683 Handy Works or Pierre Fournier's 1764 Manuel Typographique.

Social impacts of expanded printing included the spread of humanism and individualism.

17. 다음 글의 제목으로 가장 적절한 것은?

The origins of agriculture date back at least 22,000 years, when early humans began collecting wild grains as a food source.

Archaeological evidence suggests that various crops were being cultivated as early as 9500 BC in the Levant. Over the millennia, continuous innovations have boosted agricultural productivity while reducing manual labor. However, the growing global population will always demand more food. It is projected that by 2050, the world's population will increase to 9.7 billion, which will require global food production to rise by at least 70% to meet demand. Despite this need, only a small portion of the Earth's surface is suitable for farming due to limitations such as climate, topography, soil quality, and technology. Political and economic factors, including land ownership patterns, environmental laws, and population density, also influence agricultural land use. In fact, the amount of land used for agriculture has been declining. In 2013, around 18.6 million square miles was used for food production, compared to 19.5 million square miles in 1991.

To meet the challenge of feeding more people with less land, precision agriculture (PA) offers a promising solution. PA uses advanced techniques and technologies to improve agricultural efficiency, increase food production, reduce environmental impact, and lower costs (Gawande et al. 2023). This site-specific approach collects precise data for each field location and adjusts farming practices accordingly.

20. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

At sufficiently high temperatures, no molecules can exist, and there is a fourth state of matter, plasma. Plasmas can be described as ionized gases where the elements are stripped of their electrons and there is a chaotic mixture of ionized nuclei and negative electrons. Plasma is the most common state of matter in the universe, and we observe it in our terrestrial experience through the solar aurora, the northern lights, neon lamps, and flames.

Our intuition about states of matter comes from our experience on Earth's surface, where the pressure is uniformly low and variations in temperature cause changes in the state of matter from solid to liquid to gas. Therefore, when we think of melting or boiling or the creation of plasma, we intuitively assume it reflects an increase in temperature. This ----- comes from the fact that we live in a very constant pressure environment. Even small changes in pressure, such as those we experience when under water or on high mountaintops, can have very large effects on our metabolism. But the pressure changes we experience are trivial compared to the pressure range of the overall planetary environment. Since pressure is controlled by the weight of overlying material, pressures increase rapidly with depth. Imagine the pressures generated by the weight of rock a mile thick! For this reason a planet's pressure ranges are enormous—from essentially zero pressure in space to pressures of millions of atmospheres in planetary interiors.

A diagram illustrating this reality is presented in Figure 4-3, showing states of matter for two common substances—water and carbon dioxide. At a temperature of 25°C and pressure of one bar, water of course is liquid and CO₂ is gas. At these pressures CO₂ is never a liquid—at very cold temperatures, it is solid, and upon heating, it sublimates from solid to gas. But at higher pressures, liquid CO₂ is stable—as is the case in many fire extinguishers, for example, where the CO₂ is strongly compressed.

21. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Then the researcher uses self-experiments to find the procedural parameters (e.g., duration, time of day, intensity) that optimize the solution or maximize the effect.

Self-experiments can take a scientific question raised by conventional research and try to answer it, as in A. N.'s randomness work. Conventional research may suggest solutions to practical problems; self-experiments can ask if the solutions work. S. R.'s weight experiments, for instance, were partly inspired by animal studies. Conventional research may also help show that a surprising observation in a self-experiment is correct, e.g., S. R.'s sleep and mood research.

When self-experimentation and conventional experiments are both possible, the difference between them often resembles the difference between learning and showing: Self-experiments are better for discovery but worse for convincing others that the solution is helpful or the answer is correct. (①) Of course, most scientists want to do both—discover something and convince others of their discovery. (②) Thus, psychologists should consider doing both self-experiments and conventional ones. (③) The best use of resources may often be self-experiments followed by conventional ones. (④) The researcher begins with self-experiments that, if all goes well, find large effects and/or generate and eliminate many hypotheses. This exploratory and theory-building phase lasts until a convenient solution or large effect is found. (⑤) Only then would the researcher begin conventional experiments, using the optimized parameters.

- ③ 새로운 업무량을 관리하는 데 도움을 줄 다양한 사회적 자원
- ④ 옛 친구와 새 친구 모두로부터 얻는 강한 정서적 지지

[출제의도] 빈칸에 적절한 표현을 추론한다.

4) [정답] ③

[해설] ③번이 포함된 문장에서 주격 관계대명사 that의 선행사는 복수 명사인 verbal or physical expressions이므로, 관계절의 동사는 복수형인

indicate로 써야 한다. ① unless절 내에서 주어인 these ideas가 수동의 대상이므로 수동태(be allowed)가 적절하다. ② Students를 수식하는 주격 관계대명사로 사람이 선행사이므로 who는 적절하다. ④ correct가 명사 answers를 수식하는 구조로 적절하다. ⑤ 문장의 주어는 동명사구인 Part of building a safe learning community이며, 핵심 주어가 Part이므로 단수 동사 is는 적절하다.

[출제의도] 주어와 동사의 수 일치를 파악한다.

5) [정답] ③

[해설] 철도역 내의 혼란을 방지하기 위해 도시 간 여행객과 통근자의 동선을 분리해야 한다는 것이 글의 핵심이다. 이는 두 집단이 시설 이용에 대한 익숙함이나 이동 속도 면에서 서로 다른 요구를 가지고 있기 때문이다. 따라서 (A)에는 분리하다(segregate), (B)에는 별개의/뚜렷이 다른(distinct)이 들어가는 것이 가장 적절하다. ① 통합하다 - 유사한 ② 고립시키다 - 동일한 ④ 방해하다 - 다양한 ⑤ 결합하다 - 고유한.

[출제의도] 글의 내용을 한 문장으로 요약한다.

6) [정답] ③

[해설] 지문에서는 조명 신호에 동기가 필요하다는 점과 그 예시는 설명하고 있으나, ③ '누가 조명 신호의 동기를 설계할 책임이 있는지(디자이너, 연출가 등 구체적 역할)'에 대해서는 언급되어 있지 않다. ① 공연에서 'lighting states'의 정의는 무엇인가? ② 전통적인 뮤지컬에서 'button cue'는 보통 언제 일어나는가? ④ 조명 신호는 공연의 분위기에 어떤 영향을 미칠 수 있는가? ⑤ 조명의 역할은 어떤 구체적인 시점에 고려되어야 하는가?

[출제의도] 글의 세부 내용을 파악하여 질문에 답한다.

7) [정답] ③

[해설] 스피커에서 나오는 소리는 모든 음향 환경에서 똑같이 들리는 것이 아니라, 각 방의 특성에 따라 다르게 들린다는 맥락이 되어야 하므로 ③의 identical을 different와 같은 낱말로 바꿔야 한다. ① 특징 ② 동일한 ④ 다른 ⑤ 이동된

[출제의도] 문맥에 맞지 않는 낱말을 찾는다.

8) [정답] ①

[해설] 도표와 글의 내용을 통해 미국 쇼핑객들이 네 가지 피드백 요청 방식 중 이메일에 응답할 의사가 매년 가장 높았음을 알 수 있다. 따라서 글의 요지로 가장 적절한 것은 ①이다. ② 소셜 미디어를 통한 피드백 요청 비율은 매년 꾸준한 상승세를 보이고 있다 ③ 문자 메시지 피드백의 응답률이 낮아지면서 새로운 소통 방식이 요구된다 ④ 2025년에는 모든 피드백 요청 방식의 선호도가 작년 대비 대폭 감소했다 ⑤ 쇼핑객들은 보상이 주어지는 피드백 요청 방식에 더 적극적으로 참여한다.

[출제의도] 글의 요지를 추론한다.

9) [정답] ①

[해설] 영국의 물리학자 데니스 윌리엄 샤마의 출생, 학업 과정, 우주론에 관한 연구 성과 변화, 그리고 멘토로서의 영향력 등 그의 전반적인 생애와 업적을 전달하고 있는 글이다. 따라서 글의 목적으로 가장 적절한 것은 ①이다.

[출제의도] 글의 목적을 추론한다.

10) [정답] ⑤

[해설] (A) 바로 뒤에서 사운드보드나 해머 등 특정 부품을 전문적으로 만드는 사람들의 예시를 들고 있으므로 '전문가'가 적절하다. (B) 당시 가장 큰 피아노 제조업체라도 노동자 1인당 연간 생산량이 5~10대에 불과했다는 점으로 미루어 보아, 피아노는 본질적으로 한 번에 '한 대씩' 만들어졌음을 알 수 있다. (C) 미국의 공장 시스템 도입은 효율성과 품질 면에서 모두 '향상'을 가져왔으며, 이는 자체 주물 시설에서 생산된 최고 품질의 금속판 예시를 통해 확인할 수 있다.

- ① 다방면에 걸쳐 많이 아는 사람 - 여러 - 저하
- ② 전문가 - 하나 - 저하
- ③ 전문가 - 여러 - 향상
- ④ 다방면에 걸쳐 많이 아는 사람 - 하나 - 향상

[출제의도] 문맥에 적절한 낱말을 찾는다.

11) [정답] ⑤

[해설] 밑줄 친 'narrowing the focus(초점을 좁히는 것)'는 논문 기반의 박사 과정 학생들이 특정 연구 주제에만 깊이 매몰되는 현상을 지칭한다. 지문은 이러한 '깊은 몰입'이 연구 영역 밖의 기술 습득이나 관련 분야 탐구 시간을 줄여 결국 지식의 폭을 제한한다는 점을 지적하고 있다. 따라서 밑줄 친 부분이 의미하는 바로 가장 적절한 것은 ⑤ '한 분야에 대한 과도한 특성화로 인해 다양한 기술 개발을 소홀히 하기'이다.

- ① 집중적인 교육을 통해 다양한 학문 분야에 대한 포괄적인 이해를 얻기
- ② 박사 과정에서 이론적인 학술 연구보다 실질적인 현장 경험을 우선시하기
- ③ 다양한 전문적 경력 경로에서의 예측 불가능한 변화에 적응하는 능력을 향상하기
- ④ 긴급한 학제 간 과제를 해결하기 위해 복잡한 연구 방법론을 단순화하기

[출제의도] 어구의 함축 의미를 추론한다.

12) [정답] ⑤

[해설] 주어진 문장은 아이들에게 빈 상자 안에 괴물이 있다고 상상하게 한 구체적인 연구 사례를 소개하고 있다. ⑤ 앞 문장에서는 아이들이 괴물과 같이 무서운 것을 상상할 때 상상과 현실 사이의 인과 관계를 이해하는 데 어려움을 겪는다는 일반적인 연구 결과를 언급하고 있으며, ⑤ 뒤 문장에서는 해당 실험에 참여한 아이들이 보인 구체적인 반응과 결과가 제시되고 있다. 따라서 실험의 설정을 설명하는 주어진 문장은 구체적인 실험 결과가 언급되기 시작하는 문장 직전인 ⑤에 들어가는 것이 가장 적절하다.

[출제의도] 주어진 문장이 들어갈 위치를 파악한다.

13) [정답] ③

[해설] 지문에서 존 듀이는 미적인 것을 '감각과 감정에 대한 내면화된 인식'이 아니라 '자아와 대상 및 사건의 세계 사이의 완전한 상호 침투'에서 찾았다고 언급하고 있다. 따라서 ③은 글의 내용과 일치하지 않는다.

14) [정답] ④

[해설] 주어진 문장은 한 존재가 다른 존재보다 도덕적으로 우월하다고 판단되는 구체적인 조건을 설명하고 있다. 이 문장은 도덕적 우월성 판단이 도덕적 기준에 의해 결정된다는 ③번 뒤의 내용과, 그러므로 두 존재 모두 도덕적 기준의 적용 범위 안에 있어야 한다는 ④번 뒤의 문장을 논리적으로 연결해 준다. 따라서 ④번 위치가 가장 적절하다.

[출제의도] 주어진 문장이 들어가기에 가장 적절한 곳을 찾는다.

15) [정답] ③

[해설] ③ 해당 문장의 주어는 the technical issues (복수형)이므로 술어 동사로 단수 is가 아니라 복수형 are가 와야 한다.

[출제의도] 어법상 맞지 않는 표현을 찾는다.

16) [정답] ④

[해설] 인쇄술은 정보의 정확한 복제를 가능하게 하여 정보의 표준화를 가져왔으며, 여러 판본이 존재했던 필사본과 달리 인쇄된 형태는 내용이 고정되어 정보의 정확성을 보장했다는 내용의 글이다. 따라서 인쇄술이 과거의 구전이나 필사 문화보다 개선된 점은 정확성에 대한 '확실성'을 제공했다는 것이므로, ④의 uncertainty를 certainty와 같은 낱말로 바꿔야 한다.

[출제의도] 문맥상 적절하지 않은 어휘를 찾는다.

17) [정답] ②

[해설] 과거부터 현재까지 농업 생산성은 향상되어 왔으나, 급격한 인구 증가로 인해 미래의 식량 수요가 크게 늘어날 것으로 예상되는 반면, 지리적·환경적 요인과 정치·경제적 요인 등으로 인해 실제로 농사에 사용할 수 있는 토지는 오히려 감소하고 있다는 내용의 글이다. 따라서 글의 제목으로 가장 적절한 것은 ② '세계 식량 안보: 증가하는 수요 vs. 줄어드는 농경지'이다. ① 레반트 지역 작물 재배의 역사적 진화 ③ 농업에서 육체노동을 줄이기 위한 기술 혁신 ④ 인구 밀도와 토지 이용 사이의 긍정적 상관관계 ⑤ 1990년대 이후 전 세계 농경지가 확장된 이유

[출제의도] 글의 제목을 추론한다.

18) [정답] ④

[해설] 주어진 문장은 모든 언어가 '어머니'나 '아버지'와 같은 핵심적인 친족 용어 세트를 가지고 있다는 구

체적인 예를 제시하고 있다. ④ 바로 뒤의 문장이 '대조적으로(By contrast)'로 시작하며 핵심적이지 않은 구성원을 나타내는 용어들이 핵심 용어로부터 만들어지는 방식을 설명하고 있으므로, 그와 대조를 이루는 핵심 용어에 대한 설명인 주어진 문장은 ④에 들어가는 것이 가장 적절하다.

[출제의도] 문장의 위치를 파악한다.

19) [정답] ④

[해설] 지문 중간에서 배역 안에서의 행동(in-character behaviors)이 가상 세계의 공통 기반을 유지하기에 불충분할 수 있다고 언급하며, 이럴 때 참여자들이 배역에서 벗어나 정보를 제공한다고 설명하고 있다. 따라서 글의 내용과 일치하지 않는 것은 ④이다.

[출제의도] 글의 세부 내용 일치 여부를 파악한다.

20) [정답] ①

[해설] 우리가 항상 일정한 압력 환경에서 살고 있기 때문에 모든 상태 변화를 온도의 변화로만 판단하게 되는 '편향'에 관한 내용이므로, 빈칸에 들어갈 말로 가장 적절한 것은 ① '편향'이다. ② 통찰 ③ 안정성 ④ 변화 ⑤ 신진대사

[출제의도] 글의 흐름상 빈칸에 들어갈 적절한 어휘를 추론한다.

21) [정답] ⑤

[해설] 주어진 문장은 연구자가 매개변수를 찾아 솔루션을 최적화한다는 내용인데, ⑤번 앞 문장에서 탐색적 단계가 효과가 발견될 때까지 지속된다고 했고, ⑤번 뒤 문장에서 '그리고 나서야(Only then)' 최적화된 매개변수를 사용하여 전통적 실험을 시작한다고 했으므로 주어진 문장은 ⑤에 들어가는 것이 가장 적절하다.

[출제의도] 글의 흐름을 파악하여 주어진 문장이 들어갈 적절한 위치를 찾는다.

22) [정답] ⑤

[해설] 문장의 구조상 increasing ~ and thereby overcoming ~으로 이어지는 병렬 구조의 분사구문이 필요하다. 따라서 정동사 형태인 increased를 현재분사인 increasing으로 고쳐야 어법상 적절하다.

[출제의도] 문장 구조를 분석하여 어법상 오류를 찾는다.

23) [정답] ④

[해설] 문맥상 Alden이 돌을 며칠 동안 바라보며 '짜증이 난' 상태를 설명해야 하므로, 감정을 느끼는 대상(사람)을 수식하는 과거분사 annoyed가 적절하다. 현재분사 annoying은 대상이 남을 짜증나게 만드는 성질을 가질 때 사용하므로 어법상 틀리다.

[출제의도] 현재분사와 과거분사의 쓰임을 구분한다.
