Dear Valued Members of the City Sports Center,

We deeply appreciate your constant use of our sports center. As already announced, we will be conducting crucial maintenance on our underground parking lot. As a result, the underground parking facility will be completely unavailable from April 1st to April 7th. During this brief period, we politely ask you to use the temporary outdoor parking lot located opposite the main entrance. We are fully committed to completing the repair work as fast as possible. We truly apologize for any potential inconvenience this may cause and appreciate your patience and cooperation.

- ① humorous and witty
- ② apologetic and requesting
- ③ critical and cold
- ④ festive and lighthearted
- ⑤ discouraged and fearful

Just then, a plastic tray was placed down opposite him.

Looking around the loud cafeteria, Owen gripped his tray firmly. He felt the huge pressure of being new to the high school. Not knowing how the afternoon would go made him feel nervous. (①) He sat with a deep sigh at a corner table. (②) He thought, 'Can I make it through the rest of the classes?' (③) It was a classmate from his math class. "Hi, is this seat taken? By the way, thanks for lending me that pen before." (④) The unseen wall around Owen seemed to melt away. "Not at all, please sit," he replied. (⑤) Starting to feel at ease, he smiled warmly at the guy.

Wider platforms than these minimums are found in practice, especially if pedestrian flow studies indicate they are needed. Access to the platform gates is through a concourse from the street or through walkways from the station service area. When the waiting and service areas are on different levels, then ramps, stairways, escalators, and elevators are needed adjuncts. Pedestrian flow studies should also be done to size these facilities.

The usual intercity traveler moves slowly through the station area. The passenger may not be ㉠ familiar with the routine, have baggage to handle and check or retrieve, have a long wait for connections or delayed trains, and may require information, food, and a comfortable place to sit. Commuters, on the other hand, are familiar with the route through the station, have little or no luggage, and are usually in a hurry. They want direct ㉡ access to or from local streets and transport. These two types of traffic should be kept ㉢ separate to avoid ㉣ conflict and confusion. In some large stations such as Grand Central Terminal in New York City, commuter and intercity trains arrive and depart on different levels. In smaller stations, separate platforms should be used and traffic routed so that the two lines of movement do not cross. In some instances, separate stations are in use. Clear and ㉤ concise direction and routing signs and other means of channelization are desirable.

* retrieve: 되찾다 ** concise: 간결한

[지문출처: Transportation Planning Handbook (ITE (Institute of Transportation Engineers), Michael D. Meyer)]

- ① ㉠ familiar: knowing something very well
- ② ㉡ access: a way of entering or reaching a place
- ③ ㉢ separate: combined or connected together
- ④ ㉣ conflict: a situation in which people or things are involved in a serious disagreement or argument
- ⑤ ㉤ concise: giving a lot of information clearly and in a few words

6. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Most performance lighting is made up of a number of different looks which we have called lighting states. Each lighting cue triggers a change to a new state. Like actors, lighting cues usually ----- . This might be something very obvious such as a cue required to brighten a room setting when an actor turns on a light switch or the rapid increase in intensity at the end of a dance number in a traditional musical (known as a button cue). At other times we will need a cue to provide a subtle change in atmosphere over a number of minutes, motivated perhaps by the mention of a sunset or the intention to slowly change the feel of the performance from normal to threatening. The question, 'What will lighting do for this production?' needs to be asked for each moment of the production, each dramatic unit or scene, and each transition. 'What will light do for this scene?' For drama and many other production genres, a good way to begin to answer these questions is by producing a lighting score. This can then evolve into the first cue synopsis, and form the basis of our whole approach to creating the light for the piece.

What we are attempting to achieve with the lighting score is to record practical and artistic requirements for each major moment in the piece.

[지문출처: Performance Lighting Design: How to light for the stage, concerts and live events (Nick Moran)]

- ① require a technical manual
- ② need a motivation
- ③ occur without any notice
- ④ focus on the actor's costumes

7. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Also, in the same room, the loudspeaker will sound different when it is placed in different locations in the room and it will sound different as you move around the room.

Imagine that you are sitting near a noisy machine. Some sound radiates from the machine and travels directly to your ears. Because that direct sound does not strike a room surface, it is not affected by the room. (However, its high-frequency response will be slightly reduced as it travels through air.) On the other hand, other sound from the machine strikes a room surface and returns to your ears; that sound is affected by the surface characteristics.

Rooms have their own "sound" because they impose their own characteristics on audio signals contained within them. It's actually kind of remarkable. Sound such as music coming from headphones will sound the same everywhere. (①) No matter what acoustical environment we are in, the headphones sound the same. (②) That's because the room is not part of that playback signal path. (③) But sound such as music from a loudspeaker will sound different in every acoustical environment. (④) Every room where you set up the loudspeaker will cause the sound you hear to be different—sometimes dramatically different; that is because the room is now part of the signal path. (⑤) Similarly, when you are recording a musical instrument, the sound you receive at the microphone will be different in every room and the recorded sound will sound different as the instrument or the microphone is moved.

Clearly, acoustical environments such as rooms are a big deal.

We are familiar with the idea of an electrical signal passing through a black box that changes the signal passing through it. We can imagine that the box has knobs and buttons that let us manipulate the changes. A room operates the same way on an acoustic signal, and we can just as surely manipulate the changes it imposes. Instead of knobs and buttons, we use room size and geometry, glass fiber, drywall, carpet, ceiling tile, and other common and specialized construction materials to tune the room to the desired result.

10. 다음 글의 제목으로 가장 적절한 것은?

The Industrial Revolution did more than just invent new materials or machines. It invented a new process for manufacturing: the modern factory. Prior to around 1850, most piano shops used an apprentice system in which a master builder taught younger workers the skills of the trade, usually over the course of many years. The larger piano shops did have specialists—for example, one person who specialized in soundboards, another who made hammers, and so on. But even the largest piano makers of that time produced no more than 5-10 pianos per year per worker, as pianos were still made essentially one at a time. The development of a true piano factory occurred first in the United States, led by Jonas Chickering in Boston and later the Steinway family in New York City. These factories led to improvements in both efficiency and quality. For example, one of the factories of the time had its own iron casting facility where it made its metal plates, which were thought to be the best available.

At the same time, the modern factory system led to further specialization and standardization. While specialty companies had already been established for some components, such as wire, new companies were formed that specialized in making felt, hammers, actions, tuning pins, and many other components.

11. 다음 글을 읽고 답할 수 없는 질문은?

Many doctoral programmes are incorporating professional development workshops, internships, and experiential learning opportunities to enhance students' employability and versatility (Cardoso et al., 2022).

As doctoral education continues to evolve, it will be essential for universities and policymakers to adapt and innovate to meet the evolving needs and aspirations of doctoral students and the broader research community.

In a thesis-based doctoral programme, students typically spend a significant amount of time and effort researching a specific topic. While this deep dive into a particular area allows for thorough exploration and understanding, it can also result in narrowing the focus. As students become deeply absorbed in their research, they may spend less time exploring related fields or acquiring skills outside their immediate area of study. Consequently, this singular focus may limit the breadth of knowledge and skills developed during the programme, potentially hindering students' ability to adapt to diverse career paths or address interdisciplinary challenges. Some universities in Europe have recognised the limitations of traditional thesis-based doctoral programmes and have started to implement more structured approaches. These structured programmes often combine research with coursework and training in transferable skills. By incorporating coursework, seminars, workshops and internships into the curriculum, they aim to provide students with a broader skill set and better prepare them for a variety of career paths beyond academia.

European universities are increasingly emphasising professional development and training opportunities for doctoral students. These opportunities may include workshops on communication skills, project management, entrepreneurship, ethics, and teaching pedagogy. By offering such training, universities aim to equip doctoral students with the skills and knowledge needed to succeed in academia, industry, government and other sectors.

In addition, children understand that if a person thinks that something is the case, he or she will be more likely to act upon that mental state than if he or she is only imagining a particular outcome. For example, if a child thinks that a box really contains a toy, he or she will be more likely to eagerly rip the box open than if he or she is just fancifully imagining that the box contains a toy.

Research shows that, by age three, children understand that imaginary objects do not come to life. This is especially clear with respect to everyday objects—children know that even though they imagine a pencil in an empty box, the box will remain empty. However, emotion can sometimes disrupt this understanding, or at least its expression. That is, even though a child knows that monsters are not real, the thought of a monster under a bed might be enough to make a child refuse to go into his room at night. Indeed, research shows that children have a more difficult time displaying their understanding of the causal relations between imagination and reality when they are asked to pretend or imagine scary things, like monsters. In one study, preschool children were shown an empty box and were asked to imagine a monster inside. All children agreed that the box was empty. However, when they were left alone with the box they exhibited fear and avoidance of it.

Although this behavior might suggest that children confuse fantasy and reality, one must consider that adults may engage in similar behaviors. For example, an adult might cover his or her eyes when watching a scary movie, or might cry while reading the tragic conclusion to a love story. These sorts of reactions suggest separate emotional and cognitive systems, and have led researchers to propose that emotional reactions to imaginary objects may develop independently of a child's understanding of the reality status of the entity.

13. 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Recognizing that the heart of the aesthetic lies in sensibility, I have claimed that developing the awareness and capacity of aesthetic sensibility leads to immensely broader and richer social experience. At the same time, through an awareness of negative aesthetics and the negative sublime, aesthetic sensibility provides a powerful tool for criticism by recognizing the human consequences of exploitative commercial and political practices.

Perhaps the best-known development to emerge from the liberation and expansion of aesthetic experience is the aesthetics of everyday life. Although there is presently a flowering of work on everyday aesthetics, the possibility of aesthetic gratification in ordinary objects and events has long been recognized, even if degraded and dismissed by prevalent philosophical theory. Widely valued by poets, especially Romantic poets and those in Asian traditions, the aesthetic in everyday situations has also been recognized by novelists. It may be most convenient, though, to locate its contemporary intellectual origins in John Dewey's *Art as Experience*. In that book Dewey argued against the separation of art from life by basing aesthetic experience on the biological and cultural conditions of human life. He located the aesthetic, not in an internalized awareness of sensation and feeling but in "a complete interpenetration of self and the world of objects and events." Further, Dewey maintained that "the aesthetic is the clarified and intensified development of traits that belong to every normally complete experience."

I shall not attempt a chronology of the development of the present interest in the aesthetics of everyday life. Instead, let me mention some significant stages in its emergence. An important source came from the innovations that were occurring in the arts in the mid-twentieth century. A prime influence was the work of the American composer and theorist, John Cage. Experimental and innovative, Cage's interest in aleatoric (chance) music became widely known through his piano work of 1952, 4'33", which consisted in attending to the chance sounds that occurred during that interval of time.

* gratification: 만족감

** interpenetration: 상호 침투

14. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Because human existence has this moral dimension it exemplifies a higher grade of being than is to be found in the amoral, irresponsible existence of animals and plants. In traditional terms, it is freedom of the will and the moral responsibility that goes with it that together raise human life above the level of the beasts.

There is a serious confusion of thought in this line of reasoning if the conclusion drawn is understood as asserting that humans are morally superior to nonhumans.

One cannot validly argue that humans are morally superior beings on the ground that they possess, while others lack, the capacities of a moral agent. The reason is ① that, as far as moral standards are concerned, only beings that have the capacities of a moral agent can meaningfully be said to be either morally good or morally bad. Only moral agents can be judged to be ② morally better or worse than others, and the others in question must be moral agents themselves. Judgments of moral superiority are based on the comparative merits or deficiencies of the entities being judged, and these merits and deficiencies are all moral ones, that is, ③ ones determined by moral standards. One entity is correctly judged morally superior to another if it is the case that, when valid moral standards are applied to both entities, the first fulfills ④ it to a greater degree than the second. Both entities, therefore, must fall within the range of application of moral standards. This would not be the case, however, if humans ⑤ were being judged superior to animals and plants, since the latter are not moral agents.

Just as animals and plants can be neither good nor bad scientists, engineers, critics, or Supreme Court justices, so they can be neither good nor bad moral agents. More precisely, it is meaningless to speak of them as morally good or bad. Hence it is meaningless to say either that they are morally inferior to humans or that humans are morally superior to them. I conclude that it is not false but simply confused to assert that humans are the moral superiors of animals and plants.

15. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

However, its suggestion that its AI is beginning to recognise one of the functions of silence in natural speech is problematic. It claims that: 'the AI has an actual understanding of this syntax ... Some voices, those trained with a few 'uh's and 'ah's in them, have shown to sometimes insert those vocal mannerisms during the pauses, like a real speaker might' (2024, n.p.). Yet, as we will hear, silence is not reducible to nor straightforwardly replaceable with such linguistic filler sounds and hesitation markers.

Such artificial 'pause fillers' as machine-generated supplements for silence may help to produce a more natural-sounding cadence in machine-generated speech patterns and so help to convince the AI's human interlocutors that they are engaging with another human.

- (A) Yet the AI's confusion when presented with substantial silences, and its understanding that short break tags are equivalent to vocal markers such as 'uh's' and 'ah's' indicate the AI's continuing preferences for sound over silence, for presence over absence.
- (B) AI's 'humanity' of silence emerges in these contexts not least because a short period of silence is likely to be interpreted as a 'pause for thought', therefore reinforcing the illusion that the machine is 'thinking' before responding, just as a human might.
- (C) However, the technical issues flagged in AI's poor handling of higher duration and frequency silences, no less than the machine inference that silence can be filled with relevant sounds in some conversational situations, are both significant. In this context at least, the AI may be starting to recognise silence not as an absence but as meaningful data.

16. 인쇄술(Printing)에 관한 다음 글의 내용과 일치하지 않는 것은?

Another merchant understood the local dialect and asked for some "eyren," as eggs were then known in this part of the country. "What sholde a man in thyse dayes now wryte," Caxton asked, "egges or eyren? Certaynly it is harde to playse euery man by cause [because] of dyuersite [diversity] and chaunge of langage." Later, the Great Bible of 1539 and the King James Bible of 1611 helped standardize the language and had a culturally unifying effect.

Standardization of information was an effect of printing; since it allowed exact reproduction of information in a way that manuscript copying did not. This is evident in the contrast between the travel logs of Marco Polo and those of Christopher Columbus. After his return from China in 1295, a century and a half before printing, Polo's narrative was copied in about 150 different manuscripts, with so many differences that we're not sure which version is authentic. In contrast, there is only one version of Christopher Columbus's letters about the exploration of the Caribbean in the 1490s, since they were fixed in printed form and widely distributed at the time they were written. So the certainty of accuracy was a way that printing was an improvement over the old oralmanuscript culture.

Printing itself became standardized in the early 1500s, making possible a new kind of non-linear access to information through title pages and tables of contents and page numbering systems. Other improvements included better type fonts such as roman and italic, and a standardized printing production process codified in books like Joseph Moxon's 1683 Handy Works or Pierre Fournier's 1764 Manuel Typographique.

Social impacts of expanded printing included the spread of humanism and individualism.

17. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Despite this need, only a small portion of the Earth's surface is suitable for farming due to limitations such as climate, topography, soil quality, and technology.

The origins of agriculture date back at least 22,000 years, when early humans began collecting wild grains as a food source.

Archaeological evidence suggests that various crops were being cultivated as early as 9500 BC in the Levant. (①) Over the millennia, continuous innovations have boosted agricultural productivity while reducing manual labor. (②) However, the growing global population will always demand more food. (③) It is projected that by 2050, the world's population will increase to 9.7 billion, which will require global food production to rise by at least 70% to meet demand. (④) Political and economic factors, including land ownership patterns, environmental laws, and population density, also influence agricultural land use. (⑤) In fact, the amount of land used for agriculture has been declining. In 2013, around 18.6 million square miles was used for food production, compared to 19.5 million square miles in 1991.

To meet the challenge of feeding more people with less land, precision agriculture (PA) offers a promising solution. PA uses advanced techniques and technologies to improve agricultural efficiency, increase food production, reduce environmental impact, and lower costs (Gawande et al. 2023). This site-specific approach collects precise data for each field location and adjusts farming practices accordingly.

18. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

If you are going to compare languages, it helps ① to start with something that you are confident you can find in all languages. Take for example signs or words for mother and father. If we add other family relationships to this category—son, grandmother, aunt, brother-in-law, cousin—we are defining the category of kinship terminology. Comparative typological studies of kinship terminology have discovered ② that languages have labels for some but not all family relationships. And the probability that a specific kin relationship has a label is predictable ③ based on the other kinship terms in the language. For example, all languages have a core set of kinship terms—like mother and father. By contrast, terms for less central category members are often ④ built up from the core terms—like mother-in-law and step-father. If we compare languages across the world, we can ask what kinship relationships are typically ⑤ expressing with core terminology, and what relationships are expressed by modifying the core terminology.

Wilkinson (2009) compared 40 signed languages from across the world to identify recurrent patterns in the kinship terms in these languages. She found considerable variability in the number of kinship terms across languages with as few as six terms in Croatian Sign Language and as many as 58 terms in Nepali Sign Language. One pattern that stood out across these languages was that terms for daughter and son were more likely to be a semantic extension of the terms for girl and boy or woman and man than signs for grandmother and grandfather or mother and father.

19. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

There are several ways ① that participants in a make-believe can communicate things about the fictional world to other participants. Sometimes these messages are ② emitted naturally as a result of full participation in the fictional world—i.e., something said or done by a player while in character communicates some things that are fictional of that world. For example, a child pretending to be Peter Pan might gasp and draw a plastic knife. This might be sufficient to communicate that fictionally one of Peter's enemies, such as Captain Hook, ③ approaching. These in-character behaviors can be insufficient, however, to maintain the necessary amount of common ground about ④ what is fictional in the world of the make-believe. At these times participants often come at least partly out of character ⑤ to give other participants the information they need. For example, it would be important to avoid confusion about who is playing which character: "No, you're Captain Hook, and I'm Peter Pan!"

People can also signal to others that a make-believe is occurring and invite them to play along. As above, these meta-communications can happen in or out of character. Breaking character, when it does happen, can be subtle: a sarcastic tone of voice or meaningful glance could suffice. For plays, films, and television shows, the context alone of the screen or stage could be enough of a signal to viewers that the actors are only behaving that way for the purposes of the production.

20. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

At sufficiently high temperatures, no molecules can exist, and there is a fourth state of matter, plasma. Plasmas can be described as ionized gases where the elements are stripped of their electrons and there is a chaotic mixture of ionized nuclei and negative electrons. Plasma is the most common state of matter in the universe, and we observe it in our terrestrial experience through the solar aurora, the northern lights, neon lamps, and flames.

Our intuition about states of matter comes from our experience on Earth's surface, where the pressure is uniformly low and variations in temperature cause changes in the state of matter from solid to liquid to gas. Therefore, when we think of melting or boiling or the creation of plasma, we intuitively assume it reflects an increase in temperature. This bias comes from the fact that we live in a very constant pressure environment. Even small changes in pressure, such as those we experience when under water or on high mountaintops, can have very large effects on our metabolism. But the pressure changes we experience are trivial compared to the pressure range of the overall planetary environment. Since pressure is controlled by the weight of overlying material, pressures increase rapidly with depth. Imagine the pressures generated by the weight of rock a mile thick! For this reason a planet's pressure ranges are enormous—from essentially zero pressure in space to pressures of millions of atmospheres in planetary interiors.

A diagram illustrating this reality is presented in Figure 4-3, showing states of matter for two common substances—water and carbon dioxide. At a temperature of 25°C and pressure of one bar, water of course is liquid and CO₂ is gas. At these pressures CO₂ is never a liquid—at very cold temperatures, it is solid, and upon heating, it sublimates from solid to gas. But at higher pressures, liquid CO₂ is stable—as is the case in many fire extinguishers, for example, where the CO₂ is strongly compressed.

* intuition: 직관 ** metabolism: 신진대사

[지문출처: *How to Build a Habitable Planet: The Story of Earth from the Big Bang to Humankind* (Charles H. Langmuir, Wallace Broecker)]

According to the passage, our biased perception that state changes are primarily driven by temperature stems from our (A) _____ pressure environment, which overlooks the (B) _____ variations in pressure that actually exist within a planet.

- | (A) | (B) |
|---------------|-------------|
| ① stable | immense |
| ② variable | significant |
| ③ constant | negligible |
| ④ predictable | limited |
| ⑤ low | consistent |

Self-experiments can take a scientific question raised by conventional research and try to answer it, as in A. N.'s randomness work. Conventional research may suggest solutions to practical problems; self-experiments can ask if the solutions work. S. R.'s weight experiments, for instance, were partly inspired by animal studies. Conventional research may also help show that a surprising observation in a self-experiment is correct, e.g., S. R.'s sleep and mood research.

When self-experimentation and conventional experiments are both possible, the difference between them often ① resembles the difference between learning and showing: Self-experiments are better for discovery but worse for convincing others ② that the solution is helpful or the answer is correct. Of course, most scientists want to do both—discover something and convince others of their discovery. Thus, psychologists should consider ③ to do both self-experiments and conventional ones. The best use of resources may often be self-experiments followed by conventional ones. The researcher begins with self-experiments that, if all goes well, find large effects and/or generate and eliminate many hypotheses. This exploratory and theory-building phase lasts until a convenient solution or large effect is ④ found. Only then would the researcher begin conventional experiments, ⑤ using the optimized parameters.

* parameter: 매개 변수 ** optimize: 최적화하다

22. 다음 밑줄 친 부분의 영영 풀이가 문맥상 적절하지 않은 것은?

Each of these forms of visualization evolved a distinct visual vocabulary, with periods of experimentation and innovation producing visualization schemes that most modern historians now find completely transparent, with earlier visual dead ends now completely forgotten. Daniel Rosenberg and Anthony Grafton have recently shown how experimentation with designs of chronologies helped produce the modern streamlined edition of the time line and information-rich variants by the end of the eighteenth century.

The emergence of the social sciences in the nineteenth century and the ability to work with large datasets created demand for new ways of visualizing information. Processed numerical information was best expressed in tables, charts, and graphs. Mathematics, natural sciences, and social sciences that employed statistics were at the ① forefront of the development of charts and graphs. History was a consumer, not a designer, of most of these new visualizations—and mostly a ② sparing consumer at that, since economic and social history lagged behind political history as an area of research. Simple charts and graphs were not difficult to interpret, and their visual ③ conventions became part of what any ordinary reader would be expected to follow. As statistical analysis became more ④ sophisticated, the visualizations that resulted became more and more central to the argument. In some cases, the visualization made interpretation possible. These success stories demonstrated the worth of statistical analysis and visualization. Perhaps the most notable example is John Snow's map of the ⑤ incidence of cholera in an 1854 London outbreak, which helped plot the source of the outbreak at a single water pump in the neighborhood. Snow's cholera map showed that visualizations could serve as both narrative and analysis. Authors began to experiment with ways of using visual clues to tell complex stories about events, increasing the amount of information that could be conveyed in a small space and thereby overcoming the limitations of two dimensions in print.

A noteworthy example of innovative presentation occurs in Charles Joseph Minard's 1869 Carte Figurative des pertes successives en hommes de l'Armée Française dans la campagne de Russie 1812-1813, which portrays the advance and retreat of French troops in Russia on a scale map, showing the changing size of the force due to death and desertion through the thickness of the line representing the force.

* sparing: 절제된 ** lag: 뒤처지다

[지문출처: Writing History in the Digital Age (Jack Dougherty, Kristen Nawrotzki)]

- ① forefront: the leading or most important position or place
- ② sparing: using or giving something in very small amounts
- ③ conventions: a way in which something is usually done, especially within a particular area or activity
- ④ sophisticated: having a high degree of complexity and developed with great skill
- ⑤ incidence: a situation where a particular person or group is treated unfairly

23. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Alden was a youthful ambitious painter who dreamed of becoming the most prominent creator in the realm. He traveled a long distance to meet Master Roman, a legendary artist known for capturing nature's spirit. When Alden arrived at Roman's cabin, his heart pounded with thrill and dread. He knocked on the aged wooden door, holding his artworks to his chest. A brief moment later, an elderly man with eyes as deep as the sea opened the door. Without saying a single word, Roman gestured for him to enter. On entering, Alden enthusiastically spread his finest scenery sketches, waiting for compliments. However, Roman scanned them swiftly and ① dismissed them. Not giving any feedback that Alden expected, he walked to his yard. He picked up a simple, gray rock and handed it to Alden. "Paint this," Roman said. "But forget your elaborate techniques. Paint what is genuinely inside." Alden felt a surge of ② disappointment. He thought the expert was mocking him. How could a boring, hideous rock have anything inside? Unwillingly, Alden took the stone to his room. For days and nights, he stared at it, annoyed. It seemed just a bumpy, gray chunk. But as he watched the stone in the shifting illumination of sunrise and sunset over time, something ③ transformed. Alden noticed the gray stone held small fragments of quartz catching light and spots of dried moss telling a tale of time. The more he looked at the stone, the more ④ monotony he found in the uneven surface. Captivated, he grabbed his brush and began to mix colors. A few days later, Alden returned with his canvas to Master Roman. His hands shook as he handed the canvas to the expert. After the expert looked at the stone in Alden's painting for a ⑤ lengthy period, a gentle smile broke across his face. In Alden's view, the stone sparkled with concealed shades of blue, green, and gold. "To be an artist is not to invent, but to observe," the expert said gently. Alden realized the message was not about painting, but about seeing.

* quartz: 석영 ** moss: 이끼

정답 및 해설

1	②	2	③	3	④	4	④	5	③
6	②	7	⑤	8	④	9	③	10	①
11	②	12	①	13	③	14	④	15	③
16	⑤	17	④	18	⑤	19	③	20	①
21	③	22	⑤	23	④				

1) [정답] ②

[해설] 주어진 글은 스포츠 센터의 주차장 보수 공사로 인한 이용 제한을 알리며, 회원들에게 임시 주차장 이용을 정중히 요청하고 발생할 수 있는 불편함에 대해 진심으로 사과하는 내용이다. 따라서 필자의 어조로 가장 적절한 것은 ② '사과하고 요청하는'이다.

- ① 익살스럽고 재치 있는
- ③ 비판적이고 냉담한
- ④ 축제 분위기이고 명랑한
- ⑤ 낙담하고 두려워하는

[출제의도] 필자의 어조를 파악한다.

2) [정답] ③

[해설] 주어진 문장은 Owen의 맞은편에 누군가 쟁반을 놓는 상황을 묘사하고 있다. ③의 앞까지는 Owen이 혼자 앉아 긴장하며 남은 수업을 걱정하는 내면의 독백이 이어지고, ③ 뒤에서는 'It was a classmate...'라는 문장에서 쟁반을 놓은 인물의 정체기가 밝혀지는 구조이다. 따라서 긴장된 분위기가 전환되며 새로운 인물이 등장하는 시점인 ③이 가장 적절한 위치이다.

[출제의도] 주어진 문장이 들어갈 위치를 파악한다.

3) [정답] ④

[해설] 새로운 환경에서 목표 달성에만 지나치게 몰입하여 기존의 인간관계나 활동을 줄이는 것은 스트레스에 대처할 수단(remedies)을 없애는 실수라는 내용의 글이다. 전환기에 어려움이 닥쳤을 때, 우리 삶의 다른 요소들이 스트레스에 대응하여 균형을 잡아 주거나 이를 '상쇄해야' 문맥상 자연스럽다. 따라서 스트레스를 오히려 '강화한다'는 의미의 ④ 'strengthen'은 흐름상 적절하지 않으며, 이를 'counterbalance(상쇄하다)'와 같은 낱말로 고쳐야 한다.

[출제의도] 문맥에 맞지 않는 낱말을 찾는다.

4) [정답] ④

[해설] 지문에서 교사는 학생의 답변에 대해 동의나 반대를 나타내는 어떤 언어적, 신체적 표현도 하지 않음으로써 수용의 태도를 모델링할 수 있다고 언급했으므로, ④는 글의 내용과 일치하지 않는다.

[출제의도] 글의 세부 내용을 파악한다.

5) [정답] ③

[해설] 'separate'는 '분리된'이라는 뜻으로, ③의 영영폴 이인 'combined or connected together(결합되거나 함께 연결된)'는 이와 반대되는 개념이다. ① 익숙한: 무언가를 매우 잘 아는 ② 접근: 장소에 들어가거나 도달하는 방법 ④ 갈등: 사람이나 사물이 심각한 의견 차이나 논쟁에 휘말린 상황 ⑤ 간결한: 많은 정보를 명확하고 적은 단어로 전달하는

[출제의도] 핵심 어휘의 영영 정의를 통해 정확한 의미를 파악한다.

6) [정답] ②

[해설] 빈칸 뒤의 문장들에서 조명 스위치를 켜는 행위나 일몰의 언급 등 조명이 변화해야 하는 구체적인 근거(동기)들을 예시로 들고 있다. 또한 조명이 각 장면에서 무엇을 해야 하는지 질문해야 한다는 내용으로 보아, 조명 규가 단순히 발생하는 것이 아니라 '동기를 필요로 한다(need a motivation)'는 것이 가장 적절하다. ①기술 매뉴얼을 요구한다 ③아무런 예고 없이 발생한다 ④배우의 의상에 집중한다 ⑤관객의 반응에 의존한다.

[출제의도] 지문의 맥락을 파악하여 빈칸에 들어갈 말을 추론한다.

7) [정답] ⑤

[해설] 주어진 문장은 같은 방 안에서도 스피커의 위치나 청취자의 위치에 따라 소리가 달라진다는 추가적인 내용을 담고 있다. 이는 스피커를 설치한 방마다 소리가 달라진다는 내용 뒤에 오는 것이 적절하며, 악기 녹음 시의 유사한 사례를 소개하는 Similarly 앞인 ⑤에 들어가는 것이 가장 자연스럽다.

[출제의도] 글의 순서를 파악한다.

8) [정답] ④

[해설] ④ 피드백 요청(feedback requests)은 직접(in person) 행해지는 수동의 대상이므로 현재분사 making이 아닌 과거분사 made로 고쳐 써야 한다.

[출제의도] 어법상 맞지 않는 표현을 찾는다.

9) [정답] ③

[해설] 이 글은 물리학자 데니스 윌리엄 샤마의 일대기를 다루고 있는데, 영국 물리학회 회원 수가 과학 다큐멘터리의 인기로 인해 증가했다는 내용을 언급한 ③은 전체 흐름과 관계가 없다.

[출제의도] 글의 흐름과 무관한 문장을 추론한다.

10) [정답] ①

[해설] 주어진 글은 1850년 이전의 견습생 제도와 소규모 작업장 중심이었던 피아노 제조 방식이 산업 혁명을 거쳐 현대적 공장 시스템으로 전환되면서 생산 효율성, 품질, 전문화가 향상되었다는 내용이다. 따라서 글의 제목으로 가장 적절한 것은 ① '피아노 제조의 변화: 작업장에서 현대적 공장'이다.

② 미국에서 견습생 제도가 현대적 공장보다 뛰어났

던 이유

③ 미국 전역에 걸친 악기의 진화

④ 숙련된 제작자: 고품질 피아노를 생산하는 유일한 열쇠

⑤ 산업 혁명: 피아노 제작자를 위한 새로운 재료 발명

[출제의도] 글의 제목을 추론한다.

11) [정답] ②

[해설] 주어진 글은 전통적인 논문 기반 박사 과정의 좁은 연구 초점이 지식의 폭을 제한할 수 있다는 점을 지적하며, 이를 보완하기 위해 유럽 대학들이 도입하고 있는 구조화된 프로그램과 전문성 개발 기회에 대해 설명하고 있다. 지문에서 이러한 프로그램들이 연구와 교과 과정을 결합한다고 언급하고는 있지만, 연구와 교과 과정 사이의 균형을 결정하는 구체적인 기준이 무엇인지에 대해서는 알 수 없으므로 ② '이러한 프로그램에서 연구와 교과 과정의 균형을 결정하는 기준은 무엇인가?'라는 질문에는 답할 수 없다.

① 전통적인 박사 과정에서 좁은 초점의 잠재적인 단점은 무엇인가? (지식과 기술의 폭을 제한하고 다양한 경력 경로에 적응하거나 학제 간 과제를 해결하는 능력을 방해할 수 있다)

③ 구조화된 박사 과정의 커리큘럼에는 어떤 종류의 활동이 포함되는가? (교과 과정, 세미나, 워크숍, 인턴십 등이 포함된다)

④ 단일한 연구 초점이 학제 간 과제를 처리하는 학생의 능력에 어떤 영향을 미치는가? (그러한 능력을 잠재적으로 방해할 수 있다)

⑤ 박사 교육에 전이 가능한 기술 훈련을 포함하는 주요 목표는 무엇인가? (학생들에게 더 넓은 기술 세트를 제공하여 학제 너머의 다양한 경로를 더 잘 준비시키기 위함이다)

[출제의도] 글의 세부 내용을 파악한다.

12) [정답] ①

[해설] 주어진 글은 아동이 상상과 현실을 이성적으로 구분할 수 있음에도 불구하고, 공포와 같은 특정 감정이 개입되면 그러한 인지적 이해에 따라 행동하는 능력을 방해할 수 있다는 내용이다. 따라서 요약문의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은

① '감정들 - 방해하다'이다.

② 기억들 - 향상시키다

③ 감정들 - 강화하다

④ 관찰들 - 개선하다

⑤ 경험들 - 약화시키다

[출제의도] 글의 요약문을 완성한다.

13) [정답] ③

[해설] 필자는 미적 감수성이 사회적 경험을 풍부하게 하고 비판의 도구가 될 수 있음을 언급하며, 존 듀이의 이론을 빌려 예술을 삶과 분리하지 말고 일상적인 모든 경험 속에서 미적인 것을 발견해야 한다고 강조하고 있다. 따라서 필자의 주장으

로 가장 적절한 것은 ③이다.

[출제의도] 필자의 주장으로 가장 적절한 것을 찾는다.

14) [정답] ④

[해설] ④ 문맥상 valid moral standards를 가리키므로 단수 대명사 it이 아니라 복수 대명사 them으로 받아야 한다.

[출제의도] 어법상 맞지 않는 표현을 찾는다.

15) [정답] ③

[해설] AI가 침묵을 소리로 대체하려 한다는 주어진 글 뒤에, 이러한 인공적 채움이 인간 대화 상대로 하여금 AI가 '생각'하고 있다는 착각을 강화한다는 (B)가 온다. 그 뒤에 그러나(However) AI의 서툰 대응과 기술적 문제 역시 중요하다는 (C)가 이어지고, 마지막으로 이러한 특징들이 결국 AI가 침묵보다 소리를 선호함을 보여준다는 결론인 (A)가 오는 것이 자연스럽다.

[출제의도] 글의 순서로 가장 적절한 것을 배열한다.

16) [정답] ⑤

[해설] 인쇄술은 정보의 정확한 복제를 가능하게 하여 과거의 구전이나 필사 문화보다 정확성의 확실성 측면에서 개선된 방식이었다고 설명하고 있다. 따라서 필사 문화보다 퇴보한 방식이었다고 기술한 ⑤는 글의 내용과 일치하지 않는다.

[출제의도] 글의 세부 내용을 파악한다.

17) [정답] ④

[해설] 주어진 문장의 'this need(이러한 필요성)'는 바로 앞 문장에서 언급된 2050년까지 세계 인구 증가에 맞춰 식량 생산량을 최소 70%까지 늘려야 한다는 구체적인 필요성을 가리킨다. 따라서 식량 증산의 필요성을 역설한 내용 뒤에 오는 것이 자연스러우며, 이후 농경지 이용에 영향을 주는 추가적인 요인들과 실제 면적 감소 통계로 이어지는 흐름이 적절하므로 정답은 ④이다.

[출제의도] 문장의 위치를 파악한다.

18) [정답] ⑤

[해설] ⑤ 문장의 주어인 kinship relationships가 '표현되는' 수동의 대상이므로 능동형인 expressing을 과거분사인 expressed로 고쳐 써야 한다.

[출제의도] 어법상 맞지 않는 표현을 찾는다.

19) [정답] ③

[해설] ③ that절 내에서 주어는 one of Peter's enemies이고 이에 연결되는 술어 동사가 필요하다. 따라서 approaching을 시제에 맞는 동사인 is approaching으로 고쳐 써야 문장이 성립된다.

[출제의도] 문맥에 맞는 적절한 어법을 파악한다.

20) [정답] ①

[해설] 우리가 상태 변화가 주로 온도에 의해 일어난다고 편향되게 인식하는 이유는 우리가 '안정적인

(stable)' 압력 환경에 살고 있기 때문이며, 이는 행성 내부에서 실제로 존재하는 '거대한(immense)' 압력 변화를 간과하게 만든다는 내용의 글이다. 따라서 요약문의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은 ①이다. ② 가변적인 - 상당한 ③ 일정한 - 무시할 수 있는 ④ 예측 가능한 - 제한된 ⑤ 낮은 - 일관된

[출제의도] 글의 핵심 내용을 파악하여 요약문을 완성한다.

21) [정답] ③

[해설] ③ consider는 목적으로 동명사를 취하는 동사이므로, to do를 doing으로 고쳐 써야 한다.

[출제의도] 글의 맥락에 맞는 올바른 어법 사용 여부를 파악한다.

22) [정답] ⑤

[해설] incidence는 문맥상 질병 등의 '발생' 또는 '발생률'을 의미한다. 하지만 ⑤번의 풀이(불공평하게 대우받는 상황)는 'discrimination'이나 'injustice'에 가까운 설명이므로 적절하지 않다.

[출제의도] 영영 풀이의 적절성 여부를 판단한다.

23) [정답] ④

[해설] Alden이 돌을 자세히 관찰하면서 그 안에서 '우아함(elegance)'과 '이야기'를 발견했다는 흐름이므로, '단조로움(monotony)'을 발견했다는 표현은 문맥상 어색하다. 해당 자리에는 elegance 또는 beauty와 같은 긍정적인 단어가 오는 것이 적절하다.

[출제의도] 문맥 상 흐름에 어긋나는 단어를 찾는다.
