When moving into a new situation, many people decide that they need to master what's new. To this end, they reduce their connections to people or activities that might distract them from their goal. But that is a mistake. Being too focused can lead to becoming unidimensional—you have few remedies to the microstresses that are inevitably bombarding you at that time. So when things are tough during such a transition, you have almost nothing else in your life to counterbalance the stress. Instead of staying laser-focused, use this transition as the jumping-off point for building new networks to shape the work you want to do and whom you want to do it with. *And use these transitions as times to reflect on the kinds of people you want to be part of your life outside work. Be intentional in building and revitalizing your circle of nonwork friends.*

4. 다음 글의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

A first step toward establishing a respectful classroom learning community is acceptance of all ideas and answers—regardless of any obvious errors. Rich mathematical discussions cannot occur if this expectation is not in place. We must remember that wrong answers are often rooted in misconceptions, and unless these ideas are allowed to be brought to the forefront, we cannot help students confront their thinking. Students who are in safe learning environments are willing to risk sharing an incorrect answer with their peers in order to grow mathematically. It is important to model and expect the acceptance of all ideas without derogatory comments. As educators we can model this by recording all answers to be considered without giving any verbal or physical expressions that indicate agreement or disagreement with any answer. The teacher may need to practice having a "blank face." Students look to teachers as the source of correct answers. Part of building a safe learning community is to ____ (A) ____ this source of knowledge to the students by equipping them to ____ (B) ____ the thinking behind their solutions.

If there is a large range of incorrect answers, it would be appropriate to have students discuss which answers are reasonable and which answers could be ruled out based on logic and number sense. This provides an excellent opportunity for students to estimate and further consider the relationships between the numbers.

7. 밑줄 친 (A)~(E) 중 어법상 적절한 것의 개수는?

Imagine that you are sitting near a noisy machine. Some sound radiates from the machine and travels directly to your ears. Because that direct sound does not strike a room surface, it is not affected by the room. (However, its high-frequency response will be slightly reduced as it travels through air.) On the other hand, other sound from the machine strikes a room surface and returns to your ears; that sound is affected by the surface characteristics.

Rooms have their own "sound" because they (A) impose their own characteristics on audio signals contained within them. It's actually kind of remarkable. Sound such as music (B) come from headphones will sound the same everywhere. No matter what acoustical environment we are in, the headphones sound the same. That's because the room is not part of that playback signal path. But sound such as music from a loudspeaker will sound different in every acoustical environment. Every room where you (C) to set up the loudspeaker will cause the sound you hear to be different—sometimes dramatically different; that is because the room is now part of the signal path. Also, in the same room, the loudspeaker will sound different when it is (D) placed in different locations in the room and it will sound different as you move around the room. Similarly, when you are recording a musical instrument, the sound you (E) receive at the microphone will be different in every room and the recorded sound will sound different as the instrument or the microphone is moved.

Clearly, acoustical environments such as rooms are a big deal.

We are familiar with the idea of an electrical signal passing through a black box that changes the signal passing through it. We can imagine that the box has knobs and buttons that let us manipulate the changes. A room operates the same way on an acoustic signal, and we can just as surely manipulate the changes it imposes. Instead of knobs and buttons, we use room size and geometry, glass fiber, drywall, carpet, ceiling tile, and other common and specialized construction materials to tune the room to the desired result.

* acoustical: 음향의

The Percentages of Consumers in the U.S. Who Were Likely to Respond, by Review Request Methods

Note: Multiple responses were allowed.

The chart above shows the ① proportions of shoppers in the U.S. who were willing to reply to four ② distinct feedback request approaches in 2023, 2024, and 2025. In every year, the proportion of shoppers who were willing to reply in an email was the greatest among the four approaches. In 2025, the proportions of shoppers who were willing to reply to each feedback request approach were ③ identical apart from those who were willing to reply in an email. In 2024, shoppers were more willing to reply to feedback requests made in person than to those made through social media. The ④ gap between the proportions of shoppers who were willing to reply in an email and in person was greater in 2024 than in 2023. The proportions of the shoppers who were willing to reply in a text message increased ⑤ annually from 2023 to 2025.

- ① proportion: a part, share, or number considered in comparative relation to a whole
② distinct: recognizably different in nature from something else of a similar type
③ identical: having some common features or qualities but not being exactly the same
④ gap: a difference, especially an undesirable one, between two views or situations
⑤ annually: happening or produced once a year or every year

9. 다음 글에 등장하고 있는 Dennis William Sciama의 성격으로 가장 적절한 것은?

Dennis William Sciama was born in Manchester, England, in 1926. He received an instruction in mathematics and physics at Malvern College. Despite his father's desire for him to take over the family company, Sciama chose to continue pursuing his academic path. After earning a doctoral degree in physics from the University of Cambridge in 1953, he became well-known for his studies on the cosmos. Early in his profession, Sciama supported the steady-state theory, which argued that the cosmos had no origin. However, when new proof against the theory appeared in the 1960s, he changed his perspective and accepted the Big Bang model. In 1991, he was awarded the Guthrie Medal for excellent contributions to experimental physics by the British Institute of Physics. Sciama's role as a mentor became known even outside academic societies. Afterwards, he was introduced in movies about his most famous student, Stephen Hawking, which made Sciama known to a broader public.

10. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

The Industrial Revolution did more than just invent new materials or machines. It invented a new process for manufacturing: the modern factory.

- (A) But even the largest piano makers of that time produced no more than 5-10 pianos per year per worker, as pianos were still made essentially one at a time. The development of a true piano factory occurred first in the United States, led by Jonas Chickering in Boston and later the Steinway family in New York City.
- (B) Prior to around 1850, most piano shops used an apprentice system in which a master builder taught younger workers the skills of the trade, usually over the course of many years. The larger piano shops did have specialists—for example, one person who specialized in soundboards, another who made hammers, and so on.
- (C) These factories led to improvements in both efficiency and quality. For example, one of the factories of the time had its own iron casting facility where it made its metal plates, which were thought to be the best available.

At the same time, the modern factory system led to further specialization and standardization. While specialty companies had already been established for some components, such as wire, new companies were formed that specialized in making felt, hammers, actions, tuning pins, and many other components.

11. 다음 글의 요지로 가장 적절한 것은?

Many doctoral programmes are incorporating professional development workshops, internships, and experiential learning opportunities to enhance students' employability and versatility (Cardoso et al., 2022).

As doctoral education continues to evolve, it will be essential for universities and policymakers to adapt and innovate to meet the evolving needs and aspirations of doctoral students and the broader research community.

In a thesis-based doctoral programme, students typically spend a significant amount of time and effort researching a specific topic. While this deep dive into a particular area allows for thorough exploration and understanding, it can also result in narrowing the focus. As students become deeply absorbed in their research, they may spend less time exploring related fields or acquiring skills outside their immediate area of study. Consequently, this singular focus may limit the breadth of knowledge and skills developed during the programme, potentially hindering students' ability to adapt to diverse career paths or address interdisciplinary challenges. Some universities in Europe have recognised the limitations of traditional thesis-based doctoral programmes and have started to implement more structured approaches. These structured programmes often combine research with coursework and training in transferable skills. By incorporating coursework, seminars, workshops and internships into the curriculum, they aim to provide students with a broader skill set and better prepare them for a variety of career paths beyond academia.

European universities are increasingly emphasising professional development and training opportunities for doctoral students. These opportunities may include workshops on communication skills, project management, entrepreneurship, ethics, and teaching pedagogy. By offering such training, universities aim to equip doctoral students with the skills and knowledge needed to succeed in academia, industry, government and other sectors.

12. 다음 글에서 전체 흐름과 관계 없는 문장은?

In addition, children understand that if a person thinks that something is the case, he or she will be more likely to act upon that mental state than if he or she is only imagining a particular outcome. For example, if a child thinks that a box really contains a toy, he or she will be more likely to eagerly rip the box open than if he or she is just fancifully imagining that the box contains a toy.

Research shows that, by age three, children understand that imaginary objects do not come to life. This is especially clear with respect to everyday objects—children know that even though they imagine a pencil in an empty box, the box will remain empty. However, emotion can sometimes disrupt this understanding, or at least its expression. ① That is, even though a child knows that monsters are not real, the thought of a monster under a bed might be enough to make a child refuse to go into his room at night. ② Indeed, research shows that children have a more difficult time displaying their understanding of the causal relations between imagination and reality when they are asked to pretend or imagine scary things, like monsters. ③ In one study, preschool children were shown an empty box and were asked to imagine a monster inside. ④ All children agreed that the box was empty. ⑤ Providing children with various educational materials and toys in the classroom environment is known to significantly improve their creative thinking abilities. However, when they were left alone with the box they exhibited fear and avoidance of it.

Although this behavior might suggest that children confuse fantasy and reality, one must consider that adults may engage in similar behaviors. For example, an adult might cover his or her eyes when watching a scary movie, or might cry while reading the tragic conclusion to a love story. These sorts of reactions suggest separate emotional and cognitive systems, and have led researchers to propose that emotional reactions to imaginary objects may develop independently of a child's understanding of the reality status of the entity.

13. 빈칸 (A), (B), (C)에 들어갈 말로 가장 적절한 것은?

Recognizing that the heart of the aesthetic lies in sensibility, I have claimed that developing the awareness and capacity of aesthetic sensibility leads to immensely broader and richer social experience. At the same time, through an awareness of negative aesthetics and the negative sublime, aesthetic sensibility provides a powerful tool for criticism by recognizing the human consequences of exploitative commercial and political practices.

Perhaps the best-known development to emerge from the liberation and expansion of aesthetic experience is the aesthetics of everyday life. Although there is presently a flowering of work on everyday aesthetics, the possibility of aesthetic gratification in ordinary objects and events has long been recognized, even if (A)_____ and dismissed by prevalent philosophical theory. Widely valued by poets, especially Romantic poets and those in Asian traditions, the aesthetic in everyday situations has also been recognized by novelists. It may be most convenient, though, to locate its contemporary intellectual origins in John Dewey's *Art as Experience*. In that book Dewey argued (B)_____ the separation of art from life by basing aesthetic experience on the biological and cultural conditions of human life. He located the aesthetic, not in an internalized awareness of sensation and feeling but in "a complete interpenetration of self and the world of objects and events." Further, Dewey maintained that "the aesthetic is the (C)_____ and intensified development of traits that belong to every normally complete experience."

I shall not attempt a chronology of the development of the present interest in the aesthetics of everyday life. Instead, let me mention some significant stages in its emergence. An important source came from the innovations that were occurring in the arts in the mid-twentieth century. A prime influence was the work of the American composer and theorist, John Cage. Experimental and innovative, Cage's interest in aleatoric (chance) music became widely known through his piano work of 1952, 4'33", which consisted in attending to the

chance sounds that occurred during that interval of time.

* gratification: 만족감

** interpenetration: 상호 침투

14. 다음 글의 요지로 가장 적절한 것은?

Because human existence has this moral dimension it exemplifies a higher grade of being than is to be found in the amoral, irresponsible existence of animals and plants. In traditional terms, it is freedom of the will and the moral responsibility that goes with it that together raise human life above the level of the beasts.

There is a serious confusion of thought in this line of reasoning if the conclusion drawn is understood as asserting that humans are morally superior to nonhumans.

One cannot validly argue that humans are morally superior beings on the ground that they possess, while others lack, the capacities of a moral agent. The reason is that, as far as moral standards are concerned, only beings that have the capacities of a moral agent can meaningfully be said to be either morally good or morally bad. Only moral agents can be judged to be morally better or worse than others, and the others in question must be moral agents themselves. Judgments of moral superiority are based on the comparative merits or deficiencies of the entities being judged, and these merits and deficiencies are all moral ones, that is, ones determined by moral standards. One entity is correctly judged morally superior to another if it is the case that, when valid moral standards are applied to both entities, the first fulfills them to a greater degree than the second. Both entities, therefore, must fall within the range of application of moral standards. This would not be the case, however, if humans were being judged superior to animals and plants, since the latter are not moral agents.

Just as animals and plants can be neither good nor bad scientists, engineers, critics, or Supreme Court justices, so they can be neither good nor bad moral agents. More precisely, it is meaningless to speak of them as morally good or bad. Hence it is meaningless to say either that they are morally inferior to humans or that humans are morally superior to them. I conclude that it is not false but simply confused to assert that humans are the moral superiors of animals and plants.

15. 밑줄 친 ㉠~㉣의 영영풀이로 적절하지 않은 것은?

However, its suggestion that its AI is beginning to recognise one of the functions of silence in natural speech is problematic. It claims that: 'the AI has an actual understanding of this syntax ... Some voices, those trained with a few 'uh's and 'ah's in them, have shown to sometimes insert those vocal mannerisms during the pauses, like a real speaker might' (2024, n.p.). Yet, as we will hear, silence is not reducible to nor straightforwardly replaceable with such linguistic filler sounds and hesitation markers.

Such artificial 'pause fillers' as machine-generated ㉠ supplements for silence may help to produce a more natural-sounding cadence in machine-generated speech patterns and so help to ㉡ convince the AI's human interlocutors that they are engaging with another human. AI's 'humanity' of silence emerges in these contexts not least because a short period of silence is likely to be interpreted as a 'pause for thought', therefore ㉢ reinforcing the illusion that the machine is 'thinking' before responding, just as a human might. However, the technical issues flagged in AI's poor handling of higher ㉣ duration and frequency silences, no less than the machine inference that silence can be filled with relevant sounds in some conversational situations, are both significant. In this context at least, the AI may be starting to recognise silence not as an absence but as meaningful data. Yet the AI's confusion when presented with ㉤ substantial silences, and its understanding that short break tags are equivalent to vocal markers such as 'uh's' and 'ah's' indicate the AI's continuing preferences for sound over silence, for presence over absence.

* cadence: 억양 ** interlocutor: 대화 상대

*** equivalent: 상응하는

16. (A), (B), (C)의 각 네모 안에서 문맥에 맞는 낱말로 가장 적절한 것은?

Another merchant understood the local dialect and asked for some "eyren," as eggs were then known in this part of the country. "What sholde a man in thyse dayes now wryte," Caxton asked, "egges or eyren? Certaynly it is harde to playse euery man by cause [because] of dyuersite [diversity] and chaunge of langage." Later, the Great Bible of 1539 and the King James Bible of 1611 helped standardize the language and had a culturally unifying effect.

Standardization of information was an effect of printing; since it allowed exact reproduction of information in a way that manuscript copying did not. This is (A) [evident / obscure] in the contrast between the travel logs of Marco Polo and those of Christopher Columbus. After his return from China in 1295, a century and a half before printing, Polo's narrative was copied in about 150 different manuscripts, with so many differences that we're not sure which version is (B) [authentic / counterfeit]. In contrast, there is only one version of Christopher Columbus's letters about the exploration of the Caribbean in the 1490s, since they were fixed in printed form and widely distributed at the time they were written. So the (C) [certainty / ambiguity] of accuracy was a way that printing was an improvement over the old oralmanuscript culture.

Printing itself became standardized in the early 1500s, making possible a new kind of non-linear access to information through title pages and tables of contents and page numbering systems. Other improvements included better type fonts such as roman and italic, and a standardized printing production process codified in books like Joseph Moxon's 1683 Handy Works or Pierre Fournier's 1764 Manuel Typographique.

Social impacts of expanded printing included the spread of humanism and individualism.

17. (A), (B), (C)의 각 네모 안에서 문맥에 맞는 낱말로 가장 적절한 것은?

The origins of agriculture date back at least 22,000 years, when early humans began collecting wild grains as a food source.

Archaeological evidence suggests that various crops were being cultivated as early as 9500 BC in the Levant. Over the millennia, continuous innovations have (A) [boosted / hindered] agricultural productivity while reducing manual labor. However, the growing global population will always demand more food. It is projected that by 2050, the world's population will increase to 9.7 billion, which will require global food production to rise by at least 70% to meet demand. Despite this need, only a (B) [small / vast] portion of the Earth's surface is suitable for farming due to limitations such as climate, topography, soil quality, and technology. Political and economic factors, including land ownership patterns, environmental laws, and population density, also influence agricultural land use. In fact, the amount of land used for agriculture has been (C) [expanding / declining]. In 2013, around 18.6 million square miles was used for food production, compared to 19.5 million square miles in 1991.

To meet the challenge of feeding more people with less land, precision agriculture (PA) offers a promising solution. PA uses advanced techniques and technologies to improve agricultural efficiency, increase food production, reduce environmental impact, and lower costs (Gawande et al. 2023). This site-specific approach collects precise data for each field location and adjusts farming practices accordingly.

18. 다음 글을 읽고 아래 질문에 대한 답으로 알맞은 것을 고르면?

If you are going to compare languages, it helps to start with something that you are confident you can find in all languages. Take for example signs or words for mother and father. If we add other family relationships to this category—son, grandmother, aunt, brother-in-law, cousin—we are defining the category of kinship terminology. Comparative typological studies of kinship terminology have discovered that languages have labels for some but not all family relationships. And the probability that a specific kin relationship has a label is predictable based on the other kinship terms in the language. For example, all languages have a core set of kinship terms—like mother and father. By contrast, terms for less central category members are often built up from the core terms—like mother-in-law and step-father. If we compare languages across the world, we can ask what kinship relationships are typically expressed with core terminology, and what relationships are expressed by modifying the core terminology.

Wilkinson (2009) compared 40 signed languages from across the world to identify recurrent patterns in the kinship terms in these languages. She found considerable variability in the number of kinship terms across languages with as few as six terms in Croatian Sign Language and as many as 58 terms in Nepali Sign Language. One pattern that stood out across these languages was that terms for daughter and son were more likely to be a semantic extension of the terms for girl and boy or woman and man than signs for grandmother and grandfather or mother and father.

* kinship: 친족 ** typological: 유형학의

[지문출처: *Understanding Signed Languages* (Erin Wilkinson, Jill P. Morford)]

Question: According to the passage, what is the relationship between 'core kinship terms' and 'less central members'?

- ① Core terms like 'mother' are usually derived from complex kinship terms like 'mother-in-law'.
- ② Less central members are always given unique, independent labels in every language regardless of core terms.
- ③ The existence of labels for distant relatives is completely random and cannot be predicted by core terms.

- ④ Central core terms often serve as the foundation for creating labels for less central family members.
- ⑤ All languages use the exact same modified terms to describe less central category members.

[연계문항 2026년 3월 교육청(고2) 38번]

19. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

There are several ways that participants in a make-believe can communicate things about the fictional world to other participants. Sometimes these messages are emitted naturally as a result of full participation in the fictional world—i.e., something said or done by a player while in character communicates some things that are fictional of that world. For example, a child pretending to be Peter Pan might gasp and draw a plastic knife. This might be sufficient to communicate that fictionally one of Peter's enemies, such as Captain Hook, is approaching. These in-character behaviors can be insufficient, however, to ----- . At these times participants often come at least partly out of character to give other participants the information they need. For example, it would be important to avoid confusion about who is playing which character: "No, you're Captain Hook, and I'm Peter Pan!"

People can also signal to others that a make-believe is occurring and invite them to play along. As above, these meta-communications can happen in or out of character. Breaking character, when it does happen, can be subtle: a sarcastic tone of voice or meaningful glance could suffice. For plays, films, and television shows, the context alone of the screen or stage could be enough of a signal to viewers that the actors are only behaving that way for the purposes of the production.

* make-believe: 가상 역할 놀이

** gasp: 숨을 헐떡이다

[지문출처: *Culturally Sustainable Social Robotics: Proceedings of Robophilosophy 2020* (Marco Norskov, Johanna Seibt, Oliver Santiago Quick)]

- ① strictly separate the actual world from the imagined one
- ② maintain the necessary amount of common ground
- ③ exaggerate their roles to enhance the play's realism
- ④ focus only on their own character's emotional state
- ⑤ evaluate the quality of other participants' performances

At sufficiently high temperatures, no molecules can exist, and there is a fourth state of matter, plasma. Plasmas can be described as ionized gases where the elements are stripped of their electrons and there is a chaotic mixture of ionized nuclei and negative electrons. Plasma is the most common state of matter in the universe, and we observe it in our terrestrial experience through the solar aurora, the northern lights, neon lamps, and flames.

Our intuition about states of matter comes from our experience on Earth's surface, where the pressure is uniformly low and variations in temperature cause changes in the state of matter from solid to liquid to gas.

- (A) Since pressure is controlled by the weight of overlying material, pressures increase rapidly with depth. Imagine the pressures generated by the weight of rock a mile thick! For this reason a planet's pressure ranges are enormous—from essentially zero pressure in space to pressures of millions of atmospheres in planetary interiors.
- (B) Therefore, when we think of melting or boiling or the creation of plasma, we intuitively assume it reflects an increase in temperature. This bias comes from the fact that we live in a very constant pressure environment.
- (C) Even small changes in pressure, such as those we experience when under water or on high mountaintops, can have very large effects on our metabolism. But the pressure changes we experience are trivial compared to the pressure range of the overall planetary environment.

A diagram illustrating this reality is presented in Figure 4-3, showing states of matter for two common substances—water and carbon dioxide. At a temperature of 25°C and pressure of one bar, water of course is liquid and CO₂ is gas. At these pressures CO₂ is never a liquid—at very cold temperatures, it is solid, and upon heating, it sublimates from solid to gas. But at higher pressures, liquid CO₂ is stable—as is the case in many fire extinguishers, for example, where the CO₂ is strongly compressed.

* intuition: 직관 ** metabolism: 신진대사

21. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Self-experiments can take a scientific question raised by conventional research and try to answer it, as in A. N.'s randomness work. Conventional research may suggest solutions to practical problems; self-experiments can ask if the solutions work. S. R.'s weight experiments, for instance, were partly inspired by animal studies. Conventional research may also help show that a surprising observation in a self-experiment is correct, e.g., S. R.'s sleep and mood research.

When self-experimentation and conventional experiments are both possible, the difference between them often resembles the difference between learning and showing: Self-experiments are better for discovery but worse for convincing others that the solution is helpful or the answer is correct. Of course, most scientists want to do both—discover something and convince others of their discovery. Thus, psychologists should consider doing both self-experiments and conventional ones. The best use of resources may often be self-experiments followed by conventional ones. The researcher begins with self-experiments that, if all goes well, find large effects and/or generate and eliminate many hypotheses. This exploratory and theory-building phase lasts until a convenient solution or large effect is found. Then the researcher uses self-experiments to find the procedural parameters (e.g., duration, time of day, intensity) that optimize the solution or maximize the effect. Only then would the researcher

* parameter: 매개 변수 ** optimize: 최적화하다

[지문출처: *Handbook of Research Methods in Human Operant Behavior* (Kennon A. Lattal, Michael Perone)]

- ① abandon self-experiments to focus on theoretical discovery
- ② begin conventional experiments, using the optimized parameters
- ③ simplify the research process by ignoring minor procedural variables
- ④ present the results of self-experiments as the final scientific proof
- ⑤ repeat the exploratory phase to eliminate all possible external variables

Each of these forms of visualization evolved a distinct visual vocabulary, with periods of experimentation and innovation producing visualization schemes that most modern historians now find completely transparent, with earlier visual dead ends now completely forgotten. Daniel Rosenberg and Anthony Grafton have recently shown how experimentation with designs of chronologies helped produce the modern streamlined edition of the time line and information-rich variants by the end of the eighteenth century.

The emergence of the social sciences in the nineteenth century and the ability to work with large datasets created demand for new ways of visualizing information. Processed numerical information was best expressed in tables, charts, and graphs. Mathematics, natural sciences, and social sciences that employed statistics were at the forefront of the development of charts and graphs. History was a consumer, not a designer, of most of these new visualizations—and mostly a sparing consumer at that, since economic and social history lagged behind political history as an area of research. Simple charts and graphs were not difficult to interpret, and their visual conventions became part of what any ordinary reader would be expected to follow. As statistical analysis became more sophisticated, the visualizations that resulted became more and more central to the argument. In some cases, the visualization made interpretation possible. These success stories demonstrated the worth of statistical analysis and visualization. Perhaps the most notable example is John Snow's map of the incidence of cholera in an 1854 London outbreak, which helped plot the source of the outbreak at a single water pump in the neighborhood. Snow's cholera map showed that visualizations could serve as both narrative and analysis. Authors began to experiment with ways of using visual clues to tell complex stories about events, increasing the amount of information that could be conveyed in a small space and thereby overcoming the limitations of two dimensions in print.

A noteworthy example of innovative presentation occurs in Charles Joseph Minard's 1869 Carte Figurative des pertes successives en hommes de l'Armée Française dans la campagne de Russie 1812-1813, which portrays the advance and retreat of French troops in Russia on a scale map, showing the changing size of the force due to death and desertion through the thickness of the line

representing the force.

* sparing: 절제된 ** lag: 뒤처지다

[지문출처: *Writing History in the Digital Age* (Jack Dougherty, Kristen Nawrotzki)]

- ① The 19th-century social sciences and large datasets led to a need for new information visualization.
- ② Natural sciences using statistics played a leading role in developing charts and graphs.
- ③ History was a proactive designer of most new visualizations during the 19th century.
- ④ As statistical analysis became advanced, visualizations became crucial to the arguments.
- ⑤ John Snow's map demonstrated that visualization can perform both narrative and analytical functions.

23. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Alden was a youthful ambitious painter who dreamed of becoming the most prominent creator in the realm. He traveled a long distance to meet Master Roman, a legendary artist known for capturing nature's spirit. When Alden arrived at Roman's cabin, his heart pounded with thrill and dread. He knocked on the aged wooden door, holding his artworks to his chest. A brief moment later, an elderly man with eyes as deep as the sea opened the door. Without saying a single word, Roman gestured for him to enter. On entering, Alden enthusiastically spread his finest scenery sketches, waiting for compliments. However, Roman scanned them swiftly and pushed them aside. Not giving any feedback that Alden expected, he walked to his yard. He picked up a simple, gray rock and handed it to Alden. "Paint this," Roman said. "But forget your elaborate techniques. Paint what is genuinely inside." Alden felt a surge of disappointment. He thought the expert was mocking him. How could a boring, hideous rock have anything inside? Unwillingly, Alden took the stone to his room. For days and nights, he stared at it, annoyed. It seemed just a bumpy, gray chunk. But as he watched the stone in the shifting illumination of sunrise and sunset over time, something changed. Alden noticed the gray stone held small fragments of quartz catching light and spots of dried moss telling a tale of time. The more he looked at the stone, the more elegance he found in the uneven surface. Captivated, he grabbed his brush and began to mix colors. A few days later, Alden returned with his

canvas to Master Roman. His hands shook as he handed the canvas to the expert. After the expert looked at the stone in Alden's painting for a lengthy period, a gentle smile broke across his face. In Alden's view, the stone sparkled with concealed shades of blue, green, and gold. "To be an artist is not to invent, but to observe," the expert said gently. Alden realized the message was -----

-----.

* quartz: 석영 ** moss: 이끼

- ① to show off his brilliant and fancy painting techniques
- ② to find a more beautiful and rare object than a gray rock
- ③ to realize that true art comes from the depth of perception
- ④ to understand that nature is too complex for human to paint
- ⑤ to focus on the feedback of the public rather than his own view

정답 및 해설

1	③	2	④	3	③	4	①	5	④
6	④	7	③	8	③	9	①	10	②
11	③	12	⑤	13	①	14	⑤	15	③
16	①	17	②	18	④	19	②	20	③
21	②	22	③	23	③				

1) [정답] ③

[해설] (A) 접속사 as 뒤에 주어와 be동사가 생략된 분사구문으로, '이미 공지된'이라는 수동의 의미를 나타내야 하므로 과거분사 announced가 적절하다.

(B) 수식받는 명사인 주차장이 특정 장소에 '위치한' 것이므로 수동의 의미를 지닌 과거분사 located가 명사를 수식해야 한다. 참고로 locate는 '~에 위치시키다'라는 뜻이다.

(C) '~에 전념하다'라는 의미의 관용 표현인 'be committed to'에서 to는 전치사이므로 뒤에 동명사가 와야 한다. 따라서 completing이 적절하다.

따라서 정답은 ③이다.

[출제의도] 어법상 적절한 표현을 찾는다.

2) [정답] ④

[해설] ①, ⑥, ⑦, ⑧은 모두 전학을 와서 긴장하고 있는 주인공인 Owen을 가리킨다. 반면 ④는 Owen에게 다가와 말을 걸며 이전에 펜을 빌려준 것에 대해 감사 인사를 전하고 있는 '학급 친구'를 가리킨다. 따라서 가리키는 대상이 나머지 넷과 다른 것은 ④이다.

[출제의도] 지칭하는 대상을 추론한다.

3) [정답] ③

[해설] 주어진 글은 새로운 환경에 처했을 때 목표에만 몰입하기 위해 사회적 관계를 줄이는 것은 미세한 스트레스에 대처할 수단을 없애는 실수이며, 오히려 다양한 네트워크를 구축하고 비업무적 관계를 활성화하여 스트레스를 상쇄하는 지지 기반을 마련해야 한다는 내용이다. 따라서 글의 제목으로 가장 적절한 것은 ③ '다양한 네트워크 구축하기: 전환기 스트레스에 대비한 안전망'이다.

① 숙달의 비결: 모든 외부적인 방해 요소를 제거하기

② 단면적인 집중이 경력 전환에 필수적인 이유

④ 업무 집중을 강화함으로써 미세한 스트레스를 관리하는 방법

⑤ 새로운 환경에서 사회적 고립의 필연성

[출제의도] 글의 제목을 추론한다.

4) [정답] ①

[해설] 안전한 학습 공동체를 만들기 위해 지식의 출처를

교사에서 학생으로 옮기고(transfer), 학생들이 자신의 해결책 뒤에 숨겨진 사고를 정당화(justify)하거나 방어할 수 있게 해야 한다는 내용이 적절하다. ② 속성으로 돌리다 - 숨기다 ③ 제한하다 - 평가하다 ④ 이전하다 - 버리다 ⑤ 위임하다 - 간과하다

[출제의도] 지문의 핵심 내용을 파악하여 적절한 어휘를 빈칸에 추론한다.

5) [정답] ④

[해설] 이 글은 서로 다른 특성을 가진 도시 간 여행객과 통근자의 동선을 분리하여 역 운영의 효율성을 높여야 한다는 내용이다. 역 내 사치품 상점의 수를 늘리는 것이 지역 경제를 활성화하고 고소득 여행객에게 선택권을 제공한다는 내용인 ④는 글의 전체적인 흐름인 '이용객 특성에 따른 동선 분리'와 관계가 없다.

[출제의도] 글의 흐름과 무관한 문장을 찾는다.

6) [정답] ④

[해설] 지문에서 버튼 큐(button cue)는 전통적인 뮤지컬에서 댄스 번호의 '끝(at the end of a dance number)'에 강도가 급격히 증가하는 것을 의미한다고 설명하고 있다. 따라서 시작될 때 강도를 높인다는 ④는 내용과 일치하지 않는다.

[출제의도] 글의 세부 내용을 파악한다.

7) [정답] ③

[해설] (B)는 주어 Sound를 수식하는 분사 형태인 coming이 되어야 하고, (C)는 관계부사 where 뒤에서 주어 you와 연결되는 술어 동사 set up이 되어야 하므로 적절한 것은 (A), (D), (E)로 총 3개이다.

[출제의도] 어법상 맞는 표현을 찾는다.

8) [정답] ③

[해설] identical은 '동일한, 똑같은'이라는 뜻으로 '완전히 똑같은'을 의미해야 하나, ③의 풀이는 '일부 특징을 공유하지만 완전히 같지는 않음'을 설명하고 있으므로 적절하지 않다. ① 전체와 비교하여 고려되는 부분, 몫 또는 수 ② 유사한 유형의 다른 것과 본질적으로 인식 가능하게 다른 ④ 두 견해나 상황 사이의 차이, 특히 바람직하지 않은 차이 ⑤ 일 년에 한 번 혹은 매년 발생하거나 만들어지는

[출제의도] 글 속 단어의 영영풀이를 파악한다.

9) [정답] ①

[해설] 데니스 샤마는 자신이 지지하던 '정상 상태 우주론'에 반하는 새로운 증거가 나타나자, 자신의 기존 관점을 바꾸어 '빅뱅 모델'을 받아들였다. 이는 지적으로 개방적이고 유연한 태도를 보여주므로 가장 적절한 성격은 ① '유연한'이다. ② 고집 센 ③ 물질주의적인 ④ 무관심한 ⑤ 소심한

[출제의도] 글 속 등장인물의 성격을 파악한다.

10) [정답] ②

[해설] 현대적인 공장 시스템의 발명을 언급한 주어진 글 뒤에는 1850년 이전의 구체적인 제조 방식인 견습생 제도를 설명하는 (B)가 이어진다. (B)에 이어 당시 작업장들의 낮은 생산량이라는 한계점과 이를 극복한 미국 피아노 공장의 출현을 다룬 (A)가 연결되며, 마지막으로 (A)에서 언급된 '이러한 공장들(These factories)'이 가져온 성과와 전문화를 상술하는 (C)가 오는 것이 가장 자연스럽다. 따라서 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은 ②이다.

[출제의도] 글의 순서를 파악한다.

11) [정답] ③

[해설] 주어진 글은 전통적인 논문 중심의 박사 과정이 특정 주제에만 깊이 몰입하게 하여 지식의 폭을 좁히고 다양한 진로로의 진출을 어렵게 만드는 한계가 있음을 설명한다. 이를 보완하기 위해 유럽의 대학들이 워크숍, 인턴십, 전이 가능한 기술 훈련 등을 포함한 구조화된 프로그램을 도입하여 학생들의 취업 능력과 다재다능함을 높여 노력하고 있다는 내용으로 글의 요지로 가장 적절한 것은 ③이다.

[출제의도] 글의 요지를 추론한다.

12) [정답] ⑤

[해설] 주어진 글은 아동이 상상과 현실을 인지적으로 구분할 수 있음에도 불구하고, 공포와 같은 감정이 개입할 때 이러한 인지가 방해받아 상상 속 존재에 대해 실제적인 반응을 보이게 된다는 내용이다. 빈 상자에 괴물이 있다고 상상하게 한 실험의 과정과 그에 따른 아이들의 반응을 설명하는 흐름 속에서, 갑자기 '교실 환경에서 교육 자료와 장난감을 제공하는 것이 창의적 사고력을 향상시킨다'는 내용을 언급한 ⑤는 글의 전체적인 흐름과 관계가 없다.

[출제의도] 글의 흐름과 무관한 문장을 추론한다.

13) [정답] ①

[해설] (A)는 일반적인 철학 이론에 의해 일상 미학이 무시되었다는 맥락이므로 '강등된(degraded)'이 적절하고, (B)는 예술과 삶의 분리에 반대했다는 의미이므로 '반대하여(against)'가 적절하며, (C)는 미적인 것이 명료해진 발달 형태라는 의미이므로 '명료해진(clarified)'이 적절하다. ⑤ 간과된 - ~에 찬성하여 - 모호해진

[출제의도] 빈칸에 적절한 표현을 추론한다.

14) [정답] ⑤

[해설] 도덕적 우월성이라는 개념은 도덕적 행위자들 사이에서만 성립하는 것이기에, 도덕적 행위 능력이 없는 동식물과 인간을 비교하여 인간이 더 우월하다고 주장하는 것은 논리적 오류라는 내용이다. 따라서 글의 요지로 가장 적절한 것은 ⑤이다.

[출제의도] 글의 요지로 가장 적절한 것을 찾는다.

15) [정답] ③

[해설] ③ reinforce는 '강화하다'라는 의미로, 어떤 감정이나 생각을 '더 강하게(stronger)' 만드는 것을 뜻한다. 보기의 '더 약하게 하거나 덜 확실하게 만들다(weaker or less certain)'는 반대되는 의미이므로 적절하지 않다.

[출제의도] 영영풀이로 적절하지 않은 것을 찾는다.

16) [정답] ①

[해설] 인쇄술이 정보의 정확한 복제와 표준화를 가능하게 했다는 내용의 글이다. (A) 마르코 폴로와 크리스토퍼 콜럼버스의 여행 기록을 대조해 보면 이러한 효과가 분명하게 드러나므로 '분명한'이 적절하다. (B) 마르코 폴로의 기록은 필사본 사이에 차이가 너무 많아 어느 판본이 진짜인지 확실하지 않다는 맥락이므로 '진짜의'가 적절하다. (C) 인쇄술이 과거의 방식보다 개선된 점은 정확성에 대한 확실성을 제공했다는 것이므로 '확실성'이 적절하다. 따라서 정답은 ①이다. ② 분명한 - 가짜의 - 모호함 ③ 모호한 - 진짜의 - 모호함 ④ 모호한 - 가짜의 - 확실성 ⑤ 분명한 - 진짜의 - 모호함

[출제의도] 문맥상 적절한 어휘를 찾는다.

17) [정답] ②

[해설] 농업 혁신이 생산성을 높여왔으나, 인구 증가로 인한 식량 수요 급증에도 불구하고 농사 가능한 토지는 제한적이며 실제로 농경지 면적이 감소하고 있다는 내용의 글이다. (A) 지속적인 혁신이 농업 생산성을 높여왔다는 맥락이므로 boosted가 적절하며, (B) 여러 제한 요소로 인해 지구 표면의 적은 부분만이 농사에 적합하다는 맥락이므로 small이 적절하고, (C) 1991년에 비해 2013년의 농경지 면적 수치가 줄어들었으므로 감소하고 있다는 의미인 declining이 적절하다. 따라서 정답은 ②이다. ① 높였다 - 작은 - 확장되는 ③ 높였다 - 광대한 - 감소하는 ④ 방해했다 - 작은 - 확장되는 ⑤ 방해했다 - 광대한 - 감소하는

[출제의도] 문맥상 적절한 어휘를 찾는다.

18) [정답] ④

[해설] 모든 언어에는 '어머니', '아버지'와 같은 핵심 친족 용어가 있으며, '장모'나 '의붓아버지'처럼 덜 중심적인 구성원을 나타내는 용어는 대개 이러한 핵심 용어를 바탕으로 형성된다는 내용의 글이다. 따라서 질문에 대한 답으로 가장 적절한 것은 ④ '중심적인 핵심 용어는 종종 덜 중심적인 가족 구성원을 위한 명칭을 만드는 기초 역할을 한다'이다. ① '어머니'와 같은 핵심 용어는 대개 '장모'와 같은 복잡한 친족 용어에서 파생된다 ② 덜 중심적인 구성원들은 핵심 용어와 상관없이 모든 언어에서 항상 독특하고 독립적인 명칭이 주어진다 ③ 먼 친척을 위한 명칭의 존재는 완전히 무작위적이며 핵심 용어로 예측할 수 없다 ⑤ 모든 언어는 덜 중심적인 범주 구성원을 설명하기 위해 정확히 동일한 수정된 용어를 사용한다.

[출제의도] 글의 세부 내용을 파악한다.

19) [정답] ②

[해설] 배역 안에서의 행동만으로는 가상 놀이 세계에 대해 참여자들이 서로 알고 있는 공통된 정보나 기반이 충분하지 않을 수 있다는 문맥이 되어야 하므로, 뒤이어 나오는 '배역에서 벗어나 필요한 정보를 제공한다'는 내용과 자연스럽게 연결된다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ② '필요한 정도의 공통 기반을 유지하기'이다. ① 실제 세계와 상상된 세계를 엄격히 분리하기 ③ 놀이의 현실감을 높이기 위해 역할을 과장하기 ④ 자신의 캐릭터의 감정 상태에만 집중하기 ⑤ 다른 참여자들의 수행 능력을 평가하기

[출제의도] 빈칸에 들어갈 적절한 어구를 추론한다.

20) [정답] ③

[해설] 지구 표면에서 온도의 변화가 상태 변화를 일으킨다는 주어진 문장 뒤에는, 그로 인해 우리가 상태 변화를 온도의 증가로만 생각하는 편향을 갖게 된다는 내용의 (B)가 와야 한다. (B) 다음에는 우리가 겪는 미세한 압력 변화가 신진대사에는 큰 영향을 줄지라도 전체 행성 환경의 압력 범위에 비하면 사소하다는 대조적 내용인 (C)가 이어지고, 마지막으로 행성 내부의 거대한 압력이 발생하는 원리와 그 범위를 설명하는 (A)가 오는 것이 자연스럽다. 따라서 글의 순서로 가장 적절한 것은 ③이다.

[출제의도] 글의 논리적 흐름에 맞게 단락의 순서를 배열한다.

21) [정답] ②

[해설] 자기 실험을 통해 최적의 매개변수를 찾아낸 이후의 단계는 타인을 설득하기 위한 공식적인 검증 단계인 전통적 실험을 시작하는 것이라는 흐름이 되어야 한다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ② '최적화된 매개변수를 사용하여 전통적인 실험을 시작할'이다. ① 이론적 발견에 집중하기 위해 자기 실험을 포기할 ③ 사소한 절차적 변수를 무시함으로써 연구 과정을 단순화할 ④ 자기 실험의 결과를 최종적인 과학적 증거로 제시할 ⑤ 모든 가능한 외부 변수를 제거하기 위해 탐색 단계를 반복할

[출제의도] 논리적 흐름을 고려하여 빈칸에 들어갈 적절한 내용을 추론한다.

22) [정답] ③

[해설] 지문에서 "History was a consumer, not a designer, of most of these new visualizations"라고 명시되어 있다. 즉, 역사는 시각화의 설계자가 아니라 소비자였으며, 그마저도 절제된(sparing) 소비자였다고 했으므로 '주도적인 설계자(proactive designer)'였다는 설명은 내용과 일치하지 않는다.

[출제의도] 글의 세부 내용을 파악한다.

23) [정답] ③

[해설] 지문의 마지막에서 "메시지는 그리는 것이 아니라 보는 것에 관한 것(not about painting, but about seeing)"이라고 언급된다. 따라서 빈칸에는 진정한

예술은 기법이 아니라 '지각(인식)의 깊이'에서 나온다는 내용인 'realize that true art comes from the depth of perception'이 가장 적절하다.

[출제의도] 글의 전체 흐름을 바탕으로 빈칸에 적절한 표현을 추론한다.
