영 어

이 책의 구성과 특징

본 교재는 고등학교 영어과 교육과정 성취 기준의 달성 정도와 대학에서 수학하는 데 필요한 영어 사용 능력을 측정하는 대학수학능력시험을 준비하는 데 도움을 주고자 제작되었으며, 교육과정에 부합하는 내용으로 구성되어 있다. 특히 학생들의 읽기 능력 신장을 목적으로 다양한 주제·소재 분야의 글과 정보를 제시하고 있으며, 교육과 정상의 어휘 범주를 고려하여 개발되었다. '영어 I'과 '영어 II' 교과서를 통해 익힌 기본 개념을 중심으로 본 교재를 활용하여 실제 응용력을 키워 나간다면, 교육과정 성취 목표 도달과 함께 대학수학능력시험 대비에 크게 도움이 될 것으로 기대된다.

Dear students,

I am Amanda Clark, the school club director, and I am writing to you about our school clubs. Over the last few semesters, there have been requests for more diverse school clubs. For this reason, the school decided to expand the number of clubs for extracurricular activities. This provides students with an opportunity to make additional clubs. Students can make any type of club based on their various interests, such as hip-hop, K-pop dancing, or coding. Therefore, I am encouraging you to submit a proposal for a new club that you would like to create. Please turn this in to my office by the end of this week. I look forward to seeing your great ideas.

Best regards,
Amanda Clark

Gateway

출제 유형을 중심으로 구성된 유형편과 다양한 주제나 소재의 글을 중심으로 구성된 주제·소재편의 Gateway를 통해, 해당 유형 및 주제·소재에 부합하는 2026학년도 수능 혹은 모의평가 기출 문항을 제시하여 수능의 각 유형 및 다양한 주제·소재별 문항에 대비하는 능력을 높이하고자 하였다.

Solving Strategies

유형편의 Gateway를 통해 소개된 기출 문항의 답을 도출해 가는 과정을 단계별로 제시함으로써 학습자의 유형별 문제 해결 능력을 신장하고자 하였다.

Solving Strategies

STEP 1 글의 주요 어휘를 파악하고 글쓴이와 글의 목자가 어떤 관계인지를 추론하여 글의 주제를 파악한다.

주요 어휘	school clubs, expand the number of clubs, make additional clubs, submit a proposal
글쓴이	Amanda Clark (the school club director)
글의 독자	students
글의 주제	동아리 개설 제안서 제출 독려

STEP 2 글의 세부 내용을 파악한다.

* ~, there have been requests for more diverse

Academic Vocabulary by Topic

주제·소재편에 소개된 주제 및 소재와 관련하여 읽기 지문에서 주로 다루어지는 필수 어휘를 영영 풀이와 예문을 통해 익히고, 간단히 복습해 볼 수 있도록 하였다.

Academic Vocabulary by Topic

- **migration** 이주, 이동 (the movement of people or animals from one region to another)
Economic hardship forced the **migration** of families from villages to urban areas.
경제적 어려움이 가족들의 마을에서 도시 지역으로의 이주를 강요했다.
- **territory** 지역, 영토 (a particular area / an area of land under the control of a ruler, country, or group)
Tourists often gather in the shopping **territory** near the city center.
관광객들은 흔히 도심 근처의 쇼핑 지역에 모인다.
- **revolutionize** 혁신을 가져오다 (to completely change something in a way that is very important)
The internet has **revolutionized** the way people communicate.
인터넷은 사람들이 의사소통하는 방식에 혁신을 가져왔다.
- **referent** 지시 대상 (the thing that a word, phrase, or symbol refers to)
In the sentence "She loves apples," the **referent** of "She" is Mary.
"She loves apples,"라는 문장에서 "She"의 지시 대상은 Mary이다.
- **deceive** 속이다 (to make someone believe something that is not true)
Kevin tried to **deceive** the guards by wearing a disguise. Kevin은 변장을 하고 경비원을 속이려고 했다.
- **generosity** 관대함 (the quality of being kind and giving more than necessary)
Susan's **generosity** toward the poor inspired many others.
가난한 이들에 대한 Susan의 관대함은 많은 이들에게 영감을 주었다.
- **mutual** 상호 간의 (experienced or done by each of two or more parties)
The two tribes developed **mutual** respect through years of cooperation.

Exercises

26005-0002

Dear Parents,

At Greenwood High School, we take great pride in the cultural diversity that enriches our community. We are very pleased to share with you our special new project, a recipe book, created to celebrate the traditions and flavors of families from around the world. This unique collection features 100 recipes from 26 countries, highlighting beloved dishes passed down through generations. It offers a special chance to explore global cuisine and share meaningful moments with your children. We encourage you to try some of these recipes together over the summer. You can download this online recipe book from our school website. Food brings us together, and this project reflects the joy and unity that diversity brings to our school. Thank you, as always, for your continued support.

Warm regards,
Dr. Helen Brooks
Principal, Greenwood High School

Exercises

각 강에서 다루어지는 문제 유형이나 주제·소재에 적합한 다양한 종류의 지문을 활용하여 읽기 문제를 제시하였다. 문제 풀이에 더욱 효과적으로 집중할 수 있도록 지문의 단어와 어구를 따로 떼어 ‘영단어숙어’의 별책으로 제시하였다.

TEST 1

01 다음 글의 목적으로 가장 적절한 것은?
26005-0003

Dear Pollet Toys,

We are considering ordering 50 striped 2-inch plastic balls for the city-wide Youth Activity Day on June 14. According to your website, the balls are normally sold in individual plastic and cardboard packages. However, we will not need packaging or transportation for our order as we can pick up the balls, packed loose in cardboard boxes, directly from your warehouse. Given these circumstances, I would like to request a discount on our order. I believe that a discount of at least 25% would be reasonable. If you agree to this, please confirm the agreement in writing. If not, I would appreciate a call at 555-5555 as soon as possible so we can reach a mutually agreeable arrangement. I look forward to your positive response and hope that we can finalize the order details soon.

Sincerely,
Granville Community Center

Words & Phrases in Use

- ☐ semester 학기
- ☐ additional 추가의
- ☐ turn in ~을 제출하다

- ☐ diverse 다양한
- ☐ submit 제출하다

- ☐ extracurricular activity 과외 활동
- ☐ proposal 제안서

Solving Strategies

STEP 1 글의 주요 어휘를 파악하고 글쓴이와 글의 독자가 어떤 관계인지를 추론하여 글의 주제를 파악한다.

주요 어휘	school clubs, expand the number of clubs, make additional clubs, submit a proposal
글쓴이	Amanda Clark (the school club director)
글의 독자	students

글의 주제	동아리 개설 제안서 제출 독려
-------	------------------

STEP 2 글의 세부 내용을 파악한다.

- ~, there have been requests for more diverse school clubs.
- 더 다양한 동아리에 대한 요청이 있었음
- ~, the school decided to expand the number of clubs for extracurricular activities.
- 학교에서는 과외 활동을 위한 동아리 수를 확대하기로 함
- Students can make any type of club based on their various interests, ~.
- 학생들은 다양한 관심사를 바탕으로 어떤 종류의 동아리든 개설할 수 있음
- ~, I am encouraging you to submit a proposal for a new club that you would like to create.
- 만들고 싶은 새로운 동아리에 대한 제안서를 제출해 주기를 권함

STEP 3 글의 주제와 세부 내용을 종합하여 글의 목적을 파악한다.

더 다양한 동아리에 대한 요청이 있어서 학교에서는 동아리 수를 확대하기로 했으니, 만들고 싶은 새로운 동아리에 대한 제안서를 제출해 달라고 학생들을 독려하는 내용이다.

→ 따라서 글의 목적으로 가장 적절한 것은 ② ‘동아리 개설 제안서 제출을 독려하려고’이다.

Dear Professor Langford,

First of all, we apologize for contacting you during the holiday season. We understand that this is a busy time, but as the revision deadline of your manuscript (December 27th) is quickly approaching, we kindly ask for your cooperation in addressing the reviewers' comments as thoroughly as possible within the limited time available. The reviewers have carefully evaluated your manuscript and provided insightful and critical feedback. To help you revise, we have summarized the key points raised by both reviewers. Please review these comments carefully and submit a revised version of your manuscript. We are confident that incorporating these suggestions will significantly improve the manuscript and provide stronger support for your main claims. We hope that the revised manuscript will satisfy the reviewers and be accepted in our journal. Thank you for your attention and cooperation.

Best regards,

Nora Ellison, Associate Editor

다음 글의 목적으로 가장 적절한 것은?

To whom it may concern,

Before I get to my main point, I'd like to mention a past experience with your store. A year ago, I ordered my wedding bouquet from you, and my husband, Nicholas, had promised me David Austin roses. However, on my wedding day, I received standard roses instead. Although I briefly considered filing a complaint about the mistake, I chose to focus on enjoying my special day. Yesterday, to celebrate our one-year wedding anniversary, my husband ordered David Austin roses from your store again. However, the flowers I received today were lifeless, spotted, and browning upon arrival. This time, I believe it's only fair to ask you to take action to resolve this matter. I am not asking for compensation for the flowers from a year ago, but I do expect a refund for this order. To resolve this issue, I would appreciate a full refund. I look forward to your response.

Sincerely,
Cheryl

다음 글의 목적으로 가장 적절한 것은?

Dear Mr. Johnson,

Have you “settled into” your new job by now, and do you still feel as enthusiastic about it as you did at the beginning? Of course, any job has its tiresome tasks, but all in all, from what you told us, it sounds like a good match for you. We’re writing to ask when we can expect repayment of the \$1,500 loan for your car. We were glad to help you with the purchase of your car so that you’d have transportation back and forth to your new job. You agreed to pay all, or at least half, of the loan by June. If you have decided that you cannot repay the total \$1,500 at once, we understand. But we do need to receive at least half that amount within the next 2 or 3 weeks. We hope you are satisfied with the car you chose. We, too, thought it was a good buy. Please let us know how things are going.

Sincerely,

Joseph Brown

다음 글에 드러난 Sophie의 심경 변화로 가장 적절한 것은?

“Where could it be?” Sophie asked herself. It had been more than ten years since she had last visited the area where she had grown up. The village had changed a lot over time. Uncertain, she awkwardly looked around at her surroundings. She walked the narrow streets of the village, unsure about which way to go. Suddenly, Sophie saw a familiar sight. “Yes, this must be it,” she thought. In front of her was a wall with flowers painted on it. Although the colors were now faded, the familiar shapes on the wall were the same ones she had painted with her father as a child. Sophie nodded, smiled brightly, and walked toward the gate. At last, she had finally found the house she had grown up in.

- ① confused → pleased
- ② confident → embarrassed
- ③ thrilled → anxious
- ④ relieved → nervous
- ⑤ bored → excited

Words & Phrases in Use

☐ awkwardly 어색하게

☐ faded 색이 바랜

☐ surroundings 주변

☐ nod 고개를 끄덕이다

☐ sight 광경, 풍경

Solving Strategies

STEP 1 등장인물에게 일어난 일을 중심으로 상황을 파악한다.

- Sophie가 자신이 자라난 지역을 마지막으로 방문한 이후로 십 년이 넘는 시간이 흘렀다.
It had been more than ten years since she had last visited the area where she had grown up.
- Sophie는 마을의 좁은 골목길을 걸었지만, 어느 방향으로 가야 할지 확신하지 못했다.
She walked the narrow streets of the village, unsure about which way to go.
- 마침내, Sophie는 자신이 자라난 집을 드디어 찾아냈다.
At last, she had finally found the house she had grown up in.

STEP 2 등장인물의 심경을 추측할 수 있는 표현을 찾는다.

- 확신이 서지 않아, 그녀는 어색하게 주변을 둘러보았다.
Uncertain, she awkwardly looked around at her surroundings.
- Sophie는 고개를 끄덕이고, 환하게 미소 지으며, 문 쪽으로 걸어갔다.
Sophie nodded, smiled brightly, and walked toward the gate.

STEP 3 등장인물이 처한 상황과 심경 관련 표현을 종합적으로 고려하여 등장인물의 심경 변화를 추론한다.

Sophie는 자신이 자라난 지역을 마지막으로 찾은 지 십 년이 넘어 다시 방문했지만, 시간이 흐르며 마을이 많이 변해 어느 방향으로 가야 할지 확신하지 못하고 있었다. 그러던 중 그녀가 어린 시절 아버지와 함께 그렸던 꽃 그림이 있는 벽을 발견하고 환하게 미소 지으며 마침내 자신이 자라난 집을 찾아낸 상황이다.

→ 따라서 Sophie의 심경 변화로 가장 적절한 것은 ① ‘혼란스러워하는 → 기쁜’이다.

- ② 자신감 있는 → 당황한
- ③ 아주 신이 난 → 걱정하는
- ④ 안도한 → 초조한
- ⑤ 지루해하는 → 흥분한

01
26005-0007

다음 글에 드러난 'I'의 심경 변화로 가장 적절한 것은?

It was the day I had been preparing for. I drove for an hour and a half to apply for a visa. My heart was racing, but I felt ready. That same day, I helped three people who didn't know English by translating for the immigration officer. Two of them were lucky to get their visas. Then I heard my name called. Believing things were going smoothly, I made my way to the counter. I showed my documents and property papers to prove that I would return home after visiting my children. Unfortunately, the officer, who had smiled when I was helping her, suddenly turned serious. She ignored my papers and put a red stamp on my application. I didn't have a chance to say a word. I felt as if a heavy rock was pressing down on my mind. I didn't expect to hear her words of rejection. I felt dizzy, and my eyes were full of tears. I couldn't see anything at that moment.

- | | |
|--------------------------|-------------------------|
| ① proud → ashamed | ② excited → regretful |
| ③ confused → thankful | ④ concerned → satisfied |
| ⑤ hopeful → disheartened | |

02
26005-0008

다음 글에 드러난 'I'의 심경 변화로 가장 적절한 것은?

After a few nights, we ventured out on a hike to 16,000 feet. The group members were all experienced, so I couldn't understand why they were climbing so slowly — what I thought was a ridiculous pace. Having trained hard for this, I was in the best shape of my life. And, being the rookie, I wanted to prove myself to the group. Why not show off my superior conditioning? So up front I went. Then, as we approached 16,000 feet, I suddenly began to feel dizzy. Not long after, I was staggering. The group had to take my pack. In a matter of minutes, I became a basket case, needing assistance just to walk. On the way down to the hut, I could barely keep in a straight line because of the nausea, headache, and dizziness. Now all I felt was guilt for becoming a burden to the group. I wished I hadn't pushed myself so hard.

* rookie: 신참자 ** stagger: 비틀거리다 *** basket case: 완전 무능력자

- | | |
|----------------------------|---------------------------|
| ① pleased → alarmed | ② anxious → relieved |
| ③ confident → regretful | ④ delighted → indifferent |
| ⑤ disappointed → satisfied | |

03

26005-0009

다음 글에 드러난 Francis Pohan의 심경 변화로 가장 적절한 것은?

Francis Pohan sat at the organ in his Borneo home, a smile on his face as the hymn he had practiced for weeks flowed smoothly under his fingers. The melody blended with the soft sounds of the jungle, filling him with happiness. The organ, his most precious possession, was a source of comfort and joy, especially in these uncertain times. But his peace was interrupted by the distant roar of engines breaking the calm. Soldiers appeared on the jungle road, their boots loud on the dirt as they approached, weapons hanging loosely over their shoulders. Francis' heart raced; it was wartime, and soldiers often took what they wanted. Whispering urgently to his sister, Ellen, he led her to hide behind a tall tree, its thick trunk shielding them. Peeking out, Francis stepped outside carefully and looked at the soldiers walking toward their home. Their loud voices and heavy footsteps filled the quiet jungle. His mind raced with prayers, hoping they would remain unseen.

* hymn: 찬송가 ** shield: 보호하다 *** peek: (몰래) 엿보다

① excited → bored

② fearful → relieved

③ pleased → frightened

④ relaxed → envious

⑤ hopeful → disappointed

04

26005-0010

다음 글에 드러난 Vera의 심경 변화로 가장 적절한 것은?

Vera couldn't wait for her car to get fixed, but that was going to require longer than initially expected. Unfortunately, that meant relying on the bus for her commute. To add to the cruel irony, it hadn't stopped raining for the past three days. It was already past 7 PM when she stepped off the bus, cold and soaked to the bone, having left her umbrella at the gym. Her place was just one block down the street, but it felt like ten miles in this weather. Her legs moved on their own, and suddenly, the Cups & Blossoms' bell was ringing above her head. The warm, floral scent wrapped around her like a blanket, but it was another kind of welcome that surprised her — a smile from the café owner, soft and unassuming. She was also polite enough not to ask why Vera looked so tired, which was appreciated. Vera now seemed to realize what she had truly needed. Just a friendly face to ease the weight she carried.

* floral: 꽃의

① ashamed → grateful

② indifferent → satisfied

③ curious → disappointed

④ exhausted → comforted

⑤ encouraged → frustrated

밑줄 친 made a lot of work less sticky가 다음 글에서 의미하는 바로 가장 적절한 것은?

Digital platforms have made a lot of work less sticky. As work becomes ever more modularised, commoditised and standardised, and as markets for digital work are created, ties between service work and particular places can be disconnected. While the business process of outsourcing that emerged in the 1990s allowed large companies to take advantage of a ‘global reserve army’ by moving their call centres to cheap and distant labour markets, cloudwork changes the volume and granularity at which geographically non-proximate work can take place. A small business in New York can hire a freelance transcriber in Nairobi one day and New Delhi the next. No offices or factories need to be built, no local regulations are observed, and — in most cases — no local taxes are paid. The switch in the production network of work happens by simply sending some emails or clicking some buttons on a digital work platform. And, in this way, the employer leaves behind no material traces in the places where it was once an employer.

* commoditise: 상품화하다 ** granularity: 과립상(顆粒狀)

- ① settled the locational dilemma of the global markets
- ② elevated the spatial flexibility in conducting business
- ③ weakened the geographical expansion of local business
- ④ relieved the strict legal processes of regional outsourcing
- ⑤ allowed business to be less complicated in its hiring process

Words & Phrases in Use

- | | |
|--|--|
| ☐ standardise 표준화하다 | ☐ outsourcing 아웃소싱(자체적으로 하던 일을 외부 용역이나 부품으로 대체하는 것) |
| ☐ emerge 등장하다 | ☐ reserve army (산업)예비군 |
| ☐ non-proximate 가까이 있지 않은 | ☐ geographically 지리적으로 |
| ☐ regulation 규정 | ☐ transcriber 전사(轉寫) 작업자, 녹취를 글로 옮기는 사람 |
| | ☐ observe 준수하다 |
| | ☐ trace 흔적 |

Solving Strategies

STEP 1 글의 핵심 문장을 통해 요지를 파악한다.

- 핵심 문장: ~, ties between service work and particular places can be disconnected.
- 요지: 서비스 노동과 특정 장소 사이의 연결이 끊어질 수 있음

STEP 2 글의 전체 흐름을 파악한다.

- ▣ 도입: 디지털 플랫폼은 많은 일을 덜 끈끈하게 만들었음
- ▣ 요지: 일이 모듈화, 상품화, 표준화되고, 디지털 노동을 위한 시장이 만들어짐 → 서비스 노동과 특정 장소 사이의 연결이 끊어질 수 있음
- ▣ 전개: 클라우드 노동으로 인한 변화
 - 뉴욕의 기업이 하루는 나이로비, 다음 날은 뉴델리의 근로자를 고용할 수 있음
 - 사무실이나 공장을 지을 필요가 없고, 현지 규정을 준수하지 않고, 현지 세금을 내지 않음
 - 노동 생산 네트워크의 전환이 버튼을 몇 개 클릭하는 것으로 이루어짐
- ▣ 결론: 고용주는 한때 고용주였던 장소에 물질적 흔적을 남기지 않음

STEP 3 글의 요지와 관련하여 밑줄 친 부분의 함축적인 의미를 추론한다.

밑줄 친 부분은 이후의 글의 내용을 비유적으로 표현한 것으로, 클라우드 노동으로 인해 기업의 업무가 특정 장소에 고정되지 않게 되었다는 것을 나타내고 있다.

→ 따라서 밑줄 친 부분이 글에서 의미하는 바로 가장 적절한 것은 ② '사업 수행에 있어 공간적 유연성을 높였다'이다.

- ① 글로벌 시장의 입지 관련 딜레마를 해결했다
- ② 지역 사업의 지리적 확장을 약화했다
- ③ 지역 아웃소싱의 엄격한 법적 절차를 완화했다
- ④ 기업의 고용 절차가 덜 복잡해지도록 허용했다

01
26005-0012

밑줄 친 cheated God이 다음 글에서 의미하는 바로 가장 적절한 것은?

Even outdoors, although climate (including temperature) is usually regarded as beyond the control of man, localized temperature control is sometimes effective on a microclimate scale. Vancouver, Canada, is a few miles north of the 49th parallel, about 60 miles farther north than Minot, North Dakota, with its legendary harsh winter temperatures. But constant foehn winds off the Pacific Ocean make Vancouver winters mild and wet, although sunshine is scant. When I had a garden there in the late 1940s, a neighbor used to say that I “cheated God” to bring in my lettuce and tomatoes earlier than anyone else. The bed in which the vegetables grew was banked toward the south at approximately 50 degrees, and the area between the plants was covered with flat stones, gathered from the nearby beach, to maximize soil heating from the weak late winter–early spring sun.

* parallel: 위도선 ** foehn: 뫄(산에서 내리 부는 건조하고 따뜻한 바람) *** scant: 부족한

- ① prayed to get more vegetables than anyone else
- ② produced many more crops in spite of strong winds
- ③ confronted the severe climate with the latest technology
- ④ helped others to overcome the harsh weather conditions
- ⑤ made a warmer microclimate using strategic gardening methods

02

26005-0013

밑줄 친 build a cathedral이 다음 글에서 의미하는 바로 가장 적절한 것은?

Energy can always be injected into an organization to motivate people to do things. Bonuses, promotions, other carrots, and even a few sticks can get people to work harder, for sure, but the gains are, like all manipulations, short-term. Over time, such tactics cost more money and increase stress for employee and employer alike, and eventually will become the main reason people show up for work every day. That's not loyalty. That's the employee version of repeat business. Loyalty among employees is when they turn down more money or benefits to continue working at the same company. Loyalty to a company trumps pay and benefits. And unless you're an astronaut, it's not the work we do that inspires us either. It's the cause that we come to work for. We don't want to come to work to build a wall; we want to come to work to build a cathedral.

* tactic: 책략, 전술 ** trump: 능가하다 *** cathedral: 대성당

- ① promote religious beliefs in the workplace
- ② focus on personal financial gain from work
- ③ achieve perfection in every detail of the job
- ④ work towards a higher purpose or meaningful cause
- ⑤ follow orders without questioning the overall situation

03
26005-0014

밑줄 친 We are indeed trapped in this particular vehicle of history가 다음 글에서 의미하는 바로 가장 적절한 것은?

In the early 1960s the great American writer James Baldwin wrote: “People are trapped in history, and history is trapped in them.” He was speaking to race when he penned those words. But the statement is equally true if the word “people” is replaced with “all of life on Earth, present and past,” for each strand of DNA, in each of our cells, is an ancient record of biological history, written in simple code and passed down from generation to generation. One could say that DNA is nothing *but* history, one with a physical manifestation that was slowly blended and accumulated over countless eons by the most pitiless of all phenomena — natural selection. DNA is a history that *is* inside us — and yet one that is our master as well, the blueprint for our bodies, and dictator of what we *will* pass on to our children, gifts that can be blessings — or deadly time bombs. We are indeed trapped in this particular vehicle of history as much as it is trapped in us.

* strand: 가닥, 올 ** manifestation: 구현(물) *** eon: 억겁(億劫)

- ① We evolve beyond biology by developing history, language, and tools.
- ② History is repeated within the genetic and social constraints we pass down.
- ③ We are born and raised as social beings with a sense of interdependence.
- ④ We are shaped by DNA, which influences our traits, destiny and descendants.
- ⑤ Through natural selection, species are locked in the endless cycle of adaptation.

04

26005-0015

밑줄 친 shakes us to the core가 다음 글에서 의미하는 바로 가장 적절한 것은?

People may not think critically for a variety of reasons, such as laziness and inability, but fear is a big one. Why is that? People don't want to think not just because it's hard, but also because they're afraid it will make them question their long-held beliefs. Your students most likely do want to think about things that can be very controversial, like politics, ethics, and philosophy. But probe even deeper. Once we start thinking deeply, long-held assumptions are challenged. Thought makes us worry that we'll lose our balance and have to look at the world in a different way. We worry about thinking because we care about what we and other people think. Even the most far-fetched ideas have an effect on the world. Non-Euclidean geometry and symbolic logic are about as abstract as thinking can get, but you can't understand Einsteinian gravity without the first and run computers without the second. Thinking is important to us, to others, and to the world we live in. This is one reason why we are so afraid of it: it shakes us to the core.

* probe: (면밀히) 조사하다 ** far-fetched: 억지스러운 *** non-Euclidean geometry: 비(非)유클리드 기하학

- ① pressures us into accepting abstract theories that lack real-world applications
- ② discourages us from engaging with others due to fear of being misunderstood
- ③ challenges the established beliefs that shape our understanding of the world
- ④ leads us to develop emotional reactions that hinder logical decision-making
- ⑤ causes us to view others' beliefs as superior to those we have long held

다음 글의 요지로 가장 적절한 것은?

A sport ecosystem exists based on the type and rate of coopetition existing. Coopetition is defined as “the simultaneous pursuit of cooperation and competition among firms to leverage strategically important resources for superior value creation purposes”. It is a useful way to understand the dynamic nature of sport businesses which need to collaborate for resource efficiency purposes but potentially compete with each other. This special relationship should be managed properly due to trust and confidence issues being paramount. It can be challenging to be collaborative and competitive in sport as they involve different forms of behaviour. This means a careful balancing act may be required in terms of the amount of emphasis placed on each activity. Often sport managers will try to be more competitive due to performance reasons and less collaborative. By necessity they may need to share information but do so in a cautious manner. This means it might be better to have plans in place about how to pursue both simultaneously. This will ensure one is not neglected at the expense of the other.

* simultaneous: 동시의 ** paramount: 최고의

- ① 스포츠 산업에서는 협력과 경쟁 사이의 균형 잡힌 접근이 요구된다.
- ② 협력에 기반한 경쟁을 위해서 스포츠 정신 함양 교육이 필수적이다.
- ③ 스포츠에서는 성과를 중요시하기 때문에 협력을 과소평가하기 쉽다.
- ④ 스포츠 산업에서는 효율적 자원 활용을 위한 전략이 필요하다.
- ⑤ 스포츠 산업에서의 성취는 경쟁을 필연적으로 수반한다.

Words & Phrases in Use

- | | | |
|---|---|---|
| ☐ ecosystem 생태계 | ☐ define 정의하다 | ☐ pursuit 추구 |
| ☐ leverage 활용하다 | ☐ superior 보다 높은 | ☐ potentially 잠재적으로 |
| ☐ involve 수반하다 | ☐ balancing act 균형 잡기, 갈등 조정 | ☐ performance 성과 |
| ☐ cautious 신중한, 조심하는 | ☐ ensure 확실히 하다 | ☐ at the expense of ~을 대가로 |

Solving Strategies

STEP 1 핵심 어구를 찾아 도입부에 나타난 중심 개념을 파악한다.

- 스포츠 생태계는 협력과 경쟁을 동시에 추구하는 관계(협조적 경쟁, coopetition) 위에서 작동함
- 스포츠 생태계에서 협력(cooperation)과 경쟁(competition)의 동시성과 균형이 중요함을 알 수 있다.

STEP 2 글에 나타난 구체적 내용을 파악한다.

- ~ the dynamic nature of sport businesses which need to collaborate for resource efficiency purposes but potentially compete with each other.
- 스포츠 사업체들은 자원 효율성 목적을 위해 협력해야 하지만, 서로 경쟁해야 하는 역동성을 지님
- This special relationship should be managed properly ~.
- 이러한 (협력과 경쟁의) 관계는 적절히 관리되어야 함
- It can be challenging to be collaborative and competitive in sport ~.
- 협력적이면서 경쟁적인 것은 어려울 수 있음
- ~ a careful balancing act may be required in terms of the amount of emphasis placed on each activity.
- 협력과 경쟁에 두는 강조의 정도 면에서 주의 깊은 균형 잡기가 필요함
- ~ one is not neglected at the expense of the other.
- 어느 하나가 다른 하나를 대가로 소홀히 다루어지지 않도록 해야 함

STEP 3 글의 내용을 종합하여 중심 내용과 가장 일치하는 것을 찾는다.

- 스포츠 사업체들은 서로 협력하면서도 경쟁하고, 협력과 경쟁 사이의 신중한 균형이 필요하며, 어느 하나가 다른 하나를 대가로 소홀히 다루어지지 않도록 해야 한다는 내용의 글이다.
- 따라서 글의 요지로 가장 적절한 것은 ① ‘스포츠 산업에서는 협력과 경쟁 사이의 균형 잡힌 접근이 요구된다.’이다.

01

다음 글의 요지로 가장 적절한 것은?

There's a saying that "you can't eat information." That may be so, but the food we eat today is the fruit of thousands of years of increasingly high-quality information — the knowledge of how to farm — what seeds, what tools and how to use them, what times of year, what irrigation, what sequence of one crop after another on the same land. What we eat is solar energy, filtered, concentrated, and distilled through the lens of human knowledge. The energy the Earth receives from the sun each year has remained more or less constant through all of human civilization. What's allowed us to flourish is our increasingly sophisticated knowledge of how to capture an ever-growing but still tiny fraction of that energy in a form that can fuel our bodies. Every step in the advancement of our knowledge has brought with it an increase in the amount of energy we can tap into.

* irrigation: 관개(법), 물을 끌어들이м ** distill: 증류하다 *** tap into: ~을 활용하다

- ① 인류는 환경이 주는 역경을 공동체의 지혜로 극복했다.
- ② 인류는 에너지 활용에 관한 지식의 축적을 통해 번영했다.
- ③ 지속적인 품종 개량은 농업 생산성 향상에서 커다란 역할을 했다.
- ④ 역사적으로 에너지를 낭비한 문명은 항상 비극적 운명을 맞이했다.
- ⑤ 농업 지식의 발전은 인류의 에너지 소비를 감소시키는 데 기여했다.

02

26005-0018

다음 글의 요지로 가장 적절한 것은?

Increased community engagement by professional journalists, on their own, will not solve the problem of making the news more relevant to everyone because traditional news organizations already have abandoned many communities, leaving behind news deserts. In those places, citizens must take up the responsibility for discovering information, holding the powerful accountable, and telling the news for themselves and their neighbors. The democratization of information — through the disruptions caused by computers and the internet — allows citizens to retake control of local news in ways that never have existed before, and it calls them to take greater care in the gathering and dissemination of what they discover or think they know. Journalism, perhaps like never before, belongs to the people rather than to professional journalists, wealthy publishers, or even corporate shareholders. The same technology that has shifted the balance of power toward the people gives them the tools to act as broadcasters and publishers of information essential to their immediate community — and, more critically, to serve as gatekeepers to information for other people around them.

* dissemination: (정보나 지식 등의) 전파

- ① 뉴스 생산 주체의 변화로 미디어 활용 교육이 중요해지고 있다.
- ② 뉴스의 공개 시간과 방식은 시민의 반응에 지대한 영향을 미친다.
- ③ 저널리즘의 상업화는 언론인의 뉴스 보도 선택권을 통제하고 있다.
- ④ 기술을 통한 정보의 민주화는 일반 시민의 언론인 역할을 가능케 한다.
- ⑤ 일반 시민과 전문 언론인 간의 활발한 소통은 민주 사회의 발전을 이끈다.

03 다음 글의 요지로 가장 적절한 것은?
26005-0019

It is a myth that all ideas are equally valid, even those with little or no objective proof. The existence of science is the commitment to objective truth. After all, science is true: fire is hot, the wheel is efficient, birds and planes can fly, we've landed on a comet and traveled to the Moon, antibiotics treat illness, and immunizations keep us from getting sick. These accomplishments are made possible by objective truths. A plausible theory can, and frequently does, push science forward. However, an intuition must be followed with testing that confirms or disproves its veracity. If a theory is disproved, one should consider it as a reason to reject or alter the hypothesis, not a justification to just keep firmly holding to the hypothesis because you are instinctively wedded to it. Critical thinking is an absolute must, and we must respect evidence. It's the only reason for anyone to trust anything about reality. Without testing and evidence, intuition is useful, but it is never the ultimate word.

* plausible: 그럴듯한 ** veracity: 진실성 *** be wedded to: ~에 집착하다

- ① 과학적 탐구에서 직관은 객관적 증거 못지않은 역할을 한다.
- ② 직관은 과학적 검증을 거쳐야 객관적 사실로 인정된다.
- ③ 과학적 성과는 대부분 예상하지 못한 우연의 소산이다.
- ④ 과학은 지식을 탐구하고 기술은 그 지식을 응용한다.
- ⑤ 호기심은 과학 이론 형성의 가장 중요한 동기이다.

다음 글의 요지로 가장 적절한 것은?

If you suffer from social angst, awkwardness, or dread, know that this is a perfectly normal response. No matter what it looks like, a lot of people are dealing with internal anxiety in social situations. But it is actually possible to build your social muscle and use it to boost your connections — and your anxiety is giving you clues to what icebreakers and lifelines other people might be grateful for you to extend. Truly listen to what your anxiety is signaling to you about where you feel uncertain or insecure, and practice empathy by offering a hand to others who might be in the same boat. Remember that flipping anxiety into compassion is something inherent in you — it is, in fact, what your anxiety was designed to do for you. Together, compassion and empathy can buffer against bad anxiety. You can use your anxiety to be more outward-facing. The outcome? The spread of compassion for your fellow human beings, other species, and the planet!

* angst: 불안 ** buffer: 완화하다

- ① 불안을 극복하려면 타인의 평가에서 벗어나려는 의지가 필요하다.
- ② 사회적 관계에서 발생하는 불안감은 성장을 위해 바람직하지 않다.
- ③ 불안의 원인을 외부가 아닌 자신의 내면에서 찾는 것이 바람직하다.
- ④ 대인 관계에서 불안을 줄이려면 관련 상황을 피하는 것이 효과적이다.
- ⑤ 내면의 불안을 공감과 연민으로 바꾸면 타인과의 관계를 향상할 수 있다.

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

The study of literature has repeatedly failed to recognize the influence of modern musical lyricists and their contributions to the evolution of language. Unlike Shakespeare, who has been studied and celebrated for his development of the English language, particularly in vocabulary and grammatical structure, modern songwriters have experienced restraints on the acknowledgement of their contributions and largely been ignored. Over the past century, we have witnessed an explosion of incredible literary works by these artists, who, through their music, have used linguistic manipulation and storytelling to enrich our language and literature. Producing lyrics of distinct and complex imagery, songwriters have had an incredible literary impact on our language. Their remarkable works, including influences on modern language development, must be recognized in the field of modern literature.

* lyricist: 작사가 ** restraint: 제약

- ① 독특하고 복합적인 이미지 표현 기법을 작사 과정에 적용해야 한다.
- ② 가사를 통해 작사가들이 언어와 문학에 기여한 바를 인정해야 한다.
- ③ 셰익스피어의 작품이 영문학 발전에 미친 영향을 분석해야 한다.
- ④ 문학 작품을 감상하기 위해 스토리텔링 기법을 이해해야 한다.
- ⑤ 문학 작품과 가사에 사용되는 언어의 차이를 연구해야 한다.

Words & Phrases in Use

- | | | |
|---|--|---|
| ☐ contribution 기여 | ☐ evolution 발전, 진화 | ☐ witness 목격하다 |
| ☐ explosion 폭발적 증가 | ☐ incredible 엄청난, 믿을 수 없을 정도의 | ☐ literary 문학의, 문학적인 |
| ☐ manipulation 조작, 숨씨 있게 다루기 | ☐ enrich 풍요롭게 하다 | ☐ distinct 독특한 |
| ☐ imagery 심상 | ☐ remarkable 훌륭한, 주목할 만한 | |

Solving Strategies

STEP 1 도입부에서 글의 핵심 소재 및 관련된 문제 상황을 파악한다.

- The study of literature has repeatedly **failed to recognize the influence of modern musical lyricists and their contributions to the evolution of language.**
 - ~ modern songwriters have experienced **restraints on the acknowledgement of their contributions and largely been ignored.**
- 핵심 소재: 현대 음악 작사가들의 영향과 언어의 발전에 대한 그들의 기여
- 문제 상황: 그들의 영향과 기여는 계속 무시되어 옴

STEP 2 필자가 지적하는 상황의 실제 모습을 파악한다.

- Over the past century, we have witnessed **an explosion of incredible literary works by these artists,** who, through their music, have used linguistic manipulation and storytelling to **enrich our language and literature.**
 - Producing lyrics of distinct and complex imagery, songwriters have had **an incredible literary impact on our language.**
- 현실: 작사가는 언어적 조작과 스토리텔링 및 독특하고 복잡한 심상을 담은 가사로 우리의 언어와 문학을 풍요롭게 해 옴

STEP 3 결론을 통해 필자의 주장을 확인한다.

- Their remarkable works, including influences on modern language development, must be recognized in the field of modern literature.
- 결론: 작사가들이 현대 언어 발전에 미친 영향과 그들의 작품은 현대 문학 분야에서 인정받아야 함
- 따라서 필자의 주장으로 가장 적절한 것은 ② '가사를 통해 작사가들이 언어와 문학에 기여한 바를 인정해야 한다.'이다.

26005-0022

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Many crises today, such as the Great Recession, are simply too big and too overwhelming for you to completely comprehend, much less control. Crises of this ilk are precisely the kind that can easily engulf you with destructive reactions that interfere with your ability to overcome them. Focusing on these oversized crises will exacerbate the natural psychological, emotional, and physical reactions you are going to experience. With these sorts of crises, your best chance is to identify those aspects that are within your control. Then, you can break down the bigger crisis into smaller, more manageable problems toward which you can direct your energy and find solutions. For example, think back to the Great Recession. Although you probably didn't have the ability to influence economic policy, you were able to revisit the distribution of your investments and choose to create a more diverse portfolio.

* ilk: 종류 ** engulf: 집어삼키다 *** exacerbate: 악화하다

- ① 예상치 못한 상황에서는 과거의 경험을 따라야 한다.
- ② 위기 대응 시 해당 분야 전문가의 도움을 받아야 한다.
- ③ 판단이 어려울 때는 다수의 의견에 귀를 기울여야 한다.
- ④ 위기 상황에서는 감정을 통제하고 객관적으로 판단해야 한다.
- ⑤ 큰 위기일수록 통제 가능한 부분을 찾아 하나씩 대응해야 한다.

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Consumer surveys indicate that the majority of Americans (91%) believe they have some control over their health, and 72% believe that food and nutrition play the greatest role. However, 75% of consumers rely on media outlets including the Internet as their major sources of health and nutrition information, and only half use medical sources. A Google search for “nutrition listservs” yielded over 100,000 sites, but it is likely that many of these writings are not reviewed by nutrition experts. Internet sites marketing herbs, drugs, and health devices are not monitored by government regulatory agencies and often contain misleading information. Reputable food companies provide helpful facts about the nutrient content of their products, but commercial sites devoted to sales often post misleading health claims. Internet sites maintained by government agencies, universities, state extension services, and medical facilities provide evidence-based information and should be the first source for public information on foods, nutrition, and health.

* media outlet: 매스컴 ** listserv: 리스트서브(특정 그룹 전원에게 메시지를 전자 우편으로 자동 전송하는 시스템)

- ① 정부는 인터넷 건강 정보 사이트에 대한 규제를 강화해야 한다.
- ② 건강과 영양에 관해서는 증거에 기반한 정보가 우선시되어야 한다.
- ③ 대학은 영양 전문가 양성을 위한 다양한 프로그램을 마련해야 한다.
- ④ 건강은 식품과 영양뿐 아니라 규칙적인 운동으로 꾸준히 관리해야 한다.
- ⑤ 식품 회사는 제품의 안전성과 생산 과정에 관한 정보를 정직하게 제공해야 한다.

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

My business partner Charles and I embraced the servant leader's way of doing things. In other words, nothing was beneath us. We led by example and did the work. When any new salesman came into the store, he would look around, notice Charles polishing some corner of the floor and me covered in flour, and assume the decision-maker was not present. He'd then hand off whatever he was selling to me and say, "Can you give this to the owner?" Now, if Charles and I had remained in the bakery for too long, we wouldn't have been able to grow and scale, so I'm not saying you should be sweeping the floors forever. It's more about modeling what's important. If cleanliness and details are important, be sure you aren't above doing the work and pitching in. Come into your workspace and ask how you can help. If it's clear your team is in the weeds, jump in without asking.

* pitch in: 협력하다 ** in the weeds: 어려움에 처한

- ① 리더는 솔선수범하여 업무에 임하고 협력해야 한다.
- ② 주인은 판매하는 물건에 관한 모든 것을 알고 있어야 한다.
- ③ 사업의 성공적인 운영을 위해 동업자와 좋은 관계를 정립해야 한다.
- ④ 더 많은 고객을 유치하기 위해 상점을 항상 청결하게 유지해야 한다.
- ⑤ 의사 결정에 구성원의 의견을 반영하는 기업 문화를 형성해야 한다.

04

26005-0025

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Training and competition naturally speed the breath, which activates the sympathetic nervous system. In performance, this is acceptable because an athlete wants to produce adrenaline and compete and train in an aroused state. However, it is equally important for an athlete to learn how to mentally and physically downshift from the acute sympathetic activity experienced in sport, and outside of performance focus their attention on slow breathing to reduce the sympathetic activity and resolve the fight-or-flight state. In the Feinstein Institutes study, participants were able to use the pace of their breathing to activate specific regions of the brain. In a performance realm, this means athletes can use breathing pace to manage their state of arousal. During training and competition, the breathing rate increases with the introduction of adrenaline, and athletes must be able to control this to be able to adapt and recover. One way is to practice slower breathing protocols outside of training and competition.

* sympathetic nervous system: 교감 신경계 ** arouse: 고조시키다 *** acute: 급격한

- ① 선수는 운동 외 시간에 호흡 속도를 늦춰 교감 신경 활동을 줄여야 한다.
- ② 선수는 최상의 경기력 발휘를 위해 지난 경기를 돌아보고 분석해야 한다.
- ③ 선수는 필요할 때 교감 신경 활동을 극대화할 수 있는 전략을 개발해야 한다.
- ④ 선수는 팀 승리를 위해 개인 기량 발휘보다 동료와의 호흡을 우선시해야 한다.
- ⑤ 선수는 경기가 자신에게 불리할 때 침착하게 대응할 수 있도록 연습해야 한다.

다음 글의 주제로 가장 적절한 것은?

Emphasizing *speed over frequency* can make sense in contexts where everyone is expected to plan around the timetable, including peak-only commute services and very long trips with low demand. In all other contexts, though, it seems to be a common motorist's error. Roads are there all the time, so their speed is the most important fact that distinguishes them. But transit is only there if it's coming soon. If you have a car, you can use a road whenever you want and experience its speed. But transit has to exist when you need it (span), and it needs to be coming soon (frequency). Otherwise, waiting time will wipe out any time savings from a faster service. Unless you're comfortable planning your life around a particular scheduled trip, speed is worthless without frequency, so a transit map that screams about speed and whispers about frequency may simply be planting confusion.

* commute: 통근

- ① consequences of adjusting frequency of transit
- ② significance of designing an accurate transit map
- ③ importance of valuing frequency in public transportation
- ④ impact of creating high-speed public transportation systems
- ⑤ methods to improve speed and frequency of commute services

Words & Phrases in Use

☐ emphasize 강조하다

☐ transit 대중교통

☐ scream 소리치다

☐ frequency 빈도

☐ span 운행 시간대의 범위

☐ whisper 속삭이다

☐ timetable 시간표

☐ wipe out ~을 없애 버리다

Solving Strategies

STEP 1 도입 부분을 통해 글의 소재와 핵심 개념을 파악한다.

- **Emphasizing speed over frequency** can make sense in contexts where everyone is expected to plan around the timetable, ~.
- In all other contexts, though, it seems to be a common motorist's error.
- 소재 및 핵심 개념: '빈도보다 속도'를 강조하는 것은 시간표에 맞춰 계획을 짜는 상황에서는 타당하나, 그 외의 다른 상황에서
는 혼란 오류로 보임

STEP 2 핵심 개념을 구체화하고 있는 필자의 설명을 찾는다.

- **Roads are there all the time**, so their speed is the most important fact that distinguishes them. But **transit is only there if it's coming soon**.
- 도로 vs. 대중교통: 도로는 항상 존재하지만, 대중교통은 그것이 도착하는 경우에만 존재함
- But **transit has to exist** when you need it (span), and **it needs to be coming soon (frequency)**.
- 대중교통은 필요로 할 때 존재해야 하고, 곧 도착해야 하는 운행 빈도가 중요함
- Unless you're comfortable planning your life around a particular scheduled trip, **speed is worthless without frequency**, ~.
- 운행 일정에 맞춰 계획하는 것이 편안하지 않다면, 운행 빈도 없는 속도는 가치가 없음

STEP 3 핵심 개념에 관한 필자의 설명을 종합하여 글의 주제를 추론한다.

항상 존재하는 도로와 필요할 때 존재해야 하는 대중교통의 상황을 통해 속도와 빈도의 개념을 비교 설명한 글로, 대중교통은 필요할 때 곧 도착해야 하므로, 속도는 빈도 없이는 가치가 없다는 내용의 글이다.

→ 따라서 글의 주제로 가장 적절한 것은 ③ '대중교통에서 운행 빈도에 가치를 부여하는 것의 중요성'이다.

- ① 대중교통의 운행 빈도 조정의 결과
- ② 정확한 대중교통 지도를 설계하는 것의 중요성
- ④ 고속 대중교통 시스템을 만드는 것의 영향
- ⑤ 통근 서비스의 속도와 운행 빈도를 개선하는 방법

01

26005-0027

다음 글의 주제로 가장 적절한 것은?

In the United States, the practice of permitting aliens to vote could be seen as compatible with the idea of an exclusionary citizenship, but that is a hard balance to maintain. If the vote, of all rights, is in the hands of noncitizens, why should they not count as citizens, and the entire distinction between resident alien and citizen be abandoned? Indeed, something like this thought probably lay behind the disappearance of alien voting: with universal adult citizen suffrage after 1920, the only way to maintain an exclusionary kind of citizenship was to restrict the vote to citizens and not residents. But no theory of “active” democracy can countenance this distinction: the laws concerning our common life must be made by all those who are taking part in it, and residence is the only convincing test of whether someone is taking part — as is understood almost universally when it comes to questions of which citizens should have a voice in local government.

* exclusionary citizenship: 배타적 시민권 ** universal suffrage: 보통 선거권 *** countenance: 지지하다

- ① conventional views on political rights that citizens should have
- ② necessity of including all residents in voting for true democracy
- ③ importance of electing well-represented candidates in democracy
- ④ difficulties of promoting resident participation in decision-making
- ⑤ ways to maintain political stability while meeting diverse interests

02

26005-0028

다음 글의 주제로 가장 적절한 것은?

When people are asked *what* any painting hanging on a gallery wall means, no matter how strange it might appear, as is the case with most abstract-expressionist paintings, they tend to find meaning in it because it is *located* in a gallery. Consider a soda can found thrown away on a city street. If we were to come across this item on the street, we would no doubt view it as a piece of garbage or rubbish. But if we saw the very same object on a pedestal, displayed in an art gallery, signed by some artist, and given a title such as “Waste,” then we would interpret its meaning in a vastly different way. We would, in fact, be inclined to interpret it as an artistic form, descrying a throw-away or materialistic society. Clearly, the can’s location on a sidewalk versus its display on a pedestal in an art gallery will influence how we will interpret it.

* pedestal: 받침대 ** descry: 발견하다

- ① how shifts in art movements influence art appreciation
- ② the emerging art form recycling seemingly useless materials
- ③ artists’ activities in streets viewed as a pollutant of urban area
- ④ the impacts of an artist’s fame on art gallery exhibition decision
- ⑤ variable interpretations of an object depending on where it is located

The reliance on the computer as a model for the operations of the human mind may well prove to be as limited as an earlier fascination with behaviorism. Psychologists have already begun to recognize the flaws of the mind-as-computer metaphor. Some have turned to cultural anthropology as a way of understanding the factors outside any particular individual's brain that help the individual make sense out of the world. Others, such as Jerome Bruner, one of the founders of cognitive psychology, find that the computer analogy carries with it an unfortunate shift "from the *construction* of meaning to the *processing* of information." Bruner's reflections on the limits of the machine model lead him back to a humanistic emphasis on narrative and story-telling as essential ingredients in understanding human cognition, a fascinating intellectual journey that reveals both the power and the limits of computers as guides to the way we think.

- ① similarities between how humans think and how a computer works
- ② various factors that influence how individuals understand the world
- ③ reasons for using the computer analogy when discussing the human mind
- ④ alternative perspectives on human cognition beyond the computer model
- ⑤ technologies that enhance the accuracy of computer-based thinking models

다음 글의 주제로 가장 적절한 것은?

In the escape that reading literature provides through vicarious identification and comparison with other lives, places, and times, we activate our imagination, that uniquely human ability to explore an alternative set of ideas and experiences that are outside our present environment and that may not even be real. As opposed to perception that receives and processes information from the outside world — light, sound, shape — and finds meaning in it — a sunset, a symphony, a house — in imagination, the process is reversed. Translating the words we read into what they signify, we populate an inner world in which imagery is created from the memory. For example, we read “house” and picture a representation of a house from memory. It is our imagination, the complex interweaving of perception and memory that literature activates, releasing a latent creativity that pleases. The writer may provide the blueprint, but the reader builds literature’s many rooms, and like any satisfying occupation, literature gratifies our imaginative and creative abilities.

* vicarious: 대리인 ** latent: 잠재적인 *** gratify: 만족시키다

- ① the influence of language on narrative structure
- ② the role of literature in preserving historical truths
- ③ the conflict of imagination and realism in literature
- ④ the pleasure of imagination granted by literary experience
- ⑤ the dominance of logic over imagination in literary analysis

다음 글의 제목으로 가장 적절한 것은?

The economic benefit of culturtainment makes it attractive to politicians and policy makers alike. A potential increase in inbound visitor numbers coupled with their demand for related goods and services (travel, accommodation, retail) is an incentive for those within governments and authorities to work with cultural groups in order to develop celebrations and commemorations into larger and more high-profile events. However, such commercialization risks culturtainment becoming homogeneous and losing its original 'message' that could lead to a dilution of audiences. This could also lead to smaller non-commercial independent events being set up that would only serve to divide audiences further. This is something that planners and stakeholders will need to balance against potential financial gain. Changing political, social and religious landscapes will lead to the emergence of new cultures, and with them new culturtainment experiences. Overall this is a healthy growth sector of the entertainment industry, but one that by its very nature is delicate in the face of exploitation.

* homogeneous: 동종의 ** dilution: 희석 *** exploitation: 착취

- ① The Commercialization of Culture and Its Unexpected Benefits
- ② Cash or Soul? When Culture Couples with Entertainment
- ③ Culturtainment: An Ambition of Entertainment to Be a Culture
- ④ New Cultures! The Poisonous Fruit of Culturtainment
- ⑤ Why Balanced Investments Matter in the Entertainment Industry

Words & Phrases in Use

- ☐ policy maker 정책 입안자
- ☐ retail 소매
- ☐ high-profile 이목을 끄는
- ☐ landscape 경관

- ☐ inbound 국내 유입의
- ☐ incentive 장려책
- ☐ commercialization 상업화
- ☐ emergence 출현

- ☐ accommodation 숙박
- ☐ commemoration 기념행사
- ☐ stakeholder 이해관계자
- ☐ delicate 취약한, 섬세한

Solving Strategies

STEP 1 도입과 마무리를 읽고, 글의 소재와 핵심 개념을 파악한다.

- **The economic benefit of culturtainment** makes it attractive to politicians and policy makers alike.
- 소재: 컬처테인먼트의 경제적 이점이 존재함 ⇒ 정치인과 정책 결정자에게 매력적임
- Overall this is a healthy growth sector of the entertainment industry, but one that by its very nature is **delicate in the face of exploitation.**
- 핵심 개념: 컬처테인먼트는 건전한 성장 영역이지만, 동시에 취약성이 존재함

STEP 2 핵심 개념을 염두에 두고 읽으며, 특히 연결사에 주의하여 추가 정보를 찾는다.

- **However**, such commercialization **risks culturtainment** becoming homogeneous and losing its original 'message' that could **lead to a dilution of audiences.**
- 상업화는 컬처테인먼트를 동종화하고 원래 '메시지'를 잃어 관객의 희석화를 초래할 위험이 있음
- This could also lead to smaller non-commercial independent events being set up that would **only serve to divide audiences further.**
- 관객을 더욱 분산시킬 소규모 독립 행사가 생기는 것으로 이어질 수 있음
- This is something that planners and stakeholders will **need to balance against potential financial gain.**
- 계획자와 이해관계자는 잠재적 재정적 이익에 맞서 균형을 맞춰야 함

STEP 3 글 전체의 핵심을 포함하고 있는 글의 제목을 추론한다.

컬처테인먼트의 경제적 이점은 매력적이지만, 그것의 상업화는 컬처테인먼트가 동종화하고 원래의 '메시지'를 잃어버려 관객의 희석화를 초래할 수도 있는 위험이 있기에, 계획자와 이해관계자가 잠재적인 재정적 이익에 맞서 균형을 맞춰야 할 필요가 있다는 내용의 글이다. 상업적 이득을 추구하는 과정에서 문화의 본질이 희석될 수 있다는 지문의 핵심을 잘 포함하고 있는 제목을 선택해야 한다.

→ 따라서 글의 제목으로 가장 적절한 것은 ② '돈인가 아니면 정신인가? 문화가 엔터테인먼트와 결합할 때'이다.

- ① 문화의 상업화와 그것의 예상치 못한 이점
- ③ 컬처테인먼트: 엔터테인먼트가 문화가 되고자 하는 야망
- ④ 새로운 문화! 컬처테인먼트의 해로운 결실
- ⑤ 균형 잡힌 투자가 엔터테인먼트 산업에서 중요한 이유

You've probably heard that it takes about ten thousand hours of practice to become an expert in anything — a musical instrument, a sport, chess, cooking, or a foreign language. The research by K. Anders Ericsson on this topic has been written about many times, and it was made even more famous when Malcolm Gladwell described it in his bestselling book *Outliers*. However, recently, a cohort of researchers reexamined the studies and research behind the 10K figure and said, quite dramatically, that the ten-thousand-hour rule was utter nonsense. Specifically, there is nothing particularly special about ten thousand hours, and while practice is clearly important to boost performance, other factors may play an even more important role. What are those other factors that get us to expert levels of performance? Pure innate talent? Intelligence? Luck of the draw? Perseverance? Hard work? Yes, it's all of that... and more. Age, experience, and environment all play a role. In other words, there's no one certain factor that can predict or ensure mastery or optimal performance of anything.

* cohort: 집단 ** perseverance: 인내심

다음 글의 제목으로 가장 적절한 것은?

In the old Soviet Union, a famous U.S. beverage company wanted to set up a bottling plant and distribution network. The prevailing ideology in the old Soviet Union at the time stressed the importance of the group over the individual and the need to develop industrial capacity at the expense of consumer goods. Soft drinks hardly seemed to fit the country's ideological priorities. Indeed, one government official dismissed the product as a "useless drink." Eventually, the two sides struck a deal, but not on the basis that the drink would quench the local population's thirst. Instead, the U.S. negotiators justified the project on the grounds that it would contribute to the country's industrial development. They restructured the project to include a heavy training component for local workers and managers, as well as a farm that would grow certain of the drink's ingredients. In addition, the company promised to make efforts to persuade other American companies to consider investments in the country.

다음 글의 제목으로 가장 적절한 것은?

In 2012, the Yale School of Architecture held a symposium called “Is Drawing Dead?” The bold title reflects a growing sense that the architect’s freehand sketch is being displaced by the computer. The transition from sketchpad to screen entails, many architects believe, a loss of creativity, of adventurousness. Thanks to the precision and apparent completeness of screen renderings, a designer working at a computer has a tendency to lock in, visually and cognitively, on a design at an early stage. He bypasses much of the reflective and exploratory playfulness that springs from the uncertainty and ambiguity of sketching. Researchers term this phenomenon “premature fixation” and trace its cause to “the disincentive for design changes once a large amount of detail and interconnectedness is built too quickly into a CAD (Computer-Aided Design) model.” The designer at the computer also tends to emphasize formal experimentation at the expense of expressiveness. By weakening an architect’s “personal, emotional connection with the work,” a renowned American architect and designer Michael Graves argues, CAD software produces designs that, “while complex and interesting in their own way,” often “lack the emotional content of a design derived from hand.”

* rendering: 렌더링(컴퓨터가 가진 정보를 우리가 눈으로 볼 수 있는 그림이나 영상으로 바꿔서 모니터나 휴대전화 화면에 보여주는 과정)

Limited animation is a process of making animated cartoons that does not follow a “realistic” approach. The short cartoons and feature films of Walt Disney from the 1930s and 1940s are widely acclaimed for depicting animated simulations of reality, with exquisite detail in every frame. However, this style of animation is very time-consuming and expensive. “Limited” animation creates an image that uses abstract art, symbolism, and limited movement to create the same effect, but at a much lower production cost. This style of animation depends more upon suspension of disbelief to tell a story; the story exists more in the viewer’s imagination. It also encourages the animators to indulge in artistic styles that are not necessarily bound to the limits of the real world. The result is a new artistic style that could not have developed if animation was solely devoted to producing simulations of reality. Without limited animation, such ground-breaking films as *Yellow Submarine*, Chuck Jones’ *The Dot and the Line*, and many others could never have been produced.

* acclaim: 격찬하다 ** exquisite: 정교한 *** indulge in: ~에 몰두하다

- ① Advantages of Limited Animation with Less Realism
- ② Why Does Animation Cost So Much and Take So Long?

다음 도표의 내용과 일치하지 않는 것은?

**Percentages of U.S. Teenagers Who Spent Time with Friends
by Communication Type (2014 – 2015)**

Note: 1. The number of participants is the same for each communication type.
2. Data for other frequency response categories and no answer are not shown.

The graph above shows the percentages of U.S. teenagers who spent time with friends by communication type, based on a survey conducted between 2014 and 2015. ① In the category of Every Day, text messaging showed the highest percentage among the four types of communication that teenagers used to spend time with friends. ② In the category of Less Often, the percentage of teenagers who spent time with friends through talking on the phone was more than twice that of teenagers who did so through text messaging. ③ The percentage of teenagers who spent time with friends through talking on the phone in the category of Every Day was lower than that of teenagers who did so in the category of Less Often. ④ In the category of Less Often, emailing was the second highest in percentage among the types of communication listed above. ⑤ The percentage of teenagers who spent time with friends through video chatting in the category of Less Often was higher than that of teenagers who did so in the category of Every Day.

Words & Phrases in Use

□ video chatting 화상 채팅
□ category 범주

□ survey 조사

□ conduct 실시하다

Solving Strategies

STEP 1 도표의 제목 및 내용을 파악한다.

- 도표의 제목: Percentages of U.S. Teenagers Who Spent Time with Friends by Communication Type (2014-2015) (2014년에서 2015년까지, 의사소통 유형별로, 친구와 시간을 보낸 미국 십 대의 비율)
- 도표의 내용: 2014년에서 2015년까지, 친구와 시간을 보낸 미국 십 대의 비율을 의사소통 유형별로 비교

STEP 2 글의 도입부를 통해 도표의 이해를 위한 개요를 파악한다.

- The graph above shows the percentages of U.S. teenagers who spent time with friends by communication type, based on a survey conducted between 2014 and 2015.
- 위 도표는 2014년에서 2015년 사이에 실시된 조사를 토대로, 친구와 시간을 보낸 미국 십 대의 비율을 의사소통 유형별로 보여준다.

STEP 3 도표와 선택지 내용을 비교하여 일치 여부를 판단한다.

- ① ‘매일’의 범주에서, 문자 메시지 주고받기는 십 대가 친구와 시간을 보내기 위해 사용하는 네 가지 의사소통 유형 중에서 가장 높은 비율을 보였음
⇒ 일치
- ② ‘덜 자주’의 범주에서, 전화 통화로 친구와 시간을 보내는 십 대의 비율은 문자 보내기를 통해 그렇게 하는 십 대의 비율의 두 배를 넘어섰음
⇒ 일치
- ③ ‘매일’의 범주에서 전화 통화로 친구와 시간을 보내는 십 대의 비율은 ‘덜 자주’의 범주에서 그렇게 하는 십 대의 비율보다 더 낮았음
⇒ 일치
- ④ ‘덜 자주’의 범주에서, 이메일 주고받기는 위에 열거된 의사소통 유형 중에 두 번째로 비율이 높았음
⇒ 불일치(두 번째로 높은 게 아니라 가장 높았음)
- ⑤ ‘덜 자주’의 범주에서 화상 채팅으로 친구와 시간을 보내는 십 대의 비율은 ‘매일’의 범주에서 그렇게 하는 십 대의 비율보다 더 높았음
⇒ 일치

→ 따라서 도표의 내용과 일치하지 않는 것은 ④이다.

Proportion of Student Housing by Accommodation Type for Selected Study Destinations (2022)

The graph above shows the proportion of student housing by accommodation type for selected study destinations in 2022. ① Notably, Other Private Accommodations made up the largest share of student housing, except in the UK, where PBSAs were the most common type. ② Among the study destinations, the UK had the highest percentage of University Accommodations and PBSAs. ③ University Accommodations were used by fewer than one-third of students in every study destination, with Australia showing the lowest proportion. ④ Australia showed the greatest difference between University Accommodations and PBSAs, with a 10-percentage-point gap, while the USA showed the smallest difference, with a 1-percentage-point gap. ⑤ Europe was the only study destination where the percentage of PBSAs was greater than that of University Accommodations, showing the opposite pattern to the other study destinations.

Job Opportunity Outlook by Income Level Amid AI Adoption (2024)

*Note: Share of respondents who didn't offer an answer or responded 'Not sure' are not shown.

The graph above shows how employed adults viewed the impact of AI adoption on their job opportunities by income level in 2024. ① Among all employed adults, those expecting fewer job opportunities from AI outnumbered those expecting more, while nearly a third foresaw little impact and fewer than 20% remained unaware of workplace AI use. ② More than one-third of lower-income workers and about one-third of middle-income workers said AI would lead to fewer job opportunities, compared to about one-fourth of upper-income workers. ③ Over 40% of upper-income workers said AI would not make much difference, which was more than twice the share of middle-income workers who said the same. ④ Only 5% of lower-income workers thought AI would create more jobs, while this figure rose to 8% among upper-income workers. ⑤ Over one-fourth of lower-income workers had not heard of workplace AI use, which was more than three times the share of upper-income workers.

Gender Differences in Sports or Exercise Participation Among U.S. Adults (2022–2023)

The graph above shows the share of adult men and women in the United States who reported engaging in sports or exercise at least occasionally from 2022 to 2023. ① Fitness, Aerobics, and Cardio were the top-ranked activities for women in terms of participation but were ranked fifth for men. ② For men, the most commonly reported activity among respondents was Basketball, followed by American Football/Flag Football, neither of which appeared on the list of activities for women. ③ Hiking was one of the top three activities for both men and women, with a slightly higher percentage of women participating in it compared to men. ④ Hunting/Fishing was ranked higher among men than women, and the participation rate for each gender was below 30%. ⑤ Dancing, Swimming/Diving, Yoga/Pilates, and Running/Jogging appeared only on the women's list, with fewer than 30% of women reporting participation in each of these activities.

* cardio: 유산소 운동

Max Kleiber에 관한 다음 글의 내용과 일치하지 않는 것은?

Max Kleiber, a pioneer in the study of animal biology, was best known for his research on animal nutrition and metabolism. He was born in Zurich, Switzerland in 1893. Kleiber graduated from the Swiss Federal Institute of Technology in 1920 and earned his doctoral degree in 1924. He came to the University of California at Davis (UC Davis) in 1929 to conduct research on energy metabolism in animals. In 1952, Kleiber received the distinguished Borden Award from the American Institute of Nutrition and, a year later, the Morrison Award from the American Society for Animal Production. Kleiber's book, *The Fire of Life*, was published in 1961 and subsequently translated into German, Polish, Spanish, and Japanese. Kleiber was an outstanding teacher popular with undergraduates and graduate students alike. Before his death, a new classroom building at UC Davis was named Kleiber Hall in his honor.

* nutrition: 영양(학) ** metabolism: 신진대사

- ① 스위스의 Zurich에서 태어났다.
- ② 1924년에 박사 학위를 받았다.
- ③ 1952년에 Borden Award와 Morrison Award를 수상했다.
- ④ 그의 저서 *The Fire of Life*는 여러 언어로 번역되었다.
- ⑤ 대학생과 대학원생에게 인기 있는 뛰어난 선생님이었다.

Words & Phrases in Use

- ☐ pioneer 선구자
- ☐ doctoral 박사 학위의
- ☐ award 상
- ☐ outstanding 뛰어난

- ☐ federal 연방의
- ☐ conduct (특정한 활동을) 수행하다
- ☐ subsequently 이후에, 나중에
- ☐ undergraduate 대학생

- ☐ institute (주로 이공계의) 대학
- ☐ distinguished 저명한, 유명한
- ☐ translate 번역하다
- ☐ in one's honor ~을 기념하여

Solving Strategies

STEP 1 글의 전반부에서 누구에 관한 글인지 확인한다.

Max Kleiber, a pioneer in the study of animal biology, was best known for his research on animal nutrition and metabolism.

→ 동물 생물학 연구의 선구자인 Max Kleiber는 동물 영양(학)과 신진대사에 관한 연구로 가장 잘 알려져 있었다.

STEP 2 선택지의 핵심 정보를 확인하고 글에서 그 정보의 근거를 찾아 연결한다.

- ① 스위스의 Zurich에서 태어남
→ He was born in Zurich, Switzerland ~.
- ② 1924년에 박사 학위를 받음
→ ~ earned his doctoral degree in 1924.
- ③ 1952년에 Borden Award와 Morrison Award를 수상함
→ In 1952, Kleiber received the distinguished Borden Award ~ and, a year later, the Morrison Award ~.
- ④ 그의 저서 *The Fire of Life*는 여러 언어로 번역됨
→ ~ translated into German, Polish, Spanish, and Japanese.
- ⑤ 대학생과 대학원생에게 인기 있는 뛰어난 선생님이었음
→ ~ popular with undergraduates and graduate students alike.

STEP 3 글에 제시된 정보 중에서 선택지의 내용에 해당하는 부분을 찾아 비교하면서 일치하지 않는 진술을 찾는다.

- ① He was born in Zurich, Switzerland in 1893.
→ 1893년 스위스의 Zurich에서 태어났다고 했으므로, 글의 내용과 일치한다.
- ② Kleiber graduated from the Swiss Federal Institute of Technology in 1920 and earned his doctoral degree in 1924.
→ 1920년에 Swiss Federal Institute of Technology를 졸업했고, 1924년에 박사 학위를 받았다고 했으므로, 글의 내용과 일치한다.
- ③ In 1952, Kleiber received the distinguished Borden Award from the American Institute of Nutrition and, a year later, the Morrison Award from the American Society for Animal Production.
→ 1952년에 Borden Award를 수상했고, 1년 후 Morrison Award를 수상했다고 했으므로, 글의 내용과 일치하지 않는다.
- ④ Kleiber's book, *The Fire of Life*, was published in 1961 and subsequently translated into German, Polish, Spanish, and Japanese.
→ 저서인 *The Fire of Life*는 1961년에 출간되었고, 이후에 독일어, 폴란드어, 스페인어, 일본어로 번역되었다고 했으므로, 글의 내용과 일치한다.
- ⑤ Kleiber was an outstanding teacher popular with undergraduates and graduate students alike.
→ 대학생과 대학원생 모두에게 인기 있는 뛰어난 선생님이었다고 했으므로, 글의 내용과 일치한다.
→ 따라서 ①, ②, ④, ⑤는 글의 내용과 일치하고, ③은 일치하지 않는다.

William Henry Perkin에 관한 다음 글의 내용과 일치하지 않는 것은?

William Henry Perkin was born in London in 1838 to a family of builders and was expected to follow the same path. However, his life changed when, at the age of twelve, a friend introduced him to a simple chemistry set. He later studied at the Royal College of Chemistry, where he was taught by the distinguished German chemist August Wilhelm von Hofmann. Perkin's curiosity led him to build a small laboratory at home, where he continued his experiments. At eighteen, he conducted an experiment that would change his life. He tried to make quinine, a costly medicine for malaria. He failed and produced only an ugly black substance, in which he became interested. When he dissolved it in methylated spirit, the mixture blossomed into a rich and bright purple. This led to the creation of the first synthetic dye, mauve. Perkin's discovery helped start the synthetic dye industry, making vibrant colors more accessible and affordable around the world.

* methylated spirit: 변성 알코올 ** synthetic: 합성의

- ① 12세 때 친구로부터 간단한 화학 세트를 소개받았다.
- ② Royal College of Chemistry에서 August Wilhelm von Hofmann에게 배웠다.
- ③ 집에 작은 실험실을 짓고 그곳에서 실험을 계속했다.
- ④ 고가의 말라리아 치료제 퀴닌의 개발에 성공했다.
- ⑤ 합성염료 산업의 시작에 도움을 주었다.

02

26005-0043

Charles Frederick Worth에 관한 다음 글의 내용과 일치하지 않는 것은?

Charles Frederick Worth was the most famous fashion designer of the 19th century. He was born in 1825 in Bourne, Lincolnshire, one of five children. His father abandoned the family by the time he was 11, leaving them impoverished. His mother was left with little choice but to find an apprenticeship for him at a printer's shop, but the young boy hated the work. He persuaded his mother to allow him to move to London to gain employment at Swan & Edgar, a haberdashery located in the recently constructed Regent Street. There, he was given the opportunity to work with textiles, which gave him an outstanding grounding for the future. Perhaps equally important were his frequent visits to the new National Gallery, within walking distance of Swan & Edgar. Worth's knowledge of costume history, gained from observing portraits in the National Gallery, was very helpful to his career.

* impoverished: 빈곤한 ** apprenticeship: 수습직 *** haberdashery: 남성복점

- ① 11세 무렵에 아버지가 가족을 버렸다.
- ② 인쇄소에서 일하는 것을 싫어했다.
- ③ 어머니의 권유로 마지못해 런던으로 이주했다.
- ④ Swan & Edgar에서 일하며 옷감을 다룰 기회를 얻었다.
- ⑤ National Gallery에서 의상 역사에 관한 지식을 얻었다.

Charles Lyell에 관한 다음 글의 내용과 일치하지 않는 것은?

Charles Lyell (1797 – 1875), best known as the author of *Principles of Geology*, was born in Scotland to a wealthy family, the eldest of ten. When he was quite young, he moved with his family to Hampshire in southern England, where he luxuriated in nature and collected moths. At Exeter College, Oxford, he studied under Professor Buckland but became disappointed with his mentor's biblical interpretations of geology. After earning his bachelor's degree in the classics, Lyell pursued law, but his eyesight was weak, and law studies were difficult. Although he was called to the bar in 1822 at Lincoln's Inn, his father's financing allowed him to pursue his childhood love of nature and geology. He became Secretary of the Geological Society of London in 1823 and served as its president for two terms, traveling widely and studying geology not only in England but in France, Sicily, the Alps, the Canary Islands, and North America (from Nova Scotia to the Mississippi Delta).

* luxuriate in: ~을 즐기다 ** moth: 나방 *** be called to the bar: 변호사 자격을 얻다

- ① 어렸을 때 가족과 함께 잉글랜드 남부로 이주했다.
- ② 지질학에 대한 스승의 성경적 해석에 실망하게 되었다.
- ③ 법학을 공부한 후 고전학 학사 학위를 취득했다.
- ④ 아버지의 재정 지원으로 자연과 지질학을 계속 연구할 수 있었다.
- ⑤ 런던 지질학회에서 두 번의 임기 동안 회장을 역임했다.

04

26005-0045

Ivan Beltrami에 관한 다음 글의 내용과 일치하지 않는 것은?

Ivan Beltrami was born on June 14, 1920, in Marseille, France, to a family committed to medicine — his father was a doctor and his mother a nurse. Raised in a Catholic environment, he grew up valuing compassion and justice, particularly influenced by the discrimination faced by his Jewish friends. During World War II, Beltrami studied medicine while secretly aiding the French Resistance. From 1942, he served as a courier and provided medical assistance to those in need. He also risked his life by sheltering Jewish individuals in his home, actions for which he was later honored as Righteous Among the Nations by Yad Vashem in 1984. After the war, he dedicated himself to improving healthcare access in underserved communities, establishing clinics in rural areas of southern France. He passed away on November 12, 1991, leaving behind a legacy of kindness and courage.

* courier: 전령 ** legacy: 유산

- ① 의사인 아버지와 간호사인 어머니 사이에서 태어났다.
- ② 유대인 친구들이 직면한 차별에 영향을 받았다.
- ③ 제2차 세계 대전 중에 의학을 공부했다.
- ④ 1942년부터 도움이 필요한 사람들에게 의료 도움을 제공했다.
- ⑤ 전쟁 후에는 의료와 관련된 모든 활동에서 물러났다.

School Bell Sound Contest에 관한 다음 안내문의 내용과 일치하지 않는 것은?

School Bell Sound Contest

Wakeville High School is holding a school bell sound contest. The theme of this contest is Happy School Life.

Deadline: December 12, 2025

Participants: Wakeville High School students of all grades

Application Details

- Submit entries in MP3 format only.
- Upload entries to our school website (file size limit: 1MB).
- Include the description of the sound creation process.

Selection Method

- Three school bell sounds will be selected by student vote, based on creativity and suitability.

Awards

- The winning school bell sounds will replace our current bell sounds.
- The winners of the contest will each get a wireless speaker.

- ① 주제는 행복한 학교생활이다.
- ② Wakeville 고등학교 모든 학년의 학생이 참여할 수 있다.
- ③ 출품작은 학교 웹사이트에 업로드해야 한다.
- ④ 네 개의 학교 종소리가 학생 투표에 의해 선택될 것이다.
- ⑤ 우승자는 무선 스피커를 받을 것이다.

Words & Phrases in Use

- ☐ hold 열다, 개최하다
- ☐ application 신청, 지원
- ☐ description 설명

- ☐ theme 주제
- ☐ submit 제출하다
- ☐ suitability 적합성

- ☐ deadline 마감 일자
- ☐ entry 출품작
- ☐ current 현재의

Solving Strategies

STEP 1 안내문의 도입부 내용을 통해 소재를 파악한다.

Wakeville High School is holding a school bell sound contest.

→ Wakeville 고등학교에서 열리는 학교 종소리 경연 대회에 관한 안내문이다.

STEP 2 선택지의 핵심 정보를 확인하고 안내문의 내용을 추측한다.

- ① 주제는 ~
→ The theme of this contest is ~
- ② 모든 학년의 학생이 참여
→ ~ students of all grades
- ③ 웹사이트 업로드
→ Upload entries to our school website
- ④ 학생 투표에 의해 선택됨
→ ~ selected by student vote
- ⑤ 무선 스피커를 받음
→ ~ get a wireless speaker

STEP 3 선택지의 기술 내용에 해당하는 부분을 찾아 구체적으로 비교하여 일치하지 않는 진술을 찾는다.

- ① The theme of this contest is Happy School Life.
→ 경연 대회의 주제는 ‘행복한 학교생활’이라고 했으므로 안내문의 내용과 일치한다.
 - ② **Participants:** Wakeville High School students of all grades
→ 참가자는 Wakeville 고등학교 모든 학년의 학생이라고 했으므로 안내문의 내용과 일치한다.
 - ③ Upload entries to our school website (file size limit: 1MB).
→ 출품작을 학교 웹사이트에 업로드해야 한다고 했으므로 안내문의 내용과 일치한다.
 - ④ Three school bell sounds will be selected by student vote, based on creativity and suitability.
→ 창의성과 적합성에 근거하여 세 개의 학교 종소리가 학생 투표에 의해 선택된다고 했으므로 안내문의 내용과 일치하지 않는다.
 - ⑤ The winners of the contest will each get a wireless speaker.
→ 경연 대회의 우승자들은 각각 무선 스피커를 받을 것이라고 했으므로 안내문의 내용과 일치한다.
- 따라서 ①, ②, ③, ⑤는 안내문의 내용과 일치하고, ④가 일치하지 않는다.

Movement in the Museum: Heart Centering Yoga에 관한 다음 안내문의 내용과 일치하지 않는 것은?

Movement in the Museum: Heart Centering Yoga

Find inner strength and peace in our Movement in the Museum: Heart Centering Yoga session, where we practice the ancient art of yoga surrounded by fossils.

Date and Time: Tuesday, May 19th from 5:45 pm to 6:30 pm

Location: Chesterfield Museum of Natural History

Classes

- Two separate classes (beginner and intermediate) will be held at the same time — each led by a trained yoga instructor.
- The beginner class will include chairs for those who need them.

Participation Fees

- Museum Members: \$5
- Early Registration (Non-Members): \$15
- Day of Registration (Non-Members): \$20

General Information

- Participants must be 18 years or older and will be required to sign a participation agreement.
- Please bring your yoga mat and water as they are not provided.
- Register for the class online.
- Parking in the museum is free after 5:00 pm.

Contact Information

If you have any questions, contact Grace Harrell (Education Outreach Coordinator, Chesterfield Museum of Natural History) by calling 305-349-6483.

* outreach: 지원

- ① 화석에 둘러싸여 고대 요가를 수련한다.
- ② 초급과 중급 수업이 있다.
- ③ 박물관 회원의 참가비는 5달러이다.
- ④ 요가 매트와 물이 제공된다.
- ⑤ 오후 5시 이후 박물관 내 주차는 무료이다.

2026 Maple Elementary After School Program for Kids에 관한 다음 안내문의 내용과 일치하는 것은?

2026 Maple Elementary After School Program for Kids

Keep your kids learning, active, and engaged after school! Join our exciting 2026 Maple Elementary After School Program designed for kids aged 5 – 12.

- **Schedule:** Monday to Thursday, 3:00 p.m. – 6:00 p.m.
- **Location:** Maple Elementary School, 123 Maple Lane
- **Activities by Day:**
 - Monday: Arts & Crafts
 - Tuesday: Homework Assistance
 - Wednesday: Sports & Outdoor Games
 - Thursday: Music, Dance, & Drama
- **Program Highlights:**
 - All activities and materials are provided free of charge.
 - The program is supervised by trained, experienced staff.
- **Registration Deadline:** April 3
- **Program Start Date:** May 4

● **How to Register:**

- Visit maplelelemschool.com and complete the online registration form.
(Registration cannot be completed over the phone.)

Give your kids the opportunity to explore, play, and grow in a familiar setting!

- ① 월요일에서 목요일까지 오전에 실시한다.
- ② 미술과 공예 활동은 화요일에 진행된다.
- ③ 활동을 위한 재료비를 내야 한다.
- ④ 등록 마감 다음 달에 프로그램을 시작한다.
- ⑤ 전화로 등록을 마칠 수 있다.

2026 Family Green Day에 관한 다음 안내문의 내용과 일치하지 않는 것은?

2026 Family Green Day

Come to the 2026 Family Green Day and enjoy seasonal, environmentally-themed activities!

Date: Tuesday, April 7

Time: 9:00 AM and 1:30 PM

*Each session lasts 2 hours and 30 minutes. Please select only one when booking.

Location: Avioly Environmental Center

Tickets

- Children aged 3 and over: \$25
- Children under 3: \$12

Activities

1. Making a toy animal with various kinds of leaves and pinecones
2. Face painting with nature-themed designs such as butterflies and flowers

Other Information

- Aimed primarily at 3–11 year olds, this event is enjoyable for the whole family!

Frequently Asked Questions

1. Do accompanying adults need tickets?
 - No! Adults can enter free with the purchase of a child's ticket.
2. Is there parking on site?
 - Yes, paid parking is available.

- ① 각 수업은 2시간 30분 동안 진행된다.
- ② 3세 이상 아동의 입장권은 25달러이다.
- ③ 오후 솔방울로 장난감 동물을 만드는 활동이 있다.
- ④ 아동을 동반하는 성인도 입장권을 구매해야 한다.
- ⑤ 유료 주차장을 이용할 수 있다.

Gear Up for Good에 관한 다음 안내문의 내용과 일치하는 것은?

Gear Up for Good

The Blue Ridge YMCA is proud to announce its upcoming gently used sports equipment drive, *Gear Up for Good*. Let's level the playing field and help more kids play sports this year!

• **Donate Gear: July 7 – July 21**

Bring your new or gently used sports equipment to the Blue Ridge YMCA, Cedar Creek Family YMCA, or Harbor Point Family YMCA.

• **We Accept Equipment for:**

Baseball	Basketball	Soccer
Tennis	Swimming	Golf
Yoga	Surfing	Boxing
Bikes	Skateboards	Cheerleading

*Note: We do not accept sports clothing or swimwear.

• **Shop the Sale: July 25 (2 PM – 5 PM)**

All donated sports equipment will be available for purchase at the Blue Ridge YMCA. Community members are invited to shop the sale for affordable, quality sports gear!

VOLUNTEER!

We are looking for volunteers to help organize donations and prepare for the sale. Volunteers must sign up on our official website.

- ① 기부는 3주 동안 진행된다.
- ② 기부하는 장소는 총 두 곳이다.
- ③ 스포츠 의류는 기부받지 않는다.
- ④ 기부 물품은 7월 25일 오전에 판매한다.
- ⑤ 자원봉사 활동은 신청 없이 참여할 수 있다.

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

We are exceptionally smart, and this helps us adapt to a wide range of environments. But we are not nearly smart enough as individuals ① to solve the adaptive problems that confronted modern humans as they spread across the globe. The package of tools, foraging techniques, ecological knowledge, and social arrangements used by any group of foragers ② being far too complex for any individual to create. We are able to learn all the things we need to know in each of the many different environments ③ in which we live only because we acquire information from others. We are much better at learning from others than other species are, and we are ④ motivated to learn from others even when we do not understand why our models are doing what they are doing. This psychology allows human populations to accumulate pools of adaptive information that ⑤ greatly exceed the inventive capacities of individuals.

* forage: 구하러 다니다

Words & Phrases in Use

- ☐ exceptionally 대단히
- ☐ confront 직면하다
- ☐ arrangement 설비, 장치
- ☐ capacity 능력

- ☐ adapt to ~에 적응하다
- ☐ tool 도구
- ☐ accumulate 축적하다

- ☐ adaptive 적응의
- ☐ ecological 생태의
- ☐ exceed 능가하다

Solving Strategies

STEP 1 글의 내용을 파악하면서 읽는다.

→ 인간의 적응 성공은 서로에게서 배우는 능력과 그로 인한 정보의 집단적 축적 덕분임

STEP 2 밑줄 친 부분이 포함된 문장의 구조를 파악하며 어법의 정확성을 판단한다.

① to부정사

But we are not nearly smart enough as individuals to solve the adaptive problems that confronted modern humans as they spread across the globe.

「형용사+enough」를 수식하는 to부정사이므로 to solve는 어법상 옳다. → OK

② 술어 동사

The package of tools, foraging techniques, ecological knowledge, and social arrangements used by any group of foragers being far too complex for any individual to create.

주어인 명사구 The package ~ foragers 다음에 문장의 술어 동사가 있어야 한다. → STEP 3

③ 관계사

We are able to learn all the things we need to know in each of the many different environments in which we live only because we acquire information from others.

the many different environments를 수식하는 관계절에서 관계사가 장소를 나타내는 부사구 역할을 하므로 in which는 어법상 옳다. → OK

④ 형용사

We are much better at learning from others than other species are, and we are motivated to learn from others even when we do not understand why our models are doing what they are doing.

주어 we가 문맥상 motivate가 나타내는 동작의 주체가 아니라 대상이므로 과거분사 형태의 형용사 motivated는 어법상 옳다. → OK

⑤ 부사

This psychology allows human populations to accumulate pools of adaptive information that greatly exceed the inventive capacities of individuals.

동사 exceed를 수식하는 부사 greatly는 어법상 옳다. → OK

STEP 3 어법상 틀린 것으로 생각되는 ②의 올바른 형태를 떠올리며 답을 확정한다.

The package of tools, foraging techniques, ecological knowledge, and social arrangements used by any group of foragers being far too complex for any individual to create.

→ 주어인 명사구 다음에 문장의 술어 동사가 필요하므로 being은 is로 고쳐야 한다.

01 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

26005-0052

Here's an application of metaphors to research papers: Below-grade-level readers in my urban middle school have a great deal of difficulty doing research. Their answer when ① assigned to do "a report" is to come to the media center and copy verbatim everything in the encyclopedia article or whatever source they have located, be it Internet, print, or whatever. ② To try to get the students to understand why it isn't necessary to copy everything in the articles, I use a comparison to a supermarket. I ask them if everything in the supermarket is useful, and we discuss this, with the usual conclusion being that it ③ does, but we don't buy everything all the time. Then I ask them why they don't buy everything each time they go and how they determine what to buy when they go with their parents. Someone usually mentions that they have a list. From that point on, I lead a discussion about how ④ whatever their teachers have asked for is their "shopping list" for their research, and they should just read for that information and write it down in note format. It sometimes helps them to understand that ⑤ copying everything is a wasteful endeavor.

* verbatim: 말 그대로 ** encyclopedia: 백과사전 *** endeavor: 노력

02 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

26005-0053

Reformist approaches assume that markets could operate in more equitable and environmentally reasonable ways, and that a market is the most efficient option available. Yet the logic of market efficiencies generally ① rotates on *purely monetary* calculations, effectively reasoning in a hall of mirrors and marginalising real social and environmental values. Familiar examples are conventional food retailers, such as supermarkets, which purchase fruit and vegetables as ② cheaply as possible. Inexpensive produce might be grown using soil- and water-damaging fertilisers, by poorly paid illegal migrant workers, and ③ transported long distances using more cheap labour and environmentally damaging practices. However, organic farmers can only follow ecologically sound practices and make sure they pay their workers fair wages if the food costs more, meaning supply for an elite demand. By its very nature, one never manages to escape the conundrums ④ that production for trade entails. Real social and environmental values involved in caring for people and Earth ⑤ highlighting the inequities and damage of market-oriented activities.

* equitable: 공정한 ** conundrum: 난제

03

26005-0054

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

There is no scientific basis for the term “race”. Most humans are genetically very similar and there is so little variation amongst us that it is not possible to draw neat boundaries around people and ① label them as a distinct racial group. Race is an example of social construction, ② which social processes create something that essentially does not exist but takes on real force in people’s lives. Sociologists prefer to call these processes “racialization”. Historical evidence ③ that race has always been an issue is hard to find. For example, in ancient Rome there were various leading figures, such as Emperor Septimius Severus (ruled C.E. 193–211), who ④ were black. Little is said of their skin colour in accounts ⑤ written at the time, because the ancient Romans did not think it made any difference. They thought more in terms of judging people as being civilized or a barbarian.

* barbarian: 미개인

04

26005-0055

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Many factors contribute to Americans’ growing waistlines, but one observation in particular cannot be overlooked: The incidence of obesity has increased in parallel with increasing portion sizes. Consider this: Adults today consume an average of 300 more calories per day than they ① did in the year 1985. Is this just a coincidence, or do larger portion sizes have something to do with ② it? In almost every eating situation, we are now confronted by huge portions, which are perceived as “normal” or “a great value.” Americans have created the perception ③ what large portion sizes are appropriate, creating an environment of *portion distortion*. We find portion distortions in restaurants, where the jumbo-sized portions are ④ consistently 250 percent larger than the regular portions. We even find portion distortions in our homes, where the sizes of our bowls and glasses have steadily increased and where the surface area of the average dinner plate has increased 36 percent since 1960. Research shows that people unintentionally consume more calories when ⑤ offered larger portions. Consuming larger portion sizes can contribute to positive energy balance, which, over time, leads to weight gain and ultimately can result in obesity.

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Situational ethics is an ethical theory that takes into account the context of a situation or an act when judging whether it is ethical. Supporters of this theory willingly permit casting aside ① absolute moral standards. In the absence of a universal standard or law, what matters is the outcome or consequences; so, the end ② justifies the means. Possibly the following contrasting realities can help illustrate the application of situational ethics. In a pickup game of basketball played among friends, everyone is expected to call his or her own fouls or acknowledge knocking the ball out-of-bounds. Caring about one's friends and maybe getting to ③ keep playing with the group leads to these actions. But, once an organized game is played with officials, most athletes will not admit to the same fouls or violations as the end goal of winning is more important than expressing ④ concern for competitors. Situational ethics has been extended by many athletes and coaches to mean trying to get away with as many actions on the field or court as possible to ⑤ abandon competitive advantages.

Words & Phrases in Use

☐ ethics 윤리, 윤리학

☐ context 맥락

☐ absence 부재

☐ justify 정당화하다

☐ pickup game 즉석 경기

☐ violation (농구 등의) 바이얼레이션, 경기 규칙 위반

☐ get away with (나쁜 짓을 하고도 처벌받지 않고) 넘어가다

☐ ethical 윤리적인

☐ willingly 기꺼이

☐ universal 보편적인

☐ illustrate 설명하다

☐ acknowledge 인정하다

☐ take ~ into account ~을 고려하다

☐ cast aside ~을 버리다, 제쳐 놓다

☐ end 목적

☐ application 적용

☐ extend 확대하다

Solving Strategies

STEP 1 첫 문장을 읽고 글의 핵심 개념을 파악한다.

- *Situational ethics* is an ethical theory that takes into account the context of a situation or an act when judging whether it is ethical.

→ 핵심 개념: 맥락을 고려하여 상황이나 행위의 윤리성을 판단하는 이론인 '상황 윤리'

STEP 2 글의 논리적인 흐름을 따라가며 문장 간 또는 문장 내에서 그 근거를 찾아 밑줄 친 낱말의 적절성을 판단한다.① **absolute**: 절대적 도덕 기준 vs. 맥락

상황 윤리에 의하면 맥락에 따라 상황이나 행위의 윤리성은 달라진다고 했으므로 이 이론을 지지하는 사람들은 절대적 도덕 기준을 버린다고 추론할 수 있다. 따라서 **absolute**는 문맥상 적절하다.

② **justifies**: 수단 vs. 목적

상황 윤리와 같이 보편적인 기준이나 법이 부재한 경우 중요한 것은 결과라고 했으므로 목적이 수단을 정당화한다는 맥락이 된다. 따라서 **justifies**는 문맥상 적절하다.

③ **keep**: 함께 경기 계속하기 vs. 경쟁하기

즉석 농구 경기에서는 자신의 파울을 스스로 선언하거나 공을 경기장 밖으로 쳐낸 것을 인정하는 등 친구들을 배려하고 경기를 함께 계속할 수 있다는 맥락이므로, **keep**은 문맥상 적절하다.

④ **concern**: 상대방에 대한 배려 vs. 승리

정식 경기에서는 파울이나 바이얼레이션을 인정하지 않는 등 상대방에 대한 배려보다 승리(최종 목표)가 더 중요하다는 맥락이므로, **concern**은 문맥상 적절하다.

⑤ **abandon**: 수단(많은 행동을 들이지 않기) vs. 목적(경쟁적 이점을 얻어 승리하기)

정식 경기에서 선수와 코치는 경쟁적 이점을 얻기 위해 많은 (규칙 위반) 행동을 들이지 않으려고 애쓴다는 맥락이므로, **abandon**은 문맥상 적절하지 않다.

STEP 3 문맥상 적절하지 않은 ⑤ **abandon**의 대안을 생각해 보고 문맥을 점검하며 답을 정한다.

맥락에 따라 상황이나 행동의 윤리성을 판단하고 목적이 수단을 정당화하는 상황 윤리에 의하면 정식 경기에서는 많은 선수와 코치가 경기장에서 경쟁적 이점을 얻기 위해 가능한 한 많은 행동을 들이지 않고 넘어가려고 애쓴다는 내용이 되어야 한다.

→ 따라서 ⑤의 **abandon**(버리려고)을 **gain**(얻으려고)과 같은 낱말로 바꾸어야 한다.

01

26005-0057

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Moral outrage is the psychological tool that motivates people to punish wrongdoers, even at cost or risk to themselves. It is a “commitment device,” something that commits people to punishment, even though trying to punish someone can be ① dangerous. When we witness unjust harm, whether someone committing interpersonal violence or obvious cheating, we have an embodied ② physical reaction. We get angry, our blood pressure spikes, our heart beats faster; we thirst for retribution. Outrage leads us to ③ recognize the irrationality of risking our own safety to punish someone. In any single situation, there is rarely an immediate personal benefit for meting out punishment, and often there is real risk, because the person you are serving ④ justice against could lash out at you or get revenge in the future. But the powerful feeling of outrage leads us to momentarily forget this unfavorable evaluation and get involved in a situation we would be better off ⑤ avoiding, and science reveals how this feeling and forgetting is essential for maintaining a cooperative society.

* retribution: 징벌, 응징 ** mete out: (벌 등을) 내리다 *** lash out at: ~을 공격[비난]하다

02

26005-0058

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Why do humans have the counterproductive instinct to favor natural products in the absence of knowledge of their benefits or their potential for harm? The answer likely lies in our genes. Our species, through most of its evolutionary history, relied heavily upon ① experience to judge whether ingestion of something was beneficial (i.e., nutritional or medicinal) versus whether it was dangerous (i.e., poisonous). We evolved the instinct to avoid plants that made us sick and favored those that made us well. Treating unknowns with great caution provided a terrific survival ② advantage. Today, we trust that products of nature are safe to consume. But those pills coming off a pharmaceutical production line look ③ nothing like what our instincts tell us is safe to eat. The ingredients remind us of a high school chemistry lab. Yet we are expected to consume them. Thus, we treat them with ④ favor just as our distant ancestors regarded a new plant. When in need of a remedy, we are drawn to derivatives of our food, plant products, which we perceive to be safe, and not ⑤ artificial products of science.

* ingestion: 섭취 ** pharmaceutical: 제약의 *** derivative: 파생물

03

26005-0059

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Dietary supplements are *not* drugs. A drug is intended to diagnose, cure, mitigate, treat, or prevent disease. Before marketing, drugs must undergo extensive studies of effectiveness, safety, interactions with other substances, and dosing. The FDA gives formal premarket ① approval to a drug and monitors its safety after the drug is on the market. If a drug is subsequently shown to be dangerous, the FDA can act quickly to have it removed from the market. None of this is ② true for dietary supplements. The current law gives the FDA only limited authority over supplements. This makes it ③ possible for the government to remove unsafe supplements from the marketplace. The FDA does not evaluate the safety and effectiveness of supplements before they hit the marketplace. There are some legislators in Congress who want to improve the law by ④ requiring supplement makers to put safer products on the shelves and label products more clearly. The objective is to ⑤ ensure that consumers can tell the difference between dietary supplements that are safe and those that have potentially serious side effects or drug interactions.

* mitigate: 완화하다

04

26005-0060

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Literature is not a disposable carrier of nuggets of information. Literature (as opposed to everyday reading) ① invites us back again and again to re-experience what it offers and to reassess its meanings. Literature continues to communicate meaning and significance over time, and, most remarkably, to ② shift its meaning based on our perspective. We have all had the experience of taking up a classic work of literature after several years and finding in it details and significance we ③ missed the first (or fifth) time through. What has changed is not the work of literature exactly but our experiences that are now reflected in the text. One's perception of Shakespeare's grand drama on aging under existential threat, *King Lear*, is a different experience read in one's twenties than it is in one's seventies. This is true because reading literature, as opposed to everyday reading, requires full reader ④ participation, activating not just our informational processing skills but our analysis, imagination, and emotions. These change over time in every person, and those changes explain how works of literature are more ⑤ invariable than everyday reading.

* nugget: 덩어리, 뭉치

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The early grain trade firms were active in both surplus-producing and food deficit regions, and these firms made it their business to know the state of supply and demand in both. Because this information was the key to their _____, these firms worked in relative secrecy, frequently built on family ties, trust, and loyalty. In addition, these firms were able to benefit from the rise of commodity exchanges and commodities futures markets that emerged in the mid-1800s. Agricultural markets are naturally unstable, due to changes in harvest size that result from variable weather patterns and other factors. Locking-in prices by buying and selling grain for future delivery helped these firms to minimize such risks. It made sense for the grain trading companies to manage their risks within a single firm that was operating in more than one country, rather than operating as independent national companies trading with each other. Their access to information in multiple markets enabled them to easily cover the risks associated with agricultural commodity trade.

* deficit: 부족

- ① profitability
④ reputation

- ② unification
⑤ morality

- ③ innovation

Words & Phrases in Use

- | | | |
|--|--|--|
| ☐ grain 곡물 | ☐ surplus 잉여 | ☐ secrecy 비밀(성) |
| ☐ tie (강한) 유대[관계] | ☐ loyalty 충성심 | ☐ commodity exchange 상품 거래소 |
| ☐ futures market (상품·채권의) 선물 시장(先物市場) | | ☐ emerge 생기다 |
| ☐ agricultural 농업의, 농사의 | ☐ unstable 불안정한 | ☐ variable 변동하는 |
| ☐ minimize 최소화하다 | | |

Solving Strategies

STEP 1 도입 부분을 읽고, 글의 중심 소재를 파악한다.

- 초기의 곡물 무역 회사들은 잉여 생산 지역과 식량 부족 지역 둘 다에서 활동했으며, 양쪽의 수요와 공급 상태를 아는 것을 자신들의 일로 삼음

(The early grain trade firms were active in both surplus-producing and food deficit regions, and these firms made it their business to know the state of supply and demand in both.)

→ 초기 곡물 무역 회사의 활동 및 전략에 관한 글임을 알 수 있다.

STEP 2 전개 부분을 읽고, 곡물 회사의 활동을 통해 빈칸에 들어갈 말을 추론한다.

- 첫 번째 근거(정보의 중요성): 곡물 회사들은 이 정보(수요와 공급 상태)를 기반으로 상대적으로 비밀리에, 그리고 가족 간 유대, 신뢰, 충성심에 기반하여 활동함. 이는 곧 그 정보가 경쟁 우위를 확보하고 사업적 성과를 결정하는 핵심 요소였음을 암시 (these firms worked in relative secrecy, frequently built on family ties, trust, and loyalty)

- 두 번째 근거(선물 시장 활용): 이들 회사는 상품 거래소와 선물 시장의 등장으로 이익을 얻을 수 있었음 (these firms were able to benefit from the rise of commodity exchanges and commodities futures markets that emerged in the mid-1800s)

- 농업 시장의 불안정성 때문에, 곡물을 미래 인도분으로 사고파는 방식으로 가격을 미리 고정하여 위험을 최소화함
- 두 개 이상의 국가에서 운영하는 단일 회사가 서로 거래하는 독립적인 국가 회사들보다 위험 관리에 더 유리

→ 이러한 활동(정보를 비밀리에 활용, 선물 거래를 통한 위험 최소화, 다국적 단일 회사 운영)은 모두 수익을 극대화하고 사업을 성공적으로 이끌기 위한 전략임. 정보 접근성이 이들의 농산물 상품 거래 관련 위험을 쉽게 상쇄해 준다는 것 역시 재정적 성공과 연결됨

STEP 3 글의 요지를 파악하고, 빈칸에 들어갈 내용을 확인한다.

- **요지:** 초기의 곡물 무역 회사들이 광범위한 시장 정보에 비밀리에 접근하고, 선물 시장을 활용하며, 다국적 운영을 통해 불안정한 농산물 시장의 위험을 관리하는 이러한 전략은 사업의 성공과 재정적 성과를 달성하기 위한 것임. 따라서 수요와 공급 상태에 대한 정보가 이 회사들의 수익성을 결정하는 핵심이었다고 보는 것이 가장 적절함

→ 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ① '수익성'이다.

- ② 통합
- ③ 혁신
- ④ 평판
- ⑤ 도덕성

01

26005-0062

다음 빈칸에 들어갈 말로 가장 적절한 것은?

In the *Physics*, Aristotle asks whether nature acts for the sake of something. He offers an account of rain as water that rises when heated by the Sun, then cools, condenses, and falls to Earth, but is not particularly concerned with explaining rain as such. Rather, he addresses a more general question: how to account for natural objects, events, and processes that appear with regularity. He queries whether the sharpness of front teeth and the bluntness of molars is coincidental and rejects that possibility, because this arrangement occurs with regularity and that regularity is linked to _____. The sharpness of front teeth allows them to tear while the bluntness of those in the back enables them to crush food; both are useful for eating. In Aristotle's view, all natural things happen in a given way and occur for the sake of something; that is the final cause.

* query: 의문을 제기하다 ** bluntness: 뭉툭함 *** molar: 어금니

① swiftness

② creativity

③ originality

④ purposefulness

⑤ beauty

02

AI is a prolific idea generator. Human brainstorming groups tend to focus on the quality of creative ideas and almost immediately lean into variations of first suggestions, but good ideas are more likely when groups focus first on quantity. As Linus Pauling put it, “The best way to have a good idea is to have lots of ideas.” Psychologist Dean Keith Simonton called this the “equal odds rule” arguing that creative success is correlated to the total number of works created. Many studies have confirmed that creative quality comes from quantity of ideas (what Bob Sutton at a design and innovation consulting company called “idea ratio”), and one Stanford study pegged the number of ideas that distinguish a successful product from a failure at more than two thousand. This is why design thinking and innovation are so focused on the processes (what Utley and Klebahn call “idea flow”) of _____.

* prolific: 많이 만들어 내는, 다작의 ** peg: 못박다

- ① selecting the best idea of all
- ② drawing immediate outcomes
- ③ filtering options through analysis
- ④ creating possibilities without judgment
- ⑤ judging creativity during brainstorming

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Becoming aware of our internal sensations can help us handle our own emotions. Perhaps more surprisingly, the body's interoceptive faculty can also bring us into closer contact with *other* people's emotions. That's because the brain, on its own, has no direct access to the contents of other people's minds, no way to feel what others are feeling. Interpreting others' spoken words and facial expressions may yield only a coolly abstract sense of the emotions that stir within. The body acts as a critical conduit, supplying the brain with the visceral information it lacks. It does so in this way: When interacting with other people, we subtly and unconsciously mimic their facial expressions, gestures, posture, and vocal pitch. Then, via the interoception of our own bodies' signals, we perceive what the other person is feeling *because we feel it in ourselves*. We bring other people's feelings onboard, and the body is the bridge. In an act similar to taking a bite off our partner's plate, or borrowing an earbud to hear the song our friend is listening to, we are _____.

* interoceptive: 내부 감각 수용의 ** conduit: 전달자 *** visceral: 본능적인

- ① avoiding emotional bias
- ② sampling their emotions
- ③ analyzing their words rationally
- ④ responding without genuine empathy
- ⑤ distancing ourselves from their experience

04

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The strongest criticisms of the overextension of technology involve claims of dehumanization, and these arguments are not new. Canadian philosopher of the electronic age, Marshall McLuhan was primarily a techno-utopian, but he was also a critical thinker, who cautioned decades ago against too much human extension into technology. McLuhan famously claimed that every media extension of man is an amputation. For example, once we have a car, we don't walk to the shops any more; once we have a computer hard-drive, we don't have to remember things; and now that we have personal GPS (Global Positioning System) on our cell phones, no one can find their way about without it. Based on McLuhan's philosophy, we are becoming post-literate because we rely on screens full of pictures, rather than print media, such as books. It is thus possible that extensions of human faculties, through techno- and bio-enhancement, will bring about

* techno-utopian: 기술 낙관론자 ** amputation: 잘라내기, 절단 *** post-literate: 탈문해화의

- ① renewed emphasis on traditional literacy in modern society
- ② accelerated progression in the intellectual growth of human cognition
- ③ rapid changes in the application of human faculties to daily activities
- ④ arrested development in the natural evolution of higher human faculties
- ⑤ an unprecedented competition between human abilities and artificial intelligence

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Giving clients sufficient opportunity to react to your designs while in progress is a key to professional success. Similarly, involving prospective building users as well as clients is even more valuable in the long run. Say your client is a large corporation, such as a health care provider. While the hospital administration may serve as your client, no doubt the perspectives of administration personnel will differ significantly from those of doctors, interns, residents, nurses, and other medical staff who use the building regularly. In addition, the experiences of patients and visitors who use the building irregularly, often as a result of life-threatening emergencies, are altogether different as well. Understanding how each type of user experiences the current medical environment as well as how each reacts to your prospective designs inevitably produces a better building. People are likely to be more satisfied with a new building or addition if they _____. For a large institution, this can translate into increased productivity on the job, reduced absenteeism, less turnover, and lower costs.

- ① have been engaged in multiple design training sessions
- ② are given the opportunity to draft a new design
- ③ have established trust with the building designers
- ④ have been consulted in the design process
- ⑤ share their perspectives on the building with each other

Words & Phrases in Use

- | | | |
|--|--|--|
| ☐ sufficient 충분한 | ☐ in progress 진행 중인 | ☐ prospective 예상되는, 장래의 |
| ☐ corporation 기업 | ☐ administration 행정 부서 | ☐ perspective 관점, 시각 |
| ☐ personnel 직원들, (총)인원 | ☐ life-threatening 생명을 위협하는 | ☐ inevitably 필연적으로, 불가피하게 |
| ☐ absenteeism 장기 결근[결석] | ☐ turnover 이직률 | |

Solving Strategies

STEP 1 도입 부분을 읽고, 글의 중심 소재와 그것의 예시를 파악한다.

- 전문적 성공의 핵심은 고객에게 설계 작업에 대해 반응할 충분한 기회를 제공하는 것이지만, 장기적으로는 예상되는 건물 사용자들을 참여시키는 것이 훨씬 더 가치가 있음

(Giving clients sufficient opportunity to react to your designs while in progress is a key to professional success. Similarly, involving prospective building users as well as clients is even more valuable in the long run.)

(예시) 병원이라는 대기업 고객의 경우, 행정 부서의 관점과 의사, 간호사 등 실제 사용자들의 관점이 크게 다르며, 환자와 방문객들의 경험 역시 완전히 다름

(While the hospital administration may serve as your client, no doubt the perspectives of administration personnel will differ significantly from those of doctors, interns, residents, nurses, and other medical staff who use the building regularly. In addition, the experiences of patients and visitors who use the building irregularly, often as a result of life-threatening emergencies, are altogether different as well.)

→ 건축 설계 과정에서 고객 외의 예상되는 건물 사용자를 참여시키는 것의 가치에 관한 글임을 알 수 있다.

STEP 2 전개 부분을 읽고, 다양한 사용자 참여의 이점을 파악하여 빈칸에 들어갈 말을 추론한다.

- 추론 근거: 각 유형의 사용자가 현재의 의료 환경을 어떻게 경험하는지, 그리고 각각이 여러분의 예상 설계안에 어떻게 반응하는지를 이해하는 것이 필연적으로 더 나은 건물을 만들어 냄

(Understanding how each type of user experiences the current medical environment as well as how each reacts to your prospective designs inevitably produces a better building.)

- 사용자 만족도: 다양한 사용자들의 의견을 들으면 더 나은 건물을 만들게 되며, 따라서 사람들은 새로운 건물에 더 만족하게 됨
- 만족도의 원인: 사람들이 만족하게 되는 직접적인 이유는 설계 과정에서 그들의 의견이 수렴되는 경험을 했기 때문임
- 결과적 효과: 만족도는 대규모 기관의 경우 생산성 향상, 장기 결근 감소, 이직률 감소, 비용 절감이라는 구체적인 성과로 이어짐

STEP 3 글의 요지를 파악하고, 빈칸에 들어갈 내용을 확인한다.

- 요지: 건축 설계 과정에서 예상되는 실제 건물 사용자의 의견을 수렴하는 것은, 더 나은 건물을 만들 뿐만 아니라 사용자들의 만족도를 높여 궁극적으로 대규모 기관의 경우 생산성 향상, 비용 절감 등으로 이어지고, 사용자들이 만족하는 이유는 그들의 경험과 관점이 설계 과정에 고려되었기 때문임

→ 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ④ ‘설계 과정에서 자문을 받았을’이다.

- ① 여러 설계 훈련 시간에 참여했을
- ② 새로운 설계의 초안을 작성할 기회를 받을
- ③ 건물 설계자들과 신뢰를 구축했을
- ④ 건물에 대한 관점을 서로 공유할

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Sharing meanings and experiences is not a simple, automatic process: whenever two or more people observe or participate in the same ongoing event they experience it from different perspectives, with different histories, with different background knowledge. These differences are most glaring when the individuals involved include an infant or very young child and an adult, although an adult arranging an event for an infant may find it difficult to keep these differences in mind. When giving a bath, for example, a parent whose experience with water play has been fun, whose knowledge about the source of the water and its disposition provides confidence, and whose body control ensures that the baby is safely held and not in danger, expects the infant to enjoy splashing water. Yet the baby may make it clear (perhaps by terrified crying) that her perspective is quite different from that of the adult. The two _____.

* glaring: 두드러진 ** disposition: 성질

- ① fail to regulate their emotions
- ② share an experience, but not a meaning
- ③ hesitate to share their unique experiences
- ④ try to understand each other's perspectives
- ⑤ are open to differences, and ready to collaborate

다음 빈칸에 들어갈 말로 가장 적절한 것은?

A detailed anthropological study of daily scientific practice in the Salk Institute laboratory in La Jolla, California shows how difficult it is to _____. Bruno Latour describes how scientists arrived at the elucidation of TRF (thyrotropin-releasing factor), a hormone that is secreted by the brain. He says that his observations led him to “the conviction that a body of practices widely regarded by outsiders as well organized, logical, and coherent, in fact consists of a disordered array of observations with which scientists struggle to produce order.” The final consensus formulation of TRF (i.e., when it became a scientific “fact”) emerged some time between January 1968 and January 1970. Half of the Nobel Prize in Medicine for 1977 for this discovery was shared between the Salk group and another competing group in New Orleans (the other half went to Rosalind Yalow for the techniques she developed that were used in these studies), but each of these two competing groups strongly felt that they deserved sole credit and that the other did not deserve even a share of the award.

* elucidation: 규명, 설명 ** secrete: 분비하다 *** array: 배열

- ① assign credit and dates
- ② trace intentions and methods
- ③ control variables and conditions
- ④ standardize procedures and tools
- ⑤ compare evidence with conclusions

03

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The idea of music direction, in the sense of someone shaping and leading a musical performance, goes back to the beginnings of music. Even the gamelans of ancient Indonesia had leaders who would signal to the group changes of meter and tempo, beginnings and endings, and transitions from piece to piece. Yet listening audiences _____, and for good aesthetic reason. They need not be aware to fulfill their experience; indeed, the unnecessarily conspicuous presence of a musical leader will detract from it. An audience is better off, for the most part, taking in the whole of a stage work rather than being party to the techniques that go into realizing it. This is not to say that when an orchestra plays alone the audience members' eyes are not fixed on the conductor for the majority of the time; they probably are. When music is accompanying something happening on stage, however, all eyes turn to the stage, and so do everyone's ears, too (including the music director's).

* gamelan: 가믈란(인도네시아 전통 음악 연주단) ** conspicuous: 눈에 띄는 *** detract from: ~을 손상하다

- ① are rarely aware of any musical leadership
- ② do not care about subtle mistakes in a performance
- ③ are not always essential for a performance to be meaningful
- ④ do not understand the technical aspects of how the music sounds
- ⑤ should not favor personal interpretation over the composer's intent

04

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The importance of _____ is highlighted in a study discussed by Hirsch in *The Knowledge Deficit*. This study consisted of two groups of students who were asked to read a passage about baseball. The first group was made up of strong readers who knew little about baseball. The second group was composed of struggling readers who were knowledgeable about baseball. After reading the passage, students in each group had their comprehension tested. Guess which group scored higher? The struggling readers. Having strong reading skills was not enough for the students who came to the page with a knowledge deficit about the topic. Though the second group of readers were not strong readers, their prior knowledge enabled them to outscore readers with far better abilities. Prior knowledge, or, in the case of the good readers, the lack of prior knowledge, was the x-factor.

* deficit: 부족, 결손 ** x-factor: (성공을 좌우하는) 미지의 요인

- ① how a student solves problems
- ② where students learn a new topic
- ③ what a reader brings to the page
- ④ how readers approach complex texts
- ⑤ what a student does when tackling difficulties

다음 글에서 전체 흐름과 관계 없는 문장은?

There are few of us who don't at least want to make time for self-care activities such as exercise, hobbies, or relaxation. We start each day with the best of intentions but then get stuck by the flood of email messages or pulled into an unexpected meeting. ① As we struggle to reprioritize so we can get everything done before our deadlines, often our self-care activities are the first thing to be given up. ② No matter how much we plan, we all occasionally have days when that happens. ③ In the short term, the impact of missing that grant deadline may be greater than the impact of missing a woodworking class. ④ Needless to say, we should try to enroll in the woodworking class before the design class because it is more competitive to get into and more beneficial to us. ⑤ But it's important to recognize the cumulative impact of not prioritizing self-care and to make sure that in the long term, this is the exception rather than the norm.

Words & Phrases in Use

- | | | |
|--|--|--|
| ☐ self-care 자기돌봄 | ☐ relaxation 휴식 | ☐ intention 의도 |
| ☐ get stuck 갇히다 | ☐ reprioritize 우선순위를 다시 정하다 | ☐ occasionally 때때로 |
| ☐ grant 보조금 | ☐ woodworking 목공 | ☐ enroll in ~에 등록하다 |
| ☐ beneficial 유익한 | ☐ cumulative 누적된 | ☐ exception 예외 |
| ☐ norm 일반적인 것, 표준 | | |

Solving Strategies

STEP 1 반복적인 어구 또는 특정 개념과 관련된 어구를 통해 글의 내용을 추측한다.

- make time for self-care activities, get stuck by the flood of email messages, our self-care activities, the first thing to be given up

→ 글의 요지: 우리는 자기돌봄 활동을 위해 시간을 내야 하지만, 일에 갇혀 자기돌봄 활동을 포기한다.

STEP 2 글의 요지와 연관성을 고려하면서 흐름에서 벗어난 문장을 찾는다.

첫 두 문장 → 도입(요지): 우리는 자기돌봄 활동을 위한 시간을 내고자 하지만, 날마다 이메일 메시지의 홍수에 갇히거나 예상치 못한 회의로 끌려감

문장 ① → 우선순위를 다시 정하려고 할 때, 우리는 자기돌봄 활동을 가장 먼저 포기한다는 내용이므로 요지와 연관됨

문장 ② → 우리는 모두 그런 일이 일어나는 날을 때때로 겪는다는 내용이므로 요지와 연관됨

문장 ③ → 단기적으로는, 일을 포기하는 것의 영향은 자기돌봄 활동을 포기하는 것의 영향보다 더 클 수 있다는 내용이므로 요지와 연관됨

문장 ④ → 디자인 수업에 앞서 목공 수업에 등록하려고 노력해야 하는 이유는 그것이 들어가는 데 더 경쟁이 치열하고 우리에게 더 유익하기 때문이라는 내용이므로 요지와 무관함

문장 ⑤ → 자기돌봄에 우선순위를 두지 않는 것의 누적된 영향을 인식하고, 장기적으로는 이것이 예외가 되도록 하는 것이 중요하다는 내용이므로 요지와 연관됨

STEP 3 글의 전개 방식을 환기하면서 문장 ④가 무관함을 확인한다.

도입부(요지)	자기돌봄의 의지는 있지만 현실적으로 실행하기 어려움
↓	
전개 1	우선순위를 조정하는 과정에서 자기돌봄 활동은 가장 먼저 희생됨
↓	
전개 2	우리 모두는 이러한 상황을 때때로 겪음
↓	
반론	단기적으로는 일의 포기가 자기돌봄 활동의 포기보다 더 큰 영향을 끼칠 수 있음
↓	
결론	자기돌봄에 우선순위를 두지 않는 것의 누적된 (부정적) 영향을 인식해야 하고, 장기적으로는 이것이 예외적인 상황에만 허용되어야 함

→ 따라서, 목공 수업을 디자인 수업보다 먼저 등록해야 하는 이유에 관한 ④는 글의 전체 흐름과 관계가 없다.

But으로 시작하는 문장 ⑤는 자기돌봄에 우선순위를 두는 것의 중요성을 강조하므로, 바로 앞에는 이와 반대되는 내용이 와야 한다. 따라서 문장 ③ 다음에 문장 ⑤가 자연스럽게 연결된다.

01 다음 글에서 전체 흐름과 관계 없는 문장은?

26005-0072

The use of emotion may be important in exercise, particularly among exercise instructors. It has been established that exercise enjoyment is associated with increased exercise adherence. An instructor might aim to foster enjoyment in his participants as a means of increasing their program adherence. ① An instructor also might use emotion to elicit greater effort from her students. ② Cuing participants to feelings of anger and frustration during a cardio kickboxing class might lead to more effortful punches and stronger kicks. ③ Like this, sports instructors may want to consider monitoring the physical conditions under which students exercise to help prevent injury. ④ Conversely, a yoga instructor could use positive emotions or emotion-related states such as compassion to get her students in the proper mindset for their practice. ⑤ Evidently, there are a number of ways emotions could be used to enhance performance in sport and exercise.

* adherence: 지속성, 고수 ** elicit: 이끌어 내다 *** cardio kickboxing: 유산소 킥복싱

02 다음 글에서 전체 흐름과 관계 없는 문장은?

26005-0073

The most fundamental rule regarding the use of any measuring device is that the device should always be read to its optimum capability with regard to precision. ① Precision is reflected in the number of digits in a measurement; the more digits this measurement has, the more precise it is. ② For example, the measurement 345.2 inches is more precise than the measurement 345 inches. ③ In addition, many calculators today offer advanced graphing features that are useful in visualizing mathematical functions. ④ If it is possible to obtain the first digit to the right of the decimal point from a device, then that digit should be recorded; if it is possible to obtain the second digit to the right of a decimal point, then that digit should be recorded, and so on. ⑤ Thus, a laboratory worker should endeavor to obtain the most digits possible from whatever device is being used whether it is digital or nondigital.

* optimum: 최고의, 최대의 ** decimal point: 소수점 *** endeavor: 노력하다

03

26005-0074

다음 글에서 전체 흐름과 관계 없는 문장은?

The standard school mathematics curriculum doesn't stress enough that mathematics is all about abstraction. Mathematicians study specific objects but, usually, they aim to cluster them together and study them all at the same time. ① This saves huge amounts of time and effort because they must prove properties only once, for the whole class of objects, instead of studying each object individually. ② Even more importantly, this guarantees that every object within a class has a particular property, even the objects that haven't been defined yet. ③ Often, when mathematicians want to prove that an important object behaves in a particular way, they prove instead that it belongs to a class already known to have this property. ④ Mathematical calculation ability serves as a key indicator of academic development, as it reflects a student's numerical proficiency, problem-solving skills, and cognitive growth. ⑤ We reason similarly in everyday life: since all fruits have seeds, and an apple is a fruit, then an apple must have seeds.

* proficiency: 숙달(도), 숙련(도)

04

26005-0075

다음 글에서 전체 흐름과 관계 없는 문장은?

Because belief is so crucial in the placebo effect, it would seem that deception is necessary in order to trigger a patient's trust in the actual drug he might be taking. ① But Ted Kaptchuk, a leading placebo researcher at Harvard, is investigating the possibility of doing away with the element of deception. ② He tells patients up front that they will be taking a placebo, but he also informs them about how powerful and effective placebos can be. ③ In one trial with irritable bowel syndrome, it was found that roughly 59 percent of those on an open placebo treatment reported improvements, as compared with 35 percent of the control group that received no treatment. ④ If patients discover they were given a placebo, it could damage their trust in healthcare providers, potentially leading to doubt about future treatments. ⑤ The results may seem modest, but they make the point that giving a placebo isn't the same as doing nothing.

* placebo effect: 위약[속임약, 플라세보] 효과 ** irritable bowel syndrome: 과민성대장증후군

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

We usually think of a clock as a physical thing, like an alarm clock or a wristwatch. But a clock is really a process embodied in a machine, and the nature of that process is repetitive.

- (A) Indeed, it is almost impossible to think of a clock that does not depend on a repetitive cycle of events. The only example that comes to mind readily is a candle marked in hours. But here too there is iteration — the repeated burning of molecules of wax — so this too is an iterative process, although at first masked.
- (B) The use of radiocarbon dating is another, much longer scale clock that also appears to be like this. It seems to yield a smooth time scale but in fact does not: the decay of atoms of carbon-14 is repetitive, although on a large scale it gives the appearance of being continuous.
- (C) A clock can be almost any process that repeats itself over and over again for an indefinite period. Water clocks drip at a steady pace; quartz crystals vibrate regularly.

* molecule: 분자 ** quartz: 석영(石英)

① (A) - (C) - (B)

② (B) - (A) - (C)

③ (B) - (C) - (A)

④ (C) - (A) - (B)

⑤ (C) - (B) - (A)

Words & Phrases in Use

☐ embody 구현하다

☐ repetitive 반복적인

☐ readily 손쉽게, 선뜻

☐ mark 표시하다

☐ iteration 반복

☐ radiocarbon dating 방사성탄소 연대 측정

☐ scale 규모, 척도

☐ yield 산출하다, 내다

☐ decay 붕괴

☐ give the appearance of ~인 것처럼 보인다

☐ indefinite 무기한의

☐ vibrate 진동하다

Solving Strategies

STEP 1 글의 핵심 어구를 통해 글의 소재를 파악하고 글의 전개를 예측한다.

- 핵심 어구: a clock is really a process, a repetitive cycle of events, an iterative process, any process that repeats itself
- 소재: 반복되는 과정에 기반한 시계의 시간 측정 방식(시계는 실제로는 어떤 기계 속에 구현된 하나의 과정이며, 그 과정의 본질은 반복적임)

STEP 2 주어진 글의 내용을 바탕으로 연결 어구와 지시어, 반복되는 어구 등을 활용하여 글이 전개되는 논리적 흐름을 파악한다.

- (C) ⇒ A clock can be almost any process that repeats itself over and over again ~.에서 주어진 글에 제시된 시계는 기계 속에 구현된 하나의 과정이며, 그것의 본질은 반복적이라는 말을 구체적으로 설명하고 있음
- 물시계와 석영 결정의 사례는 반복적인 과정이 시계의 본질임을 보여줌
- (A) ⇒ Indeed, it is almost impossible to think of a clock that does not depend on a repetitive cycle of events.에서 Indeed를 사용해 앞 문장의 내용(시계는 반복적인 과정이다)이 사실임을 강조하고 있음
- 시간 단위로 표시된 양초도 반복적인 과정이 가려져 있지만, 밀랍 분자들의 반복적인 연소 과정임

STEP 3 마지막 부분을 연결하여, 글의 전체적인 흐름이 자연스럽게 완결성이 있는지 확인한다.

- (B) ⇒ The use of radiocarbon dating is another, much longer scale clock that also appears to be like this.에서 this는 겉으로 보기엔 연속적인 것처럼 보이지만 실제로는 반복적인 과정에 기반해 작동하는 다른 사례를 가리킴
- 탄소-14 원자의 붕괴가 연속적인 것처럼 보이지만, 그것은 반복적인 과정임
- 다른 순서도 가능한지 검토한 후, 최종적으로 정답을 결정한다.

In academia, you are taught to write up your results thus: “I came up with a hypothesis, then I did this experiment, and then I did another experiment, then I tested my ideas some more, and so on until [dramatic fanfare] *ta-da!* I proved this.”

- (A) Instead, you need to tell us up front: “I proved this! And here’s how I know it...” Your readership may still dwindle and trail off over the course of your writing, but at least the vast majority know what it is you’ve achieved from the very beginning.
- (B) A few more of them may stay along for the ride if the opening line — the “hook,” in journalistic terms — is particularly interesting. If you grab their attention early, you can more likely convince more readers to stay for the whole story.
- (C) If you wrote this way online, very few of your readers would make it to your dramatic conclusion, no matter how exciting or groundbreaking it was. Online, we don’t have the patience to wait for your big reveal at the end.

* dwindle: (점점) 줄어들다

- | | | |
|-------------------|-------------------|-------------------|
| ① (A) - (C) - (B) | ② (B) - (A) - (C) | ③ (B) - (C) - (A) |
| ④ (C) - (A) - (B) | ⑤ (C) - (B) - (A) | |

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

The human perceptual system is designed to recognize objects under changing illuminations, situations, and contexts. It is extraordinarily adapted to a constantly changing world. To deal with this uncertainty, the brain uses not one, but multiple routes.

- (A) For instance, migrating birds fly thousands of miles and may rely on the stars to navigate. But if it's a cloudy day, they may instead rely on landmarks or their magnetic sense. Similarly, the brain can recognize a face by the shape of the eyes, nose, and mouth.
- (B) In extreme cases, only a few lines are sufficient, as when we recognize the face of a celebrity in caricatures made with just a few pencil strokes. Face recognition also functions even when parts of a face are covered and internal features such as eyes are hardly visible. In this case, the brain relies on external features such as hair and head shape.
- (C) If one is blocked, it takes another route. This immense flexibility of the brain to rely on changing cues, according to whatever is available, is known as *vicarious functioning*. It can be found in most biological systems.

* illumination: (불)빛, 조명 ** vicarious: 대리

- ① (A) - (C) - (B) ② (B) - (A) - (C) ③ (B) - (C) - (A)
- ④ (C) - (A) - (B) ⑤ (C) - (B) - (A)

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Bir Tawil is a strange place. In January 1899, administrators of the British Empire decided to finalize a border between the countries of Egypt and Sudan.

- (A) The strange result of this long-standing conflict is that, to this day, both countries refuse to claim Bir Tawil, an area of land roughly the size of London, as it would mean giving up a greater prize. This makes Bir Tawil the largest — perhaps the only — piece of land that no country wants.
- (B) The combination of these two intersecting lines brought about the creation of two new areas: the large, inhabitable coastal area called the Hala'ib Triangle and an empty, landlocked patch of desert, which is Bir Tawil. To keep the desirable Hala'ib, Egypt understandably claimed the original, straight border of 1899, whereas Sudan — with the same goal in mind — claimed the new 1902 line.
- (C) In colonial fashion, they decided to use the conveniently straight line of the twenty-second parallel of latitude. Unsurprisingly, this new international border arbitrarily tore through local tribes and communities, and in 1902, the British drew a new line to reflect tribal territories.

* landlocked: 육지에 둘러싸인 ** parallel of latitude: 위도선 *** arbitrarily: 임의적으로

- | | | |
|-------------------|-------------------|-------------------|
| ① (A) - (C) - (B) | ② (B) - (A) - (C) | ③ (B) - (C) - (A) |

An in-group can become a reference group, a group that is used as the frame of reference for evaluating one's own behavior. Members of a volunteer organization, for example, may evaluate themselves by the standards of the group and feel proud about their contribution to a community service project.

- (A) The normative effect basically involves imitating the reference group. However, reference groups can also have *comparison effects* and *associative effects* on self-appraisals. If most of your classmates shine in academic achievement, you are likely to compare yourself with them.
- (B) This positive self-evaluation reflects the *normative effect* of a reference group whose members share the same view of themselves. If other members of your reference group (say, your parents) have high self-esteem, you, too, are likely to share that norm and have high self-esteem.
- (C) As a result, you may have a negative self-evaluation, feeling that your academic performance is not up to par. Being associated with the brilliant group, though, makes you feel proud of yourself, “basking in reflected glory.”

* self-appraisal: 자기 평가 ** par: 표준, 기준 *** bask in: ~을 누리다

- ① (A) - (C) - (B) ② (B) - (A) - (C) ③ (B) - (C) - (A)
- ④ (C) - (A) - (B) ⑤ (C) - (B) - (A)

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

In music, *proximity* may refer to elements' being close together in pitch, time, or space. For example, notes that are similar in pitch may be grouped together.

- (A) Similarly, in some of Bach's famous solo music for violin, the violinist essentially creates two streams of music by simultaneously playing both high and lower notes. Perceptually, we group the high notes together and group the low notes together, so we hear it as polyphonic or as two lines of music.
- (B) Also, most often, it is the right hand that plays the melody, whereas the left hand plays the bass line or accompaniment. Even though all of the notes are played in close spatial proximity and at approximately the same time, we hear the notes from the right hand emerging as melody because they are grouped together with respect to pitch.
- (C) Notes are also grouped together if they are played together in time or if they come from the same instrument or section of a larger musical group. To get a sense of the idea of proximity, imagine a person playing a piano. Typically, the right hand plays notes that are higher in pitch than the left hand.

* polyphonic: 다성 음악의(한 번에 많은 음을 내는)

Public goods are undervalued in markets, which exist for private goods but rarely for public goods.

- (A) As a result, there is no “market” and thus no “price” for these public good uses of wetlands. But the actual value of these services is not zero. Because many people benefit from these services, their value is the total additional benefits of all individuals who enjoy provision of these services by wetlands.
- (B) For example, aquatic habitats such as wetlands provide diverse benefits that are often public goods, including breeding or refuge for unique species, recreation, hunting and tourism, or purification of water supplies. These benefits are enjoyed simultaneously by many people and are provided to them for “free” by the natural functioning of the wetlands.
- (C) This value could be huge, even though there is no apparent “market price” for these wetland services. This gap between the (zero) price for wetland services and their actual value to all beneficiaries indicates how much these public goods are undervalued in markets.

* aquatic: 수생의 ** refuge: 피난처 *** beneficiary: 수혜자

- ① (A) – (C) – (B) ② (B) – (A) – (C) ③ (B) – (C) – (A)
- ④ (C) – (A) – (B) ⑤ (C) – (B) – (A)

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Sometimes these internal narratives we form not only shape our beliefs and opinions but also become deeply rooted in our identity.

While stories clearly dominate statistics from both memorability and persuasiveness perspectives, it's rarely a battle between facts and anecdotes — or even facts and other facts. The real clash is actually *between stories*: the predominant incumbent and a new challenger. (①) As storytelling creatures, we routinely form narratives to help us understand the world around us. (②) When we experience different events or encounter various facts, our minds seek to make sense of them by forming stories around them. (③) For example, if you have had some bad experiences with graduates from a particular university, you may create a negative narrative in your mind about people who went to that school. (④) Suddenly, you judge everyone from the university by what you've experienced on just a few unfortunate occasions. (⑤) For example, the narratives you have formed around gun control or climate change are most likely related with your political ideology — who you are as an individual.

* anecdote: 일화 ** incumbent: 점유자

Words & Phrases in Use

☐ narrative 내러티브, 서사

☐ clash 충돌

☐ occasion 일

☐ memorability 기억할 만함

☐ predominant 우세한, 지배적인

☐ gun control 총기 규제

☐ persuasiveness 설득력

☐ routinely 일상적으로

☐ ideology 이념, 이데올로기

Solving Strategies

STEP 1 글의 소재와 요지를 포함한 글의 전반적인 내용을 개략적으로 파악한다.

- 소재: 내러티브가 우리에게 끼치는 영향
- 요지: 어떤 사건을 경험할 때 이를 이해하기 위해 내러티브를 형성하고, 동시에 우리 자신이 내러티브의 영향을 받는다.

STEP 2 글의 소재와 요지를 염두에 두고 글을 읽으면서, 문장 사이의 흐름이 부자연스럽거나 단절되는 곳을 찾는다.

문장 1	이야기가 기억할 만함과 설득력의 관점 둘 다에서 통계보다 분명 우세하지만, 사실과 일화, 심지어 사실과 또 다른 사실들 사이의 싸움인 경우는 거의 없다.
문장 2	진정한 충돌은 사실 ‘이야기들 사이’, 즉 우세한 점유자와 새로운 도전자 사이의 충돌이다.
문장 3	이야기하는 존재로서 우리는 우리를 둘러싼 세계를 이해하는 데 도움을 주기 위해 일상적으로 내러티브를 형성한다.
문장 4	우리가 여러 가지 사건을 경험하거나 다양한 사실을 마주할 때, 우리의 마음은 그것을 둘러싼 이야기를 형성함으로써 그것을 이해하려고 한다.
문장 5	예를 들어, 여러분이 특정 대학 졸업생들과 어떤 좋지 않은 경험을 했다면, 여러분은 그 학교에 다니는 사람들에게 대한 부정적인 내러티브를 마음속에 만들어 낼 수도 있다.
문장 6	갑자기, 여러분은 자신이 겪은 고작 몇 번의 유감스러운 일로 그 대학 출신 모두를 판단한다.
문장 7	예를 들어, 총기 규제나 기후 변화를 둘러싸고 여러분이 형성한 내러티브는 여러분의 정치적 이념, 즉 개인으로서 여러분이 어떤 사람인지와 관련이 있을 가능성이 매우 높다.

STEP 3 주어진 문장의 단서를 통해 그 문장의 앞뒤에 올 수 있는 내용을 추론하여 주어진 문장이 들어가기에 가장 적절한 곳을 고른다.

주어진 문장은 우리가 형성하는 내러티브가 우리의 신념과 의견뿐만 아니라 우리의 정체성에도 영향을 준다는 내용이므로, 앞에는 내러티브가 우리의 신념과 의견에 영향을 미치는 예시에 관한 문장이 있어야 하고, 뒤에는 우리의 정체성에 영향을 미치는 내용의 문장이 이어져야 하는데, ㉠ 앞에서 신념과 의견에 영향을 미치는 사례가 제시되고, ㉡ 뒤에서 내러티브가 우리의 정치적 이념, 즉 정체성에 영향을 미치는 사례가 제시되고 있다.

→ 따라서 주어진 문장은 문장 6과 7 사이의 ㉡에 들어가야 한다.

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

For many people though, we spend far too much time on the other end of the scale, doing what is referred to as shallow work.

Deep work is when you perform an activity with deep concentration that pushes your cognitive capabilities, and by doing so create new value and improve your skills. (①) These efforts are hard to replicate; and to be able to do deep work, we need a distraction-free environment. (②) This style of working is not cognitively demanding but is rather an execution of logical-type tasks that rarely create new value (although they may still be important). (③) We often perform these tasks while we are distracted. (④) Shallow work has its place, both because routine-type tasks need to be done and because we cannot spend our entire time doing deep work. (⑤) The problem with too much shallow work is that we feel busy, maybe even stressed, but we rarely see any output reflecting our experienced effort.

* replicate: 재현하다, 반복하다 ** execution: 실행, 수행

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Subjective reality is acquired and shared through agreed-upon symbols, especially language.

Symbols are instrumental in helping people derive meanings from social situations. (①) In social encounters, each person's interpretation or definition of a given situation becomes a *subjective reality* from that person's viewpoint. (②) We often assume that what we consider to be "reality" is shared by others; however, this assumption is often incorrect. (③) If a person shouts "Fire!" in a crowded movie theater, for example, that language produces the same response (attempting to escape) in all of those who hear and understand it. (④) When people in a group do not share the same meaning for a given symbol, however, confusion results; for example, people who did not know the meaning of the word *fire* would not know what the commotion was about. (⑤) How people *interpret* the messages they receive and the situations they encounter becomes their subjective reality and may strongly influence their behavior.

* commotion: 소란, 소동

Perhaps understandably, there is no one treatment for this condition, either.

Depression is terrible, and it is common. Roughly one in seven people will experience at least one full-blown depressive episode in their lifetime. (①) It is a tragedy on an individual and a societal level, yet we — and by we, I mean all of us, including doctors — struggle to grasp it. (②) This is because depression is not one disease; it is a collection of symptoms that appears similar across sufferers, despite resulting from a melting pot of diverse causes and mechanisms. (③) There is no single reason for depression: one person's depressive episode seems to clearly stem from recent life events, another from historic trauma and loss, yet another out of the blue, with no clear psychological or social cause whatsoever. (④) There is also no one presentation of depression: in fact, there are 227 possible symptom combinations that meet the diagnostic criteria for major depressive disorder. (⑤) Antidepressants lead to improvement in roughly a third of patients, offer some kind of improvement in another third, while a final third remain completely unaffected.

* antidepressant: 항우울제

26005-0087

On other occasions, however, the analogy can be an integral part of an argument.

Analogies can serve two different functions in philosophy. Sometimes, as seems often the case in Plato, for example, they serve simply to illustrate. (①) When Socrates compares the Good with the sun, he may simply be using the image of the sun to help bring to life his arguments about the Good. (②) Consider one of the most popular arguments for the existence of God, the ‘argument from design’, which has been advanced by many thinkers, from the ancient Stoics to British theologian William Paley. (③) The argument holds that just as an artefact such as a watch implies the existence of an artisan, so the universe implies the existence of a divine creator. (④) Here the analogy with the watch is not meant simply to illustrate a point. (⑤) Rather, the analogy is supposed to show why we should conclude that the universe has a creator.

* analogy: 유추 ** theologian: 신학자 *** artisan: 장인

Recovery as a process refers to those activities and experiences that result in a change in one’s physiological and psychological state.

Recovery can be considered a *process* as well as an *outcome*. Recovery as an outcome refers to one’s physiological and psychological state after a certain recovery period, which can be, for instance, at the end of the day, after engaging in a certain activity, or after waking up. (①) Physiological recovery outcomes involve the restoration of physiological resources such as muscle strength, heart rate, and the absence of physical fatigue (e.g., muscle soreness, heavy arms and legs). (②) Psychological recovery outcomes relate to the restoration of mental resources such as attention, motivation, mental energy, and mood. (③) As such, one’s physiological and psychological states act as a resource that functions as a stress-buffer for upcoming activities as well. (④) Accordingly, recovery processes precede recovery outcomes and, consequently, determine whether adequate recovery is obtained. (⑤) Regarding recovery processes, physical inactivity is generally considered the most effective way to restore physiological resources.

* physiological: 생리적인

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

On the other hand, these past experiences with suffering tended to reduce people's overall levels of happiness.

The difficult times that we endure play a key role in helping us to lead more meaningful lives. As Jean-Paul Sartre put it, "Human life begins on the far side of despair." That is, many of the ways people feel their lives are meaningful are grounded in the sufferings they have experienced. (①) One research project investigated the differences between people who found their lives to be happy and those who found them to be meaningful. (②) While, on average, happy lives and meaningful lives overlap a great deal, the researchers focused on those aspects of a meaningful life that were distinct from happiness. (③) And, remarkably, they found that people who had more meaningful lives reported that they had more experience suffering through past negative events. (④) They also reported worrying more and enduring more things that caused them stress. (⑤) Our sufferings, then, seem to help to provide people with the sense that their lives are more meaningful, even if these events are associated with lower feelings of happiness.

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

In modern societies, the performing arts form a distinct category of public entertainment in opposition to the mass distribution through the media of expertly staged performances which have been recorded and edited. By contrast, theater, ballet, circus, concert, rodeo, storytelling, etc., unfold their signs in real space and time, and engage audiences who respond cognitively and emotionally on the spot. Performers and audiences are involved in shared enjoyment. But sometimes frustration occurs within the boundaries of such ritualistic events. In industrialized and computerized cultures, the performing arts become economically unstable because the institutions which sustain them increasingly depend on public and corporate funding. However, they retain their power of fascination for large, if not massive audiences, who prize the experiential, risk-loaded and one-time event quality they afford. In traditional and local cultures, performances still survive and provide their audiences with a unique fulfillment in smaller scale, economically sustainable institutional settings.

* ritualistic: 의식의

In a situation of financial _____ (A) _____ due to reliance on external funding, the performing arts, which provide unique and live experiences, _____ (B) _____ audiences who value those experiences.

- | (A) | (B) | (A) | (B) |
|---------------|---------------|-------------|-------------|
| ① uncertainty | lose | ② imbalance | split |
| ③ challenges | secure | ④ stability | reach |
| ⑤ advantages | support | | |

Words & Phrases in Use

- | | | |
|--|--|---|
| ☐ performing arts 공연 예술 | ☐ distinct 독특한 | ☐ public entertainment 대중 오락 |
| ☐ in opposition to ~과 대조적으로 | ☐ unfold 펼쳐 보이다 | ☐ engage 끌어들이다 |
| ☐ cognitively 인지적으로 | ☐ on the spot 현장에서 | ☐ be involved in ~과 관련되다 |
| ☐ frustration 좌절 | ☐ sustain 지속하게 하다, 지탱하다 | ☐ retain 유지하다 |
| ☐ fascination 매혹 | ☐ prize 소중히 여기다 | ☐ experiential 체험적인 |
| ☐ risk-loaded 위험 부담이 따르는 | ☐ fulfillment 충족감 | |

Solving Strategies

STEP 1 요약문을 먼저 보고 핵심 어구로 보이는 것들을 근거로 대략적인 글의 내용을 추론해 본다.

→ reliance on external funding, the performing arts, audiences 등의 어구를 통해 공연 예술과 그것에 대한 외부의 자금 지원이 관객을 어찌하는가에 관한 글임을 추론한다.

STEP 2 요약문을 통해 얻은 단서를 바탕으로 글의 세부 내용을 파악한다.

■ 도입: 공연 예술의 독자적 특성

- 현대 사회의 공연 예술은 녹화되고 편집된 공연의 매체를 통한 대량 배포와는 구별되는 독특한 범주를 형성함
- 연극, 발레, 콘서트 등은 인지적, 감정적으로 반응하는 관객을 현장에서 즉각적으로 끌어들이

■ 전개: 경제적 불안정과 고유한 매력의 공존

- 산업화, 컴퓨터화된 현대 문화 속에서 공연 예술은 공공 및 기업 후원에 의존해 경제적으로 불안정함
- 하지만 많은 관객은 위험 부담이 따르고 단 한 번뿐인 행사의 특성을 소중히 여김

■ 결론: 지속 가능한 규모의 생존

- 전통적이고 지역적인 문화에서, 공연 예술은 여전히 경제적으로 지속 가능한 규모로 생존하고 있음

STEP 3 글을 통해 파악한 내용을 바탕으로 요약문의 빈칸에 들어갈 가장 적절한 말을 선택지에서 고른다.

(A) 산업화되고 컴퓨터화된 문화에서 공연 예술은 그것을 지속하게 하는 기관들이 공공 및 기업의 자금 지원에 점점 더 의존하게 되면서 경제적으로 불안정해진다는 내용으로부터 challenges를 추론할 수 있다.

(B) 공연 예술은 대규모는 아니더라도 많은 관객에게 매혹적인 힘을 유지하며, 그들은 공연 예술이 제공하는 체험적이며 위험 부담이 따르고 단 한 번뿐인 행사의 특성을 소중히 여긴다는 내용으로부터 secure를 추론할 수 있다.

→ 그러므로 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은 ㉓이다.

01
26005-0091

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

There are estimated to be more than 160,000 farms spread across Northern Ireland and the Republic of Ireland combined. On all of those farms, you will find barns, and in some of those barns, you might be fortunate enough to stumble across a classic tractor like the Massey Ferguson 35. Production of the Massey Ferguson 35 in the UK and the USA stopped in 1964. If you were to strike up a conversation with a farmer who still owns one, she might well give the chassis of her Massey Ferguson 35 an affectionate tap and nostalgically remark, 'They don't make 'em like that anymore.' The fact that the tractor has survived at least fifty-eight years seems to provide evidence of its superior build quality. But wait — how long did the other 388,381 Massey Ferguson 35 tractors produced between 1956 and 1964 last before they went for scrap? Rather than build quality, it might well be the fondness that people in Ireland have for the little red tractor (Harry Ferguson, who developed it, was born in Ireland) that has led farmers there to hold on to their Massey Fergusons and take care of them as well as they have.

* stumble across: ~을 우연히 발견하다 ** chassis: 차대(자동차의 기본 프레임 구조) *** scrap: 폐품

While the long-standing presence of the Massey Ferguson 35 on Irish farms may seem to reflect its _____ (A) _____, it might instead be due to the strong _____ (B) _____ that farmers have for the tractor.

- | (A) | | (B) |
|-----------------|-------|--------------|
| ① durability | | affection |
| ② appearance | | appreciation |
| ③ reliability | | tolerance |
| ④ affordability | | affection |
| ⑤ technology | | tolerance |

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

During crises that present immediate danger (e.g., natural disasters, acts of violence or terrorism, transportation crises), people seek trusted and verified sources to ease their immediate concerns, thus turning to traditional sources such as television and radio. For other crisis types, such as public health and political crises, however, people are more likely to turn to social media where they can seek multiple voices and a variety of expert opinions, as, unlike the first set of crises, public health and political crises may be more subjective and less straightforward, and thus necessitate a deeper dive into supplementary information and evidence. In addition to the type of crisis at hand, Liu, a communication scholar, and colleagues argued that traditional and social media have different effects on different audiences regarding the motivation to follow instructions and recommended behaviors during crises. For example, although younger audiences seem to favor social media to traditional media sources during times of crisis, older audiences indicate a preference for traditional media. Thus, both traditional and social media play a prominent role in delivering important scientific information to the public during crises.

While people select traditional media for _____ (A) _____ crises and social media for complex and subjective issues, _____ (B) _____ factors also influence how different population groups approach these media choices during emergencies.

- | (A) | | (B) |
|--------------|-------|--------------|
| ① unexpected | | educational |
| ② unexpected | | regional |
| ③ minor | | economic |
| ④ urgent | | generational |
| ⑤ urgent | | linguistic |

26005-0093

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Focal points are the little things that make a big difference — the difference between reaching one equilibrium and reaching another. If a local soccer team comes to practice near the playground of the park every Saturday morning or a group of stay-at-home parents arranges a regular trip at 3 P.M. on a Wednesday afternoon, that can create a focal point around which others coordinate. With the team at practice, the park will feel safe from muggers and there will be something to look at, so families will come along to use the park. Other families will come because the first families will be there; after the soccer season is over and the team no longer comes to practice, Saturday mornings can still be lively at the playground simply because everybody expects that they will be. A lively park playground can be created by a soccer practice that doesn't even take place any longer: That is an indication of how whimsically unpredictable these multiple equilibria can be. Yet while the outcome is whimsical, the causes are rational.

* equilibrium: 균형, 평형 ** mugger: 강도 *** whimsically: 종잡을 수 없게

Focal points, such as a local soccer team's regular practice, can foster _____ (A) patterns of activity in public spaces through rational coordination, even when the outcomes may appear _____ (B) .

- | (A) | | (B) |
|-------------------|-------|---------------|
| ① self-sufficient | | predictable |
| ② self-sustaining | | unforeseeable |
| ③ self-limiting | | unsuspected |
| ④ shifting | | expected |
| ⑤ fading | | unrelated |

04

26005-0094

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

As the set of cultural norms and categories taken for granted at any particular time, the present is normally more or less invisible to those who participate in it. It is the unthought background of their thought and action, like water to a fish, or air to a dove. In films, this background can sometimes become visible as a bygone present in a film that is not just historically but culturally dated. In the culturally dated film, attitudes and ways of behaving that have altered over time and which now appear as quaint, strange, ‘incorrect’ or problematic, are taken for granted by the characters in the film, and go unquestioned or are even happily endorsed in the film’s narrative. The present is also visible in contemporary historical dramas that ‘read the past in terms of the present’, anachronistically importing modern attitudes into the past they portray. This is something that is doubly evident in dated historical films that read the past in terms of *their* present, where the anachronisms are themselves reflective of a bygone present.

* quaint: 기이한 ** endorse: (공개적으로) 지지하다 *** anachronistically: 시대착오적으로

Historically and culturally dated films portray _____ (A) _____ attitudes and behaviors and reveal the contrast between then and now, and thus our perception of the present is _____ (B) _____.

- | (A) | | (B) |
|-------------------|-------|------------|
| ① period-specific | | distorted |
| ② future-oriented | | reflected |
| ③ period-specific | | visualized |
| ④ future-oriented | | confused |
| ⑤ morality-guided | | questioned |

01~02 다음 글을 읽고, 물음에 답하시오.

There is an obvious problem with the history of dress in all of its displays and that is, although textiles survive from early periods and cultures of recorded history, actual garments do not provide an uninterrupted flow of evidence across the same long time-span. Therefore, to give the study of dress equal significance to other areas such as architecture, painting, prints, drawings and sculpture, it was (a) inevitable that these other areas would provide much of the source material. The history of surviving dress really only starts in the 17th century, and like all artefacts described as fine or decorative art, is a highly visual subject. However, unlike most of the categories of collection and study that make up those areas, it is fluid rather than static. Garments should be seen in (b) movement on a human body, not frozen on a display figure. This is one of the many difficulties when curating collections of costume and also why some modern writers find costume collections physically and intellectually (c) lifeless. Fortunately, in the period after 1660, when more items of dress survive to enrich our understanding of the history of the subject, there are also many painted, printed, photographed and filmed sources of evidence of people in clothing, caught in movement. Often a variety of different types of illustrative examples will (d) provide evidence about how a garment was worn within the period in which it was made. Without the information contained in art in all of its forms, from drawing to sculpture, it is (e) unlikely that displays of historic dress would be awkward imitations of the intentions of their original makers and owners.

* garment: 의복

26005-0096

밑줄 친 (a)~(e) 중에서 문맥상 낱말의 쓰임이 적절하지 않은 것은?

- ① (a) ② (b) ③ (c) ④ (d) ⑤ (e)

Words & Phrases in Use

- | | | |
|---|--|---|
| ☐ textile 직물 | ☐ uninterrupted 연속된, 끊김이 없는 | ☐ architecture 건축 |
| ☐ sculpture 조각 | ☐ inevitable 불가피한 | ☐ artefact 인공물 |
| ☐ fluid 유동적인 | ☐ static 정적인 | ☐ physically 물리적으로 |
| ☐ enrich 풍부하게 하다 | ☐ illustrative 실례가 되는, 설명적인 | ☐ awkward 어색한 |

Solving Strategies

STEP 1 글의 전반적인 흐름을 파악한다.

- 도입: 복식사 연구의 문제점 → 오랜 기간 연속된 증거를 제공하지 못하는 실제 의복 → 다른 예술 자료(건축, 회화, 조각 등)에 의존해야 할 필요성
- 전개: 유동적인 복식 → 전사용 동상 위에 고정된 것이 아닌 본래 움직임 속에서 의미가 드러나는 의복 → 1660년 이후, 옷을 입은 사람들의 움직임이 포착된 다양한 자료(회화, 사진, 영화 등)를 통해 의복 제작 시기에 그것의 착용 방식을 확인
- 결론: 복식사를 이해하기 위한 증거로서의 다양한 시각 자료의 중요성

STEP 2 글의 내용을 종합적으로 파악하여 제목으로 적절한 것을 고른다.

실제 의복은 오랜 기간 연속적으로 남아 있지 않기 때문에 회화, 판화, 사진, 영화 등 다양한 시각 자료가 복식사 연구의 공백을 메우는 중요한 역할을 한다는 내용의 글이다. 따라서 글의 제목으로 가장 적절한 것은 ② ‘시각 자료: 복식사의 공백 메우기’이다.

- ① 시각 예술로서 복식: 지금 입은 옷을 기록하라!
- ③ 수집가들은 왜 역사 속 미지의 의복을 원할까?
- ④ 복식 문화: 인류 의복의 기원을 탐구하기
- ⑤ 보는 것이 믿는 것이다! 복식 디자인에서 삽화의 중요성

STEP 3 글의 맥락을 살펴서 어휘의 적절성을 판단한다.

- (a) 실제 의복은 오랜 기간 연속된 증거를 제공하지 못하기에 건축, 회화, 조각 등과 같은 다른 분야가 원자료의 많은 부분을 제공해야 했을 것이므로, inevitable은 문맥상 적절하다.
- (b) 의복은 전사용 동상 위에 고정된 것이 아니라고 했으므로 인간 신체의 움직임으로 보여져야 함을 추론할 수 있다. 따라서 movement는 문맥상 적절하다.
- (c) 전사용 동상 위에 고정된 의복으로는 의상 수집품을 큐레이팅하는 데 어려움이 있으며 이 때문에 일부 현대 작가들이 의상 수집품을 생명력이 없다고도 여긴다는 맥락이므로, lifeless는 문맥상 적절하다.
- (d) 다행히 1660년 이후에는 옷을 입은 사람들의 움직임이 포착된 회화, 판화, 사진, 영화의 많은 증거 자료가 존재한다고 했으므로, 이러한 다양한 유형의 실례들이 의복 제작 시기에 그것이 착용된 방식에 관한 증거를 제공한다고 추론할 수 있다. 따라서 provide는 문맥상 적절하다.
- (e) 복식사 연구에서 모든 형태의 예술에 포함된 자료가 중요한 증거이므로, 이러한 자료가 없다면 역사적 복식 전시는 그것의 원래 제작자와 소유자의 의도를 어색하게 모방한 것으로 추론할 수 있다. 따라서 (e)의 unlikely를 likely와 같은 낱말로 바꾸어야 한다.

01~02 다음 글을 읽고, 물음에 답하십시오.

Women's dresses from the eighteenth century offered a great opportunity for repurposing, as they were frequently fashioned from long, uncut lengths of fabric. Textiles were significantly more (a) costly than the labor it took to alter them, and as a result, most garments were modified numerous times to keep up with changes in fashion. "Even the wealthy saved fabrics, remodeled clothes, and sold unwanted items in the secondhand market," observes fashion scholar Linda Walters. "Sustainability was a way of life." Indeed, although change is inherent to fashion, the remodeling of the existing clothing, rather than buying new, was a widespread practice. It is (b) rare, in fact, to find an eighteenth-century dress that does not show some sign of alteration. The cost of having a gown made, or remade, was only about half the cost of the textile itself and could be significantly less, depending on the type of fabric. In addition to updated dress silhouettes, accessories and trimmings played an important role in refreshing old clothing styles. For example, the addition of a row of lace on an upper part of a gown was an economical alternative to the full (c) replacement of the gown. Many eighteenth-century dresses, particularly those from the first half of the century, were constructed with relatively crude stitches, indicating that the effortless (d) preservation of the original gown was a consideration. Because fabrics (e) retained value even when they were not in fashion, hand-woven silks, cherished for their quality and beauty, were sometimes passed down through generations.

* garment: 의복 ** crude: 조잡한 *** cherish: 소중히 여기다

The rise of internet-based technologies means that news is produced, distributed, and consumed faster than ever before. However, the reliability of this news is questionable. Not all organizations or individuals putting out information spend time (a) checking the details or putting the facts into a wider context.

People are confronted with overwhelming amounts of information not just on a daily basis, but via minute-by-minute updates transmitted to audiences around the globe. More than ever before, people are (b) involved in organizing and managing the amount and type of news they receive. The internet means that irrespective of where we are in the world or what time of the day it is, news can be (c) accessed from broadcasters located anywhere on the planet. As “new media” such as mobile phones, computers, and other portable devices have become more affordable, compact, and embedded in everyday life, they have come to replace television and newspapers. For younger people, advances in technology form part of the world they were born into. But the (d) difficulty of use and affordability of new media means that they are an integral feature of the lives of people of all ages.

For US sociologist Matthew Hindman, technological advances have made news more “democratic,” meaning that now people of all ages and from all social backgrounds can access it. Others fear that new media poses a threat. Information on the internet is often (e) unregulated, so while it is more accessible than ever before, its reliability is difficult to discern.

* embed: 깊숙이 자리 잡게 하다 ** discern: 분별하다

Since the 1970s, a combination of forces has made the problem of overwork more widespread. The service sectors in Western economies have grown dramatically while employment in manufacturing has declined. The shrinking of labor unions and workplace protections has let employers push for (a) longer hours while global competition, decreased job security, and flat wages have forced workers to work harder to stay in place. Corporations now shed staff in the course of restructuring and “process reengineering,” forcing surviving workers to carry heavier workloads. The 2008 recession and recovery has (b) weakened a pattern in which companies seek to grow by increasing demands on existing workers rather than hiring new ones. A few industries have turned into fast-moving, winner-take-all contests: small numbers of people stand to make (c) immense fortunes when their tech company goes public, their hedge fund investment pays off, or their song goes viral — and since no one knows how long they have until fashions change, technology evolves, or the bubble bursts, it makes sense to go all-in right now.

As a result, many of us are actually working longer hours. Working hours generally decline with increased productivity, but in the 1970s, increased productivity (d) stopped yielding shorter working hours, despite the expectations of generations of economists. Working hours started to rise in the United States in the 1980s, especially among salaried workers and professionals like doctors, lawyers, bankers, and academics; in contrast, working hours (and full-time jobs and salaries) in less skilled, hourly professions began to fall. Since then, this (e) split has spread to other parts of the world: today, well-off, well-educated people in Western Europe, Australia, and South Korea are also more likely to be overworked, while more poor people struggle to find stable jobs and face chronic underemployment.

* recession: 경기 침체 ** hedge fund: 헤지 펀드(고위험·고수익을 추구하는 민간 투자 펀드)

Political psychologist Philip Tetlock examined the speeches made by policymakers involved in international conflicts. He noted that, in making important decisions, national leaders often fall back on overly simplified images of the world. During the Cold War between the United States and the Soviet Union, for example, two very simple images of the conflict were (a) dominant. One of these was the deterrence view — that any sign of weakness would be taken advantage of by the opponent and that leaders needed to show their willingness to use military force. From a deterrence perspective, some demonstration of aggressiveness is often necessary as a (b) preventive measure to stop the other side from aggressing against one's group. People who hold a deterrence view — that demonstrations of weakness would be taken advantage of — are less likely to (c) support nuclear disarmament. The other prominent view was a conflict spiral view, which presumed that every escalation of international threat leads the opponent to feel more threatened and that leaders need to demonstrate (d) peaceful intentions in order to reduce the opponent's own defensive hostilities.

Tetlock noted that each of these cognitive frames was correct in some circumstances and incorrect in others. Against an opponent such as Hitler, a deterrence viewpoint might have been more effective than a view that led to conciliation. On the other hand, international policy experts estimate that the U.S. invasion of Iraq, argued by President G. W. Bush to be the centerpiece of the war on terror, seems to have (e) restrained increases in the membership of Al-Qaeda (the group responsible for the terrorist attacks of September 11, 2001).

* deterrence: 억지(抑止) ** escalation: 고조, 상승 *** conciliation: 우호 상태, 화해

(A)

“Mia, let’s go walk our dog!” Julia called out, but there was no answer. She checked her daughter’s room and found that Mia was absorbed in her smartphone, wearing her earbuds. Julia was concerned about her daughter. She turned to her husband, Sam. “Mia seems to live inside her phone, not with us.” Sam nodded, “I know. I feel like (a) she is growing distant from us. Why don’t we set up a family reading club?” Julia brightened at the suggestion, and Sam promised to talk with Mia about it.

(B)

Mia’s family held their first book club meeting on Saturday afternoon. Everyone enjoyed the book Mia had chosen. Julia was the first to speak: “Dr. Duvall nearly invented a drug for eternal life, yet disappeared one day and ended up running Café Paris. That’s such a mystery.” Mia responded, her eyes sparkling, “Mom, I understand him. He always dreamed of being a barista, and his dream came true.” Sam supported (b) his daughter, and their conversation grew lively. During the discussion, Mia felt reconnected with her parents and already looked forward to their next book club meeting.

(C)

At the library, Mia scanned the shelves for nearly an hour, feeling lost among the endless titles. Then, a librarian approached and asked, “Looking for something in particular?” “I need a book for my family’s reading club,” Mia admitted. “What genre do you enjoy?” she asked kindly. “Hmm, I like mysteries,” Mia replied. The librarian handed her a book titled *Café Paris* and said with a smile, “You’ll love this one.” Mia thanked (c) her and checked it out.

(D)

When Sam suggested starting a family reading club, Mia immediately shook her head and said, “No, Dad. I don’t have time to read books. You know how busy (d) I am with exams all semester.” He didn’t give up. “But wouldn’t it be fun if we all read the same story and shared our thoughts? You could simply read for 20 minutes, maybe during your lunch break.” After some persuasion, Mia reluctantly agreed. Deep down, (e) she knew she was spending too much time on her phone. So she asked, “Dad, can I choose the first book?” Sam gladly said, “Yes.”

26005-0107

윗글에 관한 내용으로 적절하지 않은 것은?

- ① Julia는 스마트폰에 빠져 있는 Mia를 걱정했다.
 ② 가족들은 Mia가 선정한 책을 좋아했다.
 ③ Mia는 책장을 살펴보며 거의 한 시간을 보냈다.
 ④ Mia는 미스터리 장르를 좋아한다고 말했다.
 ⑤ Mia는 Sam의 독서 모임 제안을 처음부터 환영했다.

Words & Phrases in Use

- | | | |
|--|--|---|
| ☐ call out 외치다 | ☐ absorbed 몰두한 | ☐ earbud 이어폰 |
| ☐ be concerned about ~에 대해 걱정하다 | ☐ brighten (얼굴 등이) 밝아지다 | ☐ eternal 영원한 |
| ☐ sparkle 반짝이다 | ☐ reconnect 다시 연결하다 | ☐ shelf 책장, 선반 (pl. shelves) |
| ☐ genre 장르 | ☐ check out ~을 대출하다 | ☐ immediately 즉시 |
| ☐ semester 학기 | ☐ persuasion 설득 | ☐ reluctantly 마지못해 |

Solving Strategies

STEP 1 주어진 글 (A)를 읽은 후, 글 (B), (C), (D)의 내용을 빠르게 살펴 글의 순서를 추론해 본다.

글 (A): 스마트폰에 몰두한 딸 Mia를 걱정해, Sam과 Julia는 가족 독서 모임을 하자고 동의함

글 (B): 가족은 첫 독서 모임을 열고 Mia는 주인공에 대한 자기 생각을 공유하며 부모님과 소통하고 다시 연결된 느낌을 받음

글 (C): 도서관에서 책을 고르던 Mia는 사서의 도움을 받아 자신이 좋아하는 미스터리 장르의 책을 선택하고 대출함

글 (D): Sam이 독서 모임을 제안하자 Mia는 처음에 거부하지만, Sam의 설득에 마지못해 동의하고, 첫 번째 책을 고르겠다고 함

STEP 2 파악한 글의 내용을 종합하여 글의 순서를 완성한다.

스마트폰에 몰두해 너무 많은 시간을 보내는 딸에 관해 이야기를 나누던 중 아빠인 Sam이 가족 독서 모임을 만들어 보자고 제안하며, 자신이 딸인 Mia에게 말해 보겠다는 내용의 (A) 다음에는, Mia가 아빠인 Sam의 제안을 처음에는 거절하지만, 결국 수긍하며 첫 번째 가족 독서 모임 책은 자신이 고르겠다고 말하는 내용의 (D)가 이어져야 한다. 그다음에는 도서관에 간 Mia가 사서의 도움을 받아 책을 고르게 되는 (C)가 이어져야 하고, 마지막으로 가족 독서 모임을 통해 Mia가 가족과의 유대를 다시 느끼게 되었다는 내용의 (B)로 마무리가 되는 것이 글의 순서로 가장 적절하다.

STEP 3 글의 흐름에 맞추어 글의 내용을 이해하고 나머지 문제를 푼다.

- (a), (b), (d), (e)는 Mia를 가리키지만, (c)는 도서관의 사서를 가리킨다.

- Sam이 가족 독서 모임을 시작하자고 제안했을 때, Mia는 즉시 고개를 저으며 싫다고 말했으므로, 글에 관한 내용으로 적절하지 않은 것은 ⑤이다.

(A)

The manager of the Humane Society was out of town for two weeks, and Elaine was placed in charge. Since she had taken on this responsibility before, she was familiar with the challenges she might encounter — impounding stray animals, reuniting pets with their owners, informing people their pet hadn't been found, accepting animals from those who could no longer care for them, or turning animals away when the shelter was full. Though she found the work demanding, (a) she handled these situations with confidence and calm.

* impound: 수용하다, 가둬 두다 ** stray: 길 잃은; 길 잃은 동물

(B)

Elaine could no longer hold it in. She gently put the cat in a kennel and brought it to the back isolation area. Then she went to the back room and called the absent manager, who encouraged her to let it all out. Elaine shared what happened and released (b) her emotions while the manager listened. She felt much better afterward and was relieved to have someone she could talk to without fear of judgment. Since then, the manager has encouraged staff to come to her if they need to release emotions kept in at work — and she listens.

* kennel: 이동 장, 이동식 케이지

(C)

Elaine calmly explained that there was no space available, but the woman became visibly upset and said, "If you don't take this cat, I'll just have to let it go somewhere." Although such statements were sadly not unusual, they always troubled Elaine. Still, (c) she maintained professionalism, offered contact information for other shelters, and tried to help. The woman complained the alternatives were too far and repeated she had no other choice. Elaine then suggested the shelter might find a volunteer to transport the cat. In response, the woman, showing her frustration toward (d) her, placed the cat's kennel in front of her, raised her voice, and left the shelter.

(D)

On the first day of the manager's absence, everything was running smoothly until a woman arrived with a cat and asked to leave it at the shelter. Elaine's first question was whether the cat was a stray or not, since the shelter was obligated to take in strays but could refuse owned pets. The woman said it was her cat and explained that she was moving and couldn't take it with (e) her — a common excuse. Although the shelter sometimes accepted pets in such cases, it was already housing over ninety cats, nearly double its capacity of fifty, so Elaine had to politely refuse.

* obligate: 의무를 지우다

(A)

One evening, little William was on his way home from his friend's. He was passing through the market. On his way, he came across the beautiful aroma of some meatballs sold by an elderly vendor just across the road. The smell was so pleasant that little William had to stop by the stand to purchase some meatballs. However, the meatballs didn't have a listed price, so he decided to head directly home. Just as little William turned to leave, a firm voice stopped (a) him.

(B)

The shopkeeper angrily shouted, "When did you pay the money? You reached into your pocket but came out empty-handed!" Little William made it clear that he had just paid, reminding the shopkeeper that he had heard the jingle of the coins from his pocket. (b) He added that if smelling is as good as eating, then hearing the sound of the coins should also be as good as receiving them. He smiled proudly and walked home from there, leaving the man completely surprised.

* jingle: (달랑거리는) 소리; 달랑거리다

(C)

It was the elderly vendor. "Wait! You can't just leave. Before you go, you have to pay," he said. Little William was surprised at the statement made by the elderly vendor. (c) He asked him, "Payment for what, Sir? I didn't purchase any meatballs." The vendor insisted that although little William did not purchase any meatballs, he enjoyed the pleasant smell of his meatballs for quite a long time. (d) He truly believed that little William had to pay for it because smelling was as good as eating.

(D)

Little William was upset about this. He didn't know how merely smelling the meatballs meant that (e) he had to pay for them. After observing the man for a short while, little William dipped his hands in his pocket and jingled a few coins. The elderly vendor was excited to hear the coin sound. He said, "Now hurry up, boy. Pay the money fast." Little William replied, "I have already paid the money, Sir. You didn't understand?"

(A)

Sandy Robinson was a teacher in an elementary school. In addition to a variety of other duties, every afternoon Sandy worked with small groups of third graders who were reading below grade level. The goal was to raise the reading level of the students with whom she worked to help enable her school to ascend from its “academic emergency” status under the state’s education rules. Emma was in one of Sandy’s afternoon reading groups, and she was not improving. (a) She lacked patience and often lost focus, at which point she became disruptive, primarily to amuse herself, or so it seemed.

* ascend: 올라가다

(B)

That evening after school, Sandy reflected on what Emma had said. Sandy recalled research suggesting she needed to increase the number of words Emma was reading to improve her ability to sound out words. The next day, Sandy told her she would meet her for some one-on-one reading instruction in addition to the small-group time. In those one-on-one meetings, Sandy let Emma select a book from a handful of books that were at (b) her reading level. Then Sandy would read a paragraph out loud and have Emma read one.

(C)

They would continue to swap back and forth. Slowly but surely, they saw improvement. Over time, they were able to increase the reading level of the books as Emma’s ability to sound out words improved. Sandy also noticed that Emma came to reading group with her classmates and started to make it through the entire lesson without becoming disruptive or feeling anxious. More than anything, her newfound confidence made (c) her want to try and read other books!

* swap: 교대로 하다

(D)

When Emma lost focus, it was difficult for Sandy to teach her or the other six students in the reading group. Sandy spent a lot of time thinking about how she could help Emma keep her focus and be successful. After much reflection, (d) she decided to get her impression of how the reading group was going. When they met later that week, Emma said something that really surprised her. Emma shared that she felt like Sandy needed to be more patient with her when (e) she sounded out words she was reading to the group. Emma knew she was not good at it, and it made her nervous and want to get away from the group.

10~12 다음 글을 읽고, 물음에 답하십시오.

(A)

It was a rainy Monday morning, and Sarah, a young professional struggling with the weight of a recent job loss, found herself at her favorite corner café. She sat alone at a small table, staring blankly out the window, her untouched cup of coffee growing cold. Anxiety and hopelessness weighed on her as she replayed the events of the last few weeks. Across the room, an older woman named Margaret noticed Sarah's sad expression. Margaret, a retired teacher, had a habit of looking for opportunities to brighten someone's day. She approached Sarah's table cautiously, holding (a) her steaming cup of coffee.

(B)

Before leaving, Margaret wrote her email address on a note and handed it to her. "If you ever need someone to talk to or help with a résumé, don't hesitate to reach out," (b) she said with a kind smile. Encouraged by this unexpected encounter, Sarah went home and started to take small steps forward. She updated her résumé, sent out applications, and began to see her challenges as opportunities. A few weeks later, she landed a job at a nonprofit organization — work that fit well with her passions and gave her a renewed sense of purpose.

* résumé: 이력서

(C)

When Sarah finished, Margaret offered a few kind words. "I'm sorry you're going through this. I know it's tough, but (c) I can see strength in you, even if you don't feel it right now. Sometimes, life closes one door so it can open another. You'll get through this, and maybe it will lead to something better." (d) Her words were simple, but they carried a weight Sarah hadn't realized she needed. For the first time in weeks, she felt seen, heard, and understood.

(D)

"Mind if I join you?" Margaret asked gently. Startled but too polite to decline, Sarah nodded. Margaret sat down and introduced herself, asking how her day was going. At first, Sarah hesitated to share her troubles, but Margaret's warm, patient manner made (e) her feel at ease. Slowly, she opened up about her struggles — losing her job, mounting bills, and her fear of an uncertain future. Margaret listened intently without interrupting.

* startled: 깜짝 놀라게 하다

주제·소재편

다음 빈칸에 들어갈 말로 가장 적절한 것은?

One word is inextricably associated with geography: where. That is because geography starts from the premise that it matters where something takes place on Earth's surface. The key questions are not simply "where" questions, though; they are "why there" and "so what" questions. Getting to such questions means taking spatial arrangements, variations, and interconnections seriously. Engaging in even the simplest day-to-day activity requires some appreciation of spatial circumstances — where to find food and services, how to get to work places, and the like. Moving up in scale, without some awareness of _____, it is difficult to make reasoned business or policy judgments, make sense of events, or grasp some of the basic forces shaping life on the planet. Locating a new store or public service requires taking into consideration population distributions, the location of roads and utilities, socio-economic patterns, and more. Understanding why and where migration happens requires consideration of the political organization of territory, the spatial consequences of discrimination, socio-economic patterns, and the layout of the physical environment.

* inextricably: 풀 수 없게 ** premise: 전제

- ① why cross-cultural conflicts will increase
- ② how phenomena are arranged on Earth's surface
- ③ when the Earth's natural resources will be exhausted
- ④ which places on Earth are damaged by climate change
- ⑤ who has the authority to make decisions about territories

Words & Phrases in Use

- | | | |
|---|--|--|
| ☐ spatial 공간의, 공간적인 | ☐ arrangement 배열 | ☐ variation 차이 |
| ☐ appreciation 이해 | ☐ awareness 인식 | ☐ reasoned 합리적인, 이치에 맞는 |

Perhaps nothing has revolutionized the study of human-environment interactions more than the development of spatially explicit methods for collecting and analyzing data. Just a few decades ago, most natural and social scientists collected their data without precise spatial referents. References were made to watersheds, to communities, to villages, to cities, to proximity to rivers, and so on. In some cases (in anthropology mostly), there was even the custom of changing the name of the community and even its location, “to protect the informants.” While confidentiality remains an important concern when working with human subjects, the extreme to which this was done was largely unjustified. Everyone knew more or less where these studied communities were, and anyone interested could have found out. Be that as it may, there was very little interest, except in geography, to precisely locate a study area on a map with coordinates. Geography persisted, and finally convinced the rest of us, that *place* was fundamentally important to understand human-environment dynamics.

* watershed: (강의) 유역 ** proximity: 근처, 근접 *** coordinate: 좌표

- ① traditional methods of environmental data collection
- ② impact of geographical features on participant behavior
- ③ practical challenges in using approximate spatial information
- ④ growing need to protect research subjects by hiding their location
- ⑤ significance of correct spatial information in human-environment studies

The idea that our senses may be deceiving us was taken up by the French philosopher and mathematician René Descartes.

- (A) It might even be that we are asleep, and that the world we are experiencing is no more than a dream, or that God or some mischievous power is making us believe things that are not really true. If that is the case, though, we can never know anything for sure.
- (B) But Descartes then showed that there was one thing he could be sure of: In order to be deceived, he must exist, and exist as a thing that thinks. So, although his senses could not be trusted, he could be sure he existed as something that was capable of thinking and reasoning.
- (C) He realized that sometimes our senses give us a false impression — a straight stick in a glass of water appears to be bent, for example. And if we know that they can be unreliable, it would be wrong to trust them completely — everything that we experience with our senses might be false.

* mischievous: 장난기 많은

- ① (A) - (C) - (B) ② (B) - (A) - (C) ③ (B) - (C) - (A)
- ④ (C) - (A) - (B) ⑤ (C) - (B) - (A)

Instead of living by a philosophy of “rugged individualism,” however, hunters who have a lucky day share their meat with other families.

Hunters in the Ache tribe, living in the Paraguayan jungle, have a lot of ups and downs in their success at the hunt. Some days they bring home much more food than they could possibly eat; other days they come home empty-handed. (①) If a man caught a wild pig and hoarded it for himself and his family, much of it would go to waste (there are no deep-freeze refrigerators in the Paraguayan jungle). (②) During unlucky periods, individual hunters and their families would starve. (③) And they don’t just share a little; they share a lot — fully 90%. (④) In exchange for this generosity, their neighbors share with them on days when the luck runs the other way. (⑤) By exchanging resources, particularly those that are unpredictable and uncertain (like meat from the hunt, as opposed to vegetable crops), the group provides a mutual insurance policy against starvation.

* rugged individualism: 단호한 개인주의 ** hoard: 비축하다

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

What is soft-path river engineering? One way to visualize its spirit is to liken it to a footpath in the forest. Suppose a tree falls across a footpath. A soft-path response would be simply to redirect the trail around the fallen tree. A more interventionist response would be to ① remove the tree and restore the original route. A still more interventionist response might be to straighten and pave the path to insert it more ② permanently in the landscape. The true high-modernist step would, of course, be to ③ create a superhighway that removes the landscape and bulldozes straight through all obstacles in the topography. Soft-path engineering has the unique advantage of intellectual ④ modesty with respect to what we actually know about river movement and its environmental effects. In contrast to hard-path engineering, soft-path engineering accepts variability in the river's movement as ⑤ insignificant until proven otherwise. Backwaters, short-lived wetlands, braids and channels, swamps — all undesirable to hard-path engineering — are presumed by soft-path engineers to be ecologically important.

* pave: 포장하다 ** topography: 지형

Connectivity, the capacity of a landscape to support movement by any given species across the landscape, is of increasing concern for conservation biologists. As the connectivity of a landscape increases from the human perspective (generally through increases in road networks), connectivity decreases for many other species. Although we may see many species of animals moving across human landscapes (e.g. deer, wolves, and turtles crossing roads or wandering through our backyards), landscapes substantially altered for human use act as barriers to movement of both animal and plant species. In some cases, these barriers are incomplete — many turtles die on roads, but some make it across. In other cases, passage is essentially impossible — cities along landscape corridors such as river valleys can effectively eliminate genetic exchange between previously connected plant and animal populations; dams can permanently halt spawning of fish by blocking travel to their breeding grounds. Thus, lack of connectivity can decrease the conservation value of remaining habitat below what its mapped area might suggest, increasing the impact of fragmentation.

* corridor: 회랑 지대(주요 도로나 강을 따라 나 있는 좁고 긴 땅) ** spawning: 산란 *** fragmentation: 파편화

By enhancing energy efficiency and putting waste products to use, biopower helps move utilities and industries in a sustainable direction. ① The U.S. forest products industry now obtains half its energy by combusting woody waste and liquid waste from pulp mill processing. ② Biopower helps alleviate climate change as well by reducing carbon dioxide emissions, and capturing landfill gas reduces emissions of methane, a potent greenhouse gas. ③ Biopower also benefits human health as it cuts down on pollution; by replacing coal in co-firing and direct combustion, biopower reduces emissions of sulfur dioxide because plant matter, unlike coal, contains no appreciable sulfur content. ④ When plant matter is burned for power, soil is deprived of nutrients and organic matter it would have gained from the plant matter's decomposition. ⑤ In addition, biomass resources tend to be geographically spread out, so using them can help support rural economies and reduce many nations' dependence on imported fuels.

* combust: 연소시키다 ** alleviate: 완화하다 *** sulfur dioxide: 이산화황

Conversely, where human interference prevents elephants from moving freely within their habitats and leads to their numbers exceeding the carrying capacity of the savanna, their effect can be environmentally disastrous.

One example of human interventions modifying the character of savannas is through their effects on savanna-dwelling mammals such as elephants. They are what is known as a 'keystone species' because they have a strong effect on many aspects of the environment in which they live. (①) They diversify the ecosystems which they occupy and create a mosaic of habitats by browsing, trampling, and knocking over bushes and trees. (②) They also spread seeds through their eating and defecating habits and maintain or create water holes by wallowing. (③) All these roles are beneficial to other species. (④) Equally, if humans reduce elephant numbers in a particular piece of savanna, the savanna may become less diverse and less open, and its water holes may fill with mud. (⑤) This will be harmful to other species.

* trample: 짓밟다 ** defecate: 배설하다 *** wallow: 뒹굴다

A good example of chaos is the magnetic pendulum sold as an executive toy. It has four magnets arranged in a square at the base and a pendulum that swings back and forth between them.

- (A) In order to produce chaos, the iteration has to be within what is called a nonlinear system. Nor are all nonlinear systems chaotic: to become so they need to be pushed beyond a certain point, called a *bifurcation*. Before that point is reached they may behave in a quite orderly fashion.
- (B) Release the pendulum and note the magnets that it visits, and in what order. If the pendulum is released from the same position a second time, the pattern of movement may at first be the same but soon it will become completely different. In fact, the pattern of its movement is chaotic.
- (C) No matter how much care is taken to start the pendulum in the same position, it will visit an entirely different set of points on the two occasions. Chaotic systems are generated by iteration, though not all iteration leads to chaos.

* pendulum: 추(鍾) ** iteration: 반복 *** bifurcation: 분기(分岐)

- ① (A) - (C) - (B) ② (B) - (A) - (C) ③ (B) - (C) - (A)
- ④ (C) - (A) - (B) ⑤ (C) - (B) - (A)

다음 글의 제목으로 가장 적절한 것은?

There is one important thing to note about momentum. Since motion is relative, only relative velocities are relevant. In fact, when you think about it, all velocities are relative. Thus, on the surface of the earth, we always reckon velocity with respect to the ground — the velocity of the earth itself does not matter. There is a true story of a French pilot in World War II who stretched his hand out of his small airplane window and caught a bullet. How is this possible? The velocity of the bullet must have been about the same as the velocity of his plane. This can happen, because a bullet slows down to such a velocity toward the end of its flight path due to the action of air drag. Since only relative velocity matters, the momentum of the bullet was negligible as far as the pilot was concerned. Thus, he would have had little problem in catching the bullet.

* momentum: 운동량(물체의 질량과 속도의 곱으로 나타내는 물리량) ** velocity: 속도 *** reckon: 생각하다

- ① How Earth's Velocity Pushes Air and Bullets
- ② The Subjective Perception of Speed in the Sky
- ③ Catching a Bullet: It Depends on Relative Velocity

Hipparchus에 관한 다음 글의 내용과 일치하지 않는 것은?

Hipparchus of Nicaea was the most important astronomer of the Hellenistic Age after Aristarchus of Samos. Unlike Aristarchus, Hipparchus believed in the geocentric universe of Aristotle. A noted mathematician, Hipparchus gauged the movement of the sun and the moon using an astronomical model devised by Apollonius of Perga. Hipparchus worked at Alexandria and Rhodes; at the latter city, he created a kind of astronomical research center in which he cataloged the stars according to brightness. He produced a star chart of about 850 stars, tracking their movements and relative brightness. Hipparchus made more accurate measurements than Aristarchus did of the distance of the moon and sun from the earth. To account for the orbit of the sun around the earth he developed the idea of the eccentric, which Ptolemy of Alexandria would expand upon.

* geocentric: 지구 중심적인 ** gauge: 측정하다 *** eccentric: 이심원(중심이 지구에서 벗어난 위치에 있는 원 궤도)

- ① Apollonius의 천문 모델을 이용하여 태양과 달의 움직임을 측정했다.
- ② Rhodes에 일종의 천문 연구소를 설립했다.
- ③ 별들의 움직임과 상대적 밝기를 추적했다.
- ④ Aristarchus보다 더 정확하게 지구에서 달과 태양까지의 거리를 측정했다.
- ⑤ 태양의 지구 공전 궤도를 설명하기 위해 Ptolemy가 발전시킨 개념을 이용했다.

다음 글에서 전체 흐름과 관계 없는 문장은?

Living things are not confined to the familiar temperate realm of land, water, and sunlight inhabited by plants and plant-eating animals. They can be found in the darkest depths of the ocean, in hot volcanic mud, in pools beneath the frozen surface of the Antarctic, and buried kilometers deep in the Earth's crust. ① The creatures that live in these extreme environments are generally unfamiliar, not only because they are inaccessible, but also because they are mostly microscopic. ② In more homely habitats, too, most organisms are too small for us to see without special equipment: they tend to go unnoticed, unless they cause a disease or rot the timbers of our houses. ③ Studies of bacteria have helped us become familiar with those species of industrial importance, such as those used in breaking down waste materials. ④ Yet microorganisms make up most of the total mass of living matter on our planet. ⑤ Only recently, through new methods of molecular analysis and specifically through the analysis of DNA sequences, have we begun to get a picture of life on Earth that is not grossly distorted by our biased perspective as large animals living on dry land.

* temperate: 온대의 ** Earth's crust: 지각 *** microscopic: 극히 작은

다음 글에 드러난 Jessie의 심경 변화로 가장 적절한 것은?

The shoreline was known for having the best fishing spots on the lake. Jessie was sitting at one of those spots, but her fishing line still hadn't moved an inch. With a deep sigh, Jessie pulled out the line and cast it back into the water. Her dream of catching a big fish was fading. "I can't believe I haven't caught a fish yet. Not a single one," she thought. Just as she was about to give up and leave, the fishing line suddenly became tense. Jessie excitedly held onto the fishing pole as it began to move around wildly. Her eyes widened and her heart began to beat faster with excitement. With a big smile, she could feel that this was the biggest fish she had ever caught!

- ① disappointed → thrilled
- ② indifferent → discouraged
- ③ jealous → anxious
- ④ delighted → bored
- ⑤ relieved → pleased

Today's cultural tourist is just as likely to be in search of 'popular', 'everyday' or 'street' culture as they are likely to visit a heritage site or a museum. The museum seems to have ① lost its dominant role as a factory of meaning in (post)modern society, so cultural tourists have gone in search of meaning elsewhere. The predominant direction of ② expansion has been into 'everyday life'. Cultural tourism is as much based on experiencing as it is on seeing; therefore, Raymond Williams' definitions of culture as a whole way of life as well as the arts and learning are particularly relevant here. Past definitions of cultural tourism have placed too ③ little emphasis on cultural tourism as a form of arts or heritage tourism in its narrowest sense; for example, visiting museums, monuments, galleries and theatres. Cultural tourists are also interested in the more ④ experiential aspects of culture. In an international context, particularly in the context of indigenous or ethnic tourism, the way of life of a people can be a central focus, where the traveller is ⑤ motivated primarily by first-hand, authentic or intimate contact with people whose ethnic or cultural background is different from their own.

* indigenous: 토착의, 지역 고유의

다음 글의 제목으로 가장 적절한 것은?

Although many U.S. Americans consider mathematics boring and tedious, all forms of standardized rankings involve figures and numbers. When ranking quarterbacks, for instance, the NFL (National Football League) standardizes the ranking process by defining different numerical categories that cover all aspects of the position. Each quarterback has certain numbers and figures, ranging from "percentage of pass completions" to "interceptions over touchdowns" to "number of yards passed per game." The quarterback's livelihood depends on those numbers. To negotiate a raise, a quarterback has to improve his numbers, and when a quarterback is benched, it is often due to unsatisfactory numbers. Similarly, at least 13 million Americans belong to virtual football leagues in which participants select players from different professional teams; at the end of the season, the participant whose virtual team has amassed the most points, defined by each virtual league differently, wins the jackpot. Such leagues even have a draft at the beginning of the season.

* tedious: 따분한 ** amass: 모으다, 축적하다 *** draft: 프로 신인 선수 선발 제도

- ① The Role of the Quarterback Goes Beyond Numbers
- ② American Football: A Game Within Everyone's Reach
- ③ Numbers Dominate Real and Virtual Football Leagues!
- ④ The Decline of Real Sports and the Rise of Virtual Sports
- ⑤ Why Do Rankings No Longer Matter in Virtual Football Games?

Grand Rails Adventure Package에 관한 다음 안내문의 내용과 일치하는 것은?

Grand Rails Adventure Package

Enjoy an unforgettable 3-night rail journey with our exclusive Grand Rails Adventure Package!

Package Highlights:

- Save up to 25% on round trip train travel from Silver Creek Station to Sky National Park.
- Stay at the charming downtown hotel for the first and last night of your trip.
- Relax in comfort at Ridge Lodge inside the park for the second night of your stay.
- Enjoy free breakfast and dinner throughout your stay, with lunch available at an additional charge.
- Receive a \$20 Gift Certificate per adult to use at the hotel gift shops.

How to Book:

- Select “Vacation Packages” in the reservation form.
- Call us at 1-800-123-4567 (available 7 AM–7 PM), or click below to book your trip today!

[\[Book Now\]](#)

This package is on sale for a limited time only: March 1 through June 30.

***Don't miss this chance to experience the adventure of a lifetime!**

- ① 여행 첫날 밤에는 공원 내의 Ridge Lodge에서 숙박한다.
- ② 모든 식사는 무료로 제공한다.
- ③ 성인 1인당 20달러의 상품권을 제공한다.
- ④ 전화 예약은 오전 9시부터 가능하다.
- ⑤ 패키지는 3개월 동안만 판매된다.

다음 글의 주제로 가장 적절한 것은?

The purpose of class discussions is to encourage you to be an active participant, not a passive recorder. Much of the emphasis in a discussion is on getting students involved in thinking, reacting, and responding. These are important intellectual activities in the learning process, for through them you are supposed to discover and express your opinions. Writing is an invaluable tool for accomplishing these tasks. Unfortunately, too many times, when class discussion begins, pens and pencils go down. Admittedly, it is considerably more difficult to take notes from discussions than from lectures, for, unlike lectures, discussions tend to be disorganized and difficult to follow. Also, students usually don't know how much of what other students are saying is important. And if you are an active participant, it is not easy to take notes and formulate what you want to say. But note taking in discussions is not only manageable, it is also important. Note taking helps to keep you active and alert; it allows you to impose some organization on the discussion; and it can prepare you to speak.

* impose: 부과하다

- ① reasons to standardize procedures for class discussions
- ② strategies to improve note-taking skills for public speaking
- ③ significance of note taking for active engagement in discussion
- ④ effectiveness of summarizing and reviewing notes after class
- ⑤ benefits of brainstorming to generate ideas for writing tasks

Teaching reflects what society itself demands; it necessitates that disorder — of students and teachers alike, of mind, behavior, and environment — yield to its opposite. Effective teaching requires that, failing their own self-imposed order, students experience the imposition of some outer order so that inner order may develop. This means in practice, for instance, that the goals of classes and courses be clearly set, that they be explained and justified, that the manner of achieving them be clear, that the presentation of materials conducive to reaching them be appropriate, and that all activities be directed somehow to their attainment. It means, too, that students take up their own obligation to maintain the conditions under which learning occurs: quiet in their classrooms, respect for and courtesy toward others, civility of language and behavior, and the like. Above all, it implies structured industry — study and activity that are oriented toward a goal and pursued with perseverance and method. That is, good teaching requires that teachers and students _____ so that learning can take place.

* conducive: 도움이 되는 ** perseverance: 인내

- ① be willing to be critical to each other
- ② rely on spontaneous actions and interactions
- ③ learn independently without any imposed structure
- ④ subject themselves to external and internal control
- ⑤ remove all forms of unnecessary structure and planning

다음 글의 제목으로 가장 적절한 것은?

When we lecture, scold, yell, or criticize, when we say something positive but in a sarcastic tone, or when we try to make our kids feel guilty, it activates their amygdala, triggering their stress response and putting them into a defensive, rigid, reactive state. Even more basic, when we say *no* or *don't*, it releases stress chemicals in our kids' brains (and in ours) that are associated with fear and anger. Functional brain imaging research has shown that even seeing the word *no* on a screen for less than a second while you're lying in an MRI scanner will cause your brain to suddenly release dozens of stress-producing hormones and neurotransmitters. Conversely, positive words like *yes*, *love*, and *peace* activate systems in the prefrontal cortex that are related to emotional regulation. The problem is that negative words like *no* and *don't* have a more powerful effect on kids than positive words. For this reason, the researchers Suniya Luthar and John Gottman say that “*bad is stronger than good*” when it comes to communicating with children and teens.

* sarcastic: 비꼬는 ** amygdala: (해부) 편도체 *** prefrontal cortex: 전전두엽 피질

Actually, this sort of automatization of conscious learning can be jeopardized by the return of explicit awareness.

The experiences of learning to ride a bicycle or drive a car illustrate well how the “what” and “how” systems — those involved in object identification and practical action — might interact during development. (①) When we learn to drive a car, we go through a first stage where each required action and sequence of actions — such as looking in the mirror, signaling with the blinker, pressing the clutch prior to shifting into gear, and so forth — are explicitly thought of and double-checked while monitoring our situation in the environment. (②) Once learned and after a few hours of practice, the required actions for driving become second nature, transferable to almost any vehicle and performed without explicit thinking. (③) Information appears to be perceived directly; the affordances of the road, the car, and the traffic implicitly detected. (④) If you start to think too much about your driving, you actually increase your chances of having an accident. (⑤) People in sport competitions confirm that self-consciousness is one's worst enemy: tennis, golf, or billiard players commonly report that they lose their “touch” by thinking too much about their moves.

* jeopardize: 위험에 처하게 하다 ** affordance: 행동 유도성

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

In most fiction, characters' lives are limited to the individual work. Readers may disagree on the characteristics and traits of fictional figures, and in drama there is room for different interpretations of characters. However, it is less common for characters in literary fiction to reappear in subsequent works than in genre fiction, where series featuring the same central characters are common. This is even more pronounced in comics, which are typically serialized in newspaper strips or comic books. Thus characters introduced in the 1930s, like Superman and Batman, may still enjoy new adventures decades later. During these characters' long histories, they change in various ways for a variety of reasons. If a character is created by a single author, like Sherlock Holmes, the character's core traits may change little from story to story, but readers learn more about him with each successive story. On the other hand, if characters are the work of several hands over decades, they may change considerably.

While characters in most literary fiction hardly ever _____ (A) _____ in successive works, those in genre fiction and comics often do so, and may undergo _____ (B) _____ in their traits especially when written about by different authors over time.

(A)

(B)

In the context of a studio visit, the viewer might notice several clipped newspaper articles pinned to the wall, a wax-coated hotplate, walls with paint marks, resin-drizzled floors and several sculptures barely visible through their plastic wrap. Such real-world clues offer the visitor a foothold onto the artist's oeuvre. The studio visitor imagines that the artist is currently a painter, who applies wax and resin and finds inspiration in particular articles. Similarly, guests experiencing artworks in some homes notice art positioned next to furnishings, family photographs displayed on the piano and coffee-table books stacked to demonstrate preferences. Together, these components affect particular experiences. Within the artist's studio or collector's home, residue from studio activities or the collector's personal belongings help to connect the artworks to the world. By contrast, artworks displayed in exhibitions feel comparatively isolated, practically clipped from the world where they originated. This could explain why aestheticians tend to treat artworks as singletons, rather than as members of some set.

* resin-drizzled: 수지(끈적하고 굳는 성질이 있는 액체 물질)가 흘러내린 ** oeuvre: 예술 작품 *** residue: 잔여물

- ① various sources of inspiration for artists
- ② the ideal environment for creating artworks
- ③ the impact of context on the appreciation of artworks
- ④ differences in artworks with regard to artistic materials
- ⑤ external factors distorting the true meaning of artworks

Linguists typically distinguish between signals that are communicative and those that are informative, depending on whether the information is conveyed intentionally or not.

① For example, a deliberate wink is distinguished from an involuntary blink by the communicative intention that lies behind it. ② Yet in intercultural interaction, information conveyed unintentionally may actually be interpreted as intentional; for instance, in some cultures, showing the soles of one's shoes can communicate an insult and when somebody does that, it is typically assumed to have communicative intent. ③ However, for someone from a cultural group where that convention does not exist, such behaviour would be unintentional and hence would not be communicative. ④ So, most societies invest heavily in preserving their unique traditions such as language, rituals, and customs, as these are considered vital to maintaining cultural identity and continuity. ⑤ In other words, a given piece of behaviour may be communicative to some of the participants and only informative to others.

* sole: (신발) 밑창

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Through stories we can explore the human condition and see how other people think. This can affirm our own beliefs and perceptions, but it also challenges them. Regardless of the language, there is something universal about what occurs in the brain at the point when we are processing narratives, triggering better self-awareness and empathy for others. Psychologists scanned people listening to narratives in English, Farsi, and Mandarin, and found the same patterns of brain activation when people found meaning in the stories. Other studies find that reading fiction significantly increases empathy toward others, including people of a different race or religion. And the more absorbed in a story a reader is, the more empathetically they behave in real life. For instance, if the researcher “accidentally” dropped his pens, those participants who had previously reported being “highly absorbed” in the story were about twice as likely to help pick up the pens. Another study concluded that literary fiction “uniquely engages the psychological processes needed to gain access to characters’ subjective experiences.” That is to say, if you read novels, you can probably _____.

* affirm: 확인하다 ** empathy: 공감 *** Farsi: 페르시아어

- ① spot symbols that have hidden meanings
- ② find parts of yourself mirrored in fictional characters
- ③ boost your imagination and turn it into real-life creativity
- ④ read emotions, vital skills for forming cooperative societies
- ⑤ analyze plot twists, an activity essential for engaged reading

Information and meaning are, clearly, not the same thing. The former refers to uninterpreted data or sensory states whose probability in a certain situation can be easily measured; the latter refers to the interpretation of the data or sensory states, including the special kinds of nuances and values that the information entails, or is intended to have, in the given situation. This applies to any type of information, from alarm signals to sophisticated statements. Take, for instance, a coin-tossing game in which it is decided that throwing three heads in a row constitutes a win. If a certain player ends up consistently with the desired outcome, defeating all who challenge that player, then we tend to interpret the outcome either as the work of Fortune, or else as clever and undetectable cheating on the part of the winning player. Interpretation is at the core of everything we do, think about, and feel.

* sophisticated: 정교한

- ① 우리는 정보를 해석함으로써 의미를 만들어 낸다.

Over the past twenty years, with the arrival of digital politics, social and political protest movements have changed and become ever more prominent through what the sociologist Manuel Castells has called *Networks of Outrage and Hope*. We now have a swirling world of 'online activism', digital rebellion, information politics and *People's Platforms*. Smartphones and social networking now provide a more fluid, leaderless, participatory activism that arises more spontaneously. The early examples like the Occupy Movement (2011), the Arab Spring in Egypt (2010), the Umbrella Movement in Hong Kong (2014, 2019), the Gezi Park Movement in Turkey (2013), and the Pussy Riots in Russia (2011) galvanized large numbers of people and attracted world attention. While some suggest that these new politics are enhancing democracy, others maintain that they do not really challenge the dominant power groups. Looking back, most of them have proved unsuccessful, clamped down upon by the state. There seems a limit to the power of new social movements.

* swirling: 소용돌이치는 ** galvanize: (충격을 주어) 행동에 나서게 하다 *** clamp down upon: ~을 진압하다

The advent of automobiles drastically altered urban landscapes by enabling the growth of suburbs. Cars provided individuals the ability to live farther from city centers, where land was cheaper and more abundant. This ① expansion created the modern suburb, characterized by residential zones separate from commercial and industrial areas, promoting a shift from high-density urban living to the spacious suburbs. The ② flexibility cars offered meant people could commute daily, uniting work, leisure, and homelife in new ways. In response, urban planning evolved, placing emphasis on roads and highways to accommodate increased travel. This ③ centralization led to altered living patterns, encouraging families to seek homes in quieter, suburban environments while maintaining access to urban job markets. The sprawling growth ④ fueled demands for expanded infrastructure and services in these areas, bringing in new economic opportunities. Cars were ⑤ instrumental in shaping this living model by significantly detaching home locations from places of employment and recreation.

* advent: 출현 ** sprawling: 무질서하게 퍼져 나가는

Awareness of AI Uses Among General Population vs. Tech Executives in the U.S. (2018)

% of general population vs. tech executives that are aware of various AI uses

The graph above shows results from a 2018 U.S. survey on awareness of AI uses among the general population and tech executives. ① Tech executives had a higher awareness of AI uses across the various domains compared to the general population, with the exception of Drones. ② The top three AI domains with the highest awareness among tech executives were Voice Assistants, Natural Language Processing, and Text Recognition. ③ Ride-Hailing Apps had the lowest awareness levels in both the general population group and the tech executives group. ④ Tech executives' awareness of AI use in Natural Language Processing was more than double that of the general public. ⑤ The rate of awareness of AI use for Computer Vision and Drones was the same among tech executives, but for the general population, the awareness of Drones was 10 percentage points higher than that of Computer Vision.

* ride-hailing: 차량 호출

One reason that people participate in social media is because it builds social relations. We increase our social capital when we successfully engage in social media. Social capital describes the networks of relationships we have that are built on mutuality and sharing of identity, understanding, norms and values. We build ties that may pay off with a job lead or a letter of recommendation. We reinforce our identities through our online presentation in a personal blog or our profile. “The premise behind the notion of social capital is rather simple and straightforward: investment in social relations with expected returns,” noted sociologist Nan Lin. Lin’s work stresses that it is *who* you know as much as *what* you know that shapes our experience in society. With new media, our reach of connecting is all the greater, expanding our “who you know” to greater and greater lengths.

* premise: 전제

- ① 소셜 미디어를 통한 관계망의 확장은 중요한 사회적 자본이 된다.
- ② 사회적 규범과 가치를 공유하는 것이 인간관계 형성의 기반이다.
- ③ 뉴 미디어의 등장은 사회적 자본 형성의 방식을 변화시킨다.
- ④ 다양한 인적 자본 구축은 소셜 미디어 활동에 필수적이다.
- ⑤ 사회적 경험은 인격 함양과 세계관 확장에 도움이 된다.

다음 글의 주제로 가장 적절한 것은?

People like pictures of the savanna, even if they have never been there. In one study, people of different ages (8, 11, 15, 18, 35, and over 70 years) looked at images of tropical forests, deciduous forests, coniferous forests, deserts, and the East African savanna. Eight-year-old children said that they would like to live in or visit the savanna more than any other environment. After the age of 15, people also liked deciduous and coniferous forests. Since none of these people had visited savannas, the implication is that this preference was programmed into their brains. This programmed preference is called “the savanna hypothesis.” As people get older, this preference gets modified by where they have lived. Synek and Grammer, researchers in evolutionary psychology, confirmed these findings in a different study. They showed that young children in Austria prefer landscapes thinly dotted with trees and with low mountains, scenes that resemble the savanna. After puberty, their preferences shifted to areas with denser trees and higher mountains, again, presumably, because of more experience with these terrains.

* deciduous: 낙엽성의 ** coniferous: 침엽수의 *** terrain: 환경, 지형

- ① effects of survival instincts and experiences on our preferences
- ② the relationship between nature and human emotional responses
- ③ the evolution of ancient forest ecosystems in the East African Savanna
- ④ modification of humans' innate savanna preference through experience
- ⑤ the influence of cultural traditions on our interaction with environments

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Dreamers find it difficult to determine whether a memory is from a dream or some other source after time has passed, known as “source monitoring.” It is difficult ① to distinguish between memories of real dreams and made-up ones, imagination or stories someone else told us. Dream source monitoring was found to be less ② accurate than other memory source monitoring. A cognitive psychologist, Marcia K. Johnson and her colleagues’ explanation is ③ that “real dreams are deficient in information about cognitive operations that help identify the self-generations we create when we are awake.” Although dreams are usually more vivid than imagination, the cognitive operations that generate imagining are also remembered. ④ Remember that you intentionally thought of an image helps distinguish it from a perception that you did not intentionally generate. Dream generation, in contrast, is “transparent” in that we don’t experience the generation process, ⑤ making it more difficult to source monitor.

* transparent: 투명한

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

In contrast, people will typically show the precise opposite pattern for their successes and will interpret those events as being of outsize importance.

Much research in social psychology has documented some of the key strategies that people rely upon in defending the belief *I am good*. For example, when people perform poorly at something, they tend to trivialize their failures. This trivialization disarms those failures and prevents them from overwriting their life stories. (①) Imagine, say, that someone fails a calculus test. (②) A common defensive response is to conclude that this test was just not that important to them. (③) They may say to themselves, “Who cares about calculus anyway. I’m not going to become a mathematician.” (④) So if someone aces a calculus test, they may think to themselves about how crucial calculus is for their future career success and how it’s key to getting into graduate school or getting a highly desired job as an engineer or a financial analyst. (⑤) By titrating how importantly people view their successes and failures, they can shape their emotional reactions to these events in a way that enables them to tell a more convincing story that *I am good*.

* trivialize: 대수롭지 않게 여기다 ** calculus: 미적분학 *** titrate: 조정하다

다음 빈칸에 들어갈 말로 가장 적절한 것은?

When gathering the preferences of multiple agents into one collective choice, it is easily seen that certain cases _____. For example, if there are two alternatives, *a* and *b*, and two agents such that one prefers *a* and the other one *b*, there is no deterministic way of selecting a single alternative without violating one of two basic fairness conditions known as *anonymity* and *neutrality*. Anonymity requires that the collective choice ought to be independent of the agents' identities whereas neutrality requires impartiality towards the alternatives. Allowing lotteries as social outcomes hence seems like a necessity for impartial collective choice. Indeed, most common "deterministic" social choice functions such as plurality rule are only deterministic as long as there is no tie, which is usually resolved by drawing a lot. The use of lotteries for the selection of officials interestingly goes back to the world's first democracy in Athens, where it was widely regarded as a principal characteristic of democracy, and has recently gained increasing attention in political science.

* plurality: 복수

- ① call for randomization or other means of tiebreaking
- ② demonstrate how impartial selection could be invalidated
- ③ necessitate deterministic systems of selecting voters blindly
- ④ rely upon neutral agents to establish clear selection guidelines
- ⑤ require understanding of the unpredictability inherent in democracy

Along with the mistaken notion that the law resides in the books goes the equally mistaken idea that law is secret, or at least inaccessible to the ordinary person. To understand and apply the law at the advanced, technical level that lawyers do requires professional knowledge, but to understand the basic substance of the law does not. Law reflects life. The principles and issues embodied in the law are not different from those that we experience in other aspects of our lives. Contract law, for example, is a commentary on the way people make, interpret, keep, and break their promises in commercial and noncommercial settings. Few nonlawyers can describe the objective theory of contract formation or the Statute of Frauds, but they have thought a lot about contracts and promises. If you cross your fingers when you make a promise, does it mean that the promise doesn't count? If your newly purchased television doesn't work, can you return it to the store? And so on.

* embody: 구현하다, 포함하다 ** commentary: 해설 *** Statute of Frauds: 사기 방지법

- ① Why Contract Law Is More Complicated Than It Appears
- ② The Challenges of Applying Law in Daily Life
- ③ The Everyday Meanings of Legal Concepts
- ④ Decoding Legal Language: A Frustrating Puzzle

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The internet has transformed the fashion marketplace, making it increasingly difficult to _____. Consumers can browse for product information and prices and gain comparative information almost instantaneously, making them more informed than ever before, transferring the balance of power from the retailer to the customer. This is exacerbated by open and real-time access to fashion shows, facilitated through livestreaming, coupled with social media access to celebrity looks and lifestyles and the sharing of all aspects of life on social media. Consumers use fashion choices to express their individual style and personality, especially those promoting ‘brand me’ on social media. The traditional two-season offer is no longer seen as enough, with consumers demanding new products throughout the whole year. This creates a problem for fashion retailers as many consumers are looking for more exclusive pieces to differentiate themselves, forcing up the desire for trend-led ever more rapidly changing styles, while still demanding affordable prices.

* browse: 검색하다 ** exacerbate: 심화시키다

- ① monitor social media trends
- ② assess brand popularity online
- ③ predict the demand for the selling season
- ④ forecast the impact of celebrity promotions
- ⑤ evaluate the appeal of traditional product lines

What deeply affected so many Black communities globally was not only that they could not metaphorically breathe because of the oppressive forms and limits of white supremacy, but also that so many Black communities *literally* cannot breathe because of environmental racism. ① Similarly to Black communities in the UK, Black Americans are also more likely to live near landfills, industrial plants and fossil-fuel infrastructure. ② While some Black Americans have started community projects to turn neglected or run-down areas into youth centers or art spaces, these efforts often face challenges because of a lack of local support and simple safety concerns. ③ The process by which this hazardous infrastructure is deliberately situated close to African American communities is called redlining. ④ This process means that fossil-fuelled power plants and hazardous-waste facilities are disproportionately and deliberately situated in Black or ethnic-minority neighbourhoods. ⑤ As a result of this, Black Americans are three times more likely to die from exposure to air pollutants than their white counterparts.

* metaphorically: 비유적으로 ** oppressive: 억압하는 *** white supremacy: 백인 우월주의

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Honey can be eaten by itself or mixed with other ingredients. Natural or pure honey has had no additives, preservatives or synthetic ingredients added. Also ① referred to as ‘undiluted’, it is usually more expensive than diluted honeys. Natural honey can also be called ‘blended honey’, ② which honeys from various sources are blended together — not by the bees, but by human processors and distributors in stages after the honey has been collected. Blending is frequently done for taste as well as marketing reasons, especially since some consumers find the darker honeys too ③ strong. Mixing different types of honey together can make it more palatable, and also gives a more uniform flavour — this is an important consideration for producers and retailers, who ④ feel the need to guarantee reliable, unsurprising (typically mild) flavours to their customers. Clover is one of the most popular honeys in the U.S., and ⑤ its mild flavour and taste have become familiar to many Americans.

* dilute: 묽게 하다 ** palatable: 입에 맞는

Words & Phrases in Use

- ☐ ingredient (특히 요리 등의) 재료
- ☐ synthetic 합성의
- ☐ processor 가공업자
- ☐ consideration 고려 사항

- ☐ additive 첨가물
- ☐ refer to ~ as ... ~을 ...라고 부르다
- ☐ distributor 유통업자
- ☐ retailer 소매상

- ☐ preservative 방부제
- ☐ blended 혼합된
- ☐ uniform 균일한
- ☐ guarantee 보장하다

Academic Vocabulary by Topic

- **nutrient** 영양소 (a substance that is needed to keep a living thing alive and to help it to grow)
A balanced diet supplies essential **nutrients** that support growth and development.
균형 잡힌 식단은 성장과 발달을 돕는 필수 영양소를 제공한다.
- **misleading** 오해의 소지가 있는, 오도하는 (giving a false or incorrect idea)
The advertisement gave **misleading** information about the effectiveness of the new pill.
그 광고는 새 알약의 효과에 대해 오해의 소지가 있는 정보를 제공했다.
- **regulatory** 규제(의) (making official rules about what is acceptable in a particular business, activity, etc.)
Regulatory reform is a task that requires plenty of time and money.
규제(의) 개혁은 시간과 돈이 많이 드는 과제이다.
- **supplement** 보충(제) (something that is added to something else in order to make it complete)
Many people take dietary **supplements** to replace missing nutrients in meals.
많은 사람들이 식사에서 부족한 영양소를 보충하기 위해 식이 보충제를 섭취한다.
- **infection** 감염 (a condition in which bacteria or viruses that cause disease have entered the body)
Washing hands regularly is one simple way to prevent serious **infections**.
손을 규칙적으로 씻는 것은 심각한 감염을 예방하는 한 가지 간단한 방법이다.
- **immune** 면역의, (~에) 면역이 된 (not capable of being affected by a disease)
Adequate sleep strengthens the **immune** system and prevents frequent illnesses.
충분한 수면은 면역 체계를 강화하고 잦은 질병을 예방한다.
- **treatment** 치료(법) (something that is done to cure an illness or injury)
Effective **treatment** of common illnesses depends on nutrition, exercise, and medical guidance.
일반적인 질환의 효과적인 치료는 영양, 운동, 그리고 의학적 지침에 달려 있다.

Not too much or too little — that's what moderation means. Moderation does not mean that you have to eliminate low-nutrient-density foods from your diet, such as soft drinks and candy, but rather that you can include them occasionally.

- (A) It's also important to remember that substances that are healthful in small amounts can sometimes be dangerous in large quantities. For example, the body needs zinc for hundreds of chemical reactions, including those that support normal growth, development, and immune function.
- (B) Too much zinc, however, can cause deficiency of copper, another essential mineral, which can lead to damaged immune function. Being moderate in your diet means that you do not restrict or completely eliminate any one type of food, but rather that all types of food can fit into a healthful diet.
- (C) Moderation entails not taking anything to extremes. You probably have heard that vitamin C has positive effects, but that doesn't mean huge doses of this essential nutrient are appropriate for you.

* zinc: 아연 ** entail: 수반하다

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Dietary behaviors are, in large part, the consequence of _____, many of which lead to increased caloric consumption and poor dietary choices. Individuals are subject to inherent cognitive limitations and mostly lack the capacity to consistently recognize, ignore, or resist contextual cues that encourage eating. Take, for example, going to the movies. For many, a night at the movies also means sharing popcorn, candy, and soda. People often cannot resist this learned indulgence and are encouraged by the environment to eat a particular food. Another example is eating potato chips or peanuts that have been set out during a friendly card game or conversation with others. Individuals often consume snacks not because they are hungry, but because they are prompted by the social environment, which encourages them to eat. Similarly, grocery stores and restaurants have discovered the profits in suggestive selling, a sales technique where the customer is encouraged to make an additional purchase by taking advantage of a two-for-one sale or special discount. Grocery stores often use placement of items to encourage impulse buying.

* indulgence: 탐닉

- ① physical hunger signals and metabolic needs
- ② intentional decisions based on food preferences
- ③ cultural traditions dictating specific meal patterns
- ④ ways of coping with stress and personal experiences
- ⑤ automatic responses to a particular situation with food

Science shows that, when compared to adults, children naturally prefer higher levels of sweet and salty tastes and reject bitter tastes. This might help explain why children are drawn to more ① unhealthy food choices within our current food environment — an environment composed of high-salt, high-refined-sugar foods. In support of this idea, studies have found that ② sensory experiences, beginning early in life, can shape preferences in both a positive and a negative way. For example, expecting mothers who consume diets rich in healthy foods can help develop their child's taste preferences in a ③ positive way because flavors from foods that the mother eats are transmitted to amniotic fluid and to mother's milk, creating an environment in which breastfed infants are more accepting of these flavors. In contrast, infants fed formula learn to prefer its unique flavor profile and may have ④ less difficulty initially accepting flavors not found in formula, such as those of fruit and vegetables. Having healthy food experiences early in life may go a long way toward ⑤ promoting healthy eating throughout a person's life span.

* amniotic fluid: 양수 ** formula: 분유, 유아용 유동식

Dear Pollet Toys,

We are considering ordering 50 striped 2-inch plastic balls for the city-wide Youth Activity Day on June 14. According to your website, the balls are normally sold in individual plastic and cardboard packages. However, we will not need packaging or transportation for our order as we can pick up the balls, packed loose in cardboard boxes, directly from your warehouse. Given these circumstances, I would like to request a discount on our order. I believe that a discount of at least 25% would be reasonable. If you agree to this, please confirm the agreement in writing. If not, I would appreciate a call at 555-5555 as soon as possible so we can reach a mutually agreeable arrangement. I look forward to your positive response and hope that we can finalize the order details soon.

Sincerely,
Granville Community Center

다음 글에 드러난 Noah의 심경 변화로 가장 적절한 것은?

Noah sat on the park bench, watching people set up telescopes. His parents had brought him to see a meteor shower, but he didn't care much. He had never thought the night sky was interesting. Stars were just tiny dots, and he didn't see why people were so excited. He folded his arms and stared at the ground, waiting for time to pass. Around him, voices buzzed with excitement, but he barely listened. Then, a sudden wave of surprise spread through the crowd. He looked up. A bright line of light shot across the sky, then another. The meteors burned fast, disappearing in seconds. His eyes widened. How often did this happen? Could he predict the next one? Were there more coming? He leaned forward, scanning every corner of the sky. The stars, once meaningless, now held his full attention. For the first time, he truly wanted to see more.

* meteor shower: 유성우

- ① excited → relaxed
- ② nervous → relieved
- ③ annoyed → frustrated
- ④ uninterested → curious
- ⑤ hopeful → disappointed

Employees who are not privacy “literate” represent a vulnerability for businesses. They may compromise privacy and security measures and expose personal or confidential information without realizing it. Employee online access rights can and should be limited to what each employee needs to perform his or her job. However, while physical barriers, firewalls, passwords, and other security measures are useful, for most organizations access to large amounts of sensitive information by employees is necessary to do business. The key to ensuring employee adherence to privacy and security measures is to educate them and to develop a practice of ongoing education and other opportunities for reinforcement of the role that all employees play in securing critical information privacy by adhering to proper privacy and security protocols. Employees may have differing levels of access to information, but all should understand the importance of protecting private or confidential information and how their actions affect the security of this information. The very nature of private or commercially confidential information means that it should not be made publicly available.

* protocol: 통신 규약

- ① 직원 채용 시점부터 정보 보안 준수 사항을 명확히 안내해야 한다.
- ② 기업의 개인정보 보호와 관련된 내부 정책을 수시로 점검해야 한다.
- ③ 안전 수칙 준수는 모든 부서와 직원의 공동 책임으로 인식되어야 한다.
- ④ 개인정보나 상업적 비밀 정보 유출 시 규정에 따라 엄중히 처벌해야 한다.
- ⑤ 기업의 모든 직원에게 개인 및 비밀 정보 보호 교육을 지속적으로 시행해야 한다.

밑줄 친 Sight is one of the senses that blinds us가 다음 글에서 의미하는 바로 가장 적절한 것은?

An odd, but interesting trigger I ran across while researching, was introduced by a man called Robert who had already recovered about 75 percent from RSI after reading Dr. Sarno's second book. He would have been nearly 100 percent recovered but he could not change the pattern of pain that occurred when using his right index finger to click the computer's mouse. In Robert's own words, "The strange part is that my finger and hand don't hurt when I close my eyes and move/click the mouse. It's as if the screen (and software) is the trigger for the pain!" He reduces his visual acuity when he closes his eyes, one of his senses. So, closing his eyes allegorically opens them by removing the sensory trigger. If he unconsciously despises staring at his computer screen because staring at it is in conflict with his unconscious wants and needs, then closing his eyes "cuts out" the source of information that triggers his anger, i.e., his eyesight. Sight is one of the senses that blinds us (Lao Tzu).

* RSI (Repetitive Strain Injury): 반복 사용으로 인한 부상 ** acuity: 예민함 ***allegorically: 비유적으로

- ① Sight is the least reliable sense for gathering information.
- ② Visual information is processed without any emotional influence.
- ③ Reducing visual input can make other physical senses more active.
- ④ Our reliance on sight may prevent us from seeing reality as it truly is.
- ⑤ Recognizing others by sight does not always reveal their true intentions.

다음 글의 요지로 가장 적절한 것은?

Handing over decision making to your children is a gradual process based on their age, maturity, and decision-making history. It would be downright dangerous to give children complete latitude in their decision making. You can, however, begin to teach decision making to very young children by setting reasonable limits to their decisions. For example, if you took your children into a convenience store and told them they could have anything they wanted, they would be overwhelmed by the choices (which, research shows, either tend to prevent people from making decisions or result in poor decisions). However, you can give them limited options to choose from, such as jawbreakers, licorice, and bubble gum (or, better yet, sesame sticks, fruit wraps, and yogurt peanuts), and they would then decide which treat they want. Your children will learn to make decisions, but they won't be inundated by the huge number of options available to them.

* latitude: 자유 ** licorice: 감초 사탕 *** inundate: 감당하지 못할 정도로 주다

- ① 자녀의 자율성 신장을 위해 부모의 간섭을 최소화하는 것이 좋다.
- ② 부모가 모범을 보임으로써 자녀는 합리적인 결정 방식을 배우게 된다.
- ③ 발달 수준에 맞는 집안일을 맡김으로써 자녀의 책임감을 기를 수 있다.
- ④ 창의적인 놀이의 제공을 통해 자녀의 문제 해결 능력을 향상할 수 있다.
- ⑤ 제한된 선택지를 제공하여 자녀의 의사결정 능력을 점진적으로 기를 수 있다.

다음 글의 주제로 가장 적절한 것은?

When we were investigating why Americans valued meat so much, we found widespread confusion among consumers about which foods are healthy and sustainable. As part of the project, we asked consumers to sort different foods in any way they thought they should be grouped. Participants ended up dividing foods into groups such as fruits, vegetables, and dairy. However, most consumers didn't know how to sort plant-based "milks" and meat alternatives. Interestingly, they didn't consider them as part of any typical food group. In addition, most people still don't understand (or trust) lab-grown or cultured meats. The reaction to lab-grown meats will likely be similar to the often negative reactions to and suspicions of genetically modified foods when they first came on the market. These gaps in literacy of emerging technologies hinder the successful implementation of products that could have environmental and health benefits.

* hinder: 방해하다 ** implementation: 도입

- ① food literacy as a predictor of cooking habits
- ② how food literacy influences grocery shopping decisions
- ③ the nutritional superiority of plant-based foods over meat
- ④ the environmental dangers of lab-grown and plant-based meats
- ⑤ consumers' misunderstanding as a barrier to new food technologies

다음 글의 제목으로 가장 적절한 것은?

In an experiment conducted by researchers at the University of California, Los Angeles, study subjects were required to give a series of unplanned speeches in front of an audience (a reliable way to trigger anxiety). Half of the participants were then asked to engage in what the researchers call “affect labeling,” filling in responses to the prompt “I feel _____,” while the other half were asked to complete a neutral shape-matching task. The affect-labeling group showed steep declines in heart rate and skin conductance compared to the control group, whose levels of physiological arousal remained high. Brain-scanning studies offer further evidence of the calming effect of affect labeling: simply naming what is felt reduces activity in the amygdala, the brain structure involved in processing fear and other strong emotions. Meanwhile, thinking in a more involved way about feelings and the experiences that evoked them actually produces greater activity in the amygdala.

* steep: 급격한 ** conductance: (전기나 열의) 전도도 *** amygdala: 편도체

U.S. Greenhouse Gas Emissions by Source, 2020

The charts above show U.S. greenhouse gas emissions by source for the year 2020, with a particular focus on emissions from agriculture. ① The largest contributor to greenhouse gas emissions in the United States in 2020 was transportation, accounting for over a quarter of the total U.S. emissions. ② The percentage of greenhouse gas emissions produced by electricity generation, which was the second-largest source in the overall emissions chart, was more than twice as high as that generated by agriculture. ③ Industry produced a larger share of emissions than the combined total from commercial and residential sources. ④ Meanwhile, within agricultural emissions, emissions from agricultural soil management were the most significant, contributing to half of the total agricultural emissions. ⑤ Enteric fermentation was the second-largest source of agricultural emissions, producing more than three times the emissions generated by manure management.

* enteric fermentation: 장내 발효 ** manure: (동물의 배설물로 만든) 거름

Lee Kuan Yew에 관한 다음 글의 내용과 일치하지 않는 것은?

Lee Kuan Yew, Singapore's first prime minister, was born on September 16, 1923, and is of third-generation ethnic Chinese descent. He excelled in the Senior Cambridge examinations in 1940, earning the John Anderson Scholarship to attend Raffles College. During the prize-awarding ceremony, he met his future wife, Kwa Geok Choo, the only girl in the school. The onset of World War II in Asia disrupted Raffles College, which was converted into a medical facility in 1941. After the war, Lee chose not to return to Raffles College and pursued higher education in the United Kingdom. Initially, he enrolled at the London School of Economics but eventually studied law at Cambridge University. Lee Kuan Yew served as prime minister for 31 years, from 1959 to 1990. While his government restricted freedoms and maintained strict control over power, he also built excellent public housing, transforming Singapore into one of Asia's wealthiest countries.

- ① John Anderson 장학금을 받고 Raffles College에 다녔다.
- ② 시상식에서 아내가 될 Kwa Geok Choo를 만났다.
- ③ 제2차 세계 대전 종식 후 Raffles College로 돌아갔다.
- ④ 1959년부터 1990년까지 싱가포르의 총리로 재직했다.
- ⑤ 싱가포르를 가장 부유한 아시아 국가 중 하나로 변모시켰다.

A Romantic Christmas Seafood Night at Hilltop에 관한 다음 안내문의 내용과 일치하지 않는 것은?

A Romantic Christmas Seafood Night at Hilltop

Make this Christmas unforgettable with a romantic seafood dinner
at Hilltop Seafood Grill.

(Special offers from December 21 to December 27!)

Set in a charming hilltop location, our restaurant offers a relaxed atmosphere with exclusive ocean-view seating available upon request.

Unique Offerings:

- A wide range of seafood dishes, from grilled fish to seafood pasta
- Over 50 wine labels and delicious handcrafted cocktails (starting from \$12)
- Live acoustic music from 7 PM to 9 PM

December Promotions:

- Enjoy a Mixed Seafood Dish for Two for just \$90 — that's 10% off the regular price!
- We offer a free Christmas dessert on Christmas Eve and on December 25.

Reservations:

- Visit our website to make your reservation directly.
- Please note that we do not accept reservations on Christmas Eve; seating will be on a first-come, first-served basis. Be sure to arrive early to secure your table!

- ① 요청하면 바다 전망 좌석을 이용할 수 있다.
- ② 저녁에는 두 시간 동안 라이브 음악 공연이 있다.
- ③ 2인용 모듬 해산물 요리를 할인된 가격에 제공한다.
- ④ 크리스마스이브와 12월 25일에는 디저트가 무료로 제공된다.
- ⑤ 크리스마스이브에는 예약 손님만 입장할 수 있다.

AARP Smart Driver Program에 관한 다음 안내문의 내용과 일치하는 것은?

AARP Smart Driver Program

Join the AARP Smart Driver Program, hosted by the CL Center, in the fall. This classroom-based driver retraining course is designed for drivers aged 50 and older to enhance their safety and confidence on the road.

*Graduates may qualify for a 5–10% car insurance discount.

Instructor: David Mitchell

What You'll Learn

- How aging and medications affect driving
- Basic driving rules and license renewal
- Local traffic hazards and road conditions
- Accident prevention tips

Course Details

- Participation is limited to 25 people.
- A 1-hour lunch break is included (please bring your own lunch).
- Attendance at both classes is required.
- Classes will be held on Tuesday and Thursday, October 6 and 8, from 9:00 AM to 4:00 PM.

Registration & Fee

- AARP Members: \$15 / Non-Members: \$20
- Payment is due on the first day of class (credit card only; cash not accepted).
- Pre-registration is required (phone registrations are not accepted).
- Early registration is recommended, as space is limited and fills up quickly!

For registration and more information, please visit our website at www.clcenteraarp.org/aarp.

- ① 40세 이상의 운전자를 대상으로 하는 과정이다.
- ② 수료자에게는 자동차 보험료 할인 자격이 주어진다.
- ③ 점심시간은 1시간이 주어지고 도시락이 제공된다.
- ④ 두 번의 수업 중 한 번만 참석하면 된다.
- ⑤ 사전 등록이 필수이고 전화 등록도 가능하다.

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Jean Baudrillard, one of the best-known French social theorists, believes that the world of culture today is based on *simulation*, not reality. According to Baudrillard, social life is ① much more a spectacle that simulates reality than reality itself. People often gain “reality” from the media, where reality is not always as it might appear. Many U.S. children, upon entering school for the first time, ② have already watched more hours of television than the total number of hours of classroom instruction they will encounter in their entire school careers. ③ Add to this the number of hours that some will have spent playing computer games or surfing the Internet. Baudrillard refers to this social creation as *hyperreality* — a situation ④ which the *simulation* of reality is more real than the thing itself. For Baudrillard, everyday life has been captured by the signs and symbols ⑤ generated to represent it, and we ultimately relate to simulations and models as if they were reality.

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Things become complicated when we consider a task that involves multiple processes differing in automaticity. In a psychological task, people are required to name aloud the color of words while ① ignoring the words themselves. Sometimes, the words are compatible with the color with which they are printed (e.g., “red” printed with red ink). In other conditions, the words are incompatible with their color (e.g., “red” printed in blue). People usually complete this task more ② slowly in incompatible than compatible conditions. On incompatible trials, people do not intend to respond to the meaning of the word (the task is to name the ink color, not the word), but they typically become ③ aware that it is easier said than done. They realize their attention is being drawn to the content of the words, despite its irrelevance to the task at hand and their intention to ④ notice it. To overcome this automatic draw on attention, people must assert control to report a judgment that has been made challenging by a competing automatic process. So, in this case, people are aware of an automatic process, but they cannot stop it and have difficulty ⑤ correcting its influence.

다음 빈칸에 들어갈 말로 가장 적절한 것은?

If you told me that you don't like sharp cheeses, I would believe you. If you said that you don't like the texture of very soft cheeses, I would pity you, but I would believe you. But if you say that you don't like *any* cheese, I don't believe you because cheeses simply don't taste, look, or feel the same. What my friend dislikes is *something being called "cheese."* I'm sure that he had a bad cheese experience in childhood. He ate something he didn't like and learned that "cheese" is bad. With that negative attitude, he quickly rejected anything else called "cheese" (and very likely did not have a wide experience with cheeses anyway), reinforcing his belief that "cheese" is bad. As a result, this friend, who is in other respects normal, cannot bear to eat anything that he believes is called "cheese." He actually thinks that there is some flavor or property of cheese that makes it taste bad to him. But that is not the case: cheeses don't share a particular texture or flavor or source. He hates the _____, not the actual stuff.

- ① usage ② design ③ category
④ marketing ⑤ situation

15

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The issue of cultural variation in emotions has been controversial. At first, it was widely believed that different cultures produced radically different emotional states, so that a person from one culture could not even begin to understand what someone from another culture was feeling. This view received a severe blow from evidence that people from very different cultures could translate emotion words effectively and even recognize facial expressions of emotion. A highly influential research program by Paul Ekman and his associates began with photographs of facial expressions that Americans would easily recognize as expressing different basic emotions: angry, sad, happy, and the like. Ekman and his group traveled all over the world showing the photographs to people in widely different cultures, including even some distant tribes that had had almost no contact with Western civilization. By and large, most people in every culture recognized the emotions expressed in those American faces. These results convinced most doubters that _____.

* radically: 근본적으로

- ① emotion recognition relies mostly on verbal cues
② facial expressions are meaningless without context
③ some aspects of emotions are innate and universal
④ no clear patterns exist in human emotional response
⑤ emotions are learned and passed down through imitation

16

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Good thinkers _____.

For example, when Galileo finally got around to doing some empirical studies of gravity, he was plagued by the inaccuracies of the current technology of measurement. Instead of waiting a couple of hundred years for the invention of a good stopwatch, he slowed things down by studying the behavior of bodies *rolling down inclined planes*. By doing so, Galileo was able to demonstrate quite convincingly that heavy and light objects “fell” at the same rate. In addition, he was able to show something more subtle and perhaps more important. Things don’t simply fall at a constant rate: they constantly accelerate. Of course, accepting Galileo’s conclusions requires us to make some logical inferences about the compatibility of rolling and falling, but this is exactly the point. Galileo was not simply a good logician or a good observer. One of his unique talents was his ability to blend logic and observation into a seamless set of arguments that could knock someone’s socks off (and predict how quickly they would fall to the floor).

* empirical: 실증적인 ** plague: 시달리게 하다 *** seamless: 아주 매끄러운

- ① deliberately expose themselves to contrasting viewpoints
- ② hardly prioritize emotional reasoning over factual evidence
- ③ strategically combine technological tools to confirm understanding
- ④ rarely limit themselves to a single way of understanding the world
- ⑤ continuously challenge themselves to detect flaws in their reasoning

Accustomed to bargains and overwhelmed with options, consumers must have a reason to buy now. In addition to the actual product they're buying, consumers expect something more, an incentive that will give them an extra emotional charge. Customization, an event, multiple uses for the product, entertaining pop-up stores, or a great story (such as a special product heritage or theme) are more examples of plus-one incentives that result in purchases. "Do-good" products such as those that tout being environmentally conscious or supporting communities offer not just one but three plus-one purchasing incentives: a compelling and human story, rationalization, and an emotional boost for the consumer who feels altruistic while spending. For example, consumers who purchase Tom's Shoes or Walgreen's flu shots are told that their purchase will result in a pair of shoes or a flu shot being donated to someone in need through each company's one-to-one matching program. Thus, in addition to their purchase, consumers also get to see themselves in a more positive light; they feel less wary about these businesses, which have been humanized through a compelling story of need; and they _____.

* tout: 크게 선전하다 ** altruistic: 이타적인 *** wary: 경계하는

- ① feel discouraged by the lack of direct impact
- ② question the sincerity behind the marketing message
- ③ become confused about the company's true intention
- ④ focus mainly on the product's practicality and design
- ⑤ have the rationalization of giving rather than spending

Postage stamps were born bearing images of state sovereignty and authority. ① Taking their cue from coins and banknotes, postal officials understood that the stamps they were printing to facilitate the circulation of letters and packages among the population could also be used for a different kind of circulation: that of state imagery. ② Postage stamps, tiny though they were, nonetheless had space enough for the state to use them to circulate messages announcing its own supremacy. ③ Iconic images of flags and coats of arms began to circulate on stamps, but, above all, stamps hosted portraits of the personages considered uniquely suitable to stand for the nation-state: heads of state, allegorical figures, military heroes, and other historically important men. ④ Some criticized The United States Postal Service for issuing stamps “honoring its own” instead of working to improve postal service and the artistic quality of its stamps. ⑤ From the beginning, then, stamps depicted state power expressed in images of exemplary personhood even as they provided ordinary people with an important means for communicating with one another.

* sovereignty: 통치권 ** supremacy: 패권 *** allegorical: 우화적인

There's a difference between a story and a plot. They may seem to be the same thing (a narrative account of some action with a beginning, middle, and end), but they aren't.

- (A) Here's a plot: The king died and then the queen died of grief. Events are now connected by cause and effect: the death of the king led to the death of the queen from grief. For Forster, a story asks “And then?” (X happens and then Y happens). A plot asks “Why?”
- (B) In other words, plots involve cause and effect, not just one event following another. The English novelist E. M. Forster illustrated the difference between story and plot by this example. Here's a story: The king died and then the queen died. This is a succession of events, simply organized temporally: this happened and then this happened.
- (C) A story, as opposed to a plot, is the straightforward account of everything that happens in the order that it happens. A plot is the way events are selected and arranged with an emphasis not only on what happened but on why it happened.

① (A) - (C) - (B)

② (B) - (A) - (C)

③ (B) - (C) - (A)

④ (C) - (A) - (B)

Married couples are highly motivated to empathize with one another; to do this, they mimic each other's facial expressions, which in turn facilitates similar emotional experiences. People who are on the same page get along better and are more likely to stay happily married.

- (A) Most striking, the more similar people looked, the happier they reported they were in their union. So next time you are struggling to connect with your spouse, try to subtly mimic his or her facial expression; it is likely to make you feel in sync and strengthen that emotional link that can weaken in times of strife.
- (B) Over time, research confirms, this mimicry leads to permanent changes in how the face is shaped. In one study, more than a hundred volunteers were shown photographs of men and women taken in their first year of marriage and taken twenty-five years later, on the spouses' silver wedding anniversary.
- (C) They were also shown photos of randomly matched pairs at the same ages. The volunteers were asked to judge the physical similarity of the couples. Sure enough, there was an increase in similarity among the married couples at the twenty-five-year mark, but not the randomly matched pairs.

* in sync: 화합하는 ** strife: 갈등, 다툼

Unlike a digital computer, it did not respond in a discrete all-or-none manner, either.

In the 1960s, Richard Thompson, a neuroscientist at the University of California at Irvine, recorded the activity of single neurons in the cortex of cats while the animals were presented with series of tones or of light flashes. (①) Some cells fired only after a certain number of events. (②) One neuron, for instance, reacted after six events of any kind, regardless of whether this was six flashes of light, six brief tones, or six longer tones. (③) Sensory modality did not seem to matter: The neuron apparently cared only about number. (④) Rather, its activation level grew after the fifth item, reached a peak for the sixth, and decreased for larger numbers of items. (⑤) Several similar cells, each tuned to a different number, were recorded in a small area of the cat's cortex.

* discrete: 명확하게 구분되는 ** cortex: 대뇌피질 *** modality: 양상, 양식

But in the 2016 presidential election, many Americans got their news from social networking sites and other online media that created highly tailored news feeds for each individual.

Information technology can play an important role in both bringing communities together and splitting them apart. On the one hand, IT has the potential to increase shared information and norms across larger groups. For instance, in the 1960s, most Americans got their news from one of three national television networks and a small number of other publications. (①) If Walter Cronkite, a famous American broadcast journalist, said it, many Americans believed it was true. (②) That almost certainly helped spread more shared norms across a country that previously had strong regional differences. (③) If you had liberal friends and interests, you were rarely exposed to conservative news outlets, and vice versa. (④) In a community where each subgroup saw a different set of facts about the world and had a different value system for interpreting those facts, the shared norms needed for the overall community to function effectively were greatly weakened. (⑤) In a sense, the United States seemed to be fragmenting into two separate communities.

* fragment: 분열되다

Animals often compete: over food, a mate, a territory, or some other resource. But rather than jump immediately to physical fighting, individuals typically engage in nonaggressive communicative displays, like the roaring of red deer, the “jousting” displays of stalk-eyed flies, the croaking of European toads, or the loud “wahoo” calls of male baboons. Ethologists now have a good understanding of how these displays have evolved — that is, why they are evolutionarily stable. In red deer, for example, roaring is energetically costly, so only males in good physical condition can roar repeatedly, for long durations. Moreover, the acoustic features of a male’s roar are constrained by his body size, so only large males can produce deep-pitched roars. And larger males are more successful fighters. As a consequence, a male’s roaring cannot be faked — because small males and males in poor condition cannot produce low-pitched roars at a high rate — and roaring serves as an honest indicator of size, condition, and competitive ability.

* joust: (말을 타고 창을 든 채) 결투하다 ** croak: (개구리가) 개굴개굴 울다 *** ethologist: 동물행동학자

Animals use displays to _____ (A) _____ physical fights, as these signals accurately reflect physical condition and size, making them _____ (B) _____ evolutionary indicators of competitive strength.

To demonstrate how our minds have adapted, consider a typical high school task: writing a research paper. Baby Boomers most likely went to their local library, searched card catalogues, took longhand notes, and painstakingly typed their papers on a typewriter. Their challenge was in finding information. They (a) memorized things like how to spell words, because reference materials weren't readily available and the process of checking was time consuming. And they were careful and precise when typing — correcting took time. Baby Boomer brains were trained to focus, pay attention to detail, be patient, and have (b) mental strength. Haste meant waste.

Fast-forward to today. The Baby Boomer challenge of finding information is less relevant — information is extremely (c) accessible. Memorization and precision are less essential as well — it's easy to check facts and spelling. This means that those brain activities don't get the workout today that they did for previous generations of high school students. Today's young brains are heavily focused on scanning and processing mountains of information. Their brains are trained for (d) patience. But it's not only the young who are increasingly addicted to speed. Their saturation in and early use of technology makes them highly tuned to require more stimulation and become more easily bored — but everyone's brains are changing. We're all less patient and less able to focus, and we all want things faster. It's no wonder we've (e) replaced the word “trend” with “trending.” We barely alight on a new idea long enough for it to be a trend; it's just zipping by or “trending.”

* saturation: 충분히 배어들기, 침투 ** alight: 내려앉다 *** zip by: 핑 소리를 내며 지나가다

(A)

In a village, there lived two friends named Jake and Ben. They spent most of their time resting under a tree, thinking about what they should do with their lives. One day, Jake noticed that the people in the village carried water pots from a river, which was far away. No matter how many trips they made, the water was never enough for their families' needs. Then, (a) he came up with an idea and suggested to Ben that they fetch water for the villagers in exchange for 25 cents per pot. Ben thought it was a good idea and agreed.

* fetch: 가지고 오다

(B)

Jake, however, couldn't shake off (b) his concern. One day, while visiting a neighboring village, Jake saw a potter making pots. He noticed a pot with a long, narrow neck and suddenly had an idea. "What if we build a long pipeline to bring water directly to the village?" Excited, he shared his idea with Ben. But Ben shook his head. "A pipeline made of clay? That will never work. It's a terrible idea." (c) He gave a thousand reasons why it wouldn't work, but Jake wanted to try it, even if by himself. Jake had just one reason to try — he believed in it. The construction began, and, as expected, many problems arose. The pipe broke several times, and there were countless challenges.

(C)

But Jake didn't give up. After about seven months of hard work, the pipeline was finally completed, and water started flowing directly into the village. Now, Jake could provide thousands of pots of water each day, and (d) he lowered the price to just 10 cents per pot. With this new system, money started flowing into Jake's pocket, while Ben was left jobless. After all, who would pay 25 cents for water when they could get it for 10 cents? Ben regretted ignoring Jake's idea, but Jake invited him to join the new project. Together, they expanded the pipeline and helped even more villages.

(D)

Jake and Ben presented their offer to the villagers, and everyone liked it. Soon, their business grew rapidly. They made 50 to 100 trips a day and became the richest men in all the nearby villages. After ten years, however, Jake started to worry about the future. “We are young and healthy now, but we won’t stay this way forever. What will happen to our families then?” (e) he asked. Ben laughed and said, “Don’t worry about the future. We’re doing great now! Just enjoy the moment.”

Dear Customer Service,

I am writing with regard to my recent furniture order. Last Saturday, I visited your Springfield showroom and purchased an oak desk along with two three-drawer filing cabinets for my study. However, when I returned home this evening, I found that my order had been delivered in my absence, and the cabinets were not what I ordered. Instead of the three-drawer style, I received the four-drawer version. Unfortunately, due to limited space, I am unable to accommodate the taller cabinets, which makes them unsuitable for my needs. I kindly request that you arrange for the wrong cabinets to be picked up and replaced with the correct three-drawer models as soon as possible. Please contact me at your earliest convenience to schedule the exchange. I would appreciate your prompt attention to this matter, as I need the right cabinets to properly organize my files.

Best regards,

John Smith

다음 글에 드러난 Emily의 심경 변화로 가장 적절한 것은?

Light streamed into Emily's eyes as she stirred awake, stretching with a contented sigh. Hugging her pillow, she smiled — her cousin's house was just as cozy as hers, and everything felt wonderfully familiar. The usual morning sounds of Rosewood filled the air: the dog barking and the garbage truck passing by with a low, steady sound. Memories of last night's party with her cousins danced through her mind, bringing a soft smile to her face. Then, a strange scent hung in the air — something earthy and sharp, like hay mixed with something unfamiliar. Emily frowned and sensed that something was not right. As she turned her head, her breath caught. Aunt Helene stood in the doorway. Emily blinked, unsure if she was still dreaming. Aunt Helene was supposed to be traveling. She couldn't understand why Aunt Helene was here. "You're up," Helene said. "Come downstairs." Emily was so shaken that she couldn't say anything. Emily's body was moving down the stairs, but her mind was still trying to catch up with what just happened.

* frown: 얼굴을 찌푸리다

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Society makes a pedagogical mistake when it emphasizes obtaining the so-called “right answer” rather than asking the “right” question, or at least, a good question. The so-called “good student” is viewed as the one who rapidly provides the right answers to questions teachers ask. On this view, the expert in a given field unfortunately becomes an extension of the so-called “expert student” — the one who knows and can quickly spit back a lot of information. As John Dewey believed, how one thinks about issues often is more important and consequential in life than exactly what one thinks. Schools should teach students how to ask important questions (questions that are worth answering and that are interesting) and reduce their emphasis on rote learning of facts. And they need to reorient their emphases in diverse domains, not just in the arts. Contemporary creativity research embraces a wide variety of distinct domains, from science to engineering to business to architectural design to the arts to athletics, all of which are ready for creative investigation.

* pedagogical: 교육상의, 교육의 ** consequential: 중대한 *** rote learning: 암기식 학습

- ① 학생들이 전문적인 지식을 함양할 수 있는 환경을 조성해야 한다.

밑줄 친 keep alive가 다음 글에서 의미하는 바로 가장 적절한 것은?

The combination of geometrical regularity and keen observation of nature is characteristic of all Egyptian art. We can study it best in the reliefs and paintings that adorned the walls of the tombs. The word ‘adorned’, it is true, may hardly fit an art which was meant to be seen by no one but the dead man’s soul. In fact, these works were not intended to be enjoyed. They were meant to ‘keep alive’. Once, in a dark distant past, it had been the custom when a powerful man died to let his servants and slaves accompany him into the grave so that he should arrive in the beyond with a suitable suite. They were sacrificed. Later, these horrors were considered either too cruel or too costly, and art came to the rescue. Instead of real servants, the great ones of this earth were given images as substitutes. The pictures and models found in Egyptian tombs were connected with the idea of providing the souls with helpmates in the other world.

* relief: 부조(재료의 한쪽 면에만 형상을 새긴 것) ** adorn: 장식하다 *** suite: 수행원, 일행

- ① express devotion to the gods through sacred imagery
- ② serve the deceased’s soul as substitutes for real servants
- ③ depict daily life scenes in tombs for aesthetic enjoyment
- ④ document unusual customs and traditions in ancient Egypt
- ⑤ honor the dead by illustrating their achievements and status

다음 글의 요지로 가장 적절한 것은?

When thinking of fashion as clothing and accessories, it is hard not to see it as an item, an object we purchase and use, and an object that, inevitably, is made of something — for one cannot think of fashion items without thinking of their materiality. Nevertheless, such materiality is inconceivable if not as a performance. Fashion is fabric, sartorial design, and the set of inventions and innovations that punctuate its history — none of these are static. The study of fabrics and pattern designs runs parallel to and complements the very study of our cultures and traditions. It is a matter, somewhat poetically, of dressing history, of giving it colors and design. The fabrics in which fashion items are made populate our cultural heritage: they remind us of traditions and rituals. They are even at times signs of economic change — nylon after the Second World War, sustainable fabrics nowadays. In many ways, the study of the material counterpart of fashion becomes a study of collective identity, of global trends, of the growth and evolution of societies — from the past to the present to the future.

* sartorial: 의류의 ** static: 정적인

다음 글의 주제로 가장 적절한 것은?

Gen Z became the first generation in history to go through puberty with a portal in their pockets that called them away from the people nearby and into an alternative universe that was exciting, addictive, unstable, and unsuitable for children and adolescents. Succeeding socially in that universe required them to devote a large part of their consciousness — perpetually — to managing what became their online brand. This was now necessary to gain acceptance from peers, which is the oxygen of adolescence, and to avoid online shaming, which is the nightmare of adolescence. Gen Z teens got sucked into spending many hours of each day scrolling through the shiny happy posts of friends, acquaintances, and distant influencers. They watched increasing quantities of user-generated videos and streamed entertainment, offered to them by autoplay and algorithms that were designed to keep them online as long as possible. They spent far less time playing with, talking to, touching, or even making eye contact with their friends and families, thereby reducing their participation in embodied social behaviors that are essential for successful human development.

* perpetually: 끊임없이 ** acquaintance: 지인, 아는 사람

- ① effects of social media on Gen Z's social development
- ② roles of online education platforms in Gen Z's schooling
- ③ psychological benefits of spending time online for Gen Z
- ④ impacts of online advertising on Gen Z's purchasing behavior
- ⑤ Gen Z's preference for digital platforms over traditional media

다음 글의 제목으로 가장 적절한 것은?

The philosopher and statesman Francis Bacon couched the efforts of his peers to understand the world, whether it is the workings of an organ or movements of the heavens, in terms of the spiders and the ants, where the former use reason and the latter rely on experiment. Importantly, Bacon realised that a blend of both skills — as performed by the bees — was necessary for what today we call science: like these busy little insects, worker scientists harvest data from experiments so that their minds can transform them into fruitful information. In his evocative writing, one can see an outline of how science still works: reason guides experiment, which paves the way for new reasoning and then new experiments. With his metaphor of the bee, Bacon had rejected the approaches of the ant, which depended on radical empiricism (data without reason), and of the spider, which relied on rationalism (reason without data), in his quest for knowledge.

Thomas Wiggins에 관한 다음 글의 내용과 일치하지 않는 것은?

Thomas Wiggins, also known as ‘Blind Tom,’ was a remarkable pianist and composer born in 1849 in Georgia, USA. Born blind and enslaved, he displayed extraordinary musical talent from an early age. Wiggins could reproduce complex melodies after hearing them only once, earning recognition as a prodigy. He was also known for his ability to mimic sounds from nature and the environment, such as birdsong and trains, incorporating them into his performances. Despite his disability and the harsh conditions of slavery, he was taken on tour by his enslaver, and his performances astonished audiences across the United States and Europe. Wiggins composed over 100 pieces, blending classical, folk, and popular influences. His most famous work, ‘The Battle of Manassas,’ vividly depicts the sounds of the Civil War. After emancipation, he continued to perform, but exploitation by his handlers continued. Despite this, Wiggins became one of the most celebrated musicians of the 19th century. He passed away in 1908, leaving behind a legacy of human potential in the face of adversity.

* prodigy: 신동 ** emancipation: 노예 해방 *** exploitation: 착취

- ① 시각장애가 있는 노예 신분으로 태어났다.

Are you ready to rock the stage? Join *Thunderstrike*, Oakridge High's official rock band, and showcase your talent!

Who We're Looking for

- Vocalists
- Guitarists (lead and rhythm)
- Bassists
- Drummers
- Keyboardists

When: April 10, 2026, 3:00 p.m. – 6:00 p.m.

Where: Oakridge High School Music Hall

Why Join *Thunderstrike*?

- to perform at school events and competitions
- to develop your musical skills and stage presence
- to build friendships with fellow music enthusiasts

What You Need to Know

- Audition Material: Prepare one piece of your choice (either a cover song or a song you wrote).
- Equipment: Bring your own instrument (drums and keyboard provided).
- Band Style: Rock, alternative, pop rock, and anything with a punch!

How to Sign Up

- Visit the music hall in person or email thunderstrike@oakridgehigh.com with your name, grade, and instrument.
- Registration Deadline: April 5, 2026

Join *Thunderstrike* and step into the spotlight!

- ① 보컬리스트와 악기 연주자를 뽑는다.
- ② 오후 3시간 동안 진행된다.
- ③ 밴드는 학교 행사 및 대회에서 공연한다.
- ④ 커버곡과 자작곡 각 1곡씩 준비해야 한다.
- ⑤ 직접 방문하거나 이메일로 신청한다.

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

A variety of linguistic expressions convey the ideas centrally linked with the concept of true self. People are said ① to have *integrity* when their actions appear to express what they truly feel and value, and this quality of integrity, cross-culturally, seems to engender trust and respect. The etymology of the term *integrity* derives from the Latin “integer,” ② meaning that integrity expresses wholeness and entirety. Nor are such expressions limited to Western cultures. Japanese language, for example, contains the word *jibun*, which is sometimes translated as “true self” and conveys a deeper self ③ that must be discovered which facilitates one’s health and connections with others. Similarly, Takeo Doi pointed out the awareness among Japanese of potential discrepancies between inner sensibilities and outward presentation, as illustrated by the existence of complementary terms such as *tatema/honne*. Kim-Chong Chong ④ similarly highlights related conceptions within Confucian philosophy. Clearly, concern with authenticity or the true self of others ⑤ are present in varied cultural contexts.

* integrity: 진실성 ** etymology: 어원 *** discrepancy: 차이

In many ways, the Internet has accelerated people’s notion that the truth is relative. As Anna Kata argues, the Internet has ① facilitated a postmodern paradigm of truth in which expert consensus is delegitimized and personal values and experiences are treated the same as scientific evidence. Within this new paradigm, Kata notes, everyone is considered an expert and truth is “flattened,” as each perspective and view of the facts is ② represented as legitimate, with evidence from legitimate experts considered one of multiple opinions. The ③ fixed nature of what is considered true is problematic in terms of misperceptions, as people are increasingly exposed to online discussions and debates about what is true. If extremely inaccurate evidence, personal experiences, or the words of charlatans are presented and considered alongside evidence from scientific consensus without consideration of validity based on evidence, it becomes more ④ difficult for people to determine which information is legitimate and true. Furthermore, online postmodern discourses often shift the standards of evidence to ⑤ suit participants’ arguments, making it more likely that people will become confused about the facts and ultimately misinformed.

* delegitimize: 위신을 실추시키다 ** charlatan: 사기꾼, 돌팔이

Researchers need to be aware that subjects' behavior may change simply because they are getting _____, as one classic experiment revealed. In the late 1930s, the Western Electric Company hired researchers to investigate worker productivity in its Hawthorne factory near Chicago. One experiment tested the hypothesis that increasing the available lighting would raise worker output. First, researchers measured worker productivity or output (the dependent variable). Then they increased the lighting (the independent variable) and measured output a second time. Productivity had gone up, a result that supported the hypothesis. But when the research team later turned the lighting back down, productivity increased again. What was going on? In time, the researchers realized that the employees were working harder (even if they could not see as well) simply because people were focusing on them and measuring their output. From this research, social scientists coined the term *Hawthorne effect* to refer to a change in a subject's behavior caused simply by the awareness of being studied.

- ① longer breaks ② better training
③ financial incentives ④ negative feedback
⑤ special attention

While the content of radio, television, or the internet might be a football game or a political debate, the *message* — in McLuhan's terms — of each of these media is not that. The message is instead equal to the social changes that a medium generates. McLuhan wrote that 'the "message" of any medium or technology is the change of scale or pace or pattern that it introduces into human affairs'. He also argued that the content of a medium is always another medium: the content of television might be the medium of a theatrical play, the medium of football, and so on. He wanted to make the point that by just studying the content, we risk becoming entangled in this spiral of media within media within media. It was therefore better, he thought, to instead focus on understanding media in terms of the ways in which they

* entangled: (∼에) 빠져든, 말려든 ** spiral: 소용돌이

- ① transform the social
- ② produce more content
- ③ deliver political ideologies
- ④ reflect personal experiences
- ⑤ increase technological complexity

Language is a cultural resource available for people to use. We *do* things with words, as the philosopher J. L. Austin reminded us decades ago. Even when we speak or write to ourselves, our very choices of words, as well as our underlying intentions and desires, are influenced by the social contexts in which we have seen, heard, or experienced those words, intentions, and desires before. Linguistic anthropologists, therefore, maintain that the essence of language cannot be understood without reference to the particular social contexts in which it is used. But those contexts do not stand apart from linguistic practices or somehow “contain” them, as a soup bowl would contain soup. Rather, social contexts and linguistic practices _____. For this reason, language should be studied, Alessandro Duranti writes, “not only as a mode of thinking but, above all, as a cultural practice, that is, as a form of action that both presupposes and at the same time brings about ways of being in the world.”

- ① mutually constitute each other
- ② are mediated by individual cognition
- ③ occur with or without their structured patterns
- ④ slowly stabilize regardless of external factors
- ⑤ function as frameworks and their applications

다음 빈칸에 들어갈 말로 가장 적절한 것은?

For evolution to work, selection needs to be — as the term suggests — selective. This means that selection needs to be based on an individual life form's properties and not on a whole population of life forms. It is not enough that a change improves the ability for a life form to survive. It needs to improve the life form's likelihood of survival *relative to other life forms*. For example, if a life form has a mutation that produces chemicals that speed up the process of procreation but distributes these chemicals among all other life forms, every life form nearby profits, no matter whether they had the beneficial mutation or not. This is similar to the situation in an economy. Money, status, or reputation is given preferably to those people and companies that have methods more adapted to the environment (the market). A well-run restaurant with better service will attract more customers than a poorly run restaurant. If, at the end of the day, the better restaurant _____, it might have a harder time “evolving” and expanding its business.

* mutation: 돌연변이 ** procreation: 생식

- ① reduced prices aggressively to defeat its rivals
- ② failed to respond to changing market conditions
- ③ aimed only to speed up its growth and efficiency
- ④ had to share its earnings with all other restaurants
- ⑤ continued attracting customers beyond its capacity

Fashion retailers are becoming more innovative in addressing the increasing returns issue, including the implementation of reverse logistics strategies, by which returns are channelled through the most cost-effective route. ① One example of this is the introduction of dedicated in-store areas, supported by advanced AI technology, for both online and offline returns and the collection of online orders. ② An advantage of this is that online customers, going into a store to process a free return, may be tempted to make additional purchases while there. ③ Improved technology is also being used to allow online customers to virtually try on products to check fit and suitability prior to purchase. ④ To attract more online customers, many brands are investing heavily in social media advertising and personalized promotions. ⑤ Omni-channel initiatives, such as these, should improve both operating profit margins and customer satisfaction, reducing the financial risk posed by the increasing rate of returns.

* retailer: 소매업체 ** logistics: 물류 관리

How water is used is unique to the resource. Oil is completely consumed when it is used, especially if it is burned to provide energy. This also means that the amount of oil consumed by one user is not available for someone else.

- (A) Water may be withdrawn from the river by upstream users, through pumping, diversion and other methods of extraction, but there can also be a lot of return flow of water back to the river during upstream use. This return flow to the river is then available for other users further downstream.
- (B) In contrast, much water use is sequential, and it is not often fully consumed by the first user. For example, the water contained in a river may be extracted by many users as it flows from the upper watershed to its eventual end in a floodplain or ocean.
- (C) In fact, some uses of water, such as hydroelectric power generation, transportation and recreation, do not require any withdrawals of surface water. Water for these purposes is neither withdrawn from the source nor consumed.

In some cases, objects are members of the same category not because they are highly similar in appearance but because they serve similar functions. For example, planes, trains, and automobiles do not look very similar to each other, but they are all means of transportation.

- (A) All of them, though, are excellent exemplars that reflect the individual's religiosity. The concept of religiosity provides a meaning structure that ties these behaviors together in a single category simply because they are different manifestations of the same underlying concept. Thus, categories need to have some explanatory function.
- (B) A category is more than a set of elements that are grouped based merely on perceived similarities and differences; a category is also a *theory* that gives some account for why *these* elements, but not other elements, are included in the category. This explanation provides the “glue” that holds the category together.
- (C) In still other cases, exemplars become associated because they have some connection to each other based on some higher meaning. Attending church, donating money to a faith-based charity, and bowing one's head before meals are very different specific behavioral acts, and it is not immediately apparent that they serve the same function.

But maybe it's the other way around: Perhaps healthy people are more likely to succeed economically, or people who live longer have more time to accumulate wealth.

The wealth-health question illustrates the most irresistible thinking error made by both amateur and professional social psychologists: When two factors such as wealth and health go together, it is tempting to conclude that one causes the other. (①) Wealth, we might presume, somehow protects a person from health risks. (②) A third variable might also cause both health and wealth — for example, perhaps those of a certain race or religion are both healthier and more likely to become wealthy. (③) In other words, correlations indicate a relationship, but that relationship is not necessarily one of cause and effect. (④) Correlational research allows us to roughly *predict* one variable from another, but it cannot tell us whether one variable (such as wealth) *causes* another (such as health). (⑤) When two variables (let's call them X and Y) are correlated with each other, there are three possibilities: X causes Y, Y causes X, or a third variable (Z) causes both.

Text messages on mobile devices and social media are basically a kind of written communication.

Literacy has become an increasingly complex issue in the twenty-first century because of the development of technology. With the popularity of social media and mobile applications, written and spoken communication genres often merge and become indistinguishable. (①) As suggested by Caroline Tagg, text and talk merge in modern communication. (②) With the immediacy of communication enabled by technology, the distinction between formal, pre-planned written communication and the more casual, immediate spoken communication is eroded, whether in social or workplace contexts. (③) The difference in language style between the two modes of communication has also become less conspicuous. (④) However, because of the immediacy of the communication, they have assumed characteristics of spoken communication, such as more casual/informal communication style, with less emphasis on planning and less compliance with typical genre features. (⑤) Features of spoken communication can often be found in these written texts which are in fact a type of textual spoken communication.

The context of children's exposure to regional variation of a language may play a role in how it is interpreted for social meaning. Kinzler and DeJesus conducted a study of five- and six-year-old children in the Northern and Southern U.S., and found that they were not equally able to identify or assign social evaluations to those regional accents. Children from the North, where the more prestigious dialect is spoken, could reliably identify it and showed social preferences for speakers with a Northern accent. Children living in the Southern U.S., where a less prestigious regional variety is predominately spoken, were at chance when identifying the varieties, and showed no social preferences for either accent. The crucial difference is that Southern children typically have exposure to both Northern and Southern accents whereas Northern children would mainly have exposure to the Northern accent. In this context, hearing multiple regional varieties did not give children an advantage in awareness of regional variation.

* prestigious: 권위 있는, 명망 있는

Children's exposure to regional accents can influence their interpretations of those accents, with Northern U.S. children showing a preference for their more _____ (A) _____ dialect, while Southern U.S. children, exposed to both Northern and Southern accents, showed neither _____ (B) _____ of nor preference for dialect variation.

- | (A) | | (B) |

The rootedness of plants, their insistence on staying in place, means that plant morphologies record biographies of encounter. Humans, fires, diseases, weather, soils, plants, and animals can all leave (a) traces in plant morphologies. Long-lived trees, in particular, can be witnesses to history. Through their capacity to live for centuries, trees can (b) inspire people into caring for processes that stretch beyond human lifetimes. Through their affinity for deep soils and moisture, short-lived domesticated plants have also persuaded humans to (c) reshape landscapes, from cornfields in Iowa to wheat fields in Tuscany. The gardens, agricultural fields, and the terracing and drainage systems that surround us are the visible consequences of human love, dependency, and exploitation of plants. Much of the time we (d) fail to notice what a plant-centered world we live in. Learning to notice plant ingenuity requires us to slow down, to walk, look, and wonder, to realize that what we took for granted is much stranger than we had imagined. The botanist Francis Hallé points out that one way to slow down and notice the (e) commonness of plants is through drawings of plant form: “It is as if we were visiting a distant planet and encountered a form of alien life with which we share no language — a form of life based upon principles not our own. If we wish to understand this creature, it is best not to rush.”

(A)

Here is a story about an emperor in ancient China and one quiet court member. The emperor attracted many people to his court who wanted to share the distinction of shaping the future of the land. Most court members eagerly competed for his attention, each trying to outdo the next and win projects to benefit themselves. The emperor gave his time to one court member after another, interested in each person's idea because it matched (a) his desires precisely.

(B)

The member continued, "The emperor's wisdom has made the land rich, allowing his people to grow in numbers. Let (b) him expand the lands that produce crops and increase trade by building the largest waterway and storage system for farming and transportation." The room fell silent, shocked that such a boring idea would be presented. But a smile slowly spread across the face of the emperor as he thought about how this plan would bring prosperity to his people. He pointed to the member and said, "This is what we will build instead."

(C)

The court members argued about how to design the foundation and build each level to support the next. To everyone's surprise, the quiet member spoke up. "The purpose of this building is to allow the emperor to be closer to the heavens?" "Yes." Everyone agreed that the purpose is to symbolize the glory and wisdom of the emperor. He asked again, "So the purpose is to build a structure that shows (c) his wisdom?" The emperor stared at him and nodded.

(D)

Yet their ideas led to disappointing results. The quiet member did not present any ideas to the emperor. Others scolded him for his lack of creativity and warned that (d) he would soon lose his position. Still, he simply listened as the emperor spoke about caring for (e) his people and improving farming. One afternoon, the court members and the emperor were discussing a project to build a structure that would reach into the heavens, taller than any other building in the land.

Dear parents,

I am writing to request your assistance in protecting our most vulnerable students. Respiratory viruses such as the flu can spread quickly in a school setting. Protecting the health and well-being of our students and staff is our top priority. By working together, we can help ensure a safe and productive school year for everyone. Some of our students have serious autoimmune conditions, making them more at risk for infections. To help protect all students, we kindly ask that you notify the school if your child has been diagnosed with any of respiratory illnesses. Because doctor's notes for excused absences often do not specify the illness, providing this information directly to the school allows us to take appropriate measures to prevent further spread. Please be assured that your child's personal information will be kept strictly private. Thank you for your cooperation and support. If you have any questions, please feel free to contact me.

Sincerely,

Kelli Garza

Harrington High School Principal

At the violin competition, my hands shook slightly as I stepped onto the stage. It had been years since I last performed on stage, and every eye in the room seemed fixed on me, pressing down with silent weight. I held the violin tightly, uncertain of how the first note would sound. Then, as I looked down, the polished surface caught a faint reflection — my father's face, just as I remembered. In that moment, something settled. I thought of the quiet evenings when he sat beside me during practice, gently nodding in rhythm. His presence was steady and unwavering. I drew in a slow breath and raised the violin to my chin, anchoring it against my shoulder. The bow paused just above the strings, then touched down with purpose. My grip steadied, and with each movement that followed, I played Pachelbel's Canon in D — no longer hesitating, but sure and measured from the first note on.

One myth in journalism was that independence required journalists to be neutral. This confusion arose when the concept of objectivity became so mangled it began to be used to describe the very problem it was conceived to correct. What we need to do now is recapture the original meaning of objectivity intended when the concept migrated from social science to journalism early in the twentieth century. Objectivity was not meant to suggest that journalists were without bias. On the contrary, precisely because journalists could never be objective, their methods had to be. In the recognition that everyone is biased, in other words, the news, like science, should flow from a process for reporting that is defensible, rigorous, and transparent — and this process is even more critical in a networked age. Today, when content comes from so many sources, this concept of objectivity of method transparently conveyed — rather than personal objectivity — is more vital than ever.

* mangled: 훼손된 ** rigorous: 엄격한 *** transparent: 투명한

밑줄 친 A chain is only as strong as its weakest link.가 다음 글에서 의미하는 바로 가장 적절한 것은?

Without bark, a tree cannot transport sugar from its leaves to its roots. As the roots starve, they shut down their pumping mechanisms, and because water no longer flows through the trunk up to the crown, the whole tree dries out. However, many of the girdled trees continued to grow with more or less vigor. I now know that this was only possible with the help of intact neighboring trees. Thanks to the underground network, neighbors took over the disrupted task of provisioning the roots and thus made it possible for their buddies to survive. Some trees even managed to bridge the gap in their bark with new growth. I have learned from this just how powerful a community of trees can be. “A chain is only as strong as its weakest link.” Trees could have come up with this old craftsman’s saying. And because they know this intuitively, they do not hesitate to help each other out.

* girdle: (나무껍질을) 고리 모양으로 벗겨 내다 ** intact: 온전한

There are a growing number of AI tools that companies use to screen job applicants. These automated systems decide which smaller set of applicants from a large pool will reach a human hiring manager. The AI tool analyzes video interviews for content, word choice, facial expressions, and so on, assigning each interviewee an “employability score,” which is compared to those of other applicants. But the validity of these tools is dubious; in fact, there is no evidence that these scores accurately predict job performance. Critics worry that algorithms trained on limited data will be more likely to give higher employability scores to typical applicants who are more frequently represented in the current workforce and give lower scores to those who appear atypical because they are less frequently represented in the current workforce. The result would be to reinforce current demographic imbalances instead of building a diverse workforce. Put differently, these automated technological tools seem to be reproducing biased wallpaper in hiring decisions. And, in fact, the technology may even be magnifying bias in new ways.

* dubious: 의심스러운 ** atypical: 비전형적인 *** demographic: 인구 통계학의

Scientific research is hard. Reaching the stage of becoming an independent and productive researcher able to pursue one's interests requires a long period of study followed by more years of apprenticeship. Even after that it requires long hours and often repetitive detailed work with little chance of obtaining wealth and glory, except for a tiny number who obtain Nobel prizes and the like, and even for them the fame is often short-lived. The respect and approval of the small community of their peers is often their main reward. So why do they do it? Almost all do it because of an intense curiosity, the desire to understand how the world works. Many because it promises to be able to solve important problems and make the world a better place. Yet others go into it because it is intellectually stimulating and rewarding, and has the promise of prestige, a good career, and a modestly comfortable lifestyle. When it comes to individual scientists, there will likely be a range of overlapping motivations for their choice.

* apprenticeship: 견습 (기간) ** prestige: 명성

다음 글의 제목으로 가장 적절한 것은?

As Michael Patrick Lynch observes in his book *The Internet of Us: Knowing More and Understanding Less in the Age of Big Data*, the information we derive from making correlations with big data often can be misleading unless we understand its context. He cites the example of a famous video map of cultural history that was created by using a data set of births and deaths of “notable” people over the past two thousand years. The shape and findings of the map were entirely dependent on the creators’ assumptions of their data’s parameters, including what constitutes a “notable” person. In other words, the answers we get are only as meaningful as the questions we frame. And for that, we need an understanding not just of correlations but of how and why the facts are so. Instead of seeing strands of information, we need to view the interconnected tapestry of relationships in a system. Thus, it is not enough to see that “culture” spread to different geographical hotspots in a particular pattern. We would need to study the social, economic, and political contexts. The purpose of data literacy, then, is to give us the tools to read the digital record and also to understand when we ought to look elsewhere.

William James에 관한 다음 글의 내용과 일치하지 않는 것은?

William James was born in New York City into a wealthy and intellectual family. His father was an unusual theologian, and his brother, Henry James, became a well-known novelist. During his childhood, William spent several years in Europe, where he developed a passion for painting. However, at 19, he abandoned art to study science. He enrolled at Harvard Medical School, but his studies were interrupted by health issues and depression, which prevented him from ever practicing medicine. Despite these challenges, he graduated and, in 1872, began teaching physiology at Harvard University. Over time, his interest shifted toward psychology and philosophy, leading to influential publications in both fields. In 1880, he was appointed a professor of philosophy at Harvard, where he made significant contributions to pragmatism and functional psychology. His works, including *The Principles of Psychology* and *Pragmatism*, remain highly influential. He taught at Harvard until his retirement in 1907.

* theologian: 신학자 ** physiology: 생리학 *** pragmatism: 실용주의

Are you ready for an adventure? We offer a one-day round trip from Miami to Key West. Travelers can enjoy a scenic drive along the Overseas Highway.

What's Included

- Onboard restroom
- Onboard Wi-Fi
- Tour guide
- Tray tables for each seat (Lunch and drinks not included)

When and Where

- Departure: 340 Biscayne Blvd, Miami, Florida, at 7:15 am
- Return: This activity ends back at the meeting point in the evening.

Additional Information

- This tour will have a maximum of 40 travelers.
- For a refund, you must cancel at least 24 hours before departure.

Ticket Prices:

Adults (older than 18): \$49 / Children & Students (18 & under): \$30
(Price includes taxes and booking fees.)

If you have questions about this tour, we'd be happy to help. Just call (855) 275-5071.

- ① 하루 일정의 왕복 여행이다.
- ② 버스에 화장실 시설이 있다.
- ③ 여행의 출발지와 종착지는 동일하다.
- ④ 최대 40명까지 참가할 수 있다.
- ⑤ 18세 이하 아동과 학생의 요금은 성인의 절반이다.

2026 The Beekeeper's Weekend에 관한 다음 안내문의 내용과 일치하는 것은?

2026 The Beekeeper's Weekend

Led by a local master beekeeper, our weekend course will give you insight and hands-on experience in the honey bee world.

Date/Time

Saturday, April 25 and Sunday, April 26

9:00 a.m. – 4:30 p.m.

Tickets

Adults: \$70

Under 18: \$40 (must be accompanied by a parent or legal guardian)

*Ticket sales end on April 23rd. Tickets are only refundable up to 7 days before the event.

Program Information

	Day 1	Day 2
Location	Blare Village Hall	Training apiary
Events	AM: Workshops on how individual bees and colonies of bees work PM: Presentations on the beekeeping year and critical manipulations	AM: Hands-on observation of a hive and the daily activities of our bee population PM: Class on assembling and manipulating hive equipment

*Beekeeping suits covering a range of sizes will be available to borrow for free.

If you have any questions, please email us at beekeeping@blarevillage.org.

* apiary: 양봉장

- ① 18세 이상만 참여할 수 있다.
- ② 입장권은 행사 열흘 전까지 환불받을 수 있다.
- ③ 프로그램은 이틀 동안 한 장소에서 진행된다.
- ④ 벌집 관찰 활동은 1일차에 실시된다.
- ⑤ 양봉용 보호복은 무료로 대여할 수 있다.

Ecosystem structure refers to the individuals and communities of plants and animals of which an ecosystem is composed, their age and spatial distribution, and the abiotic resources. Most ecosystems have thousands of structural elements, each ① exhibiting varying degrees of complexity. Scientists have learned that when enough separate elements are thrown together into a complex system, a sort of spontaneous order ② to result. One property of such systems is their tendency to generate emergent phenomena, which can ③ be defined as properties of the whole that could not be predicted from an understanding of the individual parts, no matter how detailed that understanding. Complex systems are also characterized by highly nonlinear behavior, which means that we cannot predict the outcomes of large interventions based on an understanding of smaller ④ ones. For example, removing 40% of a species stock from an ecosystem may have a ⑤ qualitatively different impact than removing 20% — that is, not just twice the known impact of removing 20%.

* spatial: 공간의 ** abiotic: 비생물의 *** emergent: [생물] 창발적인(개별 요소에서는 볼 수 없는 새로운 성질이 나타나는)

When people are relieved of the cognitive load imposed by their environment, they immediately become more creative, neuroscientist Moshe Bar has found. Bar, who directs the Gonda Multidisciplinary Brain Research Center at Bar-Ilan University in Israel, reports that when he ① taxed subjects' mental resources as they completed a test of creative thinking, they came up with more “statistically common” (that is, conventional and commonplace) associations. In his study, Bar found that “a high mental load consistently ② promoted the originality and creativity” of his subjects' responses. His explanation: when our minds are otherwise ③ occupied, we resort to mental shortcuts — convenient stereotypes, familiar assumptions, well-worn grooves. These are the thoughts that come most ④ readily to mind, that take the least mental energy to generate. It ⑤ requires abundant cognitive resources to inhibit these stale, reflexive responses and to reach beyond them for ideas that are fresher and more original.

* cognitive: 인지적인 ** groove: 습관, 관례 *** stale: 진부한

Is morality unique to human beings? Not entirely. Other species seem to have some understanding of fairness, especially when one individual's rights or wishes have been thwarted. Only human beings seem to have morality based in the _____, however. As social psychologist Jonathan Haidt pointed out, only human beings show "widespread third party norm enforcement." That is, people will expend their own or community resources to fight immorality even if they were not themselves the victims. They seem to recognize that maintaining morality is a generally good thing even when they are not directly affected. No other animal does this. If one dog steals a bone from another dog, the loser may protest and may even be said to have some moral sense that the stealing was wrong. But you will not see a third dog intervene to force the first dog to return the bone to the second. Only cultural animals use morality as a property of the larger society.

* thwart: 좌절시키다

- ① instinct
- ② emotion
- ③ situation
- ④ rationality
- ⑤ collectivity

For some organisations, filing in triplicate — a widely used system of classification that creates three copies of each document to distribute and store in different places — may be unavoidable. For most of us, such a system is a huge waste of time, space, and energy. If you need to file physical documents, what about the following beautiful alternative, invented by Japanese economist Yukio Noguchi? Forget about categories. Instead, place each incoming document in a large envelope. Write the envelope's contents neatly on its edge and line them up on a bookshelf, their contents visible like the spines of books. Now the moment of genius: every time you use an envelope, place it back on the left of the shelf. Over time, recently used documents will shuffle themselves towards the left and never-used documents will accumulate on the right. Archiving is easy: every now and again, you remove the documents on the right. To find any document, simply ask yourself _____. It is a filing system that all but organises itself, and it has won many fans.

* spine: (책의) 등 ** shuffle: 정리하다 *** archive: (파일 등을) 보관하다

- ① who requested it
- ② how thick the stack is
- ③ what color the envelope is
- ④ how recently you've seen it
- ⑤ what the envelope's label says

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The ability to act on our thoughts and feelings requires the coordination of positive and negative solidarity. It used to be the case that women were denied the right to vote and African Americans were denied access to certain institutions. Positive solidarity reflects positive freedoms, such as the right to do as you please, and it functions in tandem with negative solidarity, which reflects negative freedoms or restrictions that protect freedom. In order for women to vote and African Americans to eat at whatever restaurant they choose (*a positive freedom*), others who desired to restrict these activities had to be restrained (*a negative freedom*). Once a particular negative freedom becomes a habit or norm, people tend to take it for granted that a given behavior by others is acceptable. The bottom line is that people _____. Freedom requires mutual agreement to a set of conditions that basically involve taking turns. Freedom — like *separate, different, and individual* — has little meaning without others.

* solidarity: 연대 ** in tandem with: ~과 함께

- ① cannot escape the control of authority
- ② find true freedom in complete isolation
- ③ are not simply free to do as they please
- ④ must sacrifice comfort to achieve excellence
- ⑤ should follow personal desires to be truly free

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The claim that there are basic needs that are inherent and universal features of the psyche requires, first and foremost, evidence of the generalizability of those needs across individuals and cultures. It does not, however, depend on the claim that all individuals or cultural groups will equally value, satisfy, or recognize needs or that all individuals are equally well equipped to attain need fulfillments. The vehicles through which psychological needs are expressed and satisfied differ at different ages and in different cultures and societies, and yet across these contextualizing variables _____. This conceptualization has been supported in various ways. For example, recently Chen, Vansteenkiste, and their colleagues measured basic need satisfactions and need frustrations in multiple cultures, as well as differences in desires for these satisfactions. As expected, they demonstrated that the need variables predict important wellness outcomes across cultures. More relevant here was that they also showed that desires for these need satisfactions did not moderate these relations with wellness; desired or not, need satisfactions mattered.

* psyche: 마음 ** moderate: 완화하다

- ① their functional necessity is unchanging
- ② individuals fulfill needs in the same way
- ③ there is little need to express basic needs
- ④ desires are valued more highly than fulfillment
- ⑤ meaning is consistently influenced by individual beliefs

The use of social media can be very powerful in the pursuit of a healthy lifestyle and holds special opportunities for health promotion leaders and organizations. ① Progressive health promotion organizations have recognized the value in maintaining a presence on social media because an increasing number of individuals use social media as a primary form of communication. ② Organizations use these media to attract new clients, disseminate information in a timely manner, and inspire clients and the public with messages of encouragement, praise, and recognition. ③ Social media is also used as an excellent tool to connect individuals with each other based on common characteristics such as shared health challenges, activity preferences, geographic locations, and so on. ④ Some social media platforms have been criticized for allowing the advertisement of unproven medical treatments and contributing to the spread of health-related misinformation. ⑤ The use of tools that help to connect people holds special value because we understand the benefit of positive personal relationships and the feeling of belonging to like-minded groups of people striving to develop and maintain healthy lifestyles.

* disseminate: 전파하다

Even a seemingly simple protocol such as greeting someone is coded socially. It is shaped by appropriate words, phrases, and nonverbal cues that will enable a speaker to make successful social contact with another speaker.

- (A) These frames are coded socially — they constitute ways of relating to others and to oneself. The information exchanged in that one protocol, therefore, goes well beyond a greeting. As this example shows in microcosm, social codes derive from traditions and are taught via rearing practices.
- (B) Consider, for the sake of argument, a simple greeting protocol such as “Hi!” As such, it reveals the kind of coded behavior that is relevant in the society in which it occurs, since there are other societies in which silence or a simple nod of the head may be more appropriate as a protocol.
- (C) Also, the shortened word rather than the full word “Hello!” implies a social relation of a specific kind (informal) between the interlocutors, implying as well that they are involved in similar life schemes, which impel them to make contact in this ritualistic way. Unconscious factors such as these are imprinted in that one simple protocol, thus connecting it to larger frames of meaning and interaction.

* microcosm: 축소판 ** interlocutor: 대화자 *** impel: 해야만 하게 하다

- ① (A) - (C) - (B)
 ③ (B) - (C) - (A)
 ⑤ (C) - (B) - (A)

- ② (B) - (A) - (C)
 ④ (C) - (A) - (B)

The phrase “I have nothing to hide” has become popular in discussions about social media companies that collect all of the personal data they can get their hands on. You might hear it from users who prefer to pay with their data, not with their money.

- (A) Tech companies don't care whether or not you have something to hide. Rather, because you don't spend any money for their services, they have to employ psychological tricks to get you to spend as much time as possible on their apps.
- (B) You are not the customer; the customers are the advertisers who pay tech companies to grab your attention. Many of us have become glued to our smartphones, find hardly any time for anything else, and eagerly await another dopamine shot via each new 'like'.
- (C) And the phrase could well hold true for those of us who live uneventful lives without any serious health issues, have never made any potential enemies, and wouldn't speak up on civil rights denied by a government. Yet the issue is not about hiding or the freedom to post pictures of adorable kittens at no cost.

* adorable: 사랑스러운

- ① (A) - (C) - (B)
 ③ (B) - (C) - (A)
 ⑤ (C) - (B) - (A)

- ② (B) - (A) - (C)
 ④ (C) - (A) - (B)

Given that sport fans feel successful when their team is successful, the reverse occurs when they must deal with the disappointment of scandals and poor team performances.

Sport fans can develop a psychological attachment to sports, teams, and players. This connection can assist fans to develop a feeling of being strong, important, and successful. (①) The term vicarious achievement refers to a sense of accomplishment that is felt secondhand, through the success of someone else. (②) Some fans may experience an increase in self-esteem when their team is winning. (③) Others may feel a sense of confidence and skillfulness by learning team statistics and club history. (④) In these situations, fans may be a little less eager to publicly announce their support of the team, and they might even downplay the failure of the team. (⑤) Fans can compensate for a team's poor performance by developing strong feelings of closeness with fellow fans, being critical of other successful teams, voicing criticism of umpiring or refereeing decisions, or by being blindly optimistic that things will get better.

* vicarious: 대리의 ** downplay: 대단치 않게 생각하다

As you mentally tune back in to what your instructor is saying, you might still be able to mentally “hear” the words that the instructor said within the preceding two or three seconds.

As we go through life, our brains seem to create a very temporary record of much or all of what we sense in our immediate environment. (①) They do so through several sense-specific areas of the brain that might collectively be called *a sensory register*. (②) For example, if you have ever played with a lighted sparkler on a festive holiday evening — as many people in the United States do on July 4th — then you've undoubtedly noticed the tail of light that follows the sparkler as you swish it about. (③) That tail of light isn't “out there” in your environment; instead, this is your sensory register at work, telling you where the light has very recently been. (④) And think about what happens when you find yourself daydreaming during a classroom lecture. (⑤) As is true for the sparkler's tail, those words aren't lingering in the air around you; they're in your head — more specifically, in your sensory register.

* swish: 빠르게 휘젓다 ** linger: 남다

The children of genius parents are probably going to be less intelligent than their moms and dads. A week of record-breaking heat or cold is likely to be followed by milder weather. These facts follow directly from the nature of numbers, but people do not appreciate the statistical basis and instead tend to formulate special causal explanations. During a dry spell, if you do a rain dance every day, sooner or later the rain will come — and you may be tempted to think that your rain dance did the trick. (The illusion works especially well if you change your rain dance a bit each day, when it didn't work, so that when it finally rains, you think, *At last, I got it right!*) Medicine and psychotherapy thrive on regression to the mean. Whenever you feel bad, the odds are that you will feel better in a few days, and if you visit a physician in the interim, you will probably give her credit for your improvement. (And the doctor probably will be willing to accept your gratitude!)

* thrive: 번성하다 ** regression: 회귀 *** interim: 사이, 중간 기간

People often _____ (A) _____ natural changes to specific actions or treatments, failing to recognize that events and situations frequently return to normal on their own without any real _____ (B) _____ intervention.

- | | (A) | | (B) |
|---|-----------|-------|----------|
| ① | compare | | causal |
| ② | confine | | physical |
| ③ | attribute | | causal |
| ④ | compare | | moral |
| ⑤ | attribute | | moral |

Typically, hyperinflation begins because the authorities don't have enough money to respond to an unusual situation — say, to pay for a war, or keep paying civil servants' salaries during a social and economic upheaval that makes it hard to collect enough taxes — so they see no option but to print money and keep on printing. The trouble is that while governments can (a) create money out of thin air, getting people to accept the money as payment for their services is another matter altogether. As the printing presses churn out more and more money with no end in sight, the amount of cash chasing any particular product on the shelf will rise and rise. So will prices, inevitably, and then a (b) self-reinforcing spiral sets in: people naturally expect prices to increase further and further, so they demand ever-higher wages. Pretty soon, the situation is out of control. Not only do prices keep rising, but the rate at which they keep rising is also going up — inflation (c) accelerates.

In principle, certainly, a similar “wage-price spiral” can take hold at moderate levels of inflation in an economy that hasn't just experienced a hugely stressful event such as a war or a revolution. But history shows that it doesn't tend to happen. Some wealthy countries experienced what looks like a wage-price spiral in the 1970s, in which a combination of oil price increases and (d) relaxed monetary policy led to annual inflation in double digits, sometimes even more than 20 percent. But 20 percent annual inflation isn't 50 percent monthly inflation, which is the widely accepted official indicator of a state of hyperinflation in economics. It's not even close. And in the end, central banks did (e) fail to prevent this spiral from turning into hyperinflation.

* upheaval: 격변 ** churn out: 대량 생산하다 *** spiral: 악순환

(A)

Emily baby-sits for a little seven-year-old named Stephanie Brown who just loves Sparkle — a popular series with toys, cards, and even a movie. It seems to be the most important thing in her life: Sparkle cards, toys, dolls, videos, backpack — you name it, (a) she has it. Or wants it. Sparkle. Sparkle. Sparkle. Everything is Sparkle! Emily feels like Stephanie must be the biggest Sparkle lover she's ever met. Her room is packed with Sparkle things, from posters on the walls to piles of toys and stuffed animals everywhere.

(B)

Finally, her parents said okay and told Stephanie she could take a friend with her. Stephanie said she wanted to take Emily. “Emily?” they asked, surprised. “Don’t (b) you want to ask a friend from your class?” “No,” the little girl insisted. “I want Emily to go. She loves Sparkle even more than I do, even more than any of my friends at school, and I want to make sure (c) she can see the Sparkle movie. She’s intense about Sparkle.”

(C)

When Emily heard this, she thought it was so cute. But it also made her realize how much her simple gesture of listening and paying attention to the young girl had meant to her. Stephanie was adamant that Emily *needed* to see this movie. Emily’s listening to her interest in Sparkle convinced her that Emily must be as big a Sparkle fan as she was, and so (d) she wanted to make very certain Emily didn’t miss out on it. Now that’s a friend — always looking out for you, always making sure that your needs are met, too.

* adamant: 완강한

(D)

The moment Emily comes over, Stephanie drags out all her Sparkle paraphernalia and shows them to her, explaining what’s new. Emily is hired to care for (e) her, so of course, she listens carefully to her serious interest in the *Sparkle* hero — and her plans for acquiring even more Sparkle stuff. Last week, when the Sparkle movie came out, Stephanie nearly drove her parents crazy about wanting to see it. She talked about it nonstop, bringing it up at every meal and every car ride.

* paraphernalia: 용품, 비품
