3. 밑줄 친 touch other people이 다음 글에서 의미하는 바로 가장 적절한 것은?

So the next time you see a challenge, a tough situation, think like a teabag and dive headlong into it. It may be the opportunity you've been waiting for to show what you are capable of. Some of us are so scared of being scalded by the hot water that we stay away from it. The fear of failure. Don't let that happen to you! Give yourself a chance to show the world what you are really all about!

Imagine you have the best tea in the world and you put it into a bag that's impermeable. It won't work. You just won't be able to make a cup of tea. For the teabag to work, it needs to be porous. You need the tea and the water to come in contact with each other. In our lives too, we cannot survive and thrive in isolation. Leaders need to be careful not to build walls around themselves that prevent people from reaching out to them. As a leader, you need to be able to touch other people. The tea was meant to mix with the water. Similarly all of us were designed to work with other people, with teams, and with society at large.

Teabags work, never mind where they are in the cup. Once you dip a teabag in a cup, it doesn't matter where the teabag sits. It could be at the top, on the side or right at the bottom, it will still work. The teabag's efficacy is not linked to its position in the cup.

4. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Secondly, there are those needs which, though natural, are not necessary, such as the gratification of certain of the senses. I may add, however, that in the report given by Diogenes Laertius, Epicurus does not mention which of the senses he means: so that

on this point my account of his doctrine is somewhat more definite and exact than the original. These are needs rather more difficult to satisfy. The third class consists of needs which are neither natural nor necessary, the need of luxury and prodigality, show and splendor, which never come to an end, and are very hard to satisfy.

It is difficult, if not impossible, to define the limits which reason should impose on the desire for wealth; for there is no absolute or definite amount of wealth which will satisfy a man. The amount is always relative, that is to say, just so much as will maintain the proportion between what he wants and what he gets; for to measure a man's happiness only by what he gets, and not also by what he expects to get, is as pointless as to try and express a fraction which shall have a numerator but no denominator. A man never feels the loss of things which it never occurs to him to ask for; he is just as happy without them; whilst another, who may have a hundred times as much, feels miserable because he has not got the one thing he wants. In fact,

If an object within his horizon looks as though he could confidently reckon on getting it, he is happy; but if difficulties come in the way, he is miserable. What lies beyond his horizon has no effect at all upon him. So it is that the vast possessions of the rich do not agitate the poor, and conversely, that a wealthy man is not consoled by all his wealth for the failure of his hopes. Riches, one may say, are like sea-water; the more you drink the thirstier you become; and the same is true of fame. The loss of wealth and prosperity leaves a man, as soon as the first pangs of grief are over, in very much the same habitual temper as before; and the reason of this is, that as soon as fate diminishes the amount of his possessions, he himself immediately reduces the amount of his claims.

5. 밑줄 친 nature possesses its own dining establishments가 다음 글에서 의미하는 바로 가장 적절한 것은?

Restaurants employ carefully chosen words, aiming to create vivid mental images of delectable food and desserts to draw prospective customers to their specific locations. In a similar fashion, nature possesses its own dining establishments. Just as restaurants have a financial dependence on attracting numerous patrons, the natural world's restaurateurs—which are flowers—must also persuade potential diners to sample their offerings. In the world of nature, no neon signs or catchy phrases exist to market a potential meal to hungry animals. These establishments that I am referring to are the planet's flowers, and their potential guests consist of a host of organisms that visit them to obtain nectar and other valuable resources. Rather than using written language, they effectively promote their provisions through the language of scent.

- ① Nature has ecosystems where various animals live
- ② Nature has places like restaurants in the form of flowers
- ③ Nature has more attractive places than human-made restaurants
- ④ Nature has special spaces where animals store food
- ⑤ Nature has food sources that change according to seasons

6. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Would you rather receive \$1,000 in a year, or \$1,100 in a year and a month? Most people will opt for the larger sum in thirteen months, since a monthly interest rate of 10 percent is a rare find. It is a wise choice, as the interest will generously compensate you for any risks faced by waiting the extra few weeks. Now for a second question: would you prefer \$1,000 in cash right now or \$1,100 in one month? If you are like most people, you will take the \$1,000 immediately. This outcome is quite amazing. In both scenarios, an extra \$100 is gained by holding out for just one more month. The logic in the first instance is simple enough: one might reason, "I've already waited a year, what is one more month?" This is not so in the second case. ----- This

phenomenon is known as hyperbolic discounting. The closer a reward is, the higher our "emotional interest rate" climbs, and the more we become willing to give up in exchange for it.

- ① The introduction of "now" is what causes us to make inconsistent decisions
- ② People tend to overestimate the value of immediate rewards over delayed ones
- ③ Our rational thinking becomes impaired when money is involved in decision-making
- ④ The concept of time becomes irrelevant when faced with immediate gratification
- ⑤ Emotional responses override logical calculations in financial situations

7. 다음 글의 내용과 일치하는 것은?

Of central importance for comprehending the development of handedness is the answer to when it is actually determined whether a child will favor their left or right hand. For a long time, the prevailing belief was that handedness could only be reliably identified in elementary school when a child learns to write; however, this assumption is incorrect. Indeed, scientific research reveals that handedness is established in many children well before grade school—interestingly, for most people, this occurs even before birth. Such studies involve recording the hand and arm movements of unborn children in the womb, using ultrasound images to do so. This method has shown that a clear preference for the movement of the right arm exists as early as 10 weeks after conception. In one such study, ultrasound images of 72 fetuses 10 weeks after fertilization were evaluated, revealing that 85% demonstrated more movements of the right arm than the left. This figure is already very close to the approximately 89.4% of adults who are right-handed.

- ① Handedness is determined when children learn to write in elementary school.
- ② Hand and arm movements of fetuses are recorded through X-ray imaging.
- ③ 85% of fetuses at 10 weeks after conception showed more left arm movements.
- ④ Approximately 89.4% of adults are found to be right-handed.
- ⑤ A study of 72 fetuses revealed handedness at 8 weeks after fertilization.

The provided graph illustrates the value of US dairy product imports for four selected nations between 2018 and 2020. Of the four nations shown, the volume of US dairy products imported by Mexico was consistently the highest throughout the 2018-2020 period. However, imports to Mexico decreased between 2019 and 2020, while the opposite trend occurred in the other three countries over the same timeframe. The 2020 import figures for Indonesia were particularly noteworthy, being more than twice the amount from 2018. Regarding the 2018-2019 period, the increase in imports seen in the Philippines was smaller than that of Indonesia. Between 2018 and 2019, the sole nation where the value of these imports actually dropped was China.

- ① 멕시코의 미국 유제품 수입량은 2018년부터 2020년까지 지속적으로 가장 높았다.
- ② 2019년과 2020년 사이에 멕시코를 제외한 세 나라의 수입량은 증가했다.
- ③ 인도네시아의 2020년 수입량은 2018년보다 두 배 이상 증가했다.
- ④ 2018년부터 2019년 사이에 필리핀의 수입 증가량은 인도네시아보다 적었다.
- ⑤ 2018년부터 2019년 사이에 중국에서만 수입량이 감소했다.

The founding father of Renaissance architecture is widely considered to be Filippo Brunelleschi. Born in Florence in 1377, the artistically gifted Filippo trained as a goldsmith and clockmaker before he pursued a career as an architect. With his friend, the sculptor Donatello, he journeyed to Rome at about age 25, a city where he could study the ruins of ancient Roman structures. His initial architectural commission was the Ospedale degli Innocenti, an edifice which is one of the

great Renaissance buildings. His creation of several other fine works, such as chapels in the churches of Florence, further strengthened his growing reputation. In addition, he engineered machinery specifically designed to produce special effects for stage performances. Upon his death in Florence, he was buried within Il Duomo, the site of his masterpiece.

- ① the influence of ancient Roman architecture on Renaissance buildings
- ② Filippo Brunelleschi's life and achievements as a Renaissance architect
- ③ the development of architectural techniques during the Renaissance period
- ④ the collaborative relationship between architects and sculptors in Florence
- ⑤ the role of Florence in promoting Renaissance architectural innovations

This simple method helps you trace the main outlines of your reference image onto a sheet of paper. First print out your reference at the size you plan to draw it. You can find an image online, or you can use one of the paintings in this book. Then place a sheet of tracing paper over the printout, and trace the outlines. Coat the back of the tracing paper with an even layer of graphite, and place it over a sheet of drawing paper, graphite-side down. (Instead of coating the back of the tracing paper, you can use transfer paper, which already has one side coated with graphite.) Tape or hold the papers together, and lightly trace your outlines with a pencil. The lines of your tracing paper will transfer to the drawing paper below.

Perspective is a technique that allows you to represent three-dimensional objects on a flat surface or plane.

In art, there are a number of ways to use perspective to obtain the illusion of depth, including using colors and graduated values of black and white, and accurately drawing the subject by applying the rules of the geometric system of perspective. In order to achieve perspective, you must make a number of observations. The forms or objects that you draw on a flat surface actually have depth and dimension in real life. As you view them and place their shapes and forms on a drawing surface, try to

represent that depth to make the objects appear realistic and three-dimensional. Objects appear differently when viewed from various positions. Because of this, it's important to establish the viewpoint, and stick with it. When observing a subject, you see depth and three dimensions. When you draw this subject onto a flat surface as it appears to the eye, you are drawing in perspective.

The "keyhole" sketching method will help you draw an object in front of you. Place the object that you want to paint or draw on a sheet of paper. Then choose the angle that you want to view the object from, such as directly in front of you or from the side.

[지문출처: *The Art of 3D Drawing: An Illustrated and Photographic Guide to Creating Art with Three-dimensional Realism* (Stefan Pabst)]

11. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

This, of course, is an everyday thing that's taken for granted by consumers. We expect our products and services to get better and cheaper, at least after the initial period of mass market adoption. If they can't be cheaper, they need to be at least better in terms of quality. This has happened for computers, high-definition televisions, and a host of other electronic products. The prices of many commodities and raw materials are also lower in the long trend (except for oil, which is subject to geopolitical meddling and cartel-ruled decisions). But this can only happen in an economy driven by improving productivity and better technology, so that it is constantly able to produce more and better goods and services. Again, this illustrates the singular importance of the supply side of an economy regarding its growth.

The recent drop in oil prices is a good example to highlight. While there was palpable apprehension of

the crashing oil shares, economically, there wasn't much reason to fret over lower prices.

Low oil prices are a good thing, because it means lower energy costs of production for the majority of industries, not least the automobile and the logistics industries. Firms directly benefit from the decrease in their costs of production and provision of services, ①which has the effect of stimulating the aggregate supply and provides a stimulus for growth. Conversely, a sudden rise in oil prices due to a shrink in oil production is never good news, even though it definitely gives a big boost to the energy sector. A look through the history of oil price fluctuations proves this notion, ②what has been the subject of much economic research. ③Following an oil price jump of 10 per cent due to a contraction in supply, an economy (as typified by the US economy) typically sees its output (GDP) ④slowing by close to 1 percentage point. For a \$15 trillion economy, that is a loss of \$150 billion in potential wealth or economic growth, ⑤representing a significant impact on the overall economy.

Throughout history, there are numerous examples of major increases in supply, most often led by technological advances, giving a kick to productivity and leading to increases in income and living standards. It is important to stress that the concept of supply here adopts a very wide interpretation. It refers to the provision of every kind of good and service, including the services of healthcare and education, and comprises both quantity and quality. Essentially, progress in the medical sciences, improvement in healthcare services, and better education can all be considered in some measure to be increases in the aggregate supply. The essential point is that there needs to be a supply of something, either a good or service, for there to be an improvement in economic and social well-being of an individual or a collective society, most often (but not necessarily always) symbolised by a rise in income.

14. 다음 글의 요지로 가장 적절한 것은?

But recent generations of sea turtles have been making some awesome errors in their decision making. When presented with the option of crawling either toward the ocean or away from the water onto asphalt full of oncoming eighteen-wheelers, thousands of turtles have been choosing the latter, fatally irrational option.

A Florida man was recently inspired to find a cure for this new wave of chelonian self-destructiveness. A news article titled "Fort Lauderdale Saves Turtles from Suicide" explains his radical solution for reducing turtle decision errors: turning off the distracting lights.

Turtle hatchlings have, it seems, evolved to crawl toward the light. For millions of years this was a highly rational and effective strategy because the light on a dark beach represented the reflection of the moon and stars on the water's surface. Following the lights led baby turtles back home to the sea. The problems started when humans began building beachfront homes and sparkling hotels on the other side of the beach. Now after hatching, turtles heading for the brightest nearby lights were being guided straight into traffic. Are self-destructive sea turtles naturally irrational? Yes, in the modern world. But there's a deeper truth. Turtles are basing their decisions on simple cues that were perfectly rational for their ancestors: these days, however, their evolved decision-making mechanisms are being blinded by modern lights.

Modern humans have something in common with suicidal turtles. We too have deeply rational decision-making mechanisms, and our machinery is also sometimes blinded by features of the modern world.

Behavioral economists and psychologists studying judgment and decision making have constructed a hilarious house of errors, often showing with great fanfare that humans are like suicidal turtles. Step right up, folks, and see the amazing Stupidman! Just pay your \$20 and look in the mirror! And for a mere \$50, you can look twice!

[지문출처: *The Rational Animal: How Evolution Made Us Smarter Than We Think* (Douglas T Kenrick, Vlaslas Griskevicius)]

- ① Sea turtles' evolutionary behavioral patterns have become dangerous due to modern environmental changes.
- ② Animals' instinctive behaviors are always rational regardless of their environment.

- ③ Human coastal development has completely destroyed sea turtles' natural habitats.
- ④ Baby sea turtles have an inherent tendency to make irrational decisions.
- ⑤ New wildlife protection measures should be sought due to the development of modern technology.

15. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

The initial response of a sensory receptor to a stimulus is to change its cell membrane permeability to ions—how many ions it lets through. In other words, in response to an appropriate stimulus, transport pathways for specific ions open and/or close, depending on the type of stimulus and receptor.

Sensory organs are the only channels of communication between the brain and the outside world. Simply put, the brain is not designed to sense on its own. For instance, an exposed brain would neither sense light shining on it nor feel something touching it. In fact, patients are often kept ①awake during brain surgery, which can help a surgeon isolate specific regions of the brain. The ancient Greek philosopher Aristotle recognized this characteristic of the brain over 2,000 years ago when he said, "Nothing is in the mind that does not pass through the senses." This concept can be seen clearly when volunteers are blind-folded and placed in the warm water of a sensory ②deprivation tank. They soon experience visual, auditory, and tactile (touch) hallucinations, as well as ③coherent thought patterns. From these experiments and others, it is apparent that we need ④constant input from our senses to carry out functions that give us ⑤personality and intellect.

This, in turn, influences the movement of a charge across the cell membrane, resulting in a graded change in the membrane potential (voltage), which is called a receptor potential. The magnitude of a receptor potential is directly related to how strong the stimulus is. If a receptor potential is large enough, it may result in a conscious sensation by the brain (that is, a conscious awareness of the stimulus). However, much of the sensory information that goes to the central nervous system is filtered out by specific parts of the brain: as a result, no sensation is perceived for many stimuli. This is important because the brain would otherwise be

overloaded with too many signals to sort through. For instance, we usually are not aware of our muscle tension or blood pH levels. We also have the ability to listen to a friend in a noisy restaurant, while simultaneously "tuning out" the myriad other conversations and sounds around us.

According to the writer and zoologist Desmond Morris, it has been observed that our feet convey exactly what we think and feel more honestly than any other bodily part. What makes our feet and legs such truthful reflectors of our emotions? Reacting to environmental threats like hot sand or aggressive lions, our legs and feet responded instantaneously for millions of years, long before the advent of human speech, all without requiring any conscious thought. Our limbic brains ensured our feet and legs responded appropriately, whether by ceasing movement, fleeing, or striking at a possible danger. This survival mechanism, a legacy from our ancestral heritage, has proven effective for us and remains so even now. Indeed, these ancient responses are so deeply embedded within us that upon being presented with a situation that is perilous or even disagreeable, our feet and legs respond just as they did during prehistoric times.

- ① the evolutionary development of human communication abilities
- ② the role of feet and legs as honest emotional indicators
- ③ the importance of conscious control over bodily responses
- ④ the difference between ancient and modern survival strategies
- ⑤ the influence of environmental factors on human behavior

17. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?

The black-and-white photo of my dad started out as a white piece of paper coated in a fine gel containing silver bromide and silver chloride molecules. In 1939, when the light bouncing off my dad entered the camera lens and fell onto the photographic paper, it transformed the silver bromide and chloride molecules into little crystals of silver metal, which appear as specks of gray on the paper. If the paper had been removed from the camera at this point, the image of my dad would have been lost. This is because all the white areas where there was no image would be flooded with light, causing them instantly to react as well and creating a completely black photo. To prevent this, the photo was "fixed" in a darkroom with a chemical that washed away the unreacted silver halides from the paper. This left only the silver crystals embedded in the layer of gel on the surface of the paper. Once dried and processed it was the image of my dad that enabled him, rather than some other boy, to escape the concentration camps.

My dad is still here to tell the tale, but one day there will only be the photograph to remind us of this moment in time—a material fact of history that contributes to our collective memory. Of course, photographs are not really unbiased, but then neither are memories.

The transition from an oral culture, in which knowledge was handed down through stories, songs, and apprenticeships, to a literate one, based on the written word, was held back for centuries by the lack of suitable writing material. Stone and clay tablets were used, but they were prone to fracture and were bulky and heavy to transport. Wood suffers from splitting and is susceptible to decay. Wall paintings are static and space is limited. The invention of paper, said to be one of the four great inventions of the Chinese, solved these problems, but it wasn't until the Romans replaced the scroll with the codex – or, as we call it now, the book – that the material reached its full potential. That was two thousand years ago, and it is still a dominant form of the written word. That paper, _____, won out as the guardian of the written word is a remarkable materials story.

It is the thinness of paper that proves to be one of its great advantages, allowing it the flexibility to survive continuous handling, but when stacked together in book form becoming stiff and strong—essentially a reformed block of wood. With the use of hard covers to hold it all together, the book is a fortress for words for thousands of years.

The genius of this so-called codex format—a stack of papers bound to a single spine and sandwiched between covers—and the reason why it usurped the scroll, is that it allows for text on both sides of the paper and yet still provides a continuous reading experience. Other cultures achieved something similar with the concertina format—forming a stack by repeatedly folding one continuous sheet of paper in on itself—but the advantage of the codex, with its individual pages, is that many scribes could work on the same book at the same time, and after the invention of the printing press many copies of the same book could be created at the same time. As biology had already discovered, the speedy copying of information is the most effective way of preserving it.

18. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

It is highly unlikely for a conclusion's justification to be a single assertion. Analytically, it represents a complex web of many ideas and implications, no matter how we might concisely state it. The justification needs to be broken down into a sequence of more precise logical steps. For instance, the argument that 'university education ought to be free for all Australians' could be supported by the rationale that 'a well-educated Australian populace benefits the economy'. However, is our understanding of the matter truly expressed with clarity in a lone statement? It is scarcely the case. The conclusion focuses on universities and no-cost education, whereas the justification brings in new concepts: economic advantage and an educated populace. While the link between these concepts and the conclusion might _____ appear _____ obvious, _____ This is achieved by meticulously working through the connections among the different ideas present in our initial justification.

- ① the aim of reasoning is to avoid assuming what is 'obvious'
- ② logical connections should be established through evidence
- ③ complex arguments require multiple supporting statements
- ④ conclusions must be supported by relevant and clear premises
- ⑤ reasoning processes should eliminate all subjective interpretations

[연계문항 2025년 6월 교육청(고2) 38번]

19. 다음 글을 읽고 답할 수 없는 질문은?

As international migration has increased in recent decades, the pluralism of Southeast Asia's past has been largely forgotten. Migrants are considered to be permanent outsiders with little chance for citizenship and belonging. These ideas—reinforced with harsh policies that restrict mobility, forbid family reunification among immigrant workers, and even use pregnancy as a reason for expulsion—do little to encourage public tolerance or integration.

The word "migration" is almost always reported in the popular media and even in scientific literature as a problem or a crisis. For example, migrants are assumed to overcrowd cities, clog up labor markets, and increase poverty. The other questionable assumption is that most migration is involuntary—people fleeing natural or man-made disasters. The reality, however, is more complex, and many migrants are simply seeking greater economic opportunity. Of course migration can and does create social and economic problems. But migration can also be a solution for many preexisting problems. For example, out-migration generally redistributes workers from places of labor surplus to areas where there is greater demand or more opportunity. Migration is generally selective of persons who are younger, healthier, more flexible, and more willing to endure hardship in hopes of a better life relative to their prospects in their places of origin. Most research that examines long-term outcomes of migration, including remittances and intergenerational mobility, finds positive "long-term" effects on places of origin and destination.

Along with much of the world, Southeast Asia is currently experiencing increasing levels of migration—both domestic and international. The first step toward understanding an important issue is careful measurement of its dimensions: magnitudes, patterns,

and trends. Our analysis in tables 7.2 to 7.4 is a rudimentary description of recent trends in international migration to and from Southeast Asian countries. Basic description can, however, set the stage for more in-depth research. One of the most striking findings of this chapter is that emigration is more pervasive in Southeast Asia than immigration. Even for the countries experiencing high levels of immigration, emigration is also very high. Rapid economic growth appears to be highly correlated with above-average levels of immigration. It also seems that demography, economic stagnation, and political unrest are the primary factors that determine emigration.

[지문출처: Understanding Global Migration (Stanford University Press 출판사)]

20. 글의 빈칸에 들어갈 말로 가장 적절한 것은?

None of this is hard to understand. Complications and confusion come in when we start thinking about such mystical and fallacious things as the "intrinsic value" of money or believe that gold somehow "backs up" our money or in some mysterious way gives it value.

For much of history, gold has been used as money by many countries. Sometimes the gold was used directly in coins or (for large purchases) in nuggets, gold bars or other forms. Even more convenient for carrying around were pieces of paper money printed by the government that were redeemable in gold whenever you wanted it redeemed. It was not only more convenient to carry around paper money, it was also safer than carrying large sums of money as metal that jingled in your pockets or was conspicuous in bags, attracting the attention of criminals.

The big problem with money created by the government is that those who run the government

always face the temptation to create more money and spend it. Whether among ancient kings or modern politicians, this has happened again and again over the centuries, leading to inflation and the many economic and social problems that follow from inflation. For this reason, many countries have preferred using gold, silver, or some other material that is inherently limited in supply, as money. ----- Gold has long been considered ideal for this purpose, since the supply of gold in the world usually cannot be increased rapidly. When paper money is convertible into gold whenever the individual chooses to do so, then the money is said to be "backed up" by gold. This expression is misleading only if we imagine that the value of the gold is somehow transferred to the paper money, when in fact the real point is that the gold simply limits the amount of paper money that can be issued.

The American dollar was once redeemable in gold on demand, but that was ended back in 1933. Since then, the United States has simply had paper money, limited in supply only by what officials thought they could or could not get away with politically. To give some idea of the cumulative effects of inflation, a one-hundred-dollar bill would buy less in 1998 than a twenty-dollar bill bought in the 1960s. Among other things, this means that people who saved money in the 1960s had four-fifths of its value silently stolen from them over the next three decades. Sobering as such inflation may be in the United States, it pales alongside levels of inflation reached in some other countries. "Double-digit inflation" during a given year in the United States creates political alarms, but various countries in Latin America and Eastern Europe have had periods when the annual rate of inflation was in four digits.

[지문출처: Basic Economics: A Common Sense Guide to the Economy (Thomas Sowell)]

- ① It is a way of depriving governments of the power to expand the money supply to inflationary levels
- ② It ensures that the intrinsic value of money remains stable regardless of economic conditions
- ③ It allows governments to maintain better control over their national economic policies
- ④ It provides citizens with more confidence in their government's financial management
- ⑤ It creates a more flexible monetary system that can adapt to changing economic needs

21. 밑줄 친 This contradicts the assumptions of conventional economics가 다음 글에서 의미하는 바로 가장 적절한 것은?

In System 2, decision making tends to be thoughtful and deliberative, involving much more effort and time than System 1-related decision making. System 2 behavior also tends to be more flexible and therefore more subject to change-not hardwired. Kahneman argues that System 1 behavior can be more efficient in certain circumstances, but is more subject to systematic errors and biases. System 2 behavior is more efficient in other circumstances. And because System 2 behavior is deliberative and flexible, it is less subject to systematic errors and biases. So, an important aspect of this type of categorization of decision-making behavior is to determine which system works best and when, where, and for whom. Also of importance is the determination of the extent to which System 1 behavior is flexible in the longer term and the extent to which System 2 behavior is subject to errors and biases and, itself, is inflexible. The latter could occur, for example, when System 2 decision making is built upon deliberative but biased behavior and inaccurate mental models of how particular decisions affect outcomes. This approach to the categorization of decision making ties into the strand of behavioral economic research related to developing a better understanding how people make decisions in the real world and why and when decisions are effective and when they are not.

The study of emotions and decision making is now of considerable importance. This involves the application of various tools afforded by neuroscience. One important stream of the literature examines people with brain damage and how damage to particular parts of the brain known to be responsible for particular cognitive functions impacts on decision making. One example of this research is the work of Antonio Damasio, who finds that when the emotional part of the brain is damaged, this actually reduces the efficacy of decision making. Good decisions are a product of the emotional part of the brain working in conjunction with the deliberative part. This contradicts the assumptions of conventional economics, where emotions play a negative role in the decision-making process. Here it is assumed that decision making can be modeled as being generated in a stoic, unemotional fashion, and that's why decisions tend to be optimal. But the evidence suggests that emotions actually play an important and, often, a positive role in decision making.

Another stand of neuroscience examines the

importance of the chemistry of the brain and how this impacts on decisions and on the extent of good or bad behavior. An example of this research is work on the "moral molecule" by Paul Zak and colleagues. Here it is argued that an important determinant of morality is the extent to which higher or lower levels of the chemical oxytocin characterize an individual. This has given rise to more literature on the interplay between the chemistry of the brain and social and economic factors as determinants of decision making. There is also the important question of whether it is normative and institutionally affected behavior that causes critical levels of oxytocin, with oxytocin being an outcome rather than a cause.

[지문출처: Real-World Decision Making: An Encyclopedia of Behavioral Economics (Bloomsbury Publishing 출판사)]

- ① underestimating the negative impact of emotions on decision making
- ② differing from empirical research on the role of emotions
- ③ being incompatible with neuroscientific research methods
- ④ weakening the predictive power of economic models
- ⑤ requiring a balance between reason and emotion in decision processes

22. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?

Customers confronted with thirty distinct types of premium chocolates are more prone to leaving without purchasing anything than when they are presented with merely six options. Employees receiving a complimentary Paris vacation feel satisfied. Similarly, those awarded a free Hawaiian getaway experience happiness. However, should you offer these individuals a selection between the two locations, their satisfaction diminishes regardless of what they select. What makes choice so disruptive? Choice compels individuals to make comparisons and recognize comparative disadvantages. Paris visitors complain that there are no beaches while Hawaii travelers miss the cultural institutions. This phenomenon, which psychologist Barry Schwartz terms the 'tyranny of choice,' paradoxically ----- According to his theory, wider options increase dissatisfaction since people fear making the wrong selection, causing anxiety while attempting to evaluate every comparison to ensure accuracy. This simultaneously increases our concern about poor choices and raises our expectations that optimal decisions should be achievable. After deciding, individuals begin experiencing regret, wondering if their selection was the appropriate one.

- ① enhances our ability to make rational decisions in complex situations
- ② constrains our decision-making process instead of liberating it
- ③ provides us with greater control over our personal preferences
- ④ simplifies the evaluation process by offering clearer alternatives
- ⑤ increases our confidence in the choices we ultimately make

23. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

As Linda arrived at a peaceful rural station, the train was surrounded by the soft murmur of travelers' conversations. After a two-year absence, Linda felt excited to reunite with her grandparents. She observed passengers getting onto the train and rushing to locate their seats. Soon afterward, a senior lady (A)----- with a bulky suitcase, trying to settle into the adjacent seat. Her petite frame made the luggage appear excessively large.

Being uncertain whether the senior lady would welcome assistance, Linda paused momentarily. Nevertheless, she decided to offer support shortly after. "Allow me to carry that suitcase for you," she offered. The senior lady unexpectedly collapsed, losing her footing before Linda could grab the luggage. She lay flat on her back, her complexion turned ashen. Linda remained motionless briefly, feeling the urgency of the circumstances. Several passengers hurried forward as she swiftly crouched near the fallen lady.

To verify if the senior lady was alright, Linda gently patted her shoulder. Making an effort to regain energy, the lady uttered weak sounds. Supporting the lady's back with one hand, Linda approached nearer. She (B)----- the lady quietly, "Everything's fine, take a minute to rest," while the lady's eyelids gradually parted. After assisting the lady to rise carefully, Linda guided her to the seat. Once the situation settled, surrounding passengers returned to their places.

Looking at Linda gratefully, the senior lady eventually relaxed. "Please forgive me," she explained. "The train's abrupt motion must have made me dizzy since I suffer from hypotension. I truly appreciate your assistance." Following a gentle acknowledgment, Linda shifted her attention toward the peaceful rural landscape. She realized that no matter how uncertain she might feel, providing even small assistance is far (C)----- than neglecting those requiring aid.

(A) (B) (C)

- ① struggled --- comforted --- better
- ② battled ----- criticized --- worse
- ③ fought ----- questioned --- easier
- ④ competed --- confronted --- harder
- ⑤ wrestled ---- praised ----- simpler

정답 및 해설

1	④	2	⑤	3	②	4	③	5	②
6	①	7	④	8	⑤	9	②	10	③
11	②	12	④	13	③	14	①	15	③
16	②	17	③	18	①	19	②	20	①
21	②	22	②	23	①				

1) [정답] ④

[해설] Ms. Lopez의 뛰어난 교수 능력과 학생들에게 미친 긍정적인 영향을 인정하며 계약 연장을 제안하는 내용의 글이다. 교장이 우수한 교사에게 높은 기준을 유지하지 말라고 말하는 것은 문맥상 적절하지 않으므로, ④의 discourage를 encourage와 같은 낱말로 바꿔야 한다.

[출제의도] 문맥상 적절한 어휘 파악하기

2) [정답] ⑤

[해설] 의사의 주사 치료 후 딸의 체온이 떨어지고 훨씬 편안해 보였다고 했으므로, 글의 내용과 일치하지 않는 것은 ⑤이다.

[출제의도] 글의 세부 내용 파악하기

3) [정답] ②

[해설] 차가 물과 접촉해야 제 기능을 할 수 있는 것처럼 리더도 고립되지 말고 다른 사람들과 소통하고 연결되어야 한다는 내용의 글이다. 차와 물의 접촉을 리더십에 비유한 맥락에서 밑줄 친 부분이 글에서 의미하는 바로 가장 적절한 것은 ② '다른 사람들과 감정적으로 연결되고 효과적으로 소통하기'이다. ① 회의 중에 팀원들과 물리적으로 상호작용하기 ③ 지도를 제공하면서 전문적 거리 유지하기 ④ 조직에서 명확한 위계적 관계 확립하기 ⑤ 전문적 경계를 넘어서 개인적 우정 발전시키기

[출제의도] 어구의 함축 의미 추론하기

4) [정답] ③

[해설] 부에 대한 욕구에 이성이 부과해야 할 한계를 정의하기는 어렵고, 사람을 만족시킬 절대적이거나 명확한 부의 양은 없으며, 그 양은 항상 상대적이라고 설명하는 글이다. 사람이 요구하지도 않는 것들의 상실은 느끼지 않지만, 백 배 더 많이 가진 다른 사람이라도 원하는 한 가지가 없으면 비참함을 느낀다고 했으므로, 빈칸에 들어갈 말로 가장 적절한 것은 ③ '물질적 만족은 개인의 관점과 기대에 달려 있다'이다. ① 모든 사람은 현재 소유한 것에 만족해야 한다 ② 부의 축적은 신중한 계획과 현명한 투자를 필요로 한다 ④ 재정적 성공은 다른 사람과 자신을 비교함으로써 측정된다 ⑤ 진정한 행복은 비물질적 가치를 감사하는 데서 온다

[출제의도] 빈칸 추론하기

5) [정답] ②

[해설] 식당이 고객을 유치하기 위해 신중하게 선택한 단어를 사용하는 것과 마찬가지로 자연계에도 자체적인 식당이 있다고 하면서, 자연계의 식당 경영자는 꽃이고 잠재적 손님은 꿀과 기타 귀중한 자원을 얻기 위해 꽃을 방문하는 다양한 유기체들이라고 설명하는 내용의 글이다. 따라서 밑줄 친 부분이 글에서 의미하는 바로 가장 적절한 것은 ② '자연에는 꽃의 형태로 식당과 같은 장소들이 있다'이다. ① 자연에는 다양한 동물들이 사는 생태계가 있다 ③ 자연에는 사람이 만든 식당보다 더 매력적인 장소들이 있다 ④ 자연에는 동물들이 음식을 저장하는 특별한 공간들이 있다 ⑤ 자연에는 계절에 따라 변하는 먹이 공급원들이 있다

[출제의도] 어구의 함축 의미 추론하기

6) [정답] ①

[해설] 1년 후 \$1,000과 13개월 후 \$1,100 중에서는 대부분 더 많은 금액을 선택하지만, 지금 당장 \$1,000과 한 달 후 \$1,100 중에서는 즉시 받을 수 있는 금액을 선택한다는 내용이다. 두 경우 모두 한 달 더 기다리면 \$100를 더 받을 수 있음에도 불구하고 상반된 선택을 하는 이유는 '지금 당장'이라는 개념의 도입 때문이라는 내용의 글이다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ① "'지금 당장'의 도입이 우리로 하여금 일관성 없는 결정을 내리게 하는 것이다'이다. ② 사람들은 지연된 보상보다 즉각적인 보상의 가치를 과대평가하는 경향이 있다 ③ 돈이 의사결정에 관련되면 우리의 합리적 사고가 손상된다 ④ 즉각적인 만족에 직면하면 시간의 개념이 무관해진다 ⑤ 금전적 상황에서 감정적 반응이 논리적 계산을 압도한다

[출제의도] 빈칸 추론하기

7) [정답] ④

[해설] 글의 마지막 부분에서 성인 중 약 89.4%가 오른손잡이라고 명시되어 있으므로, 글의 내용과 일치하는 것은 ④이다. ① 손잡이는 초등학교 이전, 심지어 출생 이전에 결정된다고 했다 ② 초음파 이미지를 사용한다고 했다 ③ 85%가 오른팔을 더 많이 움직였다고 했다 ⑤ 수정 후 10주라고 했다.

[출제의도] 글의 세부 내용 파악하기

8) [정답] ⑤

[해설] 글에서 2018년부터 2019년 사이에 수입량이 실제로 감소한 유일한 국가는 중국이었다고 했으므로, 글의 내용과 일치하지 않는 것은 ⑤이다. ① 멕시코의 미국 유제품 수입량은 2018-2020년 기간 내내 지속적으로 가장 높았다. ② 2019년과 2020년 사이에 멕시코를 제외한 나머지 세 나라에서는 반대 경향이 나타났다(즉, 증가했다). ③ 인도네시아의 2020년 수입 수치는 2018년 수치의 두 배 이상이었다. ④ 2018-2019년 기간 동안 필리핀에서 보인 수입 증가는 인도네시아보다 작았다.

[출제의도] 글의 세부 내용 파악하기

9) [정답] ②

[해설] 르네상스 건축의 아버지로 여겨지는 Filippo Brunelleschi의 출생, 초기 훈련, 로마 여행, 주요 건축 작품들, 그리고 죽음에 이르기까지 그의 생애와 건축가로서의 업적을 전반적으로 다룬 글이다. 따라서 글의 주제로 가장 적절한 것은 ② '르네상스 건축가로서 Filippo Brunelleschi의 생애와 업적'이다. ① 고대 로마 건축이 르네상스 건물에 미친 영향 ③ 르네상스 시대 건축 기법의 발전 ④ 플로렌스에서 건축가와 조각가 간의 협력 관계 ⑤ 르네상스 건축 혁신을 촉진하는 데 있어서 플로렌스의 역할

[출제의도] 글의 주제 파악하기

10) [정답] ③

[해설] 지문에서는 기하학적 원근법 체계의 규칙을 적용한다고 언급되어 있지만, 이 체계를 처음 개발한 유명한 화가들이 누구인지에 대한 정보는 제시되지 않았으므로 답할 수 없는 질문은 ③이다. ① 미술에서 깊이감의 착시를 만들어내는 방법들은 무엇인가? → 색상과 흑백의 단계적 변화, 기하학적 원근법 규칙의 정확한 적용 등이 있다. ② 일관된 시점을 정하고 유지하는 것이 왜 중요한가? → 물체들이 다양한 위치에서 볼 때 다르게 보이기 때문이다. ④ 실제 생활에서 물체가 보이는 것과 평면 그림 표면에서 보이는 것의 차이는 무엇인가? → 실제로는 깊이와 차원을 가지지만 평면에서는 깊이를 표현해야 한다. ⑤ 3차원 대상을 눈에 보이는 대로 평면에 그릴 때 무슨 일이 일어나는가? → 원근법으로 그리는 것이다.

[출제의도] 글의 세부내용 파악하기

11) [정답] ②

[해설] ② 앞의 명사구 'the history of oil price fluctuations proves this notion'을 받는 관계대명사절이 필요한 자리이므로 what이 아니라 which가 와야 한다. what은 선행사를 포함하는 관계대명사이므로 선행사가 있을 때는 사용할 수 없다. 따라서 what을 which로 고쳐 써야 한다.

[출제의도] 문법성 판단하기

12) [정답] ④

[해설] 주어진 문장은 'So'라는 결론 연결사로 시작하여 앞의 내용을 종합한 결론을 제시하는 역할을 한다. ①번에서 자아가 가장 크고 접근하기 쉬운 네트워크라고 했고, ②번과 ③번에서 우리가 평생 자신에 대해 생각해왔으며 중학교 시절에는 특히 그랬다고 구체적으로 설명했으므로, 이러한 내용들을 바탕으로 '따라서 자신과 관련된 정보가 더 쉽게 처리된다'는 결론을 도출하는 주어진 문장이 ③번 뒤에 오는 것이 자연스럽다. 그 다음에 이에 대한 추가 설명으로 이어지므로 주어진 문장이 들어가기에 가장 적절한 곳은 ④이다.

[출제의도] 문장 삽입하기

13) [정답] ③

[해설] Steve Jobs가 사람들이 새로운 기술을 받아들이도록 설득하기 위해 물리적 사무실과 가상 사무실 사이의 유사점을 강조하고, 'documents', 'folders', 'desktops'와 같은 친숙한 용어를 사용하여 새로운 기술을 이해하기 쉽게 만들었다는 내용의 글이다. 따라서 글의 주제로 가장 적절한 것은 ③ '컴퓨터 기술을 대중화하기 위한 Steve Jobs의 친숙한 직장 용어 사용'이다. ① Steve Jobs의 컴퓨터 하드웨어 기술 개발에서의 역할 ② 가상 직장 기술이 전통적인 사무실 설계에 미친 영향 ④ 물리적 직장 환경과 가상 직장 환경의 차이점 ⑤ 디지털 시대의 직장 용어의 진화

[출제의도] 글의 주제 파악하기

14) [정답] ①

[해설] 바다거북 새끼가 빛을 향해 기어가는 행동은 수백만 년 동안 합리적이고 효과적인 전략이었지만, 인간이 해변에 집과 호텔을 지으면서 현대의 인공 조명이 바다거북의 진화된 의사결정 메커니즘을 혼란시키고 있다는 내용의 글이다. 따라서 글의 요지로 가장 적절한 것은 ①이다. ② 동물의 본능적 행동은 환경에 상관없이 항상 합리적이다 ③ 인간의 해안 개발이 바다거북의 서식지를 완전히 파괴했다 ④ 바다거북 새끼는 태생적으로 비합리적인 판단을 하는 경향이 있다 ⑤ 현대 기술의 발달로 야생동물 보호 방안을 새롭게 모색해야 한다

[출제의도] 요지 파악하기

15) [정답] ③

[해설] 감각 기관이 뇌와 외부 세계 사이의 유일한 소통 통로이며, 감각 차단 실험에서 자원자들이 시각, 청각, 촉각 환각과 함께 사고 패턴의 혼란을 경험한다는 내용의 글이다. 감각이 차단된 상황에서는 일관되지 않은 사고 패턴을 보이게 되므로, ③의 coherent를 incoherent와 같은 낱말로 바꿔야 한다.

[출제의도] 문맥상 적절한 어휘 파악하기

16) [정답] ②

[해설] 작가이자 동물학자인 Desmond Morris에 따르면 발과 다리가 다른 신체 부위보다 더 정직하게 우리의 생각과 감정을 전달한다고 관찰되었으며, 수백만 년 동안 환경적 위협에 즉각적으로 반응해온 발과 다리의 반응이 조상으로부터 물려받은 생존 메커니즘으로서 지금도 여전히 효과적이라는 내용의 글이다. 따라서 글의 주제로 가장 적절한 것은 ② '정직한 감정 지표로서 발과 다리의 역할'이다. ① 인간 의사소통 능력의 진화적 발달 ③ 신체 반응에 대한 의식적 통제의 중요성 ④ 고대와 현대 생존 전략의 차이점 ⑤ 인간 행동에 대한 환경적 요인의 영향

[출제의도] 글의 주제 파악하기

17) [정답] ③

[해설] 구전 문화에서 문자 문화로의 전환이 적절한 문자 재료의 부족으로 수세기 동안 지연되었고, 돌이나

나무 등의 기존 재료들은 각각의 단점이 있었지만, 종이의 발명이 이러한 문제들을 해결했다는 내용의 글이다. 빈칸 앞에서 종이가 문자의 수호자 역할을 하게 된 것이 놀라운 재료 이야기라고 했으므로, 돌이나 나무보다 훨씬 부드러운 재료인 종이가 승리했다는 내용이 빈칸에 들어가야 한다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ③이다. ① 돌이나 나무보다 훨씬 비싼 재료 ② 돌이나 나무보다 훨씬 약한 재료 ④ 돌이나 나무보다 훨씬 무거운 재료 ⑤ 돌이나 나무보다 훨씬 희귀한 재료

[출제의도] 빈칸 추론하기

18) [정답] ①

[해설] 결론의 정당화는 단일한 주장이 될 가능성이 낮으며 복잡한 논리적 단계들로 분해되어야 한다는 내용의 글이다. 대학 교육이 무료여야 한다는 결론과 교육받은 국민이 경제에 도움이 된다는 정당화 사이의 연결이 명백해 보일 수 있지만, 빈칸 다음 문장에서 이것이 초기 정당화에 있는 서로 다른 아이디어들 사이의 연결을 꼼꼼히 살펴봄으로써 달성된다고 했으므로, 빈칸에 들어갈 말로 가장 적절한 것은 ① '추론의 목적은 '명백한' 것을 가정하는 것을 피하는 것이다'이다. ② 논리적 연결은 증거를 통해 확립되어야 한다 ③ 복잡한 논증은 여러 개의 뒷받침하는 진술을 필요로 한다 ④ 결론은 관련성 있고 명확한 전제에 의해 뒷받침되어야 한다 ⑤ 추론 과정은 모든 주관적 해석을 제거해야 한다

[출제의도] 빈칸 추론하기

19) [정답] ②

[해설] 이주가 일반적으로 문제나 위기로 보도되지만 실제로는 더 복잡하며, 이주민의 특성과 장기적 연구 결과에 대해 설명하는 글이다. 이주 관리에 가장 효과적인 구체적인 정부 정책이 무엇인지에 대해서는 언급되지 않았으므로, 답할 수 없는 질문은 ②이다. ① 이주가 대중매체와 과학 문헌에서 어떻게 묘사되는가? → 문제나 위기로 보도된다. ③ 글에 따르면 이주민들은 일반적으로 어떤 특성을 가지고 있는가? → 더 젊고, 건강하고, 유연하며, 더 나은 삶을 위해 고난을 감내할 의지가 있다. ④ 이주의 장기적 효과에 대해 대부분의 연구는 어떤 결론을 내리는가? → 출발지와 목적지 모두에 긍정적인 장기적 효과가 있다고 본다. ⑤ 이주가 야기한다고 가정되는 문제들의 예는 무엇인가? → 도시 과밀, 노동시장 막힘, 빈곤 증가 등이다.

[출제의도] 글의 세부 내용 파악하기

20) [정답] ①

[해설] 정부가 발행하는 화폐의 문제는 정부가 더 많은 돈을 만들어 쓰려는 유혹에 빠져 인플레이션을 일으킨다는 것이고, 이런 이유로 많은 나라들이 공급이 제한적인 금, 은 등을 화폐로 사용하는 것을 선호해 왔다는 내용의 글이다. 빈칸 뒤에서 금이 이런 목적에 이상적이라고 했으므로, 빈칸에는 금, 은 등을 화폐로 사용하는 이유가 들어가야 한다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ① '그것은 정

부로부터 화폐 공급량을 인플레이션 수준까지 확대할 권력을 박탈하는 방법이다'이다. ② 경제 상황에 관계없이 화폐의 내재적 가치가 안정적으로 유지되도록 보장한다 ③ 정부가 국가 경제 정책을 더 잘 통제할 수 있게 해준다 ④ 시민들이 정부의 재정 관리에 대해 더 많은 신뢰를 갖도록 해준다 ⑤ 변화하는 경제적 요구에 적응할 수 있는 더 유연한 통화 시스템을 만든다

[출제의도] 빈칸 추론하기

21) [정답] ②

[해설] Antonio Damasio의 연구에 따르면 감정을 담당하는 뇌 부위가 손상되면 의사결정 능력이 감소하며, 좋은 결정은 감정 부위와 숙고 부위가 함께 작용한 결과라는 내용의 글이다. 이러한 연구 결과는 감정이 의사결정에 부정적 역할을 하며 의사결정이 금욕적이고 감정이 배제된 방식으로 이루어져야 최적이라고 가정하는 기존 경제학의 전제와 상반된다는 것을 의미한다. 따라서 밑줄 친 부분이 글에서 의미하는 바로 가장 적절한 것은 ② '감정의 역할에 대한 실증 연구와 다르다'이다. ① 의사결정에 미치는 감정의 부정적 영향을 과소평가하는 것 ③ 신경과학적 연구 방법과 양립할 수 없는 것 ④ 경제 모델의 예측력을 약화시키는 것 ⑤ 의사결정 과정에서 이성과 감정의 균형을 요구하는 것

[출제의도] 어구의 함축 의미 추론하기

22) [정답] ②

[해설] 30가지 초콜릿 중에서 고르는 고객이 6가지 중에서 고르는 고객보다 아무것도 사지 않고 떠날 가능성이 높고, 파리나 하와이 휴가를 각각 받을 때는 만족하지만 둘 중 선택하라고 하면 만족도가 떨어진다는 사례를 통해 선택이 비교를 하게 만들고 상대적 단점을 인식하게 한다고 설명하고 있다. 심리학자 Barry Schwartz가 명명한 '선택의 폭정'이 역설적으로 우리의 의사결정 과정을 해방시키는 것이 아니라 제약한다는 내용의 글이다. 따라서 빈칸에 들어갈 말로 가장 적절한 것은 ② '해방시키는 것이 아니라 우리의 의사결정 과정을 제약한다'이다. ① 복잡한 상황에서 합리적 결정을 내리는 우리의 능력을 향상시킨다 ③ 우리의 개인적 선호에 대한 더 큰 통제력을 제공한다 ④ 더 명확한 대안을 제공함으로써 평가 과정을 단순화한다 ⑤ 우리가 궁극적으로 내리는 선택에 대한 확신을 높인다

[출제의도] 빈칸 추론하기

23) [정답] ①

[해설] (A) 작은 체구의 노인 여성이 큰 여행가방과 씨름하며 고생하고 있는 상황이므로 struggled가 가장 적절하다. battled, fought, competed, wrestled는 모두 '싸우다, 경쟁하다'의 의미가 강하여 여행가방을 다루는 상황에는 부적절하다. (B) 쓰러진 노인 여성에게 "Everything's fine, take a minute to rest"라고 말하는 것은 위로하는 행동이므로 comforted가 적절하다. criticized(비판했다), questioned(의문을 제기했다), confronted(맞섰다),

praised(칭찬했다)는 문맥에 맞지 않는다. (C) 최소한의 도움이라도 제공하는 것이 도움이 필요한 사람들을 소홀히 하는 것보다 훨씬 낫다는 의미이므로 better가 가장 적절하다.

[출제의도] 빈칸 추론하기
